Identifiers-*Resources in Education

Resources in Education (RIE) is a monthly abstract journal which announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,500 documents and provides indexes by Subject, Personal Author, Institution, and ERIC Clearinghouse Number. This special COM Microfiche edition is prepared directly from the ERIC magnetic tape data base prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The first accession in each issue of RIF is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for May 1979. (LRS/WTB)

Descriptors-*Curriculum Development, Disadvantaged Youth, Handicapped Students, *Industrial Education, Models, National Surveys, Performance Based Teacher Education, Preservice Education, Program Content, Program Design, Secondary Education, *Special Education, *Teacher Certification, *Teacher Education, *Teaching Skills
Identifiers-Standards for State Approval of Teacher Education

This report describes a project the assignment of which was (1) to clarify the needs for baccalaureate programs through which industrial education teachers could be prepared to teach handicapped and disadvantaged children and (2) to develop a model from which appropriate curricula could be developed. In chapter 1 the project background is discussed and terms relevant to this area are described. In chapter 2 the need for preservice programs is explained. This section discusses the need for dual purpose curriculum based upon literature and special meetings and as reflected by a national survey. Chapter 3 contains the types and characteristics of secondary level programs. These include secondary level special needs programs and industrial education for special needs students. Chapter 4 discusses the need for a competency based curriculum model. Chapter 5 presents the curriculum model which is patterned around the Standards of the National Association of State Directors of Teacher Education and Certification. Also included are competency lists needed for general education, professional education, and major fields of specialization. Chapter 6 gives recommendations and suggestions for implementation of the curriculum model. Appendixes include the questionnaire used to gather information for this report and a statistical analysis; directions for developing learning experiences; and an annotated bibliography. (CT)

Descriptors-*Armed Forces, *Educational Coordination, Educational Programs, Instructional Design, *Instructional Systems, *Military Training, Program Evaluation, Program Validation, Staff Improvement, *Systems Development, Task Analysis
Identifiers-Army, United States

Based on a state-of-the-art analysis of Army training, this report was the initial step in an effort to systematically improve the training in the combat arms and ultimately the entire Army. This study found that a comprehensive set of procedures was needed to provide for the development of effective training and for assessment of the training's effectiveness. In response to Task V contract requirements, an instructional systems development (ISD) model was formulated. The model contains five phases: analyze, design, develop, implement, and control. The initial step was to verify the content validity of the material and then conduct extensive formative evaluation. Performance and attitudinal data gathered during field trials of the material were used to determine where revisions were necessary in the final product. The completed package of validated materials, The Interservice Procedures for Instructional Systems Development,'' includes a five-volume set of manuals (available in ERIC as ED 122 018-022) covering all phases of the procedures and a series of workshops for technical and management level personnel involved in the use of ISD. Identifiers-Developing a Curriculum, Final Reports

The purpose of this research was to identify and nationally verify the competencies considered important to local administrators of vocational education. A comprehensive literature search was conducted to identify all relevant administrator competency studies and available competency-based instructional materials. Fifteen studies were located. A curriculum development approach called Developing a Curriculum (DACUM) was used to update the competencies identified through the literature search and to identify an additional 36-40 additional tasks not found in the literature. All competency statements were analyzed, refined, and merged into a single administrator Task Inventory Instrument (191 task statements). It was then submitted to a stratified nationally representative sample of 130 practicing administrators of secondary and postsecondary vocational education programs. One hundred and twenty administrators returned usable instruments. Of the 191 task statements, 166 were considered to be verified as important. Responses to 31 tasks were found to differ significantly between secondary and postsecondary administrators and 15 tasks differed significantly between urban and rural administrators. (The second part of this final report is also available CE 016 504 . (JH)

Identifiers-Final Reports

The purpose of this development phase of a larger project entitled Development of Competency-Based Instructional Materials for Local Vocational Education Administrators'' was to field test and revise prototypic competency-based administrator instructional packages. A search was conducted to identify currently available competency-based vocational administrator materials. Very few materials were located. Six prototypic competency-based modules were developed for training local vocational administrators using the competencies identified and nationally verified in the research phase of the project as the research base. The following six procedures were utilized: (1) verified competencies were tentatively clustered for curriculum development purposes, (2) an instructional materials format was devised, (3) six prototypic modules and a user's guide were developed, (4) the modules and guide were field tested with administrator trainees in four types of instructional settings, (5) all materials were revised based on the feedback obtained, and (6) all materials and reports were prepared for publication and dissemination. The results of field testing indicated that all six of the modules were effective in helping administrator trainees achieve the designated competencies. A test revealed that trainee's perception of their growth on all six modules was statistically significant at the .001 level. Further, both the trainees and resource persons (instructors) reacted favorably to each of the six modules and to the use of modules as a method of instruction as compared with traditional college education courses. (The first part of the final report is also available CE 016 503 .) (JH)

This guide serves as an introduction to six competency-based vocational administrator modules (CE 016 506-511). The major components of a module are discussed and explanations provided as to how learning experiences are sequenced, how activities can be structured to meet each learner's individual needs, and why the final experience requires that competence in a particular skill be demonstrated in an actual administrative situation. Other major topics presented include the following: the definition of competency-based instruction; the research base upon which the vocational administrator modules were developed; definitions of terminology unique to the modules; and key steps in using the modules. (The final report of the project, which developed these modules, is available as CE 016 503-504.) (JH)

This learning module on organizing and working with a local advisory council is one of six competency-based modules designed for both preservice and inservice education of vocational education administrators. It provides a step-by-step approach to organizing a local advisory council, including gaining board of education approval and developing and writing a statement of purpose and charter; also discussed are planning meeting agendas and developing by-laws. Provided are four self-paced learning activities, including performance objectives, information sheets (sample forms and student self-checks with model answers provided). The fourth learning activity (to be performed in an actual setting) is designed to be assessed by a qualified resource person. A performance assessment form for this final activity is provided. Also contained in this module is a list of resources (materials, people) needed for the activities and a list of defined terms used in the module. This module is basically self-contained, but it is recommended that a qualified resource person guide, assist, and evaluate the learner's progress. (A final report of the project that developed these modules is available in two documents CE 016 505-506. A guide on use of the modules is available as CE 016 507.) (JH)

Intended for the developmental practitioner, this report examines literature produced by the Career Planning Support System dealing with career guidance in four major areas: minority youth; women; transition from school to work; and program planning and evaluation. The area of minority youth includes a review of literature on: educational and occupational choice and the effect on achievement; research on the role of significant other influence in the education and occupational choices of black and white urban youth; research in the same area concentrating on females; and a handbook on sources of influence on career decision making. Regarding career development of women, one publication reports the findings of a study that applied two career pattern systems for women to data available on a national sample. Another discusses the representation of careers for women in career guidance materials. Also, a parent handbook is reviewed that examines career implications of sex stereotyping. An instructional unit concerning the transition from school to work is described in detail including titles and prices of instructional packages. A complete set of materials for guidance program planning and evaluation is presented along with prices for the set and single copy prices. This set contains booklets, handout material masters, a filmstrip, and a cassette tape. (CT)

This large training module is intended to help prepare home helpers or others who can provide direct care and can utilize resources to assist older persons. The document presents first a general discussion of the background and rationale behind a series of occupational home economics modules. In addition, the particular module on serving the aging is described in terms of rationale, job description, and career ladders and lattices for care and independent living. Directions to the teacher, a list of modules and competencies, and a series of assessment instruments are also included. The module itself is divided into nine sections and each follows the same format: table of contents, directions to the teacher, competencies, objectives, suggested strategies, references, and resources and two appendixes (learner information sheets and teacher information sheets). Modules are based on the following areas: (1) orientation to and evaluation of the course, (2) job opportunities and expectations for aging services, (3) understanding aging, (4) human relations skills, (5) meeting personal care needs, (6) nutrition and food handling for aging services, (7) meeting home management needs, (8) meeting health care needs, and (9) legal and ethical concerns. Descriptors-Adult Basic Education, Adult Students, *Cognitive Ability, Cognitive Measurement, Cognitive Tests, Educational Research, *Language Ability, *Language Learning Levels, *Logical Thinking, *Reading Comprehension, Reading Level
Identifiers-California Achievement Test, *Peel

To determine the relationship between reading comprehension and the measures of logical judgement and concepts of language, forty-one adult basic education students were tested using the California Achievement Test and Peel's tests of logical judgement. The findings include the following: (1) concepts of language structure vary in adults; (2) the degree of success on the language concepts measure covaries with the reading level for adults in a basic education program; (3) logical judgement was not found to be related to achievement; and (4) the results were similar across sex and ethnic groups. Descriptors-*Accountability, *Certification, Consumer Protection, Discipline Problems, Evaluation Methods, Federal Government, Federal Regulation, Federal State Relationship, *Governance, Government Role, Legislation, Qualifications, Role Conflict, Self Evaluation, *State Licensing Boards, Testing
Identifiers-*Occupational Licensing Boards

Self-regulation by autonomous occupationally-dominated boards creates an inherent conflict of interest. Consumers are wondering whether what they get by way of protection is worth the economic and social costs. Perhaps the weakest links in the regulatory chain are enforcement and discipline. Few practitioners are suspended or have their licenses revoked for incompetence. Grounds for suspension and revocation often require so much proof that even repeat offenders are seldom disciplined. Questions need to be asked. Would the absence of regulation significantly endanger the public health, safety, or welfare? Are there better methods of regulation? Also concern has been expressed about testing in order to gain licenses. Are tests and other screening procedures objective, reliable, and valid? Other concerns are evaluations, consistency with legislative intent, responsiveness to consumers, disciplinary actions, and accountability to the public, press, and legislature. These problems call for structural changes in the way licensing is organized and in the authority/accountability structure. Some encouraging developments in the area of regulatory reform have been taking place in Wisconsin. For example, an Occupational Standards Board has been created to review licensing rules and actions. In addition, the federal government should establish a clearinghouse for information and guidance, review the actions of the Intergovernmental Personnel Act, set up a grant program to help states deal with licensing problems, and increase consumer awareness. Identifiers-United States

The study reported here examines the relationship between compulsory attendance laws and the juvenile justice system in the United States. The content is presented in five chapters. The first, an introduction, covers the purpose, limitations, and procedure of the study. Chapter 2 explores the historical development of compulsory school attendance and child labor legislation. The next chapter examines the beginnings of the juvenile court and current problems related to compulsory schooling and the juvenile justice system. Chapter 4, through discussion of court decisions, covers current movements and trends related to children's rights in relation to the school, juvenile justice system, and community. Alternatives to compulsory schooling and correctional intervention with truants are explored in the last chapter. A bibliography is attached. (EM)

Descriptors-Affirmative Action, Aptitude Tests, Blacks, Employment Experience, *Employment Practices, Employment Qualifications, Employment Services, Females, Intelligence Tests, Job Skills, Job Training, *Labor Turnover, Personnel Data, *Personnel Selection, *Promotion (Occupational), Racial Discrimination, Recruitment, Salaries, Sex Discrimination, Skilled Workers, Statistical Analysis, *Task Performance, Unskilled Workers, *Utilities

A study of employment procedures at an unnamed gas utility company was made, examining selection procedures, white and blue collar employee performance, promotion rates, and turnover. The data is based on application files, interviews with management personnel, and employee records. The company relied primarily on walk-ins and employee referrals for its job applicants. Private employment agencies were used for some specialized white collar jobs. Social agencies and the employment service were sources of black applicants. The company's selection

procedures included informal and subjective elements that led to employment preference for white applicants who were related to company employees. Black employees were hired primarily as a consequence of explicit affirmative action by the company's personnel office at headquarters. Variables that had a significant effect on the screening and hiring of new employees were referral sources, aptitude and intelligence tests, and evidence of specific skills and experience. The data suggested the possibility of discrimination against blacks and female employees in performance ratings and promotions. Both blue and white collar workers appeared able to improve their performance indicators through technical job-related courses made available or supported by the company. Short run turnover was highest for employees who were young, female, or black, and who had transferable skills. (Appended are statistics and procedures used in the study.) (Author/CT)

The three papers compiled here on vocational and technical education in Europe were prepared and discussed by experts in the course of three meetings held in 1977. Focus is on polyvalent occupational training, which prepares students for maximum adaptability to technical and social changes and for occupational mobility. The first paper describes ways in which polyvalent training can be achieved and defines basic occupational training in terms of considerations external to and within the training system. The second paper deals with systematic analysis applied to the conception of a basic occupational training course and includes skills and educational objectives; structural analysis of three levels of a system (learning, production, and social); and relationships among social behaviors, production activities, and educational contents. The next paper covers the role of work systems analysis in the determination of occupational skills to be developed in education and training. The last paper discusses the concept of occupational families in relation to occupational training, including aims, implications, methods, and contents. (EM)

Identifiers-Texas

Because of the large number of vocational agriculture programs in Texas public schools and the large sum expended annually on their curriculum materials, a study was undertaken to determine the suitability of single topic student materials and of state adopted textbooks for both group and individual instructional purposes. From a random sample of 425 vocational agriculture teachers chosen to be surveyed, 400 returned the opinionnaire. Based on a statistical analysis of their responses, the following were concluded: (1) both single topic student materials and state adopted textbooks should continue to be used in Texas for both individual and group instructional purposes; (2) a majority of teachers favor single topic student materials over state adopted textbooks; (3) teachers prefer hardbound to paperback student materials; and (4) teachers in different geographical areas perceive different needs in student materials. The following topics were recommended for future studies: the relationship between the teachers' viewpoints and factors such as geographical location, department size, tenure level, and average number of students per teacher; an assessment of which state adopted textbooks are not up-to-date and technically accurate; and the replication of this study in other states for the basis of comparison and after five years in Texas to determine if deficiencies in student materials have been corrected. Identifiers-*Massachusetts

The second annual progress report of the Massachusetts Occupational Information System (MOIS) describes the activities and strategies of the MOIS in 1977. The report is divided into seven sections. The Administrative and Organizational Information section considers the highlights of the year, contains a chart illustrating the growth of the system, describes the board of directors, and contains the in-service training schedule for MOIS. Section 2, Information Development, lists the project's emphases for the year, describes its occupational information activities, and the results of its study of emerging industries. This section also describes the MOIS files for training programs, school information, and financial aid. Section 3, Delivery System, concentrates on the way in which MOIS disseminates information, focusing on computer centers, communication links, and user terminals. Section 4, User Services, is discussed in terms of objectives, end product, price, delivery, promotion and marketing (corporate identity, advertising, newsletter, trade shows, etc.), and publicity (audio/visual and print media). In section 5, Evaluation activities are explained in terms of data tables and a brief description of methodology. The final quarterly financial information report is included, along with a discussion of future plans. Appended are school topic codes, computer centers and multiplexer locations, an evaluation survey, and a user survey. (CT)

Identifiers-Stochastic Models

This research was designed to develop and test a model of the Air Force manpower market. The study indicates that previous manpower supply studies failed to account for simultaneous determination of enlistments and retentions and misinterpreted regressions as supply equations. They are, instead, reduced form equations resulting from joint interaction of Air Force demand and enlistment supply activity. A stochastic process model is used to represent the Air Force manpower market. Variables determining manpower inventory levels, personnel turnover, and new enlistment flows are the mandated force level requirement, Air Force and civilian wages, the unemployment rate, and perceived civilian returns to Air Force-provided training. In the model it is possible to trace the impact of changes in the determining variables upon retention and enlistments. The empirical work supports the simultaneous demand and supply approach developed in the study. The results indicate that (1) changes in force level account for most enlistment rate changes during the all-volunteer force period, (2) higher Air Force wages have improved retention and reduce demand for new enlistments, (3) accessions show lower Air Force Qualifications Test scores, and (4) previous estimates of military manpower supply elasticities are biased downward from true elasticity. Identifiers-Education Amendments 1974, *New York State

This study of occupational education in New York State school districts provides background information pertinent to the financing of occupational education. It concerns vocational programs for grades 9 through 12 in terms of education which prepares people for employment in occupations requiring less than the baccalaureate degree. The study consists of four main elements in connection with occupational education: (1) state policies; (2) pupil enrollments; (3) classroom-teacher staffing; and (4) costs. These elements were analyzed from the standpoint of determining costs, and to state the resulting findings and conclusions. State policies are explained in terms of several major concepts. Occupational education enrollments for grades 9-12 (1972-73 through 1975-76) are examined, by program area. The numbers of occupational education classroom teachers are shown, and variations in the percentages of teachers in the different program areas are compared. Comparative occupational education costs are reviewed

program by program and city by city using per-pupil costs. Several programs of state aid for occupational education pupils are compared. Findings and conclusions are included along with a list of basic guidelines for funding proposals in occupational education. Data tables illustrate each section. (CT)

Identifiers-Education Amendments 1974, New Jersey (Newark)

The Newark (New Jersey) career education program (K-12) was based on three components: elementary career awareness; junior high career exploration; and senior high career guidance and placement. An external evaluation by Fred Streit Associates assessed the attainment of behavioral objectives specified for the program's components to utilize career education to increase student academic achievement and career information from data collected on reading and math achievement test scores, attendance, vocational choice, teacher perception of classroom behavior, and teacher opinion of program effectiveness. When the pre- and post-test scores of program students were compared to those of non-program students, the results were as follow: that program students showed increases in vocational area knowledge, improvement in locus of control scores, increases in career awareness, and improvement in ability to make realistic career choices. Attendance and math and reading achievement showed no improvement for participants. Program teachers perceived an improved difference in classroom behavior of participants; however, no control group or similar rating was done by non-program teachers in their classes. (Major activities of each component are described, with copies of sample activities appended.) (MF)

Descriptors-*Articulation (Program), *Career Education, Elementary Secondary Education, Evaluation Methods, *Faculty Development, Inservice Teacher Education, *Interinstitutional Cooperation, *Leadership Training, *Program Evaluation, Program Improvement, Resource Centers, School Community Cooperation, School Industry Relationship, Teacher Attitudes

Identifiers-Education Amendments 1974, Maryland (Baltimore County)

The major goal of the Baltimore County (Maryland) career education project (1975-76) was to strengthen the career education programs in fifteen schools, grouped into five clusters, through leadership training programs and through the development of linkages within and among schools and between the schools and the community. Each of the five clusters included one senior high school, one of its feeder junior high schools, and a feeder elementary school. A corps of leaders (cluster council) in each of the fifteen schools was created to carry out the objectives of the project. The major product of the one-year effort was the development of an implementation and linkage guide for school staffs. In assessing project effectiveness, the evaluator concluded that (1) the majority of the fifteen participating schools had created school leaders in career education; (2) institutes conducted for school staffs by three industries were considered very effective; (3) mini-resource centers of career education materials were established well throughout the project schools; and (4) a well designed, comprehensive guide for infusing career education through cluster councils was developed. The one objective not fully met was providing opportunities for school staffs to articulate with their feeder schools. Overall, the evaluator concluded that the project enhanced career education efforts throughout the system. The fifteen cluster councils were involved with 397 teachers who infused career education concepts and ideas to more than 10,000 students. (MF)

Identifiers-Basic Learner Outcomes for Career Education, Education Amendments 1974, Texas

Project activities primarily consisted of curriculum-writing workshops conducted for 503 educators in ten state regions. Workshops included career education orientation, procedures for career education curriculum infusion, and technical assistance in the writing process. The internal evaluation activities focused on assessing the process of infusing career education through career education-curriculum-writing workshops. Internal evaluations also included a critique of the workshop products. To some degree all of the following project objectives were met: (1) to reach a broad sample of teachers, levels K-12, (2) to increase receptivity to career education knowledge and improve career education implementation skills, (3) to familiarize 500 teachers with the set of Basic Learner Outcomes for Career Education and (4) the process used to infuse Basic Learner Outcomes into Subject matter, (5) to familiarize 500 teachers with steps on writing learning activity modules, (6) to develop a process of transmitting career education techniques to classroom teachers, (7) to produce 600 usable learning activities, and (8) to introduce teachers to available business, labor, and community resources as a means for infusing career education. (Among the appendixes are the participants' evaluation of phases 1 and 2 of the career education curriculum-writing workshops and the final external evaluation report.) (CSS)

Identifiers-Education Amendments 1974

The Career Education program in Social Studies was designed to achieve two major goals; (1) to assist school districts in developing a career education program that would be more meaningful to students and would help them make better, more informed decisions about life in the world of work; and (2) to assist teachers and curriculum decision makers in making career education an integral part of their social studies program. To accomplish these goals, teacher resource materials were developed, nationwide workshops were conducted, and a significant dissemination effort was carried out. Several on-going resource and curriculum development projects and evaluation activities were initiated. Most of the products were reviewed or field tested and revised based on that feedback. In addition, the four workshops were evaluated by an independent evaluator. Among the findings were that the workshops (1) contributed to significant gains in understanding of the philosophy and audience of career education, and (2) increased the participants' confidence about infusing career education in the schools of their community. (The workshop final report and evaluation instrument are appended.) (Author/BM)

Identifiers-Education Amendments 1974

The Roseville Area Schools' secondary career education project was based on a broad definition of career education, emphasizing career development as a lifelong process. About thirty community members, students, and district staff participated on project advisory or task force committees. About one-third of the professional certified district staff members participated in at least one of the staff development options which included college courses and an internship exchange program with business and community agencies. A major component of the project was to develop and field-test a grade 7-12 career education curriculum that would contribute to the attainment of five student outcome objectives. Sixty-four staff members were involved in the development and/or field testing, and a total of 765 class lessons were developed that covered all five student outcome areas at both the junior and senior high levels. In general, the students expressed the perception that they had a better understanding of career-related concepts as a result of working on the curriculum units. Attainment of student outcomes also was measured by testing the students before and after the curriculum units with an instrument specifically developed for each unit. Overall, the results of this testing indicated little difference between pre and post test scores. Teacher reactions to the career education curriculum were favorable. In addition, career learning centers were established in three schools and efforts were made to deal with problems of racial and sexual stereotyping and mainstreaming of the handicapped. (Author/BM)

Identifiers-California (San Diego)

Consumer education course objectives, content analysis, supporting objectives, and content generalizations are presented in this teacher's guide for Consumer Education 1 and 2 for the San Diego Unified School District. Course objectives are aimed at several areas of consumer and family studies: consumer education, cultural awareness, human potential (including sex stereotyping), and career education. A grid is included to summarize and show quickly how each course objective relates to these four emphases. A course rationale, description, objectives, and goals are given for Consumer Education 1 and 2. Areas studied under content analysis include: life styles; decision making consumer behavior; consumer in the economy; rights and responsibilities; money management; savings; borrowing; buying (food marketplace, clothing, transportation, housing and home furnishings); environment; and employment and employability. Suggested time sequences are also listed. These same areas are then considered from the standpoint of objectives and accompanying content generalizations. (CT)

Identifiers-Education Amendments 1974

Project EPIC (Educational Preparation for Involvement in Careers) was designed for the needs of low income, inner city students (K-12). The curriculum was divided into three phases: awareness (focusing on a basic foundation in the areas of academics, work, self concept, decision making, and community for grades K-6); exploration (focusing on additional skill training, hands on experiences, greater self analysis; and in-depth exploration of jobs for grades 7-9); and preparation (focusing on the selection of job or educational preparation programs and further skill training and occupational exploration for grades 10-14). A product evaluation was conducted to assess the student outcomes in the following categories: (1) knowledge of occupations/job clusters; (2) knowledge of career concepts; (3) decision-making skills; (4) improved self concept; (5) career planning; (6) school as preparation; and (7) identifying desirable work habits. Overall, survey and test results indicated that most students met or surpassed the established criterion in each category, with some exceptions in category 5. A process evaluation was conducted to insure a detailed description of the installation/implementation of the program and to provide a monitoring system to detect deficiencies in the design or implementation. This was accomplished through the use of Management Information System and several teacher questionnaires, interviews, surveys, and classroom observations. (A major part of this document contains appended materials, including product and process evaluation data and instruments.) (BM)

Identifiers-Education Amendments 1974, Texas

A demonstration project was conducted in 1975-76 at three locations in Texas to show the effectiveness of the Texas Telecomputer Grid (TTG) as a teaching method in bilingual career education. (TTG is a system designed to connect regional concentrations of computer and television resources by microwaves to transmit televised programs, computer information, and face-to-face conversations without the use of telephones.) A course, entitled The World of Work: Career Orientation for Adults,'' was developed to incorporate the basic skills of reading, writing, and arithmetic into the topics of job choice, search, and tenure. Of the 218 adult students who enrolled in the course, the 74% who participated in the evaluation study were for the majority Spanish-surnamed. Except in the area of affective development toward careers and education (which reflected little difference), TTG was found to be more effective than conventional teaching methods, and, in general, to be a flexible, viable delivery system for bilingual career education. Further study is needed to explore (1) the learning style of Spanish-speaking adult students, (2) the application of TTG to other areas of career education, and (3) other possible uses of TTG's ability to simulate face-to-face conversations. Identifiers-Education Amendments 1974, Garland Independent School District TX, Kaufman Independent School District TX, Royse City Independent School District TX, Texas, Wilmer Hutchins Independent School District TX

The design of the Phasing in Career Education Systematically (PICES) project was based on two data centered systems, sequencing and needs assessment. Four Texas independent school districts participated in the project which directly involved 986 students, 69 teachers, and 27 administrators. Some of the major activities conducted in each district were the following: development of an administrative management plan; completion of a four-component needs assessment; sequencing of 177 basic learner outcomes for career education into the existing K-12 curriculum; development of curriculum, instructional strategies, and infusion techniques; and administration of pre- and posttest to determine the effects of career education instruction on students and teachers. A procedural manual was also developed. Process, product, and impact evaluation strategies were utilized in evaluating the PICES project. Continuous reviews indicated that the project was conducted in strict accordance with the proposal objectives. The management system, the design and procedures for sequencing career education instruction, the comprehensive needs assessment, and the techniques for instructional preparation were found to be of high quality by the evaluators. Significant gains in positive teacher attitudes toward career education were observed. The impact of the project in terms of producing significant cognitive or affective gains among teachers and students was found to be negligible. Various dissemination activities were also conducted. (Appendix materials, which comprise the bulk of this document, include plans, data gathering forms, reports, evaluation plans, etc., which were used throughout project districts.) (Author/BM)

Identifiers-Education Amendments 1974

This document contains two reports on the Classrooms beyond Walls Career Education Project conducted by the Mamaroneck Union Free School District and the Sound Consortium for grades K-12 in the 1975-76 school year. The final report summarizes the project's major objectives (increasing self-awareness and decision-making skills, training teachers in curriculum modification for career education, and coordinating more closely in the world of work and education), the learning activities of the school districts in the Consortium, the dissemination activities and goals of the Consortium, and the special problems of financial support and staff hiring and training. The summative evaluation report which was prepared by a third party discusses the preparation, administration, and analysis of (1) career education pretests/posttests for senior and eighth-grade English classes, high school science classes, and fifth- and sixth-grade newspaper units; (2) a pretest/posttest for the Career Internship Program, and (3) a staff questionnaire on attitudes toward career education. Recommendations in the evaluation report include the following: since community involvement is fundamental to this project, teachers and students need to learn more about and utilize more fully community employers and opportunities for educational experiences; career education classroom materials, such as curriculum guides, need to be developed; and a conceptual framework for career education should be created, describing the program content, its relationship to other subjects, and its sequencing over grades K-12. Identifiers-Amity School District OR, Beaverton School District OR, Clatsop Intermediate Education District OR, David Douglas School District OR, Education Amendments 1974, Oregon, Portland School District OR

The Oregon Consortium for Incremental Development of Exemplary Career Education Programs had three major thrusts: (1) plans were made to upgrade levels of career education (K-12) based on 14 specified assessment categories; (2) each of the five participating consortium districts focused its efforts on one specific program category (the program categories were career guidance, staff development, curriculum processes, student participation, and communications); and (3) the criteria of the fourteen career education assessment categories were used, examined, and revised. Major emphasis was given to maximum ongoing, two-way flow of intraconsortium information between the project director and district coordinators, between target schools and other schools in consortium districts, and between consortium districts; and intrastate, between consortium districts and other Oregon school districts. At the end of phase I of this three-year project, the consortium had accomplished all its objectives, except for the pilot testing of the revised Career Education Assessment Guide Criteria. Plans were made for several schools to undertake this task the following year. The most visible results of the project were the five how-to-do-it'' models on career guidance, staff development, student participation, curriculum, and communication. These models were disseminated to schools throughout the state and nation. (Author/BM)

Identifiers-Education Amendments 1974

This report summarizes the development of a model career education program called CERES (Career Education Responsive to Every Student), which was designed to infuse career education concepts into elementary and secondary school curriculum and to articulate a curriculum structure to aid students in career choice and preparation. Following an Introduction (chapter I), chapter II focuses on the accomplishments of the program's components: elementary, junior high, and senior high school instruction; adult and vocational education; guidance; handicapped instruction; teacher inservice and preservice training; and project administration. Chapter III reviews problems and changes in the project, including the lack of clear objectives and activities and the difficulty of articulating and integrating regular and special education. Chapter IV delineates the dissemination effort made both within and outside of the school district. Chapter V describes special activities for the reduction of sex stereotyping. Following a chapter on

evaluation methods (both external see CE 017 741 and internal evaluation were used), chapter VII draws the following conclusions: (1) important elements for the project's success were inservice education for curriculum change and board-of-education and community support; (2) academic achievement was favorably impacted by a career education thrust; (3) commercial curricular materials were not appropriate so that local materials were developed; and (4) the project was successful in meeting its primary objectives. Identifiers-*Employment Tax Credit

The study reported here provides a theoretical and empirical framework for the analysis of employment tax credit policy (a government subsidy or business tax credit to firms who maintain or expand their use of labor). Various programs are examined from the standpoint of structure and implications. The programs are selective employment incentive; foreign employment credit, broad-based employment credit, and the new jobs tax credit. Literature is reviewed pertaining to economy-wide programs, including selective and broad-based employment credit programs. The effects of employment tax credits on individual firms are also examined. Then, the aggregate implications of employment tax credits are analyzed from the perspective of a complete macro-economic model of the economy. The model includes various employment tax credit parameters and accommodates several alternative methods for financing the program. Also included is an empirical evaluation of the impact of an employment tax credit on the U.S. economy and a comparison of the cost of the program with public service employment alternatives. Appended are explanations of aggregate formulation, consumption calculation formulas, and references. Flow charts, tables, and other graphics illustrate many key points. (Author/CT)

Identifiers-Final Reports, Small Businesses

The purpose of this project was to develop, administer, and evaluate an inservice education program designed to provide entrepreneurial competencies for owner-managers of newly formed small business firms. The project objectives included the following: (1) identify the core-crucial managerial-entrepreneurial competencies needed by the owner-managers; (2) prepare a series of competency-based individualized instructional modules; and (3) recruit and enroll a minimum of twenty-five owner-managers of newly formed business firms in a program of study which featured an individualized format. A review of the literature was undertaken to identify the reasons for failure of small business firms, determine needed owner-manager competencies, and determine the content for a training program. From the literature review a final list of twenty-four competencies was developed. From the list, twelve instructional modules were written featuring audio cassettes and materials published by the Small Business Administration. A training program for twenty-seven owner-managers was conducted using the modules and monitored by a teacher-counselor trained for this purpose. Evaluation of the project included an assessment by teacher-counselors, owner-managers, and a third-party evaluator. Based upon the findings of the study, it was concluded that the self-paced study was an acceptable approach to the development of competencies needed for the successful operation of small businesses. Identifiers-Small Businesses

This self-instructional module on success in small business is the first in a set of twelve modules designed for small business owner-managers. Competency objectives for this module are (1) ability to evaluate chances of success based upon one's personality and knowledge of good business practices and (2) ability to determine one's commitment to small business success. Provided are information sections on the realities of small business management (the rewards, the sacrifices, why so many failures, the successes). Also included are learning activity which is a checklist for evaluating one's chances of business success, three pamphlets from the Small Business Administration (Factors in Small Business Success or Failure,'' The Enterprising Man,'' and Personal Qualities Needed to Manage a Store''), and a script from a cassette tape designed for use with this module. (The final report of this project is available as CE 017 858.) (JH)

Identifiers-*Illinois

A study was made of Phase 1 of the long-term standards program for agricultural occupations programs for Illinois community colleges. The unique feature of this project was the procedure used to maximize the input of community college teachers in the validation and revision of the national standards. Survey instruments were sent to community college agriculture department heads who were asked to distribute the forms and to be responsible for collecting the completed forms. Follow-up by mail and telephone was conducted by the project staff to increase the response rate. After the data were processed, summarized, and analyzed, a state review committee met to assess the survey results and to revise or rewrite standards which had not received a high rating by teachers. It was found that 143 of the standards were rated essential'' or important'' by two-thirds or more of the 109 agriculture instructors in 22 community colleges in Illinois. Ten new standards were written by the review committee. Future surveys are planned to create a final'' list of standards. (The survey instrument and results are appended.) (CT)

Identifiers-Alabama, *Vocational Technical Education Consortium States

A project was conducted to develop an adult vocational education competency-based program using a research-based instructional systems design and to assess the application of competency-based research products being developed by the Vocational-Technical Education Consortium of States in the development of adult vocational education programs. Specific objectives were (1) design a model for implementing competency-based adult vocational education; (2) develop a plan for training adult vocational instructors in developing and using competency-based instruction; (3) train ten adult vocational instructors to criterion levels of performance in competency-based instruction; (4) implement competency-based instruction in forty adult vocational classes; and (5) complete an evaluation study of the effects of using competency-based instruction in adult education. A three-group experimental design was utilized to test two procedures for implementing performance-based instruction for adults. Research-based PBI (Performance-Based Instructional) materials were utilized in designing the vocational instructional program. Each group conducted vocational education short courses for adults. The achievements and attitudes of the adult learners were analyzed and the attitudes of the instructors were analyzed. The twenty-six vocational instructors and 300 adults who received PBI training indicated a strong attraction to the performance-based concept. (Program materials are appended.) (Author/CT)

Descriptors-*Educational Assessment, *Evaluation Methods, Guidelines, Guides, Manuals, Measurement Instruments, Postsecondary Education, *Program Evaluation, *Program Validation, School Visitation, Secondary Education, Self Evaluation, *State Programs, State Standards, Testing, *Vocational Education
Identifiers-Georgia

A third-party evaluation was conducted as part of a Georgia State University project to provide the Georgia State Office of Vocational Education with the preliminary materials and procedures necessary to further test a state coordinated evaluation system of secondary and postsecondary vocational education programs. Following an orientation meeting with project staff, the third-party evaluation team visited the University three times: first, to review the documents developed and procedures proposed for field testing the system; second, to interview individuals involved in the field testing; and third, to review the revised copies of the field-tested documents, and to assess the overall accomplishments of the project. The team concluded that the project was successful in meeting its ten specific objectives: standards were developed for secondary and postsecondary vocational education programs and institutions; procedural guides for on-site visitations were developed; self-study guides were developed for use by institutions offering vocational education programs; on-site visits were made to two secondary and two postsecondary schools for the purpose of validating project procedures, instruments, guides, and other materials; based upon the on-site visits, the procedures, instruments, guides, and other materials were revised and refined to incorporate indicated changes; and eight documents (four procedural manuals and four assessment guides) were published. (The appendixes contain suggestions for consideration by the division of vocational education, the third-party evaluation proposal, and copies of two interim reports by the third-party evaluators.) Identifiers-Pennsylvania

This publication contains the text of the main presentations and the highlights of discussion groups from the Ninth Annual Pennsylvania Conference on Postsecondary Occupational Education. The conference theme was "Programming Postsecondary Occupational Education." Ewald Nyquist, the first speaker, delineated the problems faced by postsecondary education money shortages, declining enrollments, and competition

between institutions and suggested that a partial solution lay in regional cooperation. In her report on current educational research, Eileen Kuhns summarized projects investigating job crisis, vocational vs. liberal education, affective preparation for work, accountability, education's new consumers and new producers, and programming coordination. The executive vice-president of the Pennsylvania AFL-CIO, Robert Mahoney, stressed that educators, workers, and employers all have a stake in program planning and must begin to cooperate. Carl Herr related plans for postsecondary occupational education to the state plan for vocational education. In Edwin Herr's talk on counselling postsecondary vocational students, the diversity of students in vocational education and areas of counselling needs were recognized, methods for career education were suggested, and policy implications were outlined for these approaches. Lee Frederick addressed the topic of cooperative education and emphasized that cooperative education is a legitimate form of academic education, not merely a learning experience. An overview of the conference was provided by James Murphy. (ELG)

Guidelines are provided for developing, preparing, and improving state plans for vocational education. Three audiences are identified for the manual's use: vocational educators at the state and local level, and non-vocational educators (reviewers, evaluators, etc. of state plans). Chapter I describes the context for the development of the state plan and includes the following: need to improve state plans; federal legislation resulting from the perceived need to improve plans; and maximizing the involvement of non-vocational educators in developing state plans. Chapter II discusses the development of the content of the plans, including preparatory activities, the planning process, and utilization of employment data. Chapter III describes the preparation of the state plans. Topics discussed are staff assignments and format design of the document. Appendixes include the following: a summary of the major provisions of state plans, with an interpretation of the rules and regulations to be followed in preparing the assurances and program provisions for the five-year plan; the annual program plan; and the accountability report. Descriptors-Bibliographies, Content Analysis, Copyrights, Curriculum Guides, Federal Aid, Federal Legislation, *Guidelines, Information Dissemination, *Information Retrieval, *Information Systems, Instructional Materials, Layout (Publications), Models, Printing, *Publications, Reprography, State Aid, *Writing

This handbook is a set of guidelines to assist authors in preparing publications to meet two sets of criteria: requirements of federal and state government sponsors and requirements of information retrieval systems. The guidelines include both a set of written instructions and a physical model, and are sufficiently flexible to apply to research reports, curriculum materials, bibliographies, handbooks, guides, and other types of publications. Divided into four sections, the handbook covers (1) elements of a publication, describing mandatory and optional publication parts (such as front matter, funding information, abstract, table of contents, lists of illustrations and tables, foreword, preface and acknowledgements, appendix, glossary, abbreviations, bibliography, index, and cover) and listing the order in which they should appear; (2) content requirements, discussing substance and organization in general, and giving a checklist for the development of curriculum materials; (3) physical characteristics, dealing with layout and reproducibility standards for ink, type size, paper weight, photographs and illustrations, and printing; and (4) copyright considerations, delineating the purpose and procedure of copyrighting as well as changes in the 1978 copyright law. Descriptors-Data Bases, *Indexes (Locaters), *Information Processing, *Information Systems, Instructional Materials, Research, *Vocational Education
Identifiers-Abstracts for Instructional Materials, Abstracts for Research Materials, *AIM ARM, *ERIC

Developed to facilitate location and ordering of AIM/ARM (Abstracts for Instructional Materials/Abstracts for Research Materials) documents in the ERIC system, this index indicates the availability of all VT (Vocational-Technical) document numbers assigned by the ERIC Clearinghouse on Vocational and Technical Education between 1967 and 1976. More than 17,000 document numbers are included, covering VT 000 000 - 024 049 (assigned when AIM and ARM were two separate publications) and VT 100 001 - 103 600 (assigned after 1974 when the two were merged into one publication). For each VT number, one of the following types of information on availability is provided: (1) an ED number, which indicates the document's acceptance into the ERIC system and which should be used for ordering the document from EDRS (ERIC Document Reproduction Service); (2) an "s" following an ED number, which signals a document that is available only in a microfiche set and cannot be ordered individually; (3) NP, which means that the document is not available because it was either not placed into the ERIC system or was subject to copyright restriction; and (4) an MP number, which applies to manpower research documents from 1966 to 1969 and should be used in ordering from EDRS. Also provided are a price list for the microfiche sets and a form (including general price information) for ordering documents from EDRS. (ELG)

Identifiers-*Word Processing

This handbook is designed to provide information to help teachers keep abreast of changes in word processing and to develop necessary teaching skills. The handbook is divided into two main parts: understanding word processing and teaching word processing skills. In the introduction the part word processing plays in the business scheme of a company is discussed. In part 1, the concept of word processing is examined from the standpoints of origin and history, why it is popular, need for and cost of word processing, and its basic organizational concept. Word processing systems are studied in terms of organizational plans and decision-making procedures (preplanning, and adoption). The operational beginnings and personnel qualifications necessary to the establishment of a word processing center are also analyzed in part 1. Finally, the types of word processing equipment (hardware and software) are explained. In section 2, the elements of input (dictating skills, planning, and determining priorities), output (keyboarding, making corrections, transcription, proofreading and editing, production measurement), and distribution (filing and logging) are described. Many flow charts, sample forms, and figures illustrate the material. Most chapters also contain glossaries and bibliographies. (Author/CT)

Descriptors-*Annotated Bibliographies, *Business Education, *Business Skills, Career Exploration, Evaluation Methods, Job Training, Management Games, Media Selection, *Office Occupations Education, *Program Descriptions, Resource Materials, *Simulated Environment, *Simulation, Student Participation, Teaching Guides, Teaching Techniques

This guide is designed to assist business teachers to effectively use simulations that involve student interaction. Learning experiences in all levels of business and office education are examined: business exploration, basic business, and occupational preparation. In the introduction, the types of simulated activities are explained, along with their use. The guide is divided into two major sections: simulation games and model office simulations. In the Simulation Games section, the value of these games is discussed. Also, the ways in which to select, use, adapt, develop, and evaluate simulation games are considered. A selected bibliography of books and articles on simulation games and descriptions of simulation games (containing source, subject, grade level, playing time, number of participants, cost, and game description) are included. In the Model Office Simulations section, flow-of-work competencies are explained. The selection, use, development, and evaluation of these simulations are examined. The model office facility area contains basic guides to follow in designing a modern office and several suggested layouts. A selected bibliography of articles describing unpublished model office simulations include the type of business, suggested occupational positions, data or transaction input, equipment needed, forms provided, duration of the simulation, source, and author. Identifiers-Illinois

To facilitate curriculum improvement and career counseling in the field of agriculture, a survey was conducted to determine the marketability, or job placement, of the 1977 agriculture graduates from both two-year and four-year colleges in Illinois. A questionnaire was sent to the 1,832 graduates and was returned by 665. In response to a separate questionnaire, the thirty-nine colleges offering agriculture courses supplied employment data on all of their graduates. Besides providing demographic information on the graduates, the two surveys revealed that (1) while two-year graduates prefer to specialize in production agriculture, four-year graduates choose more diverse areas of specialization; (2) both types of graduates are, for the majority, able to find salaried employment; (3) a close correlation exists between academic field of study and subsequent employment; (4) salaries in the agriculture field appear to be higher than those in other fields; and (5) a need exists for more graduates to pursue careers in agriculture education, agribusiness, and production agriculture. The survey data was then compared with the results of previous, similar studies for 1975 and 1976 graduates, and it was found that more females are entering agriculture; fewer agriculture majors have a farm background; graduates are increasingly entering agriculture-related and non-agriculture areas; and despite limited employment opportunities in certain fields, students continue to choose them as majors. Descriptors-Bibliographies, Building Materials, *Building Trades, Carpenters, Construction (Process), *Curriculum Guides, Educational Objectives, Electrical Systems, Heating, *Housing, Landscaping, *Learning Activities, Painting, *Performance Based Teacher Education, Plumbing, Postsecondary Education, Prefabrication, Secondary School Teachers, *Teacher Education Curriculum, *Trade and Industrial Education

Intended for use at Eastern Illinois University in a model curriculum designed to prepare secondary school teachers in the field of residential building, this curriculum guide provides a competency-based preservice construction trades program. The guide is divided into thirteen units as follows: (1) pre-construction planning; (2) structural layout, incorporating clearing the site and topographic alterations; (3) building foundation; (4) forming, placing, and finishing concrete; (5) carpentry to frame the structure; (6) carpentry to enclose the structure; (7) plumbing; (8) heating and cooling; (9) electrical wiring; (10) carpentry to finish the interior, including thermal insulation; (11) painting and finishing of both the interior and exterior; (12) mechanical trades to complete the plumbing, heating and cooling, and electrical power; and (13) landscape design. Within each of the thirteen units, one or more sub-units are identified and specific performance objectives are given. A condition statement prefaces the listing of objective statements for each section. The types of learning activities used to attain the objectives vary from written exercises to the physical performance of the building tasks. Included at the end are an extensive bibliography of resource materials in printed and audiovisual formats and a list of resource organizations. (The final report of the project that produced this curriculum, and which also contains two additional subject areas, is available in ERIC see note.) (ELG)

Identifiers-Illinois

A two-phase curriculum project was undertaken in Illinois to develop, test, and implement a two-year competency-based model for the education of secondary school building construction teachers in the area of residential structures. During the first contract period, skill and knowledge competencies were identified and validated for thirteen units of instruction, covering the topics of pre-construction planning, structural layout, concrete and its various uses, carpentry, plumbing, heating and cooling, electricity, painting and finishing, mechanical trades, and landscape design. Implementation of this curriculum option within the technology education major was planned to occur during the 1977-78 school year at Eastern Illinois University, and a proposal to accomplish this objective was presented to and approved by several university committees. Approval by the Board of Governors is expected in the near future. The final proposal, developed in the second phase, included two additional subject areas: construction materials and the organization and teaching of a construction trades program. Besides giving the rationale for the program and supporting data, the proposal outlined objectives, costs, courses and their requirements for implementation, and a liaison program with community colleges for transfer credit. As part of the project, a curriculum guide (see CE 018 238) was developed as well as an extensive bibliography of resource materials and organization. (ELG)

Identifiers-*Entrepreneurships, *Self Employment

A study was conducted to compare the personality characteristics of two types of entrepreneurs, the craft-type and the opportunistic-type, which were described by Norman R. Smith. The craft-type entrepreneur is mainly interested in self-employment and owns a small business while the opportunistic-type, although interested in self-employment, primarily concentrates on expansion and organization building. Smith hypothesized that the two types differ in fourteen areas. To test Smith's hypothesis, sixty-four entrepreneurs (evenly divided between the two types) in central Illinois were interviewed and asked to respond to two instruments: a vocational preference inventory, developed by John L. Holland to measure personality types, and an attitude statement survey, designed by Hanna Levenson to measure locus of control. Analysis of the data showed that the two types differ on seven of Smith's variables and that Holland's and Levenson's classifications of personalities are consistent with Smith's. Based on these findings, the following recommendations were made for career and vocational education: (1) self-employment should be presented to students as a career option; (2) programs for entrepreneurship should be initiated at both secondary and postsecondary levels; (3) students should be made aware of the two types of entrepreneurship; and (4) further research is needed in self-employment from the perspective of career development theory. (A curriculum is suggested for teaching the skills necessary to entrepreneurship, and an approach is offered for the organization of instructional materials.) (ELG)

A project was designed to develop, field test, and publish a career infusion unit curriculum for grades 10-12 in the Garden Grove Unified School District. Students at one project school, two transport schools, and a comparison school formed the study sample. A third party evaluated the accomplishments of objectives for the following program components: instruction, staff development, parent-community, guidance, evaluation, project management, and curriculum development. The one project and two transport groups exceeded the comparison group's scores on the English section of the Comprehensive Test of Basic Skills (CTBS). Second-year students scored significantly higher than first-year students on the attitude section and two parts (knowing about jobs and choosing a job) of a career maturity inventory. The report contains curriculum materials for the following areas: English Literature II, English Composition II, Algebra I, World History, Essentials of Composition, Geometry, U.S. History, Civics, Senior Math, English Composition Advanced, and Spelling/Vocabulary. Materials contain curriculum concepts and objectives, career concepts and objectives, activities, and resources. General supplemental activities and career cluster information are appended. (CSS)

Identifiers-California, Fremont Unified School District CA, Huntington Beach Union High School District CA

Three California State Department units (vocational education, pupil personnel services, and career education) and two school districts (Fremont Unified and Huntington Beach Union High) established a consortium to develop demonstration sites for model career development and vocational preparation systems and staff development programs. The Huntington Beach Union High project developed and articulated a K-12 competency-based career education model. Data collected was inappropriate for determining whether growth was statistically significant, but student understanding increased after the program. Without a control group, it could not be stated that gains would not have occurred without the career education experience. The Fremont Unified project developed and implemented a career decision making course. Activities were developed to meet objectives of six components: career guidance center, career decision making, staff development/infusion, articulation, community involvement, and dissemination. Data was analyzed by a third-party evaluator. Although many objectives were met, a teacher's strike affected objectives that required extensive teacher involvement. (Appendixes include the third-party evaluation report, Fremont Unified School District's skills assessment, articulated K-12 career education program, career decision making materials, and Huntington Beach Union High School District's career development competency model and student assessment forms; see note for Huntington Beach's K-12 curriculum guides.) Identifiers-*Vocational Technical Education Consortium States

This annual report of the V-TECS (Vocational-Technical Education Consortium of States) includes a progress report and an explanation of V-TECS itself. (V-TECS is a consortium whose principal objective is to produce catalogs of performance objectives, and performance guides for use in vocational-technical curriculum development.) First, the function of catalogs in the V-TECS system is described. A report of the V-TECS director includes a status report on catalogs, references to staff, bylaws, policies, committee structure, technical reference handbook, catalog revision and selection, curriculum development, and membership. An explanation of V-TECS' organizational structures includes a flow chart and descriptions of the functions of the administering agency, board of directors, technical coordinator task force, central staff, technical coordinators, and the project director. The V-TECS catalog development process is explained with the aid of a flow chart. Some of the areas included are catalog selection; state-of-the-art report; occupational inventory; population/sample design; field review process; and dissemination, in-service, and diffusion. The various uses of V-TECS catalogs and the V-TECS computer services and system are also discussed. A statement of catalog availability completes the report. Appendixes include names and addresses of V-TECS staff, directors, and members; glossary of terms; and catalog purchase agreement forms for reproduction license and restricted license. (CT)

Descriptors-*Equivalency Tests, *Job Skills, *National Competency Tests, *National Norms, Performance Tests, Scores, *Skilled Occupations, *Statistical Data, Testing Programs, Test Interpretation, Test Results, Test Validity, Trade and Industrial Education

This manual contains statistical information on the examinations administered by the National Occupational Competency Testing Institute (NOCTI) to measure occupational competencies of experienced craftsmen in twenty-six trade specialties. (More detailed information on the program and on the scope of the examinations is provided in a separate publication, Bulletin of Information for Candidates'' CE 018 275 .) Section I shows the standard scores for both the written tests (designed to measure cognitive skills) and the performance tests (designed to measure manipulative skills) in twenty-six occupations. In Section II sub-scores are given for the three or four subject areas covered by the written tests and for the two parts of the performance tests which separately measure manipulative processes and quality of workmanship as revealed by the end product. Section III provides information in the three following areas: (1) reliability and standard error of measurement for twenty-four of the written tests; (2) a similar analysis for the two new tests on computer technology and building trades maintenance; and (3) a summary of cumulative national norms for both the twenty-six written and performance tests, indicating measures of central tendency, standard deviation, and range of items which have been answered correctly by candidates. (ELG)

Descriptors-Certification, *Equivalency Tests, *Job Skills, Multiple Choice Tests, *National Competency Tests, Performance Tests, *Skilled Occupations, Test Construction, *Testing, Testing Programs, Test Results, *Trade and Industrial Education, Trade and Industrial Teachers

This bulletin describes the National Occupational Competency Testing Program, which is designed to give experienced craftsmen objective evidence of their competency in order (1) to obtain academic credit toward a degree, (2) to gain certification as an industrial teacher, or (3) to enroll in an industrial teacher education program. Information is supplied on registration, examination results, types of tests (the examination in each field consists of a written test for technical and factual knowledge and a performance test for manipulative skills), and test preparation. Sample questions are included as illustrations of the multiple-choice written test. A description of the examination's scope is provided for each of twenty-six trades. Besides summarizing the subjects covered on each test, this section indicates the percentage of the test devoted to a particular topic. It also lists any special materials that the candidate is expected to bring to the test site. The twenty-six trades covered are as follow: air conditioning and refrigeration, airframe and power plant, architectural drafting, auto body repair, auto mechanic, building trades maintenance, cabinet making and millwork, carpentry, civil technology, computer technology, cosmetology, diesel engine repair, electrical installation, electronics communications, industrial electrician, industrial electronics, machine drafting, machine trades, masonry, mechanical technology, plumbing, printing, quantity food preparation, sheet metal, small engine repair, and welding. (A separate publication CE 018 274 provides statistical information on test scores.) (ELG)

Descriptors-Area Vocational Schools, Dropouts, Inservice Teacher Education, Postsecondary Education, *Psychological Patterns, Secondary Education, *Self Concept Tests, Teacher Attitudes, Tenure, *Trade and Industrial Teachers, *Vocational Education
Identifiers-*Non Degreed Teachers, Ohio

This two-year study utilized the Tennessee Self Concept Scale and the Edwards Personal Preference Schedule to determine the self-concepts and personalities of the newly employed, non-degreed trade and industrial teachers in Central and Southeast Ohio's vocational programs. The profiles were generated to reflect those teachers who continued into their second year of vocational teaching as compared to those who terminated or had their employment terminated during their first year of vocational teaching. The results indicate that two sets of teachers have different psychological profiles. (Author/CSS)

Descriptors-*Adult Education, Federal Legislation, *Federal Programs, Federal Regulation, Federal State Relationship, Information Dissemination, Organization, *Program Administration, Program Coordination, *Program Effectiveness, *Program Evaluation, Program Planning, Statistics, Tables (Data)
Identifiers-*Adult Education Act

This study is an initial attempt by the National Advisory Council on Adult Education to review the program and administration effectiveness of the Adult Education Act (program effectiveness in terms of the impact of the program on people's lives, using existing statistical data; administration effectiveness using five basic management functions selected by the Council for the purpose of this review, various existing studies, interviews and observation). The program effectiveness data indicate that the program is changing the lives of those who participate as well as their families. These data also show the program impacting on the economic health of this nation. The results of Council review of the administration effectiveness of the U.S. Office of Education, Division of Adult Education, are somewhat less positive. Constraints imposed by the Department of Health, Education, and Welfare policy, by the Civil Service system, by the regulatory process as well as the rules, regulations, and statutes themselves, and by the lack of a systematic staff and management development program within the Division prevent the Division from relating effectively to the states in such areas as long-range planning, evaluation and dissemination. Bureaucracy, effective management, lifelong learning, and illiteracy are issues which the Administration must deal with in the coming years. (Several data tables are included.) (Author/CT)

Descriptors-Accident Prevention, Cooking Instruction, Deaf Children, Equipment Maintenance, *Home Economics Skills, *Homemaking Skills, Intermediate Grades, Junior High Schools, Learning Activities, Measurement, Middle Schools, *Prevocational Education, *Reading, Sewing Instruction, *Vocabulary Skills, Workbooks

Developed for use in the academic communication classroom of a middle school for the deaf, this student workbook is designed to reinforce the vocabulary and skills presented by the pre-vocational teacher in three areas of home economics: basic cooking, home care, and basic sewing. Each section contains new word lists, short stories, comprehension quizzes, and student activities. The cooking section is divided into units on things to know before you start cooking; use and care of equipment; measurements and abbreviations; table manners, table setting, and table service; beverages; toast; fruit; quick breads; eggs and simple breakfasts; cookies, sandwiches, and simple desserts; and simple luncheons. The section on home care contains units on the home; cleaning tools; care of the bathroom and bedroom; care of the kitchen; the living room, floors, and rugs; pre-treating clothes, mending, and removing stains; laundry care; and safety. The sewing section includes units on good tools; points for beginners; measurements; kinds of stitches; the sewing machine; and using and taking care of the sewing machine. It is designed to accompany the book ``I Care for My Home,'' by Sandra Stem (ED 130 039). (CT)

Descriptors-Arithmetic, *Bricklayers, *Calculation, Decimal Fractions, Fractions, *Individualized Instruction, Learning Modules, *Masonry, *Mathematics Instruction, Mathematics Materials, Measurement, Performance Tests, *Problem Sets, Secondary Education, Trade and Industrial Education

This student manual is concerned with the practical application of mathematics as used by masons. The manual's design allows students to work at their own pace. Included in each of the five units are individual lesson sheets with written instructions and explanations. Each information sheet states that topic's objectives, information about the topic, examples of procedures, and problems for the student to solve. Unit 1, decimal fractions, contains problems in addition, subtraction, multiplication, division, decimals on the electronic calculator, percents to decimals, fraction equivalents, and multiplication and divison by percents. Unit 2 contains problems on rounding off numbers. Unit 3, fractions, contains problems in addition, adding fractions on the calculator, dimensions-addition, adding dimensions on the calculator, converting fractional part of a foot to inches, subtraction of fractional dimensions, subtraction of dimensions on the calculator, and multiplication and division of fractions. Unit 4, square measure, contains problems concerning areas and perimeters of squares, rectangles, triangles, and circles; areas of walls and ceilings; and areas of solid geometric figures. Unit 5, cubic measure, contains problems in computing volumes of cubes, rectangular prisms, and walls; quantities of materials (brick, mortar, stone); footings; volumes of cylinders and triangular prisms; and the cubic yards of concrete floors, walks, and patios. Unit tests are provided at the end of the manual (answers are not provided). (CT)

Identifiers-*Youth Employment and Demonstration Projects Act

This report summarizes the major points and questions discussed at five regional workshops held to help the participants develop Local Education Agency (LEA) and Comprehensive Employment and Training Act (CETA) prime sponsor agreements as mandated by the Youth Employment and Demonstration Projects Act (YEDPA). The content is presented in five sections. The first, a summary report of the workshops, highlights the major concerns that were raised during the workshops. Section 2 consists of the following two workshop presentations: YEDPA: Obligations and Opportunities for Education'' and Promoting Cooperation Among the Education and Employment and Training Communities under YEDPA.'' Section 3 summarizes the four seminar sessions held concurrently at each workshop dealing with the areas of implementing YEDPA, work experience, career development, and academic credit. Section 5 lists the names of the workshop facilitators and presenters, while the last section presents a composite summary of the participants' evaluations from all five workshops. (EM)

Identifiers-*Experience Based Career Education, Iowa

The third-party evaluation of the second year of the Iowa Central Community College Experience Based Career Education (EBCE) Project was based on examination of project records, interviews with project staff, student and resource persons, questionnaires completed by students, parents and resource persons, and test data collected on students at the beginning and end of each semester. The program served 172 students from 23 rural Iowa high schools. The evaluation instruments used were: the Comprehensive Tests of Basic Skills for Mathematics concepts and applications and reading comprehension; the Career Maturity Inventory, evaluating attitude, self-appraisal, occupational information, goal selection, planning, and problem solving; and Student Attitude Survey, measuring attitudes towards learning, career, self and others; and a Socialization Profile. In addition, at the end of the semester student attitude questionnaire, parent opinion survey, and a resource person opinion survey were used. Comparison of pre- and posttest scores for the EBCE students showed statistically significant gains in all three basic skill areas measured (mathematics concepts and application and reading comprehension). The students gained in five of the six areas measured by the Career Maturity Inventory (attitude, occupational information, goal selection, planning and problem solving). They made statistically significant gains in attitude toward learning, careers, and self. (Survey data and questionnaires are appended.) (CT)

Identifiers-Coast Guard

The Coast Guard, in efforts to improve the safety of recreational boating, undertook research to identify educational alternatives in boating safety programs. Background research was done to assess materials from areas of boating education and education in comparable recreational areas. Research was also conducted to review educational and mass media methods suitable for conducting boating educational programs. Output from this research provided information for planning and conducting a boater educational program. The prototype program utilized mass media, formal boating courses, Coast Guard visitations, and home study methods. The program was directed toward reducing collision and loading-related accidents and fatalities. A video tape supplement was produced to present the prototype program in the perspective of an actual educational effort. Two evaluations of the mass media-type messages using experimental methods were performed. One experiment tested three levels of participatory response on the part of the viewers of a specially prepared television public service announcement for boater education. The version evoking highest participatory response levels produced greater recall of information given in the announcement. Another experiment compared a model'' pamphlet design to a typical'' pamphlet design used in other boating educational materials. Recall of pamphlet information was greater for the model'' design. (Appendix materials, which comprise about one half of this document, include, among other things, mailing lists for private and government agencies, and publishers relevant to boating and boating education.) Martin, Larry G.

A Descriptive Study of the Psychosocial Characteristics of A.B.E./A.S.E. Students.

Pub Date-6 Apr 78

Note-32p.; Paper presented at the Annual Adult Education Research Conference (San Antonio, Texas, April 5-7, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Adult Basic Education, Adult Education Programs, *Adult Students, Developmental Stages, Disadvantaged Groups, Educational Experience, Negative Attitudes, Program Attitudes, *Psychoeducational Processes, *Psychological Characteristics, Questionnaires, Secondary Education, *Self Concept, Self Determination, Self Esteem, Self Evaluation, *Social Characteristics, Social Development, Student Problems

A study was performed to investigate the psychosocial characteristics of adult basic education (ABE) and adult secondary education (ASE) students and the extent to which these concerns are affected by educational experiences. Several research questions were formulated; for example, what proportion of ABE/ASE students have a "favorable ratio" of positive aspects of an ego-stage crisis over the negative aspects? Seventy-two volunteer ABE/ASE students, aged sixteen to seventy, were given a self-description questionnaire to determine their perceptions of their psychosocial characteristics. Also, an educational experience questionnaire was administered to determine the extent to which students believed their educational programs helped them deal positively or negatively with their concerns for trust, autonomy, initiative, and/or industry. The proportion of mistrusting students in the sample was greater than the proportion of trusting students; but the proportion having high pertinent concerns for trust was greater than the proportion having low pertinent concerns for trust. ABE/ASE students viewing themselves as having a sense of positive autonomy was greater than the proportion viewing themselves as having a sense of shame and doubt. It appears from another finding of this research that ABE/ASE programs are generally doing well in promoting positive psychosocial development and in controlling negative influences. (CSS)

Identifiers-Government Employees Training Act, United States

Information on training covered under the 1958 Government Employees Training Act, chapter 41, title 5, United States Code, is presented in this congressionally mandated annual training report. It provides statistical and general trend information and analyses regarding federal training under the Act. The report begins with a statistical table which summarizes selected information from the fiscal year 1977 training experience. The remainder of the report is divided into four sections. Section 1 reviews efforts to improve training management in the federal service and presents a summary of training of 120 days and less (short-term training). Section 2 discusses interagency training centers and their major areas of emphasis. The third section displays and analyzes data submitted by agencies in connection with their training activities. This information is presented in terms of the total government effort. Long-term training is included. The final section shows training data on an agency-by-agency basis. The report ends with an index. The report emphasizes the purpose of the training, its principal subject matter, and the source of training. (For training information relative to fiscal years 1974-76 see ED 155 364.) (CSS)

Identifiers-*Washington

The seventh annual evaluation report of vocational education in Washington State is presented. Section I is a summary of the thirteen recommendations made by the Advisory Council; under each recommendation is a description of the original response of the Commission of Vocational Education to the recommendation, actions taken to date on the recommendations, and additional comments by the Advisory Council pertaining to the recommendations. Section II presents specific issues and needs expressed at the Council's public hearings. In question and answer format, the state's vocational education goals and priorities as set forth in the state plan are given in section III. Section IV includes questions and responses pertaining to the effectiveness with which manpower needs are served in Washington State. Advisory Council recommendations for fiscal year 1977 and beyond regarding vocational education and the Commission for Vocational Education are presented in the concluding section. (JH)

Spons Agency-Illinois State Office of Education, Springfield.
Pub Date-78
Note-143p.; Guide prepared by the Dept. of LEA Services, Springfield, Ill.
EDRS Price MF-$0.83 HC-$7.35 Plus Postage.
Descriptors-Consumer Economics, *Consumer Education, *Course Content, Credit (Finance), Curriculum Guides, *Educational Objectives, Instructional Materials, Insurance Programs, Integrated Curriculum, *Learning Activities, Money Management, Performance Based Education, Secondary Education, Services, State Legislation, *State Programs, State Standards, Taxes, Teaching Methods
Identifiers-Illinois

Designed to meet Illinois state law requirements for consumer education to be taught before graduation from high school, this guide outlines the major topics to be included in the mandatory nine weeks of consumer education. Because the law neither stipulates a specific grade level for this material, nor requires its introduction as a separate course, this guide suggests various times and methods for integrating it into the grades 8-12 curriculum. The topics covered are as follow: (1) the individual consumer in the marketplace; (2) money management; (3) consumer credit; (4) goods and services, including human services, housing, food, transportation, clothing, health services, drugs, recreation, and home furnishings and appliances; (5) insurance; (6) savings and investments; (7) taxes; and (8) the consumer in our economy. Student objectives are identified for each subject area, as well as suggested learning activities, such as research, guest speakers, class discussions, field trips, and written exercises. While bibliographies of instructional materials with one-sentence annotations conclude the sections on specific topics, a general list of resource organizations and government agencies is provided at the end of the publication. Identifiers-Northern Illinois University

A project was conducted to adapt competency-based model graduate programs for preparing occupational educational administrators to local conditions and participant needs at Northern Illinois University. (The program was originally developed by Southern Illinois University SIU /Carbondale and Illinois State University ISU .) The programs have been used as a basis for a seminar guide in the General Administrative program for Opportunities Fellows, a post-training evaluation instrument, and a comprehensive internship program. Consultations were held between project developers and members of the SIU and ISU staffs. Other project objectives formulated and achieved were competency-based training, fee waiver, $300 monthly stipend for fifteen fellows in the 1977-78 academic year, and participation by all fellows in a planned joint general administrative entitlement program. Future objectives which are currently being addressed include the placement of trainees by September, 1978, updating of needs for vocational administrators through 1980, provision of a data base and characteristics of vocational administration, and dissemination of program information. Appendixes contain (1) a directory of New Opportunities in Vocational Education participants, (2) administrative certificate course requirements, (3) project publicity materials, (4) a detailed formative evaluation report, and (5) the summative evaluation report. Identifiers-Washington

The symposium reported here was held to provide representatives from business, industry, labor, agriculture, government, and education an opportunity to examine the present and future role of vocational education in the state of Washington. First, this report presents the opening remarks regarding vocational education's role in a changing economy and the keynote address dealing with vocational education in the 1980's. Next is a section covering the exchange of viewpoints on vocational education between educators and leaders in business, industry, labor, and agriculture; it includes the individual presentations of seven panelists, a summary of the panel discussion, a presentation focusing on the future of vocational education in the nation, and a student's perspective on vocational education. The next section covers a panel presentation in which four legislative leaders exchange viewpoints on vocational education with four educators. A summary statement concludes this report. (EM)

Curricular recommendations for educators in health care institutions formulated at an invitational conference are presented. Beginning the document are summaries of the lectures presented in the general session of the conference. Topics covered are reflected in the following titles: The Administrator's View of the Director of Education; Director's View of the Education Staff; The Scope of Education in the Hospital; Findings of a Functional Job Analysis; and Findings of the Hospitalwide Education and Training Project; and Guidelines on Developing a Curriculum. Next, three sets of curricular recommendations formulated during the conference are presented. The three sets are for a preservice nondegree program, an inservice nondegree program, and a degree program. Each set includes competency statements delineating the knowledge and skills that the student should have upon completion of the educational program. Concluding the document is a summary of the common concerns expressed by conference participants and a list of recommendations. Contained in the appendixes are a glossary of terms used in the conference, the full report of the functional job analysis, and the task analysis questionnaire that was used to obtain the data. (JH)

Findings and recommendations of a five-year demonstration project designed to clarify the role and organized structure of employee education and training in health care institutions are presented. In the first section of the book, hospitalwide education functions that were implemented at sixteen individual hospitals are examined. Identified are factors important to assessing education functions: degree of centralization of administrative decision making in the hospital and the degree of congruence between the administrator's and the training director's expectations for the education function. Four composite case studies are used to illustrate these factors. Recommendations are offered to help hospitals examine current educational activities, determine the predominant managerial style of the organization, establish educational objectives that are harmonious with overall administrative objectives, and plan a suitable structure for the education function. In the second section, seventeen hospital consortiums that were selected as demonstrations of the applications of interinstitutional sharing to hospital education and training are examined. Three case studies are presented. Recommendations are given to help hospitals conduct an inventory of existing educational resources, define educational needs, determine whether a shared service can meet these needs, and organize a suitable shared service structure. Descriptors-*Adult Development, Adult Education, *Adult Students, Blacks, Caucasians, *College Credits, Comparative Analysis, Counseling Services, Degree Requirements, Developmental Tasks, *Experiential Learning, *External Degree Programs, Family Role, Females, Financial Needs, Information Dissemination, Males, Nontraditional Students, Postsecondary Education, Special Degree Programs, *Student Needs, Surveys

A questionnaire was administered to determine the needs of external degree students in the South Bend, Indiana University External Degree Program. The results (48% response rate) were compared with those of an earlier study with Northwestern New York postsecondary students. It was found that 50% of South Bend students, as compared to 27% of the New York students, were between twenty-nine and forty-three. Although both samples were predominantly white, the number of black students in the external program was twice what could be expected from South Bend local and school population ratios. Forty-eight percent of the South Bend group, as opposed to 20% of the New York group, received initial program information from print media. In examining the South Bend group alone, it was found that most of the students were between twenty-nine and fifty-five, were in a phase of reappraising their life, were most likely working, and had a yearly family income of over $15,000. The female student's personal income was often severely limited. Main student criticisms revolved around two concerns: lengthy procedures in granting self-acquired competencies; and a special mathematics course requirement. In addition to responding to these criticisms it is recommended that the university hold business office hours after five o'clock and possibly on Saturday/Sunday and provide greater counseling services. Descriptors-*Adult Education, Continuous Learning, Course Objectives, Curriculum Guides, *Educational Needs, Self Determination
Identifiers-*Self Directed Learning

Presented as a course outline, this process is intended to introduce adults to self-directed learning principles and techniques. Initially, entry level skills or competencies are specified, and the course goal and objectives are stated. Following the goal statement, three objectives, embodying strategies and resources, are presented. Objectives, in part, require that the learner complete a model education program self-directed learner competency profile, identify personal learning needs, and state identified learning needs as learning objectives. A bibliography, literary resources, methods, and schedule are provided. Finally, guidelines for determining learning accomplishments and evaluating the process are outlined. (CSS)

Descriptors-Black Youth, Changing Attitudes, Crime, *Delinquent Rehabilitation, *Disadvantaged Youth, Dropouts, Failure Factors, Family Life Education, Family Relationship, *Health, Health Education, Job Satisfaction, Job Search Methods, Leisure Time, Medical Services, Nutrition, Nutrition Instruction, Pilot Projects, *Program Effectiveness, Self Esteem, Social Welfare, Success Factors, Work Attitudes, *Youth Employment, Youth Problems, *Youth Programs
Identifiers-*Job Corps

A three-year pilot study was conducted to determine the noneconomic benefits of the Job Corps on the impact areas of jobs, society, and health. Representing seven Job Corps centers, a sample of 489 youth between the ages of 16 and 22 participated, of whom 85 percent were black and 87 percent were urban. In order to draw comparisons, the participants were chosen from three different groups: persisters or those who remained in the Job Corps at least three months; those who dropped out of the program earlier; and those who did not enroll. Of the twenty-one outcomes which were measured covering the three impact areas, persisters were found to have improved in eight areas (job seeking skills, job satisfaction, attitude toward authority, self-esteem, crime reduction, nutrition behavior, family relations, and leisure time), while dropouts only improved in two and nonenrollees in five. Particularly impressive was the Job Corps' impact on (1) crime reduction, which showed that the Corps can function effectively as a rehabilitation agent (delinquent females were found to have benefitted the most with only a four percent rate of recidivism among persisters, or compared to a much higher rate for nonenrolled and dropout females); and (2) health, which resulted from the Corps' providing free medical care to participants, including physical examinations, doctor visits, dental care, and family life and nutrition education. (Numerous tables throughout display various analyses of the data collected for this study.) (ELG)

Identifiers-*Recreational Vehicles

This report contains a secondary school curriculum guide designed to be used by vocational teachers in a one- or two-year recreational vehicle maintenance/repair program. In the preliminary pages, a description is given of the project that developed the curriculum, outlining its objectives and procedures in formulating the model interdisciplinary course. The curriculum is composed of the following components: (1) orientation to the trade; (2) the use of tools and equipment; (3) LPG systems and their assembly, testing, regulating, filling, and maintenance; (4) hitching and towing; (5) running gear, such as suspension systems, wheels and tires, and brakes; (6) electrical power; (7) plumbing; (8) construction, both supporting and exterior; (9) appliance repair, including refrigerators, air conditioning, stoves, ovens, and hot water heaters; (10) automotive systems, covering ignitions, fuel systems, engines, and cooling systems; (11) accessory installation of television antennas and air conditioners; (12) auxiliary power operation, maintenance, and installation; (13) pre-delivery service; and (14) management of sales and service areas. Each component consists of one or more units for which student objectives, classroom topics, and learning activities are listed. A cooperative education program with industry is suggested to complement the course work. Also included is a student progress chart to record a student's achievement of specific objectives. (This curriculum is to be tested for one year and then amended for publication in final form.) (ELG)

Identifiers-*Experience Based Career Education, Rhode Island

The Rhode Island Experience-Based Career Education (EBCE) project served high school juniors and seniors in seven communities by offering career exploration activities, career counseling, and academic instruction. (The academic component was not implemented in all participating schools.) The project sought to increase the career maturity, career knowledge, learning attitudes, and self concepts of EBCE participants. It also sought to increase or maintain the basic skill levels of EBCE participants. An institutional cycle design was adopted for evaluation making it possible for longitudinal analyses. The evaluation design included data collection of student achievement/change, project staff perceptions, and employer perceptions. The following instruments were used: Comprehensive Test of Basic Skills; Career Maturity Inventory; Student Attitude Survey; Self Directed Interest Inventory; and surveys to collect perceptual data from students, school staff, and employers. Test results indicated that EBCE students tended to show gains (some significant, some not) in all test areas and that academic achievement was not hindered by EBCE participation. Staff, students, and employers rated career exploration as the strongest component. Students perceived the career counseling component as helpful in sharing ideas and experiences. Overall, all participants were satisfied with the program. The project staff was successful in providing learning experiences, combining resources, placing students at job sites, recruiting employers, forming an advisory board, and devising a plan for eventual assimilation of EBCE into Rhode Island school systems at minimal cost. Identifiers-*Experience Based Career Education

During the 1977-78 school year, students from four Utah high schools participated in the evaluation of an experience-based career education (EBCE) project. The 228 students (115 girls and 113 boys) enrolled in EBCE were designated the experimental group and a randomly selected English class from each high school was treated as the control group. Specified student outcomes were categorized into three areas: career skills, life skills, and basic academic skills. To gather data, the evaluators used the following instruments: Career Maturity Inventory; Career Attitude Scale; Self-Directed Search Interest Inventory; Assessment of Student Attitudes Scale; Stanford Test of Academic Skills; Student Demographic Data Questionnaire; Teachers, Students, Site Coordinators, and Parent Attitude Surveys; and grade reports. In addition, reports, interviews, and observations held by the evaluators who monitored the project were analyzed. Some of the major results were that (1) the EBCE project was well organized and managed at all levels; (2) high commitment and enthusiasm were shown by school personnel, administration, parents, community employers, and students; (3) grade patterns of EBCE students were basically uniform with those of control students; (4) tests of academic skill development did not show significant gains in EBCE students as compared to control students; and (5) overall, EBCE students did show increased career awareness and career knowledge. Identifiers-*Junior Achievement

This monograph, summarizing the ideas of participants attending a two-day mini-conference, was developed to help educators understand the extent to which youth benefit when Junior Achievement (JA) is used as a major resource in community career education efforts. This booklet begins with a brief description of JA structure and programs. This is followed by specific examples of ways in which JA efforts are currently being incorporated into community career education efforts. Four basic problems encountered by JA in working effectively with educators are then discussed. These problems are (1) gaining teacher interest and participation in JA efforts; (2) gaining academic credit for the JA program; (3) avoiding dilution of quality in JA efforts; and (4) competing forces to JA. Finally, after offering three reasons why educators should support JA programs, this monograph concludes with nine suggestions for improving the working relationships between JA and educators. A list of participants and issues raised by the participants is appended. (EM)

Descriptors-*Career Education, Curriculum Development, Educational Objectives, Educational Philosophy, Elementary Secondary Education, *Learning Motivation, Learning Processes, Program Development, *Program Planning, *Student Motivation, *Teaching Methods, Teaching Styles

This monograph was developed to help K-12 classroom teachers infuse career education into the teaching/learning process as a regular part of their instructional responsibilities. After defining career education, this booklet briefly discusses the rationale, target population, and who is responsible for career education. Then follows a discussion on the relationship of career education and the teaching/learning process. To provide a better understanding of this relationship, the following four topics are examined in detail: (1) teaching philosophy; (2) purposefulness of learning; (3) variety of teaching techniques (includes interview, discussion, bulletin boards, and learning centers); and (4) the process of weaving/infusing/threading career education into the curriculum (includes the perspectives of both the program planner and classroom teacher). Finally, this monograph makes some concrete suggestions for the implementation of career education in terms of the readiness of school administrators, teachers, and the community. (EM)

Promoting Vocational Education. A Guide for Vocational Educators.
West Virginia State Dept. of Education, Charleston. Bureau of Vocational, Technical, and Adult Education.
Pub Date-78
Note-24p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Audiovisual Aids, Guides, *Mass Media, *News Media, *Publicize, *Public Relations, Radio, School Community Relationship, Slides, Television, *Vocational Education

This guide for vocational educators suggests some effective approaches to public relations. First, it briefly discusses effective public relations, human interest, a public relations sense, and contacts. The guide then covers the news media, focusing on the preparation of news articles and on radio and television announcements (relative to types of programs), making a television appearance, and who to contact (includes sample news releases and spot announcements). Discussed next is taking photographs and preparing a slide show, including writing the script, making the slides, and presenting the show. Finally, brochures, newsletters (includes suggested basic layouts), exhibits or displays, open houses, and speeches are covered. (EM)

Although the enrollments in vocational-technical education programs have been increasing steadily, a great deal of misunderstanding still exists about these programs. Vocational-technical education has an image problem. A coordinated, comprehensive communication program using a variety of media, such as newspapers, radio, and publications, should be designed to promote public understanding of vocational-technical education. A model public information program should accomplish nine goals, among which are the following: establish channels of communication with prospective vocational education students, informing them of the benefits of vocational training; establish channels of communication with parents of prospective students to inform them of the job opportunities afforded graduates of vocational programs; involve vocational educators, interested persons, and organizations in public information activities; initiate efforts to make academic teachers aware that vocational education can benefit all students who are interested in preparing for a career; and establish channels of communication with the news media. (This document suggests three to eighteen activities to accomplish each of the nine objectives.) (EM)

Descriptors-Data Analysis, *Dropout Characteristics, *Dropout Identification, *Dropout Prevention, *Dropout Research, *Dropouts, Followup Studies, Postsecondary Education, Surveys, Vocational Education

Identifiers-Indiana Vocational Technical College

This follow-up study had three objectives: (1) provide information about dropouts that could be used by the college to identify areas where corrective action may be needed; (2) document the number and percentage of students who leave the college for reasons not amenable to corrective action; and (3) provide insight necessary to build models that will allow for the prediction of which students and the number of students who will drop out. An instrument was developed to survey students who were enrolled in Indiana Vocational Technical College, Indianapolis, between fall quarter 1976 and winter quarter 1977, and who left prior to completing their program. Three hundred eighty-four individuals responded to the survey questionnaire. The analyses of data consisted of two subparts: a descriptive analysis in the various categories, and an analysis to determine responses by sex, race/ethnic, marital status, veteran/non-veteran, and by program enrolled. The findings indicated three major reasons for students leaving school: they learned what they came to learn; there was conflict between job and studies; and there was not enough money to go to school (black students were identified as most adversely affected by lack of money). However, it was concluded there were no significant trends shown. Recommendations include revision of the student financial aid system, elimination of questions from future questionnaire which could be obtained from admission records, and conducting follow-up studies two to three times a year. Identifiers-*Wisconsin

The Wisconsin Career Information System (WCIS) is a joint effort by several state agencies, institutions, and interested individuals to develop and disseminate accurate, current, and locally relevant occupational information to assist persons making vocational choices. One of eight state-wide occupational information systems funded by the U.S. Department of Labor National Occupational Information Service, it has completed three years of its four-year grant. In its sixteen files it utilizes computerized and manual information and audiovisual and printed materials relating to national and state occupations, training institutions, institutions of higher learning, financial aid, human resources, and military careers. The fields are organized to give information by occupational titles, rather than by specific job titles. Cross-reference files locate information on a particular occupation or job in the various files. Information sources include the Department of Labor; employers, employees, and trainers in the particular fields; institutions; and the Higher Education Aids Board. Three hundred and sixty-nine user sites are maintained at high schools, vocational/technical schools, universities and colleges, job service/WIN offices, Department of Vocational Rehabilitation offices, CAP Agencies, and CETA. Plans for the fourth year include further file development and modifications, requests for future federal aid, and an increase in user numbers and services. (The appendixes contain information on WCIS administration and user conferences, comments from users, sample products such as the SORT Index and user guide, and copies of marketing materials.) (ELG)

Descriptors-*Changing Attitudes, *Cost Effectiveness, Educational Accountability, Educational Attitudes, Educational Objectives, Educational Programs, *Evaluation Methods, Graduate Surveys, High School Graduates, High School Students, Individual Characteristics, Job Placement, Job Satisfaction, Program Effectiveness, Secondary Education, Study Habits, *Vocational Education

Through an analysis of the economic costs and benefits of five vocational-technical programs, it was shown that the benefits of a vocational-technical education outweigh the costs. Four programs showing greater benefits than costs were auto body (courses at two technical institutes), materials management, and electronic servicing. Clothing services showed greater costs than benefits. A major emphasis of the study was to examine noneconomic benefits of a vocational-technical adult education (VTAE) program. Graduates of the five programs and a group of high school graduates were surveyed to compare cost benefits and noneconomic factors such as attitude changes, job satisfaction, and social involvement. Some major noneconomic benefits found were that vocational-technical graduates receive a larger amount of help from their school regarding a job search and VTAE graduates enjoy greater job satisfaction than do high school graduates with no post-high school education. Appendixes contain (1) survey forms and cover letters, (2) summaries of cost/benefit/effectiveness procedures (in New York, Indiana, Wisconsin, New Jersey, California, Florida, and Oklahoma), (3) computerized cost model proposal, (4) format for establishing objectives, (5) survey forms for longitudinal evaluation of programs, and (6) norm tables. This final report examines the progress of the Wisconsin Vocational, Technical and Adult Education (VTAE) program to recruit and employ minorities for existing and future teaching and administrative vacancies. Recruitment activities in the vocational studies center are outlined, along with activities of the program's advisory committee and state VTAE districts. A list of resource information and contact persons is given. A recruitment plan development is examined for September-December 1978 and a program timetable for all of 1978 is presented. Another section addresses the needs, goals, objectives, and the timetable projected for 1979. The present status of program efforts is evaluated and major need areas are identified. Program components such as application procedures, intern experience and teacher exchange are examined. Performance objectives within the vocational-technical districts and process objectives are listed. Also identified are the roles of vocational-technical district affirmative action officers, department chairpersons, and the program director. Specific project responsibilities are named, including contact with minority colleges and interaction with military recruiters. Finally the 1979 timetable presents planned activities for the coming year, such as recruitment from institutions, placement of intern employment candidates, and securement of district funding for the following year. Developed as part of a competency-based curriculum in automotive mechanics which is usable by students at both the secondary and postsecondary levels, this learning package focuses on automotive electrical systems. It is the first unit to be published in a series of eight which will cover the eight subject areas on the national certification examination for auto mechanics. Following an introduction to the fundamentals of electricity and magnetism, this manual explains the identification, testing, and servicing of (1) automotive batteries, (2) the charging system, (3) the cranking circuit, (4) the ignition system, and (5) the electrical lighting and wiring of the body and chassis. Each unit contains lists of textbook references, of tools and materials needed, and of specific objectives, as well as a competency checklist for student use. Information sheets are provided with detailed diagrams, illustrations, and photographs. On the worksheets in each unit, students are asked to answer written questions or to demonstrate manually their achievement of the objectives. Tests are also provided at the conclusion of some of the units. (ELG)

Identifiers-Wisconsin

This health careers guidance manual was developed to provide high school counselors, teachers, and students with information regarding health career opportunities and available training programs in Wisconsin. The content is in two volumes, with the first comprising two-thirds of the manual. Volume 1 begins with one-page job briefs on fifty-four jobs in sixteen health career areas. Each brief includes short descriptions of the work, employment opportunities and settings, educational requirements, and where to write for further information. The remaining portion of this first volume is devoted to health career program outlines, ranging from one to seventeen pages in length, for these fifty-four health career jobs; each outline includes some or all of the following: course information, recommended high school courses, course outline (includes course titles and credits for each year of the program) and brief course descriptions for each course in the program. Volume 2 begins with two appendixes. The first describes, in alphabetical order, the recommended courses in Wisconsin high schools, while the second contains specific competencies for some of the basic curriculum courses in health career programs at a technical college. A listing of college, university, and vocational technical school programs, as well as hospital education and training programs in Wisconsin, concludes this second volume. (EM)

Descriptors-Age, Employment Opportunities, *Employment Patterns, Family (Sociological Unit), *Geographic Distribution, Hospital Personnel, *Hospitals, *Job Market, Job Placement, Job Search Methods, Marriage, Medical Education, Migration Patterns, Motivation, *Nurses, Nursing, Occupational Information, Occupational Mobility, Occupational Surveys, Tenure, Unions, Wages, *Work Attitudes, Work Environment, Working Hours
Identifiers-Job Benefits

As the second phase of a four-year research project on the geographic distribution of professional nurses, a study investigated what incentive or incentives motivate nurses in their choice of employment location. Data was analyzed from four sources: a survey of hospital directors of nursing, a survey of registered nurses, 1960 and 1970 U.S. Census information on individual nurses and their families, and the Survey of Employment Opportunities for Newly Licensed Nurses (conducted in 1973 by the National League for Nursing). Conclusions and policy implications were formulated for the following topics: (1) professional nurse staffing in hospitals and the impact of hospitals substituting lower-paid personnel for nurses, of nurses forming attachments to the geographic area of their schooling, and of nurses disliking the locations of the hospitals; (2) wage setting in hospitals, including the effect of unions and the relationship between wages and benefits; (3) mobility and interstate migration of nurses and their families, considering the variables of marriage and age; (4) matching nurses and jobs, focusing on the job market for, and job search by, newly licensed nurses; (5) retention in current employment, as influenced by age, marital status, spouse earnings, length of time with current employer, and type of nursing school program attended; (6) the demand for nonwage benefits according to age and marital status; and (7) nurse work hours and the effect of financial incentives. The modules which make up the bulk of this report are the result of a two-week workshop at which thirteen building industries occupations teachers worked toward the development of a student outcome oriented curriculum. These modules are divided into the following occupational units: (1) carpentry (containing hand tools; portable power tools; footing and foundation forms; framing of decks, walls, roofs, and roof coverings; and interior and exterior finish); (2) electrical (containing circuitry; overhead service entrance; lateral service entrance; main and sub-panel; and signaling and remote control devices); (3) masonry (containing mixing mortar, basic brick work techniques, basic block work, plastering, tile setting, and stone work); and (4) environmental control (containing basic physics of climate control, duct work, and pipe assembly). Each module lists the task, major objective, and enabling objectives; most contain suggested instructional content. At the end of each unit a task check-list is included for the instructor to identify individual tasks completed by the students. Also included are suggestions on the use of the modules and additional comments made by the workshop participants. (CT)

Focus on Choice was a 309 Special Project with education and research components. The educational aspect involved two pilot classes of under-educated adults in a 13-week course which emphasized self-assessment, goal-setting and occupational information. An integral feature of the design included mutual support groups and role models as a way of encouraging school re-entry and/or an improvement in self-esteem. The most significant impact came from group discussion and contact with peer consultants. The research and project results compiled in this final report indicate that adoption of the Focus on Choice format may be very useful in existing adult education programs. Evaluation was accomplished through questionnaires administered to participants after each session and through informal group and individual discussions with participants outside of the classroom. Evaluations by participants and project staff indicate that the techniques utilized in this project facilitated the adult students' abilities to understand their needs and interests, providing the basis for informed goal setting. A summary of the results show that of the 24 participants, 15 returned to school (63%), and 7 improved their employment status (29%). According to participants' self-inventories administered after the course, their level of self-confidence had greatly improved. (Program materials are appended.) (Author/CT)

A model for increasing awareness of sex-bias and sex stereotyping in vocational education was developed. The model consisted of a five-hour workshop which included these elements: (1) an introductory slide presentation which provided an overview of sex stereotyping; (2) five group activities (The Exchange, A Closer Look, Taking Stock, What a Difference a Word Makes, and Building Our Image); and three pre-postassessment instruments designed to determine the degree of awareness of sex bias and stereotyping (Sex Awareness Instrument, Current Behavior Practices Questionnaire, and Personal Commitment). In addition to the three instruments, the Bem Sex Role Inventory was used to obtain feminine, masculine, androgynous, and undifferentiated scores of the respondents. Following pilot testing, the model was tested on eighty-one female home economics educators and fourteen male vocational counselors. From the results, it was concluded that the sexism-awareness workshop was effective in bringing about a statistically significant increase in degree of awareness of sex bias and sex stereotyping in vocational education. The assessment instruments are included in the appendixes. (Also available is the workshop facilitator manual, CE 018 812.) (JH)

This workshop facilitator manual was developed for use in conducting a sexism-awareness workshop for home economic teachers. Section 1 provides an introduction to the manual, objectives of the workshop, format of the manual, and a suggested time schedule and group size for each activity. The second section provides instructions for conducting the workshop activities: introductory slide presentation of sex bias, five group activities, and administration of three assessment instruments. The five activities are The Exchange'' (meet other members of the subgroup and discuss media presentation), A Closer Look'' (describe and compare the way females, males, and healthy well-adjusted adults are perceived), Taking Stock'' (identify and examine personal attitudes and the attitudes of others relating to the role of men and women), What a Difference a Word Makes'' (identify personal sex bias and those biases projected in textbooks and other education resources), and Building Our Image'' (identify class behaviors that perpetrate, minimize or eliminate sex bias and stereotyping). Copies of activity handouts and assessment instruments are provided in section 3. The three instruments used are sexism awareness instrument, Current Behavior Practices Questionnaire, and Personal Commitment. (Also available is the project final report, CE 018 811.) (JH)

The 1977 annual report of the National Advisory Council on Vocational Education is presented in this document. Section 1 describes the Council functions. Names and addresses of council members are listed in section 2. Dates and locations of meetings held during 1977 are given in section 3. The next section summarizes council activities for 1977, which were performed in the areas of legislation, assessment of administration and operation of the Bureau of Adult Education, management evaluation review

for compliance, American Indian vocational education, disadvantaged and handicapped, national vocational education policy, and manpower policy. Section 5 lists the titles of council reports by month. The concluding section presents the council reports' findings and recommendations, including recommendations relative to the following: notice of intent to issue regulations (Public Law 94-482), public hearings on native Americans in vocational education, youth unemployment, testimony to Congress (Youth Unemployment Act), and energy report (the response of vocational education to the national energy crisis). Identifiers-Education Amendments 1974, *Maryland

The Maryland State Department of Education is actively involved in the development of a five-year state plan for career education. The plan is based upon data derived from a student needs assessment, a survey of LEAs, a survey of counselor competencies, and the AIR Survey of Career Education in the public schools which sampled ten districts in Maryland. The needs assessment clearly indicates that more than 70% of the students evidenced need for help in exploring careers, making post-high school plans, finding jobs and careers, developing career awareness, making career decisions, planning careers and assessing self. In a survey of career development competencies of counselors, prioritized training needs were evidenced in the following areas: inservice training in recommending curriculum changes to correlate with the changing world of work; getting teacher support; knowledge of the career development needs of special groups; and help in assisting teachers to infuse career education into their regular subject areas. The local education agencies evidenced a strong need in securing a local board policy in support of career education and help in strengthening their implementation of career education. From this needs assessment, six key program goals have been developed that are geared toward meeting specific outcome goals for students. (Author/CT)

Identifiers-Alabama (Conecuh County), *Experience Based Career Education

The goal of the Conecuh County (Alabama) project was to successfully implement into its curriculum an Experience-Based Career Education (EBCE) program based on the model developed by Northwest Regional Educational Laboratory, which integrates academic requirements and work experience opportunities into a comprehensive curriculum. To determine program effectiveness, a third-party evaluation team developed an evaluation plan which would compare the EBCE participants and a control group in the following areas: basic academic skills, mastery in career knowledge, career maturity, attitudes toward learning environments, sex-role stereotyping, and internally oriented locus of control. Assessment instruments were administered on a pretest/posttest basis. Parents and employers were also surveyed to determine their attitudes toward the program. EBCE student accomplishments appeared to be substantial. Measured growth in basic skills was equivalent to that experienced by comparison students in traditional high schools. EBCE students' attitudes toward the various aspects of the learning environment, career knowledge, work, and career maturity were significantly more positive than comparison students. EBCE students showed significant gains in reducing their sex-role stereotyping but not in increasing their internal locus of control. However, unobtrusive assessment indicated that EBCE students were displaying more maturity and accepting responsibility more readily. Finally, the perceptions and attitudes of parents, employers, and EBCE staff were positively oriented. (BM)

Identifiers-Missouri (Kansas City)

The project's purpose was to implement a vocational curriculum evaluation model developed by the Metropolitan Community College (MCC) District. The model was formatively field tested with ten MCC vocational programs and implemented in the evaluation of twenty-four vocational programs. The model's criteria was based on the program's (1) relationship to job market profile, (2) level of occupational community support, (3) meeting vocational aspirations of students, (4) student performance, (5) cost effectiveness, (6) meeting handicapped and disadvantaged students' needs, and (7) demonstrating sex fairness. Model implementation included the revision, administration, and collection of questionnaires. Questionnaires surveyed program completers and leavers, current students, handicapped and disadvantaged students, occupational communities, employers of program graduates and program faculty. (Sample questionnaires are appended.) Other data sources included labor statistics, program costs and enrollment figures, and program facility information. Analyses results were plotted on a program evaluation profile for each program evaluated. The profile points out program strengths and weaknesses and can be used by administrators and others as the data base for decision making policy. The model includes a procedures manual which facilitates replication. (In addition to the sample questionnaires, a facilities checklist and evaluation profiles for the twenty-four programs are appended.) (For the procedures manual see CE 018 869.) (Author/CSS)

Identifiers-Missouri (Kansas City)

The procedures manual, developed for the vocational curriculum evaluation model, details the process used to evaluate programs. In the first of eight sections, the manual presents seven criteria for judging the program: (1) meeting job market needs, (2) meeting past-present students' vocational aspirations, (3) demonstrating graduates' successful performance, (4) receiving occupational community support, (5) demonstrating cost-effectiveness, (6) meeting handicapped and disadvantaged students' needs, and (7) demonstrating sex fairness. (Twenty-nine sub-criteria are appended.) The criterion measures which are detailed in the report are the questionnaires for the advisory committee, current students, graduates, employers, occupational community, and program head. A program cost form, cost-effectiveness rating form, and a facilities checklist are also explained. Section 2 identifies and defines the survey population. The third section discusses budget and enrollment figures, indexes for the college, labor market projections, and program competencies and checklists. Section 4 reviews the data collection procedures, and the following section provides extensive directions for data analysis. In the sixth section directions are given for utilization of the evaluation score sheet. Program and composite evaluation profiles are explained in section 7, and the final section makes recommendations for use of the model. (For the description of the vocational curriculum education model see CE 018 868.) (CSS)

Descriptors-Occupational Choice, Secondary Education, Self Concept, *Sex Discrimination, Sex Role, *Sex Stereotypes, Standardized Tests, Student Distribution, *Vocational Education, Vocational Interests
Identifiers-*Indiana

This study investigated the extent and nature of sex bias in Indiana's vocational education programs. It also examined sex bias in relation to selected factors (motivation, psychomotor and language skills, I.Q., interest, reality, and sex-role perception). Enrollments in vocational programs in twenty-four area vocational programs were analyzed. One hundred students (twenty-five females and twenty-five males in traditional programs, and twenty-five females and twenty-five males in nontraditional programs) responded to selected commercial tests and to the Bem Sex Role Inventory (BSRI). School personnel were given a ten-item survey on practices and policies for eliminating sex bias in vocational programs. Findings indicate the following: (1) the number and type of vocational courses offered and the selected factors identified for this study appear to have little influence on an individual selecting a nontraditional program; (2) sex-role-self-perception appears to affect the selection of nontraditional programs. The findings suggest that additional efforts are needed to eliminate sex bias in vocational programs, especially in the areas of teacher attitudes, employer attitudes, and student nonsex-bias orientation to occupations. Identifiers-*Future Farmers of America

The purpose of this project was to develop innovative agricultural education programs within the comprehensive high school setting in selected school districts in Mississippi. The following programs were implemented: horticulture (Starkville Vocational Center); vocational forestry (Lamar County); agricultural suppliers and services program (Alcorn County Vocational Center); wildlife-forestry (Winston-Louisville Vocational Technical Complex); and specialized programs in crops and livestock (Covington County). The main emphasis during the period July 1, 1977 to June 30, 1978 (reported here) was on (1) development of public relations materials, (2) curriculum planning, (3) organization and development of Future Farmers of America (FFA) chapters, (4) development of adult education programs in agriculture, (5) improving FFA programs, (6) instituting effective recruitment programs for vocational agriculture/agribusiness, and (7) improving supervised occupational experience programs. No major problems were encountered during the development of the project. Project-related materials were made available to all teachers. Other project information was disseminated through workshops and meetings. The project was evaluated by both the project staff and the participants. (Appendixes comprise a major portion of this document and include a list of instructional materials distributed to teachers; script of sound/slide presentation, ``Today's Vocational Agriculture''; evaluation forms; and other related materials.) Identifiers-Waste Water Treatment

A project was undertaken at Kirkwood Community College to develop a full-time and part-time competency based program to educate water and wastewater treatment plant operators. First, a survey was conducted to identify the job tasks performed by the operators, their frequency, importance, and necessity. A questionnaire listing 651 tasks divided into six subject areas (management, human relations, wastewater collection, wastewater treatment, water treatment, and water distribution) was sent out to operators at three job levels. Based on responses from 231 operators, 439 tasks were found to be significant in plant operation. It was then necessary to revise the existing curriculum to address these tasks more fully and to convert it to a competency based format. A competency based testing program was developed to permit students to ``test out'' of instructional units, and the curriculum was changed to allow entry at various times. To evaluate the program, four types of measurement were used: (1) course effectiveness, measured by a computerized campus system, called SPOT, which is administered to students upon program completion; (2) instructor effectiveness; (3) student skills performance, which includes a basic math skills test upon entry and a remedial program, called PAD, to correct math and reading deficiencies; and (4) postgraduate job performance. (A sample competency based curriculum guide is included for the course, basic laboratory skills.) (ELG)

Identifiers-*American Womens ORT, *Collaboration

Women's American ORT (Organization for Rehabilitation through Training) is an autonomous affiliate of a worldwide Jewish volunteer organization. It is dedicated to fighting poverty by providing Jewish youth and adults with vocational skills so that they may become productive members of society. In the past, WAO (Women's American ORT) has made major contributions toward improving the image and status of vocational education in the U.S., and now it is becoming involved in implementation of career education efforts: securing greater community involvement in career education, working more closely with K-12 school systems, and encouraging a career education emphasis in higher education. In general, WAO needs (1) to develop a strong, definitive statement on career education, (2) to educate its members about career education, (3) to give career education priority status among its goals, and (4) to gain positions for its members on career education advisory boards at all governmental levels. WAO can use its media contacts to gain greater community understanding for and support of career education. (This paper is part of a series resulting from seminars sponsored by USOE's Office of Career Education on collaboration in career education. The two appendixes to this monograph contain lists of WAO seminar participants and of the thirty issues that they raised.) (ELG)

Identifiers-*Collaboration

This monograph summarizes the thoughts, opinions, and experiences of the participants in the first three seminars of a series of thirty-three sponsored by USOE's Office of Career Education on the subject of collaboration in career education for grades K-12. After an explanation of the term collaboration'' in the introduction, the expected learner benefits from collaborative career education are outlined as well as the advantages for both educators and the business/labor/industry community. Two major problems are then identified: the private sector's refusal to recognize and accept responsibility in career education and the educators' refusal to allow the private sector to participate in operational policymaking. Next, suggestions are proposed for initiating a community collaborative career education effort, and discussion is devoted to the major actions required: (1) securing commitment from top community leaders and the community in general, (2) motivating teachers to learn about and use community resources, (3) sustaining the collaborative effort through a community education/work council and a collaboration coordinator, (4) financing the council's operations and coordinator's position, and (5) obtaining policy support statements from leading business, labor, and industrial organizations. Brief descriptions are included of collaborative efforts already underway by eleven community-based organizations and by the fifteen local career education coordinators who attended the third seminar. The two appendixes contain lists of the seminar participants and of the ninety-four issues raised by them. (ELG)

Descriptors-Adult Basic Education, Adult Education, *Adult Education Programs, *Educational Development, *Educational History, *Educational Policy, Foreign Countries, Job Training, Literacy Education, Nonformal Education, Vocational Education

Identifiers-*Thailand

To develop background for examining the past, present, and future of adult education in Thailand, the author initially sketches an economic and geographic profile of the country. In the second of five sections, Thailand's adult education movement is traced by examining the influences of kings, the Buddhist religion, various governments, and the citizens. There is an emphasis on the history of the development of literacy and vocational education programs. The author also focuses on the historic role of the Adult Education Division (formed in 1940 as a part of the Ministry of Education) in setting educational objectives. Finally the 1973 revolution and the educational reforms which followed are discussed. Section 3 reviews the Adult Education Division's current sponsorship of three program types: general education, skill training, and general knowledge/information. Section 4 examines the development of a non-formal education program by the Adult Education Division. Approved in 1973 by the World Bank, the program is described as multipurpose and involves three network tiers in (1) five regional, research, development and training centers, (2) provincial and some district lifelong education centers, and (3) rural adult centers. The final section summarizes twelve points of interest to American adult educators and includes fourteen discussion questions. (CSS)

The world of work is composed of contradictory conditions which schooling tries to mediate through a reproductive process. The present organization of production based on wage-labor is inherently self-contradictory in that the interests of management and labor are directly opposed. School prepares individuals to deal with the types of peer relationships, authority figures, knowledge, and control over work content that they will eventually face on the job. This preparation, or correspondence of schooling to working conditions, facilitates workers' acceptance of the social and structural composition of labor. However, the mechanisms of this correspondence are beginning to break down, and a ``crisis in education'' is resulting. As jobs become more routinized and simplified to reduce costs and training time, school credentials are losing much of their meaning. No longer does a high level of academic achievement guarantee a high-paying, high-status job. As a result of this breakdown, workers are becoming increasingly disillusioned and cynical about the job market, and are applying pressure for more democratic, participatory forms of work organization. If such changes do occur in the world of work, then schooling processes must change in a corresponding fashion. (ELG)

Identifiers-United States

Employing 1970 U.S. census data, tests were conducted to examine the empirical evidence on the existence of U.S. labor market segments. Some comparisons between the labor market for males and females were made, but the analysis concentrates on males. Labor markets were divided by race, sex, job types (secondary, primary subordinate, primary independent, and crafts) and industry types (public and private). The basic concern was with intra-segment economic position, defined as annual earnings. One hypothesis tested was that mobility between occupational and industrial segments is limited for blacks and whites and males and females. Data analysis revealed that white males have much higher upward mobility out of secondary labor markets than do blacks. Regression estimates demonstrated that schooling and age are significant correlates of upward mobility for males. In comparing male and female regression estimates by segment it was found that women receive lower salaries than men and generally get a lower pay-off to additional schooling and higher age. Overall study results, while neither proving nor disproving the existence of a segmented labor market, indicate considerable stability over a five-year period in types of jobs and industries people work in, large earnings differences among occupational segments and private industries, and the relationship among education, work experience, and earnings differing among job types but not between industry types. Identifiers-Southern Regional Education Board

This report describes some of the initial plans, activities, and opinions of southern nursing school faculty selected to participate in the Faculty Development in Nursing Education Project (FDN). Section 1 states that the project's overall objectives are to improve and to develop the teaching skills of nurse educators in meeting the needs of students from culturally and educationally diverse backgrounds. Besides listing the twenty participating college nursing programs, the section also describes the history of other nursing education programs sponsored by the Southern Regional Education Board (SREB), FDN's administrator. Section 2 focuses on the development of project plans by task groups appointed at the twenty sites: (1) to identify the targeted student population (male, rural, minority, and disadvantaged students); (2) to establish the special concerns and needs of nursing educators in meeting these students' needs; and (3) to determine faculty beliefs regarding education, learners, and teaching methods (the results of surveys conducted at some sites are summarized). Also included are two papers previously published by the SREB and relevant to FDN activities: Diversity: Cultural and Educational'' which emphasizes the special needs of students of diverse backgrounds and Dimensions of the Teacher's Role'' which discusses the purpose and process of teaching. Needed Research in the Assessment and Monitoring of the Quality of Medical Care. NCHSR Research Report Series.

National Center for Health Services Research and Development (DHEW/PHS), Rockville, Md.
Report No.-DHEW-PHS-78-3219
Pub Date-Jul 78
Note-46p.
Available from-National Center for Health Services Research, Office of Scientific and Technical Information, 3700 East-West Highway, Room 7-44, Hyattsville, Maryland 20782
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Bibliographies, Evaluation Criteria, Measurement Techniques, *Medical Care Evaluation, Medical Services, Models, Program Evaluation, *Quality Control, Research Methodology, *Research Needs, Standards, State of the Art Reviews

In this paper the author assesses the state-of-the-art on quality assessment and monitoring of medical care and makes recommendations for needed research in this area. Following a brief introduction, the content is presented in two sections. The first, providing a frame of reference, covers definitions; quality assessment and program evaluation; relationship of quality and quantity; relationship of quality and cost; strategies of care; structure, process, and outcome; monitoring versus research; and the uses of outcomes. The second section presents a catalog of needed research on assessing and monitoring the quality of medical care. The research areas covered are as follows: basic explorations and studies of what constitutes quality, description of prevalent patterns and strategies of care, the epidemiology of quality, the relationship of structure to process or outcome, development of basic tools for assessment, specification and testing of system-design elements, comparative studies of quality using different approaches, further development of promising current approaches, integrative measures of quality, applications to special areas, consumer perspectives and the consumer's role, quality assessment and monitoring as a social process, and effectiveness and the factors that influence it. An extensive bibliography is attached. (EM)

Identifiers-Health Professions Educational Assistance Act 1976, United States

This report, the first of a series of annual reports mandated by the Public Health Service Act as amended by the Health Professions Educational Assistance Act of 1976 (P.L. 94-484), describes and analyzes the status of health professions personnel in the United States. The professions covered are medicine, osteopathy, dentistry, optometry, pharmacy, podiatry, and veterinary medicine. The content is presented in ten chapters. The first overviews the trends in health manpower supply and major health manpower concerns. The next chapter describes the dynamics of health manpower supply, including geographic distribution, licensure, and education. Chapter 3 discusses major considerations in determining health manpower requirements. In separate, succeeding chapters, information is presented on the status of physicians, dentists, optometrists, pharmacists, podiatrists, and veterinarians. The information for each profession covers general and specific issues pertinent to the supply of and requirements for personnel. Focus is on professional and graduate education, student and practitioner trends and characteristics, current manpower supply, and projected manpower requirements. The last chapter briefly describes plans to develop a health professions data reporting system to meet the requirements of PL 94-484. The appendix contains detailed tables on each of the health professions covered and technical information on the sources and methodologies underlying the material presented. (EM)

Identifiers-*Massachusetts

The 1977-78 Massachusetts statewide assessment of Career and Occupational Development (COD) included the development of test instruments, administration of the tests to a sample of thirteen- and seventeen-year-olds throughout the state, analysis and interpretation of the data, and dissemination of the results. The COD test was objective-referenced in nature. Each test item was matched to COD objectives in one of the following areas: job characteristics; job

requirements; career decision making; basic skills; and attitudes and values. A panel of educators, school administrators, and business representatives met to evaluate the actual student performance in terms of their own benchmark'' of desirable achievement. Finally, the COD technical committee met to review all the results of the assessment and, with the input of the Benchmark Panel, generated a set of interpretative comments and recommendations for action. (This report describes the major outcomes of the assessment by reporting the following: performance on objectives; comparisons of the achievement of Massachusetts students with that of students within each age group; and highlights of the student and principal questionnaires. Also the interpretations and recommendations made by the panel and technical committee are presented. A companion document, CE 019 017, describes in detail the design and methodology of the assessment.) (BM)

Identifiers-*Massachusetts

The 1977-78 Massachusetts statewide assessment of Career and Occupational Development (COD) involved the testing of 2,238 thirteen-year-olds and 2,201 seventeen-year-olds. The assessment design required developmental activities aimed at the production of (1) customized achievement tests referenced to important COD objectives, (2) student questionnaires designed to collect information on individual student and home variables, and (3) principal questionnaires designed to collect information on school-related variables. A panel of educators, school administrators, and business representatives met to evaluate the actual student performance in terms of their own benchmark'' of desirable achievement. Results were compared on each age level and on the COD objectives, which were organized in the following areas: job characteristics; job requirements; career decision making; basic skills; and attitudes and values. Based on these comparisons, the panel felt that more emphasis should be placed on teaching career decision making skills to both age levels and on giving thirteen-year-olds additional instruction in the kinds of abilities, training, and preparation required for various careers. Overall, the panel felt that students at both age levels were receiving sufficient instruction in the other areas. (The first four chapters of this report contain a summary of the design and methodology of the assessment. The remaining seven chapters present a detailed analysis of the assessment results. A number of supporting documents appear in the appendixes, and a companion document CE 019 016 presents a complete interpretation and summary of the results.) (BM)

Identifiers-*Instructional Quality Inventory, Instructional System Development, Navy, United States

This report describes the instructional quality inventory (IQI), which was developed to provide quality control/evaluation procedures for the instructional system development (ISD). The ISD is described as a method used by the military to develop or revise training courses. IQI procedures are detailed in six sections. Section 1 explains the IQI classification system, which classifies instructional parts (objectives, tests, and presentations) according to performance tasks and instructional content. Section 2 reviews the IQI steps, which are used to determine if each objective is adequate for further instructional development. The third section outlines the process used to determine whether test items are consistent with objectives and whether each item is adequate. The following section provides guidelines for insuring that the presentations are consistent with the objectives and the test items and are adequate. In section 5 rules for assessing presentation adequacy are presented. The final section reviews the resources needed to use the IQI. (Author/CSS)

Identifiers-*Navy, *Recruit Training Instructors, United States

This report addresses the selection, training, and utilization of Navy Recruit Company Commanders (Recruit Training Instructors). It represents one in a series of reports concerning the optimization of Navy Recruit Training to meet the needs of the post-1980 period. The report provides a comprehensive review of the Navy's Recruit Company Commander program, including mission and organization; selection criteria and procedures; career benefits and incentives; training approach and content; and duties and functions. A comparison is drawn between the Navy's Company Commander program and similar programs of the Army, Air Force, Marine Corps, and Coast Guard. Recommendations for the optimization of the Navy Company Commander (Recruit Training Instructor) programs are provided, including a proposed standardized training school curriculum. Descriptions of such programs in the other branches of the Armed Forces are appended. (Author/CT)

Identifiers-Higher Education Act Amendments 1965, Higher Education Act Amendments 1976

This report reviews the activities of the Administration, the Congress, and the Council in response to the learning needs of adults and community groups, and to the developmental needs of postsecondary institutions. The report focuses on activities and/or legislation surrounding five major issues: (1) removal of arbitrary barriers to participation in continuing education, (2) encouragement to institutions of higher education to offer activities and services appropriate to the special needs of adults, (3) improvement of the capability of colleges and universities to meet their public service responsibilities, (4) stimulation of more effective and widespread use of existing public and private learning resources for the solution of community problems and for the development of new learning opportunities for adults not adequately served by existing programs, and (5) development of a coherent federal role in support of community service and continuing education as an alternative to the "Ad Hoc" decision making which has created discrete and often overlapping federal programs. Identifiers-Minnesota, *Small Businesses

This booklet describes the Minnesota model for small business management education. The content is presented in five parts. The first discusses the economic role of small business and the need for small business management education. Part 2 discusses the development of the Minnesota model for management education for both farmers and small business operators. Part 3 on the goals and design of the business management program covers family and business goals, local need for a program, funding, logistical support, and a job description for instructors. Part 4, focusing on the instructional program, discusses instructional activities, the curriculum design, and business records and analysis. The last part briefly addresses program evaluation. (EM)

Descriptors-Dropouts, Educational Change, Educational Programs, *Employment Programs, *Federal Legislation, Females, Handicapped, *Job Training, Manpower Development, Minority Groups, Policy Formation, Program Descriptions, Program Development, Unemployment, *Vocational Education, *Youth Employment, Youth Programs

Identifiers-*Comprehensive Employment Training Act, *Youth Employment Demonstration Projects Act

This multi-authored book concentrates on how vocational education can help alleviate youth unemployment. G. Swanson reviews the role of vocational education in the nation's employment and training programs. He discusses education and training legislation, changes in legislative and program emphasis, and the national commitment to institution-based programs. R. Evans examines national youth employment legislation and its underlying issues and policies. R. Taggart and G. Wurzberg address themselves to opportunities for vocational education in youth employment and training programs. D. Robinson deals with special needs youth: minorities, handicapped, females, and dropouts. J. Rossbach illustrates effective strategies for implementing the federal youth legislation, emphasizing CETA and the Youth Employment and Demonstration Projects Act. L. D. Briggs examines components of exemplary training programs for youth. G. Venn describes successful patterns of serving youth through vocational education, emphasizing the need for educational change. Finally, L. Gess stresses the need for a national youth development policy, elaborating on the function of policy makers in stimulating youth employment. Several chapters have lists of suggested readings and addresses to write for further information. (CT)

Descriptors-Adult Educators, Adult Programs, *Adult Vocational Education, *Classroom Environment, *Course Organization, *Evaluation Methods, *Instructional Design, Job Application, Sequential Approach, Student Teacher Relationship, Teacher Characteristics, Teaching Guides, *Teaching Methods

A series of helpful tips for planning and teaching an adult course is contained in this guide. Section 1 studies the creation of a climate for learning. It includes such elements as the uniqueness of teaching adults, the characteristics of successful adult instructors, the importance of the first class meeting, getting to know the students, and providing for the physical comfort of the students. Next, section 2 examines the development of the teacher's training plan. This section is divided into two subsections: preparing the training plan and selecting instructional content. Section 3 concentrates on the selection of appropriate teaching methods. The topics discussed here include the nature of learning, emphasis on job application, learning as a self-activity, instruction sequencing, and teaching methods for various occasions. Finally, the evaluation process is examined along with its purposes and varying designs. Several charts illustrate the material and a sample quiz and evaluation form are included. (CT)

Identifiers-Education Amendments 1976, United States

This book was designed to serve as a guide for vocational education administrators in implementing comprehensive program planning (the process of forecasting the future and then preparing for it) as called for in the Education Amendments of 1976. The content is presented in ten chapters. The first provides an overview of comprehensive planning in vocational education, while the next chapter proposes a decision-making strategy for program planning. Chapter 3 covers the rationale and need for comprehensive planning at the national, state, and local levels. The focus of the fourth chapter is on information systems for planning, including the design, operations, and use of information systems. Chapter 5 on the use of resources to support planning functions discusses the securing, allocation, and management of resources. In the next chapter the human element in comprehensive planning is covered and includes staff involvement in planning and the effective use of advisory groups. Chapter 7 deals with the training of personnel to plan effectively, while the eighth chapter covers the implementation of the planning program. Chapter 9 discusses different planning techniques, such as the Delphi technique and advocate team progress. The last chapter focuses on evaluating the effectiveness of comprehensive planning. Four case studies demonstrating exemplary approaches to state plan development are appended. (EM)

Document Not Available from EDRS.

Descriptors-Audiovisual Aids, Educational Responsibility, Mass Media, Program Guides, *Program Planning, *Publicize, *Public Relations, School Community Cooperation, School Community Relationship, *Vocational Education

This handbook for vocational educators was developed as a tool to help them in their public relations efforts. Following a brief introduction, the content is presented in twelve sections. The first discusses the roles of various professionals and groups in vocational education. Section 2 covers planning a total public relations program and includes steps in planning, instructions on how to start the planning process, and keeping a public relations calendar. The next two sections cover communications with internal and external publics, while section 5 discusses using mass media as a communications tool, particularly the newspaper. Section 6 covers printed messages between vocational educators and their publics, including newsletters, brochures, pamphlets, letters, and posters. The next three sections discuss communication via visual media, verbal media, and audiovisual media. Section 10 covers advertising a program through paid advertising, billboards, and direct mail; section 11 is on planning special events, such as open houses and conferences. The last section provides guidelines for planning a National Vocational Education Week (NVEW) and includes a calendar of planning activities. (EM)

Descriptors-Curriculum Development, Demonstration Projects, Educational Administration, Educational Coordination, Educational Development, Educational Finance, Educational Improvement, *Educational Legislation, Educational Needs, Educational Research, *Federal Aid, *Federal Legislation, Federal State Relationship, Financial Needs, Financial Support, Project Applications, Research Proposals, Training, *Vocational Education
Identifiers-*Vocational Education Act 1963, Vocational Education Amendments 1968, Vocational Education Amendments 1976

Since 1963, Congress has provided funds and support for vocational education by passing the Vocational Education Act of 1963 and two sets of amendments, the Vocational Education Amendments of 1968 and of 1976. Federally authorized appropriations during this time have increased from eight million dollars in 1963 to eighty million in 1978. Enacted to replace the Smith-Hughes Act (1917), the 1963 Act was designed to meet current needs by funding projects in the areas of research, demonstration projects and models, and training. The Vocational Education Amendments of 1968 divided federal funding into three distinct categories: (1) Part C for research and training, (2) Part D for demonstration projects, and (3) Part I for curriculum development. Under this separation of funding it was found that programs often operated in isolation without continuity from research to demonstration to implementation. To correct this situation, amendments were passed in 1976 to consolidate research, exemplary and innovative programs, and curriculum and staff development into a single category. Unlike the earlier legislation, these laws restricted federal funding to applied, close-ended research projects of national significance. Despite the coordinated approach required by these statutes, curriculum development appears to be receiving less emphasis and financial support than other areas. (ELG)

This competency-based curriculum guide is designed to assist the teacher in the organization and management of the industrial arts program. It includes student performance objectives which detail the responsibilities of the teacher and the students. The competencies described in the document represent individual learning units in each of the following subject areas: automechanics, electronics, metals, residential planning, technical drawing, woods, and graphic arts. The authors suggest that these competency units described can be a basis in program evaluation which can assist in more effective planning and in maintaining an up-to-date educational evaluation of the progress of each student enrolled. In each area, the competencies are listed followed by the specification of the tasks involved. Each section also explains at what educational level the various competencies should be demonstrated and at what point students should be certified competent. Two other curriculum guides accompany this document and include performance objectives for courses in health occupations education (CE 019 076) and metals (CE 019 077). (CT)

Descriptors-Age, *Behavioral Objectives, Course Organization, Curriculum Guides, Diseases, *Health Education, Heredity, Hygiene, *Management Systems, Mental Health, *Performance Based Education, *Performance Criteria, Reproduction (Biology), Secondary Education, *Student Evaluation, Task Performance

This curriculum guide is designed to assist students in developing the ability to understand the many aspects of personal/social/mental health. It emphasizes student performance objectives in physical well-being, disease, reproduction, heredity, mental health and aging. It is also designed to assist the local teacher with organization and management of the course. The management system describes the accountability line and the information flow from the teacher to the principal and to the superintendent. First, the overall course objectives, district goals and objectives, and teacher facilitating objectives are listed. Next, the student performance objectives are presented in five units, which are titled (1) Postive Mental Health; (2) Human Sexuality; (3) Growth and Maturation; (4) Death and Dying; and (5) Man and Disease. These objectives are arranged in nine-week time frames to facilitate the collection of evaluation data at the same time as quarterly grades are issued. Appendix 1 includes a management system report time frame check lists, teacher facilitating objectives, student objectives, and a narrative report. Appendix 2 lists suggested audiovisual materials for health education on such topics as birth control; coping with emotions, aging, and death; alcohol; buying health care; and heart disease, cancer, and high blood pressure. Two other curriculum guides accompany this document and include performance objectives for courses in metals (CE 019 077) and industrial arts (CE 019 075). (CT)

This curriculum guide describes a broad range of teaching objectives and student learning experiences in several metal occupations. It also provides assistance to students in gathering data for personal decision making with regard to the metals industry as a career alternative and helps prepare students for entrance into post-high school technical programs. Specific units cover entry-level skills development in the areas of safety, metals technology, bench and wrought metal, sheet metal, art metal, forging, heat treating, foundry, welding, machine shop, metals in everyday living, and finishing. The guide is also designed to assist the local teacher with organization and management of the course. It describes the accountability line and the information flow from the teacher to the principal and to the superintendent. The management system includes measurable objectives which detail the responsibilities of the teacher and the students. The student performance objectives are arranged in nine-week time frames to facilitate the collection of evaluation data at the same time as quarterly grades are issued. The appendix contains a management system report, time frame checklists for teacher and student objectives, and a narrative report example with instructions. Two other curriculum guides accompany this document and include performance objectives for courses in health occupations education (CE 019 076) and industrial arts (CE 019 075). (CT)

Identifiers-Pennsylvania

This curriculum guide for an occupation home economics program in food management and production services is designed for use in teaching commercial food service at the high school level. (The authors state that the guide materials are also adaptable for programs of prevocation education, vocational education for the handicapped, adult vocational education, and cooperative education). Section 1 presents an overview of the guide, giving suggestions for planning, teaching, and evaluating vocational food service programs. Also included is an explanation of the design of and suggestions for using the guide. Section 2 presents ten instructional units (concepts): (1) program orientation; (2) safety; (3) sanitation; (4) applied nutrition; (5) small equipment; (6) major equipment; (7) receiving, storing, and issuing; (8) quality food production; (9) customer service procedures; and (10), food service math. Each unit includes a statement of the relevance of the material, a list of performance competencies, suggested teacher activities, and a list of key words (trade vocabulary) related to each unit. The concluding section is a teacher reference section. Provided are suggestions for involving students, presenting information, using visual aids evaluation, and managing the classroom. Also provided is a reference list of publications, filmstrips, and worksheets for this curriculum guide. (JH)

Identifiers-Ohio

To identify the major reasons why high school vocational agriculture teachers in Ohio left their teaching positions between 1970 and 1975, 134 former teachers and 118 current teachers were surveyed. Former teachers were asked to rank forty-five factors on the extent of influence each factor had on their decision to leave teaching. The five factors which were ranked as the most influential were long range occupational goals were other than teaching vocational agriculture; there were students in class who should not have been in vocational agriculture; inadequate advancement opportunities; long hours; and inadequate salary. An analysis of the relationship between demographic factors and influential factors revealed four findings, two of which are the following: as time spent in supervision of students' occupational experience programs increased, former teachers generally reported student learning difficulties and discipline problems as being less influential in their decision to leave; and the higher the reported salary during the last year of teaching the less influential inadequate salary generally became. In comparing former and current teachers, it was found that the former teachers tended to report lower salaries than the current teachers with whom they were matched. (EM)

Identifiers-National Center for Research Vocational Education

Through an examination of the background and current status of programs at the National Center for Research in Vocational Education, one can identify many research problems and issues. Some of these current National Center programs include a diffusion program (combining five U.S. Office of Education-sponsored projects), research and development (R&D) efforts (focusing on operational problems in National Center diffusion and information systems), and information system activities (including the ERIC Clearinghouse on Adult, Career, and Vocational Education, the National Center Clearinghouse, and the Resource and Referral Service). Based on these and past activities, eight issues can be identified as potential research topics concerning educational dissemination and utilization: (1) a discrepancy exists between national priorities and local user needs for the dissemination of R&D results; (2) communication processes need further development; (3) practitioner capability to obtain and use R&D information needs strengthening; (4) diffusion of innovation strategies have not been validated; (5) information about exemplary programs is not valid or reliable; (6) methods of conceptualizing and measuring the impact of R&D based information have not been developed; (7) the issue of selective versus comprehensive information systems needs resolution; and (8) the roles and relationships of public and private agencies active in dissemination and utilization need clarification. Identifiers-*Comprehensive Employment Training Act, Education Act 1976 Title II, Illinois (Chicago), Pennsylvania (Erie), Virginia

This final report summarizes the findings of the National League of Cities and U.S. Conference of Mayors concerning CETA funded programs. It also examines three case studies in Chicago; Erie, Pennsylvania; and the Virginia Peninsula. The report discusses the need for cooperation between CETA and the vocational education system. Characteristics of good skill training are outlined as well as difficulties in developing CETA programs. Ways in which Title II of the Educational Act of 1976 aid CETA program development are examined. In the Chicago case study, funding of CETA programs is explained in great detail. A flow chart illustrates Chicago's Title I CETA program, including employment services and opportunities in 1977. Much discussion is given here to classroom training. Mention is made of state funding's involvement and how Chicago's program is coordinated. The Erie and Virginia Peninsula studies cover in less detail the same areas as the Chicago study. Flow charts of Erie's Office of Manpower Services and the route taken by a prospective CETA client are included. The Virginia Peninsula study contains flow charts of the peninsula's office of manpower programs organization and the manpower service delivery system. Appended are Chicago's Acceptable Occupations list and Erie's skill needs survey of manufacturing. (CT)

Identifiers-*North Carolina, North Carolina (Duplin County)

The purpose of this project was to develop a comprehensive model plan for the articulation of public high school vocational education programs with the occupational education programs of the community colleges/technical institutes in Duplin County, North Carolina. Such a plan would serve also as a guide for articulation efforts throughout the state. Project procedures were divided into two phases. Phase I included the orientation and preparation of project participants relative to articulation concepts; the finalizing of a plan of action; the development of policies and procedures; the organization of local area joint advisory and program committees that would be used in the development of the materials; the development of job task inventories and state pilot model instruction objectives guides; application of articulation procedures; and the development of an articulation policies and procedures guide. During phase II a set of three State Pilot Model'' instructional objective guides were developed in automotive mechanics, executive secretary/business education, and drafting. A State Pilot Model'' articulation policies and procedures guide was also developed. For those programs commonly taught by numerous institutions throughout the state, it was concluded that a better quality articulated vocational/occupational education program can be developed with less cost and effort by a joint state occupational advisory and program committee than can be done at the local level. (Also available are a Policies and Procedures Guide CE 019 108 and Instructional Objectives Guides CE 019 109-111 .) (JH)

Policies and procedures for the implementation of five concepts as steps in the articulation of vocational education programs are presented. Part I of the document provides an introduction to the project and guide development. Part II, organized into six sections, contains the implementation procedures. The first section, Implementation of Concept I'' (policy guidance, communication, and support) includes the areas of area vocational/occupational education advisory committee, institutional visitations by teachers and students, and local area guidance counselors. The second section discusses administrative policies related to articulation, e.g., advanced credit to occupational qualifications, credit for work or military experience, and resource sharing. Implementation of Concept II (standardized instructional content) is presented in section 3. Topics covered include method of developing task inventories, the instructional objectives guides, and development of an instructional block. Section 4 discusses the implementation of concept III (performance standards), including development and recording of performance standards and standardized performance standard references. Section 5 discusses the implementation of concept IV (advisory committees), including purpose of local area advisory and program committee and occupational advisor functions. The concluding section presents the implementation of concept V (evolution, recognition of job qualifications, and awarding of advanced status credits). The appendixes comprise a major portion of the document and include sample format and content of the instructional objectives guides. Also available are the Project Report (CE 019 108) and Instructional Objective Guides (CE 019 109-111). (JH)

This booklet contains national standards for apprentices in vending machine mechanics. The main topic of the booklet, Provisions of Standards, includes the following: definitions of terms used in the booklet, apprenticeship qualifications, a statement on equal opportunity, employment, explanation of probation, hours of work, credit for previous experience, safety and health training, responsibilities of apprentices, related instruction, ratio of apprentices to journeymen, apprenticeship agreement, continuity of employment, resolving training problems, certificate of completion, local apprenticeship and training committee, consultants to the committee, registration information, apprentice wages, and modification of standards. Appendix A, work processes, lists the specific training skills that will be taught and how many hours will be spent on each for level 2 and 3 apprentices. Appendix B explains the recommended minimum apprentice wage scale. Sample agreements for apprentice and employer and for apprentice and joint apprenticeship committee are shown. Addresses are included for Bureau of Apprenticeship and Training Regional Offices and for the State and Territorial Apprenticeship Agencies. (CT)

A Need to Address Illiteracy Problems in the Military Services.
General Accounting Office, Washington, D.C.
Spons Agency-Department of Defense, Washington, D.C.
Report No.-FPCD-77-13
Note-37p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Armed Forces, Data Analysis, *Enlisted Personnel, *Illiteracy, Illiterate Adults, *Program Evaluation, *Program Improvement, Reading Difficulty, Reading Materials, Recruitment, *Remedial Reading Programs, Task Performance, Teaching Methods
Identifiers-*Department of Defense

To determine the effects of deficient reading skills in the military service, researchers met with military and civilian officials from four recruit training centers, major research activities personnel, and the commands accountable for education and training. Next, questionnaires were sent to fifteen recruit training centers to obtain data on the services' remedial reading programs. On-site reviews of remedial reading programs in each of the services were conducted. Several adverse effects of poor reading ability were found. Poor readers (1) were discharged at higher than normal rate; (2) face difficulty in technical training; (3) do not perform as well on the job; and (4) have limited career potential. Among the efforts of the Department of Defense (DOD) to alleviate this problem was the development of reading improvement programs. Efforts were also made to reduce the difficulty of reading material that personnel must use, but further efforts are needed in this area. Among the suggested alternatives to alleviate this problem were more selective recruitment, reevaluation and redesign of literacy training programs, and simplification of reading materials. It was recommended that more efforts in this area be made. (Locations visited and characteristics of the DOD reading remediation programs are appended.) (CT)

Descriptors-Administrative Organization, Comparative Analysis, Federal Legislation, *Fringe Benefits, *Insurance Programs, Labor Standards, Physically Handicapped, *Qualifications, State Legislation, *State Programs, Taxes, Unemployment, *Unemployment Insurance, *Wages

Identifiers-Federal Unemployment Tax Act, Social Security Act

To inform the public about details of the employment security program and how it functions, this comparison of state unemployment insurance laws is presented. The report is based primarily on an analysis of state statutes. It examines state by state the types of workers and employers that are covered under the state law, the methods of financing the program, the benefits that are payable, the conditions to be met for payment, and the administrative organizations established to do the job. The eight chapters deal with the following major subject areas: (1) coverage, (2) taxation, (3) benefits, (4) eligibility, (5) administration, (6) disability, (7) federal claims, and (8) readjustment allowance. Tables accompany each chapter. (CSS)

Identifiers-Japan (Tokyo), Trade Adjustment Assistance Program, Trade Expansion Act 1962

Taken from a December 1976, conference sponsored by the Bureau of International Labor Affairs, these proceedings present research reports on the impact of international trade and investment on U.S. employment. The research, produced or in some instances contracted and monitored by the Department of Labor, is intended to be of use to economists and policymakers. Generally, introductory remarks precede each session part and comments and replies follow the paper's presentation. In the first of seven parts, a sample of industry studies is concerned with the steel and auto industries. Proceedings in part 2 involve labor market adjustments and the issue of displacement. Part 3 introduces a paper evaluating direct labor market effects of the old trade adjustment assistance program before its reformulation under the 1974 Trade Act. The fourth part examines foreign investment and employment. In part 5 a paper is presented on international productivity comparisons. Part 6 is concerned with the effect of the U.S. tariff policy on trade and employment. The final part examines issues for research and policy and the value of research on policy making. (CSS)

Identifiers-Better Jobs for Women, *Denver

Better Jobs for Women (BJW) is an outreach program designed to place women in apprenticeships or similar unsubsidized on-the-job training programs in the skilled trade occupations. Among the first of its kind in the country, the Denver program has completed six years of operation and has placed over 400 women in more than fifty different skilled occupations. Each of the five full-time staff members focuses on a different aspect of the program. Through various recruitment methods, women are made aware of BJW's existence and purpose. Following attendance at an orientation session, about half of the applicants screen themselves out, leaving a highly motivated group to enter BJW. The enrollees are then provided prevocational counseling to assist them in occupational choice and are tutored in preparation for entry - examinations and interviews. Support services are also offered, such as child care, provision of trade tools, and counseling. In order to place participants, the staff has established an effective relationship with labor, management, and government agencies. Followup to job placement is conducted of both the women and their employers. Because of careful matching of jobs and enrollees, the program has achieved a successful record of trainee job retention. (The appendixes include job descriptions for program staff and copies of materials used during orientation, intake, placement, followup, and administrative reports.) (ELG)

Descriptors-Administration, Agriculture, Business, *Classification, *Codification, Construction Industry, Economic Factors, Financial Services, Health Services, *Industry, Insurance Companies, Manufacturing, Public Service Occupations, Real Estate, Retailing, Service Occupations, Standards, Transportation, Utilities, Wholesaling

This classification is presented to provide a standard for use with statistics about enterprises (i.e., companies, rather than their individual establishments) by kind of economic activity. The enterprise unit consists of all establishments under common direct or indirect ownership. It is defined to include all entities, including subsidiaries, where there is more than 50% ownership. The classification covers the entire field of economic activities: agriculture, forestry, and fishing; mining; construction; manufacturing; transportation and public utilities; wholesale trade, retail trade; finance, insurance, and real estate; services; and public administration. This classification is a revision of the 1968 Enterprise Standard Industrial Classification (ESIC). Most changes reflect the attempt to conform with the latest revision of the Standard Industrial Classification (SIC) (1972). (A table showing the changes is presented in the appendix.) The structure of the enterprise classification makes it possible to tabulate, analyze, and publish enterprise data on a division, two-digit, three-digit, or four-digit basis. Entries appear by field and contain the ESIC code number, the enterprise title, and the SIC code number. (CSS)

Identifiers-*Foreign Nurses, United States

A survey of fifty-one State Boards of Nursing (SBNs) was conducted to secure 1970 through 1972 information regarding the (1) number and characteristics of foreign nurse graduates (FNGs) who apply for licensure and those who fail to achieve licensure in the United States; (2) the availability and effectiveness of remedial courses and their utilization by FNGs; and (3) the number of FNGs granted temporary permits to practice pending licensure. Data were collected through a mail questionnaire sent to all SBNs and on-site review of licensure application forms at selected SBNs. The findings include the following: from 1970-1972, 43,485 received licensure either by endorsement or examination, and 6,664 received temporary permits to practice; at the time of application for licensure, the average FNG is a 29-year-old female, a graduate of a three-year nursing education program, and has seven years of nursing experience; FNGs who become licensed by examination did so in an average of 1.7 years from the time of initial application; and language and objective test style were the major problems encountered by FNGs seeking additional education. (The survey questionnaire, data transcription form, sample letters, thirty-four tables, and proposed methods for compiling uniform licensure data about FNGs are appended.) (EM)

The papers compiled here were presented at the fourth symposium in a series designed to provide a continuing introduction to current aspects of occupational safety and health. The papers represent eight topics: (1) special health programs, (2) degenerative disease and injury of the back, (3) job stress and work performance, (4) role of industry in preventive cardiology, (5) toxic compounds in industry, (6) emergency medical planning and industrial disaster, (7) industrial toxins and the community, and (8) problems in occupational health programming. Some representative titles of papers included under each of these areas consecutively are as follows: (1) How to Establish an Employee Health Service in a Reluctant Hospital; and Occupational Medical Support of a Research Hospital, (2) Examination of the Lumbosacral Spine; and Biomechanics of Manual Materials Handling and Low-Back Pain, (3) Variables in Occupational Stress; and The Stress of Relocation-Recognition and Prevention, (4) Exercise Prescription in an Industrial Fitness Program; and Cost Effectiveness in Hypertension Management, (5) Principles and Practices of Industrial Air Standards; and Contributions of the Industrial Hygienist, (6) A Pre-Triage System for Mass Casualty Care; and Electrical Injuries, (7) Arsenic Contamination Near a Copper Smelter; and The Michigan PBB Incident, and (8) The Role of Nursing in Occupational Medicine; and The Benefit-to-Risk Ratio in Occupational Health. Descriptors-Abstracts, Administrative Personnel, *Annotated Bibliographies, Banking, Bibliographic Citations, *Business, Data Bases, *Educational Administration, *Females, Governing Boards, Job Training, *Management Development, *Managerial Occupations, Recruitment, Reference Materials, Working Women

This bibliography contains a selection of recent references on women in management, primarily books and articles published from 1975 to the present, though some older items are also included. The bibliography is divided into four areas. General bibliographies, books, pamphlets, articles, papers, and information bank abstracts about women in management are found in the first section. The second section includes references concerning the development, training, and recruitment of women managers. Section 3 provides references for general information on women in business and also on the smaller topic areas of women in banking and women on boards of directors. The final section contains references for materials on women in education. Each citation includes author(s), title, bibliographic information, and a brief description about, or quote from, the document. A short description of the several data bases used in this compilation is also included. (CT)

Descriptors-Attitude Tests, Career Choice, Career Ladders, *Comparative Analysis, Economic Factors, Employee Attitudes, Employment Opportunities, Employment Qualifications, *Enlisted Personnel, Entry Workers, Family Influence, Fringe Benefits, *Job Satisfaction, Leadership Responsibility, Moral Values, Occupational Aspiration, Promotion (Occupational), Quality of Life, Security (Psychology), Self Actualization, Social Factors, *Work Attitudes, Work Environment

Identifiers-Air Force, United States

This report describes the preliminary results of administering the Occupational Attitude Inventory (OAI) to 7,567 airmen worldwide. Two-thirds of those sampled were first-term airmen. Results of the survey revealed numerous differences and similarities between first-termers and careerists. Differences and similarities were noted on background information items, job aspect items, job factors, and importance of job factors to career decisions. Job factors with the highest job satisfaction ratings were opportunities for social contact, job security, moral acceptability of job, leave and time-off policies, supervisory responsibilities, safety programs, and family attitude toward job. Factors receiving low satisfaction ratings were cost of living, status in civilian community, promotion chances based on ability, and quality of base housing and eating facilities. There was considerable agreement between first-terms and careerists on which factors are the most dissatisfying, differences existing in intensity of feeling rather than direction. Factors that rated high in importance to career decisions included such job aspects as work itself, promotion chances, economic security, and self-improvement opportunities. Of the twelve factors with high importance ratings only two were low in satisfaction ratings: promotion chances based on ability and cost of living. (Author/CSS)

Identifiers-Air Force, United States, Vocational Interest Career Examination

This report describes scales and supporting empirical documentation associated with the Vocational Interest-Career Examination (VOICE). The instrument provides a reliable quantitative basis for describing the vocational interests of people who may have little or no experience on the job and for relating this information to the appropriate choice of an occupational area. Basic interest and occupational scales are defined in terms of their relevant psychometric properties and potential applications in vocational counseling and job placement. Studies bearing on the reliability and validity of the scales for purposes of estimating future job satisfaction are summarized to provide users of the instrument with appropriate source material. Identifiers-*California

This guide explains the ways in which parents can become involved in driver education programs. In the introduction the benefits of such involvement are explained, along with suggested program development procedures for teachers or administrators to follow and suggestions for using the guide. Next, the four sessions which comprise the curriculum for this parent involvement program are presented. The sessions are structured to orient parents and guardians in the utilization of appropriate techniques and methods for extending and reinforcing critical safety aspects of high school driver instruction programs. The format of each session includes the following elements: the subtopics covered by each session; performance objectives; learning activities; teacher management activities; and instructional content. The session topics are: determining roles and responsibilities, demonstrating knowledge of basic skills, demonstrating knowledge of complex skills, and learning to drive defensively. Appendix A, guides for parents in the program, includes areas the student must learn and accompanying suggestions for parents. Other appendixes contain: (1) selected references and resources, (2) national highway traffic safety standards, (3) suggested letter announcing program to parents, (4) suggested form for parents interested in program, and (5) a questionnaire for parent participation program in driver education. This report presents the results of a survey conducted by the Bureau of Labor Statistics to determine wages and related benefits in (1) the banking industry and (2) for employees in home offices and regional head offices of life insurance carriers. Part I discusses banking industry characteristics and presents data for tellers and selected clerical and data processing jobs studied in twenty-eight metropolitan areas and New

York City. Wage and benefit information is presented for part-time bank workers. A summary of the overall survey results for the banking industry is also included. Part 2 describes the nature of the life insurance industry and contains wage and benefit information for the nation, regions, thirteen metropolitan areas, and New York City. This part also contains a summary of the results. Eleven insurance classifications are presented along with selected clerical and data processing jobs. Appendixes contain a description of salary plans for life insurance agents, the scope and method of the two survey parts, and occupational descriptions. (CSS)

Identifiers-United States

A survey was done to determine nationwide salary averages and distributions for seventy-eight work level categories covering nineteen occupations in private industry. Occupational groups included accountants and auditors, attorneys, buyers, personnel management, chemists and engineers, technical support, and clerical. Results showed that the average salaries of workers rose 7.9% from March 1977 to March 1978. Increases for eight of the twelve professional, administrative, and technical support occupations surveyed ranged from 7.8 to 9.1%; the average increase was 8.3%. The average of the increases for the clerical occupations surveyed was 7.4%; increases ranged from 6.0 to 9.7%. Average monthly salaries for the seventy-eight occupational levels varied from $552 for clerks engaged in routine filing to $4,317 for the highest level in the attorney series. For most occupations, salary levels in metropolitan areas and in large establishments were higher than the average for all establishments within the full survey scope. Salary levels and reported averages for standard weekly hours were generally lower in finance industries than in other major industry divisions represented in the survey. (CSS)

Descriptors-*Adult Education, Career Ladders, Certification, Continuous Learning, Cost Effectiveness, Delivery Systems, Employment Qualifications, Institutional Role, Job Market, Job Training, *Manpower Development, Manpower Needs, *Manpower Utilization, *Mental Health Programs, Occupational Mobility, Personnel Selection, Prediction, Program Development, Program Planning, Recruitment, Staff Improvement, *State Agencies, State Aid

To assist mental health agency leaders and others concerned with state mental health manpower development, these guidelines (presented in ten sections) explore various issues and approaches and indications for using one approach over another. The first three sections focus on designing and conducting manpower studies, making long range projections of manpower needs, and determining elements of manpower utilization. Section 4 examines the trend toward developing career systems that allow workers who demonstrate competency to move from one level to another. The fifth section explores the problem of linking educational institutions to delivery systems so that programs train sufficient persons in needed competencies. Recruitment and selection of persons for specific jobs and for training in the mental health disciplines are discussed in section 6. Section 7 reviews the meaning of licensure and certification, and the following section outlines continuing education program objectives and provider responsibilities. Section 8 addresses the need for coordinated funding and cost effectiveness studies. The final section proposes guidelines for planning and implementing a manpower development program. (Documents on the following aspects of continuing education in mental health are also available: sanctioning and credentialism CE 019 195 , financing CE 019 196 , and needs, assessment, and evaluation CE 019 197 .) Drawing from a study on mental health delivery systems, this report focuses on issues related to credentialing the mental health continuing education activities of individual workers and the programs themselves. The first of seven sections reviews the current status of sanctioning and credentialing in mental health continuing education by various disciplines, mental health agencies, and training institutions. Section 2 defines certain terms; for instance, continuing education is defined as any systematic learning experience to improve, modify, or update knowledge, skills, or values in professional or occupational practice. The third section suggests steps for providing more sanction and support for continuing education. Section 4 discusses accreditation of continuing education programs and the certification of continuing education hours. In section 5 seven issues, including complexity of the system, continuing education versus competency, and funding, are raised. Several approaches to credentialing, adopted by societies, agencies, and states, are described in section 6. The final section identifies twelve basic issues and proposes strategies to meet each issue. For example, the first issue involves linking sanctioned activities into a comprehensive continuing education system for delivery of mental health/human services. (Documents on the following aspects of continuing education in mental health are also available: state level programs for preparing and using mental health manpower in state agencies CE 019 192, financing CE 019 196, and needs, assessment, and evaluation CE 019 197.) Descriptors-*Adult Education, Continuous Learning, Cost Effectiveness, Delivery Systems, *Educational Finance, Financial Needs, *Fund Raising, Guidelines, *Mental Health Programs, Money Management, Operating Expenses, *Program Budgeting, *Program Development, Resource Allocations, Staff Improvement

Based on a study of the component parts of the mental health continuing education system, this publication presents guidelines for the following fiscal functions: determining funding needs, obtaining funds, budgeting funds, expending funds, and cost accounting. In addition to considering these components, the guidelines explore principal issues in the funding of mental health continuing education and point up strategies which may be used in developing financing patterns at national, regional, and state levels. In the first of seven sections, instructional and administrative expenses in continuing education are discussed. Section 2 examines possible sources of funds and funding mechanisms, and section 3 categorizes major budget areas and provides guidelines for the expending of funds. Section 4 reviews the cost accounting of funds according to various criteria. The following section raises issues in funding mental health continuing education. In section 6 major resources required for the provision of mental health services and strategies for expanding the support for mental health continuing education are presented. The final section summarizes the guidelines and includes the task force conclusions and recommendations. (Documents on the following aspects of mental health continuing education are also available: state level programs for preparing and using mental health manpower in state agencies CE 019 192 , sanctioning and credentialing CE 019 195 , and needs, assessment, and evaluation CE 019 197 .) Descriptors-Accountability, *Adult Education, Certification, Delivery Systems, Evaluation Methods, Guidelines, Health Needs, Institutional Role, *Mental Health Programs, *Needs Assessment, Personnel Needs, Program Development, Program Effectiveness, *Program Evaluation, Staff Improvement

In addition to reporting on the technology of needs assessment and evaluation, these guidelines examine the context in which certain technologies should be employed, the opportunities/limitations of different methodologies, and the rationale for assessing needs and evaluating. The guidelines, intended for personnel at various levels and different stages of program development, are aimed at improving current practices and assisting in the establishment of new program practices. The first of six sections deals with the current state of the art how needs assessment and evaluation are currently being done. The second section analyzes a series of issues as well as enabling and inhibiting factors in the mental health field and their relationship to continuing education. In the third section the report develops operational definitions for the terms needs assessment and evaluation for continuing education in mental health and describes the consequences of lack of definition. Section 4 discusses and analyzes a series of models for needs assessment and evaluation for continuing education in mental health and their use in various settings. The fifth section suggests strategies for conducting evaluations. The final section presents recommendations for needs assessment and evaluation. (Documents on the following aspects of continuing education in mental health are also available: state level programs for preparing and using mental health manpower in state agencies CE 019 192 , sanctioning and credentialing CE 019 195 , and financing CE 019 196 .) Identifiers-*Nurse Practitioner

Data were gathered on 134 maternity and pediatric nurse practitioners to determine what types of work experience, educational backgrounds, and personality traits were most conducive to successful orientation and commitment to the nurse practitioner role. The study population, comprising six separate groups trained in six-month continuing education programs, were studied at the time of program entry, at the end of training, at six months after training, and at fifteen months after training. Varied data collection methods were used during these four time periods, such as personality tests, competency inventory, student followup program evaluation surveys and personal interviews. Some of the major findings are as follows: (1) practitioners who were self-confident and assertive, and combined these qualities with warmth and dependability, did better than those who lacked these characteristics; (2) the most common changes that the practitioners reported were increased self-confidence and satisfaction with nursing as a career; (3) those practitioners who felt most competent in their skills were likely to be more assertive and self-confident; (4) those practitioners who were more highly committed and working as a nurse practitioner rated themselves as more competent than their less committed counterparts; and (5) the work setting in which the practitioners were employed affected their sense of commitment and competence in the role. Identifiers-Kentucky

The project reported here was done in Kentucky to develop, field test, evaluate, and revise 300 competency-based vocational education (CBVE) instructional modules in five occupational areas. These areas are automobile mechanics, air-conditioning and refrigeration, court and conference reporter, alterationist, and gardening and groundskeeping. This report begins with a brief description of the project rationale, goals, procedures, and results. Then follows an extensive appendix which comprises most of the report. The appendix begins with a management handbook for the production of vocational education modules, which covers module development, field testing (includes observation record form), revision (includes module evaluation form), payment procedures, and reporting procedures. Next is a list, by occupational area, of the modules and slide/tape presentations developed during the project. The remainder of the appendix contains a list of module writers, workshop agendas for module production, a list of field test teachers, and workshop agendas for field test teachers. The final portion of this report is comprised of supplements and includes a list of inservice education modules, a handbook for the development of vocational education modules, and a list of brochures explaining Kentucky CBVE. The overall objective of this project was to produce a guidebook to help vocational educators gain skills in working with handicapped students in regular classrooms. The first step in the project was to assess barriers and identify ways to overcome them. Barriers were classified into the following categories: attitudinal, architectural, work environment, placement, and barriers to curriculum modification. Difficulties within categories were identified by a literature review, an advisory panel, vocational and special educators, and others concerned with handicapped training and placement. The second step of the project was to prepare a guidebook acceptable to the vocational education community. The guidebook which identified and described practical ways to overcome barriers was reviewed and critiqued by an advisory panel and special and vocational educators not previously involved in the project. The guidebook was revised accordingly. Step 3 involved the dissemination of the guidebook through a commercial publishing company. (Appendixes include project abstract, meeting topics, synopsis of current information, forms to list problem areas and resources, sample completed survey form, telephone guide and recording form, prospectus and list of publishers, flyer describing the guidebook, list of interested publishers, and publication contract.) Identifiers-*Career Decision Making Program

The Career Decision-Making Program (CDM) for secondary school students consists of approximately fifty individual products which can be used as a semester course, a six-to-eight-week exploratory course, independent units, or outside of the CDM program in other career guidance activities. The CDM program has two components: (1) the Exploring Career Decision-Making (ECDM) curriculum materials and (2) the Career Information System (CIS), a comprehensive organization and management system for career information resources. The fifteen ECDM curriculum units were designed to assist students in the development of career planning and decision-making skills through a group process for individualized career exploration. Each unit is self-contained and employs a variety of materials and techniques, including filmstrips, worksheets, and hands-on activities. Utilization guides were also developed for the teacher/counselor conducting the units. The CIS component and the ECDM materials were field tested as a total unit at thirty-eight sites within sixteen states. Overall, evaluations were favorable, and revisions were made to implement the suggestions made by users during the field testing. (This document contains the final report and provides a description of CDM program development, model design, product development, field testing, evaluation plan, dissemination, and the revision of the Dictionary of Occupational Titles.'' The ECDM materials are available in ERIC as CE 019 231-232; the CIS materials, CE 019 233-240; and a guide to related filmstrips, CE 019 241.) (BM)

Identifiers-*Career Decision Making Program

The Career Decision-Making (CDM) Program consists of two components: the Exploring Career Decision-Making (ECDM) curriculum materials and the supportive Career Information System (CIS). (See CE 019 229 for a description of the total CDM program.) This document contains the teacher's guide to the ECDM materials, which represent fifteen career guidance units. The units are sequenced to provide a career exploration and decision-making course for secondary school students. In the text, the units are designed as a semester course with students meeting five periods a week; however, selected units may be used for a shorter course or independent units. The first four units focus on career decision-making, self-exploration, and occupational exploration. These units introduce the basic skills that students will use throughout the program. Units 5-10 use the Career Information System components (CE 019 233-240) of the CDM program to provide experiences in exploring Worker Trait Groups and occupations in terms of personal characteristics. In units 11-13, students examine major social, environmental, and economic influences on career decisions. The two final units help students utilize exploration and decision-making skills in developing or clarifying career plans and tentative occupational choices. Each unit contains an introduction, a unit overview, a list of key terms, major concepts, activities related to each concept, and a summary. Specific instructions for the teacher are included in the margins. An activity booklet, CE 019 232, contains charts, graphs, checklists, etc., that accompany many of the activities in the text. (BM)

The text contains fifteen units which are sequenced to provide a career exploration and decision-making course for secondary school students. The first four units focus on the central program concepts of career decision-making, self-exploration, and occupational exploration. These units introduce basic skills that students will use throughout the program. Units 5-10 use the Career Information System component (CE 019 233-240) of the CDM program to provide experiences in exploring Worker Trait Groups and occupations in terms of personal characteristics. In units 11-13, students examine major social, environmental, and economic influences on careers. The two final units help students utilize exploration and decision-making skills in developing or clarifying career plans, including tentative occupational choices. (BM)

Identifiers-*Career Decision Making Program

Designed for teachers and counselors, this professional manual provides detailed information for utilizing access materials and setting up the Career Information System (CIS) component of the Career Decision-Making (CDM) program developed by Appalachia Educational Laboratory. (See CE 019 229 for a description of the total CDM program.) The first section of this manual provides an overview of the CIS component. The second section contains detailed instructions for installing and maintaining the CIS in a variety of settings. (A companion document, CE 019 234, contains a file content notebook utilized in the installation of the CIS component.) This section also contains three attachments: materials and equipment list; career area-worker trait group list; and worker trait group index to commercial briefs. Finally, the third section provides utilization guides for the following CIS materials: (1) Individualized Activities for Career Exploration; (2) Work Activities Checklist; (3) Work Situations Checklist; (4) Aptitudes Checklist (CE 019 235); (5) School Subject-Worker Trait Group Chart and School Subject-Occupation Index (CE 019 240); and (6) Worker Trait Group Keysort Deck (CE 019 236). Identifiers-*Career Decision Making Program, *Dictionary of Occupational Titles

The Career Information System File is utilized in the organization and management procedures of the Career Information System (CIS) component of the Career Decision-Making (CDM) Program developed by Appalachia Educational Laboratory. (See CE 019 229 for an overview of the total CDM Program.) The twelve career areas and worker trait groups used to organize and index career information resources in CIS are based upon the Area-Group structure of the Dictionary of Occupational Titles'' (DOT), Fourth Edition. This file content notebook is used as a worker trait group (WTG) index to all DOT main titles of materials stored in the WTG vertical file. The notebook has a divider for each of the twelve areas and sixty-six worker trait groups. As material is processed into the system, the DOT main titles can be entered on the preprinted forms behind the appropriate WTG divider. Then a tally mark can be made to show how many pieces of information are in the file for a particular DOT main title. Specific procedures for developing the file content notebook are found in the CIS professional manual, CE 019 233. (BM)

The activities in this booklet are designed to help students achieve the following objectives: (1) learn as much as possible about the world of work; (2) learn as much as possible about themselves; (3) develop the skill to make sound educational and vocational decisions; and (4) accept responsibility for making their own career decisions. This booklet is part of a set of materials which make up the Career Information System (CIS) component of the Career Decision-Making (CDM) program developed by the Appalachia Educational Laboratory. (See CE 019 229 for an overview of the total CDM program.) Thirteen activities are included in this booklet and focus on the following topics: goal identification, career information, and career exploration. Several charts are included for graphing student responses. Three forms are appended: Work Situations Checklist, Work Activities Checklist; and Aptitudes Checklist. (Counselor and teacher instructions for using the activity booklet and appended checklists are included in CE 019 233. A student's guide also accompanies this document see CE 019 239.) (BM)

Identifiers-*Career Decision Making Program, *Keysort Decks

This Worker Trait Group Keysort Deck accompanies the reference and instructional materials found in the Career Information System (CIS) component of the Career Decision-Making (CDM) program developed by Appalachia Educational Laboratory. (Directions for the use of the keysort deck are found in the CIS professional manual, CE 019 233, and the CIS student guide, CE 019 239. A full description of the CDM program is found in CE 019 229.) This keysort deck may be used to identify Worker Trait Groups related to students' interests, abilities, and other personal characteristics. Students sort the cards on the basis of these characteristics, using the following sorting factors: Work Activities, Work Situation, General Educational Development, Preparation, and Physical Demands. The title, the number, and a brief description of the Worker Trait Group are printed on each card, as well as a listing of occupational subgroup examples. (BM)

Identifiers-*Career Decision Making Program

This Worker Trait Group Guide was designed for students as a basic reference in the Career Information System (CIS) component of the Career Decision-Making (CDM) program developed by the Appalachia Educational Laboratory. (See CE 019 229 for an overview of the total CDM program.) This guide contains descriptive information about twelve broad areas and sixty-six groups of occupations. The twelve areas are related to general work interests of people; the sixty-six groups are divisions of the twelve areas and represent clusters of occupations requiring similar worker characteristics, hence the title, Worker Trait Groups (WTG). The twelve WTG areas are the following: artistic, scientific, nature, authority, mechanical, industrial, business detail, persuasive, accommodating, humanitarian, social/business, and physical performing. Each worker trait group is divided into three parts: a description of the group; a list of worker qualifications; and a list of occupations in the group. Nine appendixes are provided to help the student better utilize the qualifications profile section in each Worker Trait Group. (A professional manual, CE 019 233, and student's guide, CE 019 239, explain how this document is used in conjunction with other materials in the CDM Career Information System component.) (BM)

Identifiers-*Career Decision Making Program, Dictionary of Occupational Titles, Encyclopedia of Careers Volume II, Occupational Outlook Handbook

This document contains two occupational information indexes. The first index is an arrangement of the occupational titles contained in the Occupational Outlook Handbook" (OOH). The information in this index is arranged in four columns: (1) the numbers to identify the CDM Career

Area-Worker Trait Group code; (2) Worker Trait Group title, DOT title, and OOH title; (3) the nine-digit DOT classification code; and (4) the page number of the 1976-77 edition of the OOH on which information about the occupation is found. The second index is an arrangement of occupational titles contained in Volume II of the Encyclopedia of Careers (EOC). It is based on the Career Area-Worker Trait Group structure of the Career Information System component of the Career Decision-Making (CDM) Program developed by Appalachia Educational Laboratory. (See CE 019 229 for an overview of the total CDM program.) This Career Area-Worker Trait Group structure is similar to the Area/Group structure of the Supplement to the Dictionary of Occupational Titles (DOT), Fourth Edition. The index itself is arranged in five columns: (1) numbers identifying the CDM Career Area-Worker Trait Group code; (2) Worker Trait Group title, DOT title, and EOC title; (3) the nine-digit DOT classification code; (4) the page number of the 1975 edition of the EOC on which information about the occupation is found; and (5) the page number of the 1972 edition of the EOC on which information about the occupation is found. (See CE 019 237 for a full discussion of the CDM Career Area-Worker Trait Group classification system.) (BM)

Identifiers-Career Decision Making Program

This School Subject-Occupation Index is part of a set of reference materials found in the Career Information System (CIS) component of the Career Decision-Making (CDM) program developed by Appalachia Educational Laboratory. (See CE 019 229 for an overview of the total CDM program.) This index was designed to relate Worker Trait Groups (WTG)and occupations to school subjects. It can be used to assist students in career exploration and planning or to assist teachers in relating information about the world of work and occupations to the courses they are teaching. The index has three main parts. Part I, the School Subject-Worker Trait Group Chart, quickly identifies school subjects and WTG's that are related. Part II of the index is divided into fifty-six sections, one for each school subject; each section describes the subject, lists the related occupations by WTG, and identifies the specific subject and occupational relationship. Part III contains a listing of the Worker Trait Groups; the occupations related to each WTG are listed in alphabetical order with their industry designation abbreviations in parentheses. (A professional manual, CE 019 233, and a student's guide, CE 019 239, explain the uses of this index in conjunction with other CDM materials.) (BM)

Identifiers-Education Amendments 1974, Salt Lake City School District UT

Olympus Research Centers, in a joint effort with the Salt Lake City School District, designed and produced a package of material to extend the benefits of career education to preschool children in the home. The materials were to serve as resource tools and discussion vehicles for parent training groups. The guiding concept was that parents should be trained to provide positive career education support experiences to their children in the home. The materials produced were a book, Your Child's Career''; a film; six filmstrips and audio cassettes; and a parent-teacher guidebook. The materials were developed by a group of qualified professionals in consultation with an advisory board made up of school administrators, teachers, and parents. The group included representatives of all ethnic groups in the Salt Lake City area, handicapped and non-handicapped individuals, and an approximately equal ratio of males and females. After the materials were developed, two pilot parent training groups were organized, and the materials were evaluated by those groups. The evaluation included pre- and posttests, tape recordings of the sessions, and personal interviews with participants following completion of the training program. In general, the evaluations can be best described as positive.'' Suggestions offered by the parent training groups were incorporated into the materials before final production. (Author/CT)

Identifiers-National Accreditation Council

This guide on developing an agency profile is one of 28 guides designed for organizations serving the blind and the visually handicapped who are undertaking a self-study as part of the process for accreditation by the National Accreditation Council (NAC). Instructions for preparing a packet of informative data and material for advance study by members of a site review team are provided. Profile areas described are the following: (1) statement of philosophy of service; (2) agency profile developed from documents or publications (e.g., authorizing instruments, governing authority, annual report to the public), and from tabular data (e.g., personnel utilization by vision status, staff assignment and certification, and persons served); (3) community profile, including information about the geographic area served by the agency, estimated population of the blind and visually handicapped persons in that area, and summaries of key relationships with other agencies, schools, services, and organizations; and (4) a listing of the members of the self-study coordinating committee. Identifiers-National Accreditation Council

This self-study and evaluation guide on social services is one of twenty-eight guides designed for organizations who are undertaking a self-study as part of the process for accreditation from the National Accreditation Council (NAC) for agencies serving the blind and visually handicapped. Provided are lists of standards to be appraised by the self-evaluation teams or the extent to which the organization meets the standards (excellent, satisfactory, adequate, poor, minimal, and not applicable). Areas of standards considered are policy, organization, and administration; social work; recreation; camping; group residential care; and financial assistance. Throughout the guide, space is provided for written comments to be made such as an explanation of a rating or why a standard did not apply. The concluding part of the guide provides six questions designed to permit the agency to describe its program for evaluation and indicate plans for improvement of its social services. (Other accreditation guides are available see note.) (JH)

Descriptors-Budgeting, Conceptual Schemes, Conferences, *Cost Effectiveness, Diffusion, *Educational Change, *Information Dissemination, Problem Solving, Program Effectiveness, *Program Improvement, Secondary Education, *Systems Development, Vocational Directors, *Vocational Education

A project was developed to improve vocational administrators' program management skills through diffusion of the cost-effectiveness analysis system which was developed at Indiana University-Bloomington. Specific objectives were (1) to summarize the cost-effectiveness analysis system, (2) to develop a conceptual framework for the system's diffusion and adoption, and (3) to conduct a statewide conference on cost-effectiveness analysis of secondary vocational programs. Based on a literature review, the educational change process was conceptualized as a problem-solving process; a research, development and diffusion process; and a social interaction process. A conceptual framework was developed for the diffusion and adoption of the cost-effectiveness analysis system. The conceptual framework for the diffusion and adoption of the cost-effectiveness analysis system will be useful in developing strategies for diffusion of the research and development products and in evaluating their impacts on educational change. In system diffusion some available methods were utilized and a statewide conference was conducted for Indiana vocational administrators. The statewide conference proved to be valuable in increasing vocational administrators' understanding of the system and in gaining support for its adoption. The conference's activities constitute the foundation of a national priority training workshop. (Author/CSS)

Identifiers-Education Amendments 1976

This publication, compiled as a learning component for persons enrolled in a vocational education teacher education program, provides information on sex equity in vocational education and employment. The content is in nine sections. The first defines sex discrimination, bias, and stereotypes. The next section covers female participation in the work force and includes entry rates, earnings, and economic need. The third section compares the participation of women and men in vocational training programs. Federal laws pertaining to sex equity are briefly summarized in the fourth section, while the fifth compares the Education Amendments of 1972 with those of 1976. The next section presents the provisions of the Education Amendments of 1976 regarding the administration of state vocational education programs, state use of vocational education funds, and national vocation education programs. The recruitment of students into courses nontraditional to their sex is discussed in the seventh section. The last two brief sections, respectively, discuss the program planning process and provide a list of source materials. A teacher self-assessment form on sex equity and vocational education and a test on the publication's content are appended. (EM)

Descriptors-Community, *Community Development, Community Education, *Community Involvement, Community Programs, *Concept Formation, *Conceptual Schemes, Conflict, Demonstration Programs, Experimental Programs, Power Structure, Problem Solving, *Program Design, *Program Development, Program Planning

Six approaches to community development are presented by several authors in this booklet. Chapter 1 presents an introduction to the community development concept. In chapter 2, L. J. Cary emphasizes three distinctive features of the community approach: (1) popular or broad-based participation, (2) community as an important concept, and (3) the holistic nature of concern. In The Information Self-help Approach'', H. Y. McClusky suggests that the right kind of information applied by knowledgeable participants at strategic junctures can make a difference in community development. In chapter 4, R. Thomas places heavy emphasis upon the special problem'' as the target for resolution in a problem-solving approach. He illustrates how a common interest in a particular problem goes beyond the limited locational criteria of community. W. M. Evensen, writing on the experimental approach, reveals a growing concern among agencies and institutions in the application of a quasi-experimental design to community-development activities. G. S. Abshier, in The Demonstration Approach,'' emphasizes the difference between a true experimental program and a demonstration. Finally, R. J. Salmon and G. A. Tapper discuss the dynamic approach of power-conflict. They explore the meaning of power in the community-development process today. Biographical sketches of the authors are included. (Author/CT)

Identifiers-*Colorado Educ Network for Resource Enrichment

This catalog provides an annotated list of the career education materials which may be borrowed for previewing from the Career Education Resource Center in Colorado. Covering materials of interest to educators in kindergarten through postsecondary programs, the catalog includes items produced by classroom teachers, commercial publishers, business and industry, and state and federal projects. The major topics by which the materials are categorized are as follow: classroom subject areas such as mathematics, language, art and home economics; consumer education; guidance; reference, including information on teaching strategies and historical background; career clusters, as defined by the U.S. Office of Education; and business and industrial materials. The section on Community Resources contains the following information: (1) a description of the State Community Resource Bank philosophy and objectives; (2) a listing of program directors to contact for local community resource information; (3) how to order this information; (4) a list of firms, organizations, schools, and other community groups to contact for information; (5) a list of 15 U.S.O.E. occupational clusters; and (6) a list of statewide museums with descriptions and information on location, hours, tours, fees, and grade level. The types of materials include audiovisual aids, lesson plans, student materials, bibliographies, dictionaries, learning activity packets, teacher guides, and textbooks. (CT)

Identifiers-Army, United States

A study was done to determine the feasibility of using the culture assimilator (a programed learning experience) as a race-relations training technique for junior grade officers. The assimilator is intended to help individuals of one culture better understand the point of view of individuals of another culture. Assimilator items focus on critical incidents'' or situations likely to result in cross-cultural misunderstanding. The incidents in this case were based on taped interviews of black and white officers and enlisted personnel from several Army installations. Four responses with feedback were prepared for each of 100 problems. Field tests were done with eighty-four white junior grade officers and eighty-five black junior grade officers. Results indicated (1) the assimilator's sample problems represented events more familiar to black officers than to white officers; (2) blacks obtained higher scores on the assimilator than whites; (3) evidence of learning by white officers as a function of assimilator training was obtained; (4) evidence was obtained that attitudes and knowledge changed as a function of training; and (5) the face validity of the results was compromised somewhat by uncontrolled testing factors, such as subject fatigue. Identifiers-Army, United States

A cultural assimilator was developed to teach white junior officers about black culture in the army. Scenarios involving misunderstandings between blacks and whites in the army were presented, and respondents were asked to identify ``correct'' reasons for the misunderstandings. In the first of three field tests respondents showed evidence of learning from assimilator training, but cultural sensitivity to black culture on a related measure did not increase, and stereotyping was not reduced. In a second assimilator field test subordinates rated their company commanders as being more effective in race relations when commanders demonstrated greater knowledge of black culture. However, this was true only for white and Hispanic subordinates and not for black subordinates. A third assimilator evaluation and follow-up showed that neither self-reports nor supervisor nor subordinate reports provided evidence that trained personnel were seen as being more effective in race relations than those who received no training. it was concluded that assimilator scenarios may be useful training aids as part of race-relations discussions but are not likely to have a strong favorable impact by themselves. Identifiers-United States

Dan Dunham, my Deputy Commissioner, and I agreed on six top priorities for occupational and adult education to guide our administration in the days ahead. First, we agreed that we must continue to expand access. Second, we must have equity of opportunity. Third, we must develop better accountability and data systems in vocational education. As a fourth priority, we must enlarge our capacity in vocational education to provide the most effective guidance. Fifth, we must have closer linkage between vocational education and the basic and life skills. Sixth, we must have a close and workable relationship between CETA (Comprehensive Employment and Training Act) programs and vocational education. We must work together to build a new kind of work/education structure to serve a generation of lost students. Today 24 percent of high school students drop out before they finish, often without jobs and essential skills. Jobs for the under-educated are scarce and often non-existent. There is a mismatch between the services we promote and the needs of those who leave school early. However, there are pieces of programs to serve their needs, such as the Work Experience and Career Exploration Program and Title I of CETA. It is time to develop a unique kind of institution to help the dropout unemployed youth. (EM)

Descriptors-Data Analysis, *Demography, Educationally Disadvantaged, Employment Opportunities, *Employment Projections, *Employment Statistics, Financial Policy, Government Role, Job Skills, Labor Market, Minimum Wage Legislation, Minority Groups, *Policy Formation, Racial Discrimination, Tables (Data), Tax Rates, *Unemployment, *Youth Employment, Youth Programs

Nearly one-half of all unemployed persons in the U.S. today are between the ages of sixteen and twenty-four even though that age group accounts for only one-fourth of the total labor force. Unemployment among sixteen- to nineteen-year-olds is currently more than fifteen percent, and among twenty- to twenty-four-year-olds it exceeds ten percent. The projected decline in the size of the youth population will not significantly affect youth unemployment until approximately 1980, and even then the impact will not be sudden or dramatic. At present, the unemployment rate for nonwhite teenagers is almost three times the rate for white teenagers. Racial discrimination, inadequate skills and education, location in economically depressed areas, and intensified competition as a result of the rapid influx of white teenagers and adult women into the labor market are contributing factors. Results in this study suggest that (1) monetary and fiscal policies can be used to reduce youth unemployment, as well as unemployment in general; (2) government policies established for other purposes, such as increases in the minimum wage and in payroll taxes, reduce employment opportunities for teenagers; and (3) the data presented in this study on differences in unemployment rates among subgroups of youths may be useful in targeting youth employment programs. (Statistical tables are included.) (Author/CT)

This conference report covers the Comprehensive and Employment Training Act Amendments 1978 to provide improved employment and training services. The first two-thirds of the report presents each of the eight titles comprising the amendments. Title 1 covers the administrative provisions, both organizational and general. Title 2 on comprehensive employment and training services focuses on financial assistance provisions, services for the economically disadvantaged (includes youth, older workers, and public assistance recipients), and occupational upgrading and retraining. The third title stipulates special federal responsibilities, including special national programs and activities for Native Americans, migrant workers, veterans, handicapped persons, and older workers, as well as information on efforts in research, training, and evaluation. Title 4 provides for youth programs, such as Youth Incentive Entitlement Pilot Projects, Youth Community Conservation and Improvement Projects, Youth Employment and Training Programs, Job Corps, and Summer Youth Program. Title 5 establishes the National Commission for Employment Policy, and the sixth title provides for the Countercyclical Public Service Employment Program. Title 7 covers private sector opportunities for the economically disadvantaged while the last provides for the establishment of a Young Adult Conservation Corps. The last third of the report notes the differences between the Senate bill and the House amendment and the substitute agreed to in conference. (EM)

Identifiers-*Advanced Simulation for Pilot Training, Air Force, United States

A transfer-of-training design was used to evaluate the contributions of simulator training with synergistic six-degrees-of-freedom platform motion to aerobatic skills acquisition in the novice pilot. Thirty-six undergraduate pilot trainees were randomly assigned to one of three treatment groups: motion, no-motion, and control. Those in the control group received standard preflight/flightline instructions. Experimental subjects received five sorties in the advanced simulator for pilot training (ASPT), covering instruction on basic and advanced aerobatic tasks. All students received a fixed number of repetitions per task. Student performance in ASPT was evaluated periodically throughout pretraining using instructor pilot (IP) ratings for overall task performance and of special data cards. Airborne performance was evaluated by the flightline instructor pilot using the same data card format used during the ASPT phase. Findings were (1) using IP ratings, no differences in motion and no-motion groups' performance emerged, (2) using special data cards, no consistent differences emerged between motion and no-motion groups, (3) significant learning occurred during simulator training for both groups, (4) experimental groups performed significantly better in the T-37 than did the control group, and (5) no significant differences emerged in T-37 performance between motion and no-motion groups. Identifiers-California

A descriptive model of the Fire Education Resources Information System (FERIS) is examined in this document. Information regarding educational materials relating to fire prevention, protection, and suppression is discussed. A description of the model is presented in two sections. Section 1, Problem Definition, surveys the background and needs for such a system, research methodology, user communities, services and products, objectives and performance criteria, and staffing recommendations. Section 2, System Design, presents the model itself. It contains information on normal system operations, access distribution, search/organization, system interaction flow, input, central file structure, output, media campaign, equipment recommendations, growth of the system, cost estimates, and the FERIS task-planning schedule. A bibliography follows this section. Appendixes include the frequency distribution of survey responses and the comparative analysis of machine-aided indexes, which include examples from the following systems: Library of Congress; Books in Print''; Educational Resources Information Center (ERIC); Current Index to Journals in Education (CIJE); and the National Information Center for Education Media (NICEM). To provide information on subjects of concern to those in planning, management, and delivery of human services, this journal presents 149 abstracts from literature in the human services field. The journal is divided into five parts: the abstracts themselves, arranged in alphabetical order by title, with bibliographic and availability information; an alphabetical list of authors; an index of 1978 materials; an alphabetic list of documents; and cumulative subject index. The indexes provide a guide to the abstracts by specific subject category. Categories are listed alphabetically and include cross-references between conceptually related index terms and cross-references from synonyms to the preferred terms. Specific numeric citations follow the preferred index terms. Document accession and ordering numbers appear on the left and as the last line of each citation. (Volume 3, no. 3, of this journal is available in ERIC as ED 160 770.) (CSS)

Identifiers-Pennsylvania

This compilation of pamphlets and other educational materials on current issues in nutrition provides elementary and secondary teachers with a list of free or inexpensive materials to help them implement nutrition education into the existing curriculum. This list, organized in alphabetical order by topic, contains 293 entries and each one includes some or all of the following: title, author, type of publication, publisher, source, publication date, price, and order number. Some representative topics are as follows: additives, athletes' diet, basic four food groups, breakfast, children, dental health, Food and Drug Administration, food myths, general nutrition, health education, hyperactivity, labeling, minerals, nutrition education, pregnancy, vegetarianism, vitamins, and weight control. The addresses of sources are attached. (EM)

Descriptors-*Behavioral Objectives, Case Studies, Educational Resources, Elementary Secondary Education, Foods Instruction, *Interdisciplinary Approach, *Learning Activities, Nutrition, *Nutrition Instruction, State Curriculum Guides, Student Evaluation, Teaching Guides

Identifiers-Pennsylvania

This curriculum guide was developed to help teachers from pre-school through secondary grade levels provide an interdisciplinary approach to teaching nutrition. This guide begins with eleven instructional units, varying from two to twenty pages in length, on basic nutrition and other selected topics. Each unit includes some or all of the following: rationale, topic, and behavioral objectives correlated with suggested student learning activities. The eleven units are as follows: (1) nutrition and the pre-schooler, (2) nutrition in the elementary grades (includes mathematics, social studies, language arts, and science and health), (3) mini nutrition unit for middle schools, (4) nutrition and social studies-secondary level, (5) nutrition and physical fitness, (6) nutrition and home economics, (7) food additives, (8) fad diets, (9) nutrition labeling, (10) nutrition and the single adult, and (11) snack food sense. Then follow thirteen one-to-two-page case studies of typical nutritional problems encountered by students. Each case study consists of a brief description of the case situation followed by six to eleven questions regarding the case. A brief discussion of student evaluation and a list of available resources conclude this guide. (EM)

Descriptors-Ability, Armed Forces, *Behavior Development, Environmental Influences, Habit Formation, *Learning Processes, Memory, Military Training, Overt Response, *Psychomotor Skills, *Recall (Psychological), *Retention, Retention Studies, Retraining, Task Performance, Training Techniques, Transfer of Training
Identifiers-Army, United States

A summary of an extensive literature survey deals with the variables known or suspected to affect the retention of learned motor behaviors over lengthy no-practice intervals. Emphasis was given to research conducted by or for the military. The variables that may affect the retention of motor skills were dichotomized into task variables and procedural variables. The task variables that may underlie the long-term retention of motor skill include (1) duration of the no-practice period, or retention interval; (2) nature of the response required to accomplish a particular motor task; (3) degree to which the learner can organize or impose order upon the elements that define the task; (4) structure of the training environment; and (5) initial or natural'' ability of the learner in performance of a task without prior practice. The procedural variables that may affect the long-term retention of motor skill include (1) degree of proficiency attained by the learner during initial training; (2) amount and kind of refresher training; (3) transfer of skills on one task to performance on another task; (4) presence of interfering activities; (5) distribution of practice during training; (6) use of part-task versus whole-task training methods; and (7) introduction of extra test trials prior to final testing. Descriptors-*Abstraction Levels, Armed Forces, Communication (Thought Transfer), Comparative Analysis, Cues, *Driver Education, *Foreign Countries, Lecture, Methods Research, Military Training, Retention, Slides, *Symbolic Learning, *Traffic Signs, *Training Techniques, Visual Learning

Identifiers-Army, United States

The drivers in a battalion about to be deployed to Germany were taught the meanings of international road signs using one of the following techniques: Sign Only, in which the road signs were presented via a slide projector and the names of the slides provided orally by the instructor; Sign Elaboration, which was identical to the Sign Only condition except that mnemonic cue was provided to facilitate retention of the sign's meaning; and a Standard Control condition, in which a lecture presentation was supplemented with standard training aids. No significant differences were obtained in the performance of the groups. The analyses of the interpretability of individual signs indicated that there was good reason to question the interpretability of many international road signs. Apparently, the more abstract the symbolic representation, the lower the interpretability. Training should stress selective instructional strategies for the more abstract signs and have a longer instruction period. (Author/CSS)

Descriptors-*Ancillary Services, Blacks, Caucasians, Disadvantaged Groups, Educational Opportunities, Employment Experience, Employment Programs, Employment Qualifications, *Employment Services, Federal Programs, Females, *Job Training, Males, Participant Characteristics, Statistical Data, Wages, *Welfare Recipients, *Work Experience Programs, Working Women
Identifiers-Aid to Families with Dependent Children, United States, *Work Incentive Program

The activities presented in this Work Incentive (WIN) program report are those designed to assist the movement of employable Aid to Families with Dependent Children (AFDC) recipients from welfare to work and economic independence. The first of seven sections presents statistics on WIN programs, including (1) intake, (2) individuals employed, (3) job entries, and (4) employment programs. Section 2 reviews some statistics and reports that in 1977 over 420,000 WIN participants entered jobs or training programs. Section 3 describes the WIN AFDC relationship and the WIN population by sex, race, age, and years of school completed. For example, nearly three-fourths of WIN registrants in 1977 were women; somewhat more than half were white. The fourth section reviews the general WIN services and the particular employment, training, and supportive services. The WIN job entries and hourly entry wages are reported in section 5. Program funding is discussed in section 6. The final section focuses on the WIN research, demonstration, and evaluation efforts. For instance, 1977 research studies examined the WIN population and the best ways to provide assistance to that group. The appendix contains statistical data on WIN participants. A glossary is included. (For a related document see ED 149 046.) (CSS)

Descriptors-Access to Education, *Equal Education, Federal Legislation, Guides, *Parent Responsibility, Parents, School Responsibility, *Sex Discrimination, Sex Stereotypes, *Vocational Education

This booklet was developed to introduce parents to sex fairness in vocational education. First, it presents the pictures of two women and two men and explains why they are enrolled in their particular vocational education programs. It then asks parents to consider whether they can see their daughters and sons in occupations nontraditional to their sex. These questions are followed by some statistics regarding women's work force participation, including wages. Next, the implications of these facts for both daughters and sons are discussed. Then follows a discussion of the current enrollment of men and women in vocational education programs which are not traditional for their sex. The concluding portion of this booklet discusses the things parents can do to help their children overcome stereotyping and help schools provide equal opportunity. (EM)

Identifiers-*Full Employment and Balanced Growth Act 1978

The Full Employment and Balanced Growth Act of 1978 is reproduced in its entirety. The act, public law 95-523, is designed to translate into practical reality the right of all Americans to full opportunity for useful paid employment at fair compensation rates; to assert the federal government's responsibility to use all programs and policies promoting full employment and balanced growth; to require the president each year to set forth short-term/medium-term economic goals; to achieve better integration of general and structural economic policies; and to improve economic policymaking coordination within the federal government. The act contains a table of contents and four titles, each of which embodies various sections. The titles include (1) the establishment of goals and general economic policies, (2) structural policies and programs, including treatment of resource restraints, (3) policies and procedures for congressional review, and (4) general provisions. Identifiers-Better Jobs for Women, Comprehensive Employment Training Act, Manpower Development Training Act, Nontraditional Occupational Program for Women

The participation of women in the skilled trades increased appreciably between 1960 and 1970; however, the rate of increase was not as large as could have been expected if women had entered the skilled trades at the same rate they entered the total civilian labor market. The gap between men's and women's median earnings was greater in 1970 than in 1960, but in the skilled trades the decrease in women's earnings in proportion to men's was smaller. The participation of women in the skilled trades appears to be higher in larger companies in large metropolitan areas than it is on the average nationwide. Also, proportionately more minority women are employed in the skilled trades by such companies. Women continue to be underrepresented in both apprenticeship training programs and vocational/technical education programs for the skilled trades even though affirmative action regulations and special stimulus programs have made some gains. Women have been well represented as participants in federal government training programs; however, they have been disproportionately concentrated in programs which lead to low-paying and low-skill jobs. Government funded outreach projects for women designed to prepare and place women in pre-apprenticeship, apprenticeship, and traditionally male blue-collar jobs have increased from one program in 1971 to over eighty in 1978. Now it is time to determine the effectiveness of these programs and to analyze which combination of factors is optimal the project designs, the skills/characteristics of women selected, the support/training offered, and the follow-up services. Identifiers-*Non Traditional Occupations

Focusing on counseling programs and support services for increasing the participation of women (postsecondary level) in occupations traditionally dominated by men, a study examined opportunities, needs, and support systems relevant for women seeking to enter either nontraditional professional or nonprofessional occupations. The data collected covered the following categories: opportunities in nontraditional professional occupations; characteristics of women choosing traditional and nontraditional professional occupations; counseling/support services for women in math, science, and management; role models used to increase nontraditional participation; counseling services/resources for college women; counseling services aimed at changing change agents; legislative support for women entering nontraditional occupations; participation of and support programs for women in nontraditional, nonprofessional occupations; and apprenticeship training. Positive trends were identified in several nontraditional occupational fields where female enrollments in professional training have increased during the past decade. Seen as a result of several factors rather than the result of any one programmatic effort, these increases were facilitated by legislation and efforts by states and institutions to recruit more women. Promising projects were identified that aimed at influencing educators, parents, and students to change their attitudes and behaviors. (BM)

Descriptors-*Bilingual Education, *Bilingual Students, Career Awareness, *Career Development, *Career Education, Career Exploration, Educational Coordination, Educational Experience, Instructional Materials, Migrant Education, Non English Speaking, Program Descriptions, Program Evaluation, *Program Planning, Second Language Learning, Student Characteristics, *Student Needs, Vocational Education, Vocational Maturity

A study was conducted to explore the evolution of career education concepts and its application to the bilingual population. The literature search reviewed theory as well as research papers, surveys, other literature searches, program descriptions, and state vocational/career education plans. Agencies which produce literature and other career education support of bilingual families and their children were also reviewed. The findings were synthesized to identify programmatic requirements and to establish directions for national and state planning efforts. Among the findings are these: (1) language is a critical factor in planning specific career education programs for bilingual persons; (2) children of bilingual families, where two languages are critical for survival, demonstrate distinctive, more adult, social maturity; (3) the school system loses its holding power'' on bilingual children during the seventh through ninth grades; (4) career-related materials in bilingual format are virtually non-existent; and (5) state and local planning of career and vocational education, bilingual education, and migrant education have not been coordinated. One of the four major recommendations suggests that bilingual career awareness materials (K-6) and bilingual career exploration materials (K-7) be developed concurrently in terms of career education concept development, languages appropriate for student and/or parents, and the environment of the bilingual family. (BM)

Identifiers-*Non Traditional Occupations

The impetus for developing a model to retrain women teachers and skilled women to become teachers in traditionally male-intensive secondary vocational education has emerged from a combination of problems and issues. The most pertinent of these involve the factors of supply and demand, coupled with the need to reduce sex stereotyping and bias in employment. A retraining program should respond to the need for female teachers in male-intensive vocational programs by state and should identify where the need for such a program is greatest. The major conceptual issues that must be addressed in proposing a retraining model include the characteristics of the women for whom the program is being designed, the certification requirements of the state, job growth potential, and time required to attain skill levels and operate the retraining model. Other factors involved in planning the model are evaluation, funding sources, and packaging the program. The two areas that consistently offer the most opportunities for employing teachers in male-intensive vocational programs in most states are trade and industrial education and industrial arts. Some aspects to consider in retraining women in these areas are program design, work experience, competency-based programs, and preservice and inservice training. Recruitment practices, selection of applicants for pilot programs counseling, and various support programs must be carefully planned to insure that the first group of women entering these positions has a positive and successful experience. Descriptors-Adult Education, *Agricultural Education, Career Education, Curriculum, Curriculum Guides, Disadvantaged Youth, *Educational Research, Followup Studies, *Instruction, Performance Based Teacher Education, Postsecondary Education, Program Administration, Program Evaluation, Program Planning, *Research Needs, Secondary Education, State of the Art Reviews, Student Teaching, Task Analysis, *Teacher Education, Teacher Recruitment, Teacher Shortage, *Vocational Agriculture, Vocational Agriculture Teachers

Research studies in agriculture education conducted between 1969 and 1978 are analyzed to provide an overview of representative studies in the following areas: teacher education, instruction, curriculum, student services, recruitment and retention of teachers, disadvantaged students, program planning, evaluation studies, administration and supervision, adult education, postsecondary agricultural education, and career education in agriculture. (All studies selected relate to secondary and postsecondary vocational agriculture programs in the United States.) After research in each area is reviewed, summary comments are presented to indicate trends, patterns, and important findings in that area. Finally, overall conclusions and recommendations are presented based on the total review of the research. Some of these conclusions are as follows: (1) even though the profession has an abundance of task analysis information and nationally prepared curriculum guides available for all specialty areas, little attempt has been made to evaluate task lists or curriculum guides using actual field observations; (2) even though there appears to be sufficient work completed in identifying the professional competencies needed by vocational agriculture teachers, the profession could benefit from coordinated inquiry into which competencies improve student learning; and (3) even though there is substantial documentation of the shortage of vocational agriculture teachers, to date there is no evidence of a recruitment program successful enough to attract the attention of the profession. Descriptors-Abstracts, *Annotated Bibliographies, Career Awareness, *Career Education, Career Exploration, *Community Involvement, *Community Resources, Experiential Learning, *Program Descriptions, School Community Programs, School Community Relationship, *School Industry Relationship

Identifiers-*Business Industry Labor Linkage, *Experience Based Career Education

This selected annotated bibliography was published as a result of the evident interest by educators, as well as the general public, in the issues of community resources and community involvement in career education. The abstracts of 125 studies conducted since 1975 were selected and organized under the following categories: community resources (52 entries); community involvement (48 entries); Experience-Based Career Education (16 entries); and Business-Industry-Labor Linkage (9 entries). The last two categories were added to give the reader a ``flavor'' of what is to be found in the two related areas of experience-based career education and business-industry-labor linkage. There is some overlap in the four categories; however, the selections were made on the basis of the primary focus of each particular entry. The annotations are listed under each category in order of recency of ED numbers, with the current ones first. (BM)

Descriptors-Adult Vocational Education, Citizen Role, Consumer Economics, *Daily Living Skills, *Educational Needs, *Employment, Employment Interviews, Employment Qualifications, Family Management, Health, Home Management, Interpersonal Competence, Job Skills, Job Training, Leisure Time, *Performance Based Education, Rating Scales, *Success Factors, Surveys, Task Performance, Work Attitudes

To develop a competency-based program, a study was done to identify important life skill competencies needed for job success. Educational constituents concerned with vocational education (students, educators, and community members) rated a set of 138 competencies in six life skill areas: citizenship, consumerism, health, home and family, leisure, and work. Each competency was rated on a scale from one to four, the most important to least important for job success. The 289 participants were identified by role, age, subject area, ethnicity, sex, and school location. Data were analyzed, and overall group and subcategory ratings were translated into a rank order of competencies. It was found that highly rated competencies were generally the same among the overall group and categories. Survey results were used to develop a list of twenty-four highly-rated competencies to be used in the development of competency-based instructional modules. The top three competencies were interpersonal relations on the job, evaluation of job performance, and job interview. (Among the appendixes are the competency list, the competency rating survey, demographic variables of participants, results disseminated to participants, and tables of rank orders of competency ratings.) Identifiers-School to Work Transition

The three papers compiled here provide educators and others involved in career education with some information regarding the relationship of career education and organized labor. The first paper, a conference speech by Peter A. Bommarito, President of the United Rubber Workers, presents an official policy statement on career education from the rubber, cork, linoleum and plastic workers. The second paper, by Dr. Mark Schulman of Antioch College, comprises one-half of this monograph and covers the problems organized labor faces with respect to career education. The content of this paper is in three parts. The first part discusses the issues regarding the relationship between career education and labor and includes theoretical, conceptual, and operational considerations; the second part explores the short- and long-range implications of strategies to consolidate or modify labor participation in career education; and the last part offers tentative conclusions and summarizes the paper's content. The third paper, by Kenneth Hoyt, Director of the Office of Career Education, presents the views expressed by members of organized labor at a seminar dealing with the role and function of organized labor in the career education effort. His paper focuses on seven topics, some of which are the following: the kinds of career education activities in which organized labor should participate; how the K-12 school system should obtain resource persons from organized labor; organized labor representation on community career education action councils; and involving organized labor on career education field trips. Descriptors-*Career Education, Change Strategies, *Community Colleges, Cooperative Education, Cooperative Planning, Educational Alternatives, *Educational Change, Educational Objectives, *Higher Education, Liberal Arts, Postsecondary Education, Vocational Education

The four papers compiled here deal with career education at the postsecondary education level. The first paper on career education and liberal arts in higher education discusses the goals of career education and higher education, liberal arts as a preparation for work, and career education as one change alternative currently available to higher education. The next paper identifies a number of paradoxes facing the implementation of career education in higher education and then discusses the issue in terms of the students, administration, staff, and faculty. The third paper on career education at the community college level discusses career education as a strategy for change in the community college, particularly in liberal arts and occupational education. The last paper presents strategies for marketing cooperative and work experience education and then discusses the benefits accruing from the collaboration of cooperative, work experience, and career education at the secondary and postsecondary levels. Descriptors-*Administrator Attitudes, Data Analysis, *Handicapped Students, *Mainstreaming, *Needs Assessment, Program Development, Program Planning, Questionnaires, Research Methodology, Secondary Schools, Surveys, *Teacher Attitudes, *Vocational Education, Vocational Education Teachers
Identifiers-Delphi Technique, North Carolina

A study was made to identify needs and barriers related to the mainstreaming approach and to assess attitudes of secondary principals and occupational education teachers toward mainstreaming and their perceptions of needs and barriers. The design of the project involved a three-phase research effort. The first phase utilized the Delphi Technique with local occupational education program administrators to identify needs and barriers. The second and third phases involved mail surveys of principals (N 101) and occupational education teachers (N-568). It was found that principals and teachers were neither highly accepting nor highly rejecting of the mainstreaming approach. Priority needs and major barriers were identified and their implications for program planning discussed. Teachers and principals expressed general agreement on the priority needs and major barriers, and held similar attitudes toward mainstreaming. It was recommended that future mainstreaming efforts utilize this project's products in overcoming the major barriers and in coordinating programs. Information was derived on a statewide basis to guide development and operation of vocational education programs for North Carolina's handicapped students. (Appendixes contain identification of mainstreaming needs and barriers, survey packets for secondary school principals and occupational education teachers, and a dissemination conference report. References and data tables are included.) (Author/CT)

Descriptors-*Course Content, Course Evaluation, Course Objectives, Course Organization, *Curriculum Development, Curriculum Guides, *Instructional Materials, Medical Education, Needs Assessment, *Practical Nurses, Program Content, *Program Design, Questionnaires, *Refresher Courses, Surveys, Teaching Methods
Identifiers-Nebraska

A project was designed to implement a curriculum for a short-term re-entry course for licensed practical nurses (LPN) who wish to return to employment after some absence. Southeast Community College used an advisory committee of RNs and LPNs to assist in identifying objectives, content, and method of instruction. A survey questionnaire was mailed to inactive LPNs to ascertain needs and inform them of the project. Existing curriculum materials (LPN curriculum and RN refresher curriculum) were used as resources. Participants were contacted afterwards to aid in course evaluation. The curriculum was disseminated throughout the state. Materials developed as a result of the project were course objectives, course curriculum including case studies of nursing problems, and a bibliography. Mid-course and end-of-course evaluations were very positive and the project is expected to continue. (Included in the document is a sample course survey, summary of questionnaire returns, letter to participants, memo to inactive nurses explaining the program, response card, and the curriculum guide. The curriculum guide contains the course syllabus, list of steering committee members, course objectives, evaluation form, and course content, including: introduction to the course, update in nursing, update of LPN skills, case studies, and considerations for employment.) Descriptors-Attendance, Dropout Attitudes, Dropout Characteristics, Dropout Identification, *Dropout Prevention, Dropout Research, *Dropouts, *Educational Development, High School Students, Occupational Aspiration, Potential Dropouts, *School Holding Power, Secondary Education, Student Attitudes, Student Characteristics, Student Motivation, *Vocational Education

Identifiers-Rhode Island

The problem of early school leavers within a system that offers a wide range of vocational training at the secondary level is examined. Focus is on factors that influence a student to opt for a vocational program rather than remaining in a comprehensive high school or dropping out of school. By means of interviews and school attitude questionnaires, data were collected from 96 tenth-grade vocational students and 114 early school leavers in two Rhode Island communities. Additional information was gathered through school personnel interviews and school records. The findings include the following: the dropout rates for vocational schools are lower than their affiliated high schools; vocational students as compared to early school leavers had fewer school absences, better grade averages, and higher scores on intelligence tests and the California Achievement Test; and, for the most part, vocational students were career-oriented and chose their vocational program because it fit their future plans. (This report concludes with several suggestions for improving vocational education and dealing with potential school dropouts. The appendix includes the interview forms, school attitude questionnaires, personnel questionnaire, school record data collection sheet, a list of programs in Rhode Island for dropouts, and a list of courses and extracurricular activities common to urban and suburban schools.) The workshop reported here was held to allow key personnel from secondary education and community colleges in Virginia an opportunity to explore existing problems as well as potential strategies relating to improved articulation of vocational programs at both levels. The content is presented in three parts. The first contains the three major addresses: Making a Mesh of Vocational Education,'' by David S. Bushnell; Articulation, Road Map to Employability,'' by Richard Carlson; and Two Plus Two Equals Four or More?'' by W. Robert Sullins. The next part presents the following three out-of-state articulation models: urban model at Milwaukee Area Technical College, Wisconsin; suburban model at Williamsport Area Community College, Pennsylvania; and rural model at Coosa Valley Vocational Technical School, Georgia. The last part summarizes three small group activities on problem identification, strategy identification, and identification of workable strategies. The appendixes include information pertaining to the following: pre-workshop problem identification activity, small group assignments, small group activities, articulation problems and strategies identified during small group activities, workshop program, bibliography on articulation, and the names of State Steering Committee members, workshop planning committee members, and workshop participants. This study was undertaken to determine if variations in the quality of vocational education offered in prisons, and the skill level developed by participants in these programs, are related to the inmates' post-release adjustment. It proved difficult to execute the study as designed, and the collected data were neither as numerous nor as complete as originally planned. Although it was possible to identify several variables that predict a former inmate's life satisfaction and encounters with the law, the evidence did not clearly demonstrate that particular aspects of a prison vocational education program have an effect on the post-release experiences of former inmates. The generally negative findings in this study do not suggest that vocational training in prison is ineffective. Rather, they indicate that we do not know what features of the training make it more or less effective. (Appendixes contain 1 a description of the seven correctional institutions, 2 instruments used in the study, 3 summary of inmate follow-up field experiences, 4 institutional data, participant data, reliabilities and intercorrelations, and discriminant analyses, and 5 profiles of the seven correctional institutions. Identifiers-North Carolina

A study was done to determine North Carolina inmates' vocational education/training needs, parolees' and ex-offenders' employment opportunities, and available vocational education/training resources. To determine vocational educational needs, a survey was conducted of inmates at seventeen correctional units (for adults and for youth). Estimates of parolee or ex-offender job opportunities were obtained by adjusting North Carolina Bureau of Employment Research employment projections, and by examining employer hiring practices and legal employment barriers. A questionnaire was developed to determine vocational education program offerings of community colleges and private trade, technical, and vocational schools. Study results showed that (1) ninety percent of inmates (sample equalled 545) indicated an interest in taking vocational courses while in prison; yet less than nine percent were enrolled in courses; (2) although automotive mechanics was the most frequently chosen option, only nine of seventy-seven prison facilities offered training in this area. Food service, chosen by only one out of nine, was the most frequently offered; and (3) most job openings were in industrial service, office, and construction occupations. Generally, employers considered the hiring of offenders as individual decisions. Study results revealed a fragmented statewide approach to vocational education for correction inmates. (CSS)

Identifiers-Wisconsin

A project was conducted to improve the employability and employment prospects for students by (1) identifying non-job task skills and characteristics important to job acquisition and retention, (2) constructing an instrument to assess the identified skills and characteristics, (3) pilot testing the instrument with graduates from two postsecondary vocational technical institutions, one urban and one rural, in Wisconsin, (4) writing up the results with suggestions regarding further use of the instrument, (5) determining future research and development needs, and (6) disseminating information and products. Some of the methods used to accomplish the objectives were a literature review to identify skills and characteristics important for job acquisition and retention, surveys of graduates, employers, and school staff responsible for placement to verify and expand the findings of the literature review, and a search and review of existing tests and inventories. Project staff developed the following products: Job Seeking and Job Keeping: An Annotated Bibliography,'' A User's Guide to Selected Published Tests in Career Education and Career Guidance,'' Employability: Review and Survey,'' Employability Inventory,'' Employability Inventory: User's Guide,'' and an Employability Inventory: Findings and Analyses.'' This report consists of a background and discussion of the methods used to design the employability inventory as well as results obtained from field testing it with graduates from and current students at two postsecondary vocational technical institutions in Wisconsin. Results obtained are reported in number and percentage distribution tables along with results of statistical procedures used in analyzing reports. Analyses presented consist of comparisons between various groupings of the field test subjects. Graduate subjects are grouped and compared according to employment status, program area completed, rural or urban locale, sex, and experience (age). Comparisons are also made between the responses of current students and those of successfully employed graduates from the same general programs. The report concludes with a discussion of the findings, suggestions for further research, and possible implications for practitioners. Appendixes contain samples of the employability inventory and correspondence concerning the inventory. (CSS)

Identifiers-Wisconsin

A consortium of five Wisconsin Vocational, Technical, and Adult Education (VTAE) Districts (Gateway, Indianhead, Mid-State, Milwaukee, and Southwest) were utilized to identify, verify, and alleviate barriers to enrollment. A VTAE survey in 1976 identified six major reasons for individuals' failing to attend school after indicating an interest in doing so: postponement of schooling, need to earn money, inability to decide, finding a permanent job, lack of financial aids, and transportation problems. Each district conducted a 1977 survey to verify and/or identify barriers. Most verified that inability to decide'' was a major factor in not attending a VTAE school. Gateway District used intervention techniques/no intervention to test the effects of increased information on student's decision to attend. The control group (no intervention) surprisingly had the highest percentage registration. Indianhead District reported that instructor contact and school mailings

reduced "no shows." Mid-State District discovered that the percentage of those attending at a later date could be increased 1% by informational mailings. Unlike the 1976 survey, the Milwaukee District survey found the most important reason for not attending was acceptance at another school. The Southwest District survey showed that job security, need for money, career indecisiveness, and program difficulties were main enrollment barriers. (CSS)

The overall purpose of this project was to expand the vocational education curriculum to provide adults with entrepreneurial competencies which will facilitate self-employment. More specifically, the project goals were to (1) develop and implement modules of instruction in entrepreneurship for adults in self-employment and potential entrepreneurs; (2) develop a staff development program for adult educators; (3) develop and implement a communication system which will provide more visibility to occupational training for adults; and (4) coordinate realistic training experiences in entrepreneurship. (Objectives are stated in performance terms in the narrative of the project.) Twelve modules were developed which adequately cover the entire spectrum of small business ownership. Content specialists developed technical content materials for the selected entrepreneurial modules. A selection of on-site teams pilot tested the materials. Staff development activities included three seminars and a two week workshop. The project culminated with self-contained instructional modules in the identified areas of entrepreneurship and media for maximizing vocational technical education for adults. Overall evaluation results indicated that the modules were successfully developed and widely accepted among state and local adult and vocational educators. (Evaluation design summary charts are appended.) (Author/CT)

A project studied the feasibility of delivering instructional modules via a computer-managed instructional system for preparing and certifying inservice vocational education teachers. The project developed a computer-based system to deliver and manage instructional modules, developed and field tested twenty instructional modules, and developed a procedure for evaluating the effectiveness and efficiency of individual performance-based modules as delivered by a computer-based system. The project served fifteen inservice vocational education teachers and attempted to meet project objectives by (1) utilizing performance-based teacher education modules stressing individualized instruction via a computer-managed system, (2) utilizing advisement processes that will be improved by setting aside blocks of time at each vocational education setting, (3) developing performance-based modules to limit time spent in a North Carolina A&T State University classroom and increase course-content meaningfulness in meeting inservice needs of teachers in their unique setting, and (4) reducing class meetings through independent studies aided by instructional modules and on-site instructor observations. The project demonstrated that it was feasible to develop a computer-managed instructional system that can individualize instruction for students and provide activities consistent with professional course requirements. An exemplary project was initiated in March of 1977 as a jointly operated project with Arrowhead Area Education Agency 5 and Iowa Central Community College. The purpose of the effort was to analyze the potential and demonstrate the components of the Experience-Based Career Education Appalachia Education Laboratory (EBCE-AEL) model for mildly mentally disabled secondary students. The project included establishing procedures, editing and rewriting component parts, and developing experience sites, inservice training, implementation, and evaluation in all phases. Program components include the following: Cross-Reference Catalogs in Personal/Social Skills, Math, Career Education, and English/Communication (CE 019 711-714); Student Career Guide (CE 019 715); a Resource Person's Guide (CE 019 719) and a Learning Coordinator Guide (CE 019 720). (Other related documents include Experience Site Learning Guides CE 019 717 , and the Formative Evaluation Plan CE 019 716 .) (JH)

Descriptors-*Career Education, Career Exploration, *Career Planning, Check Lists, *Educable Mentally Handicapped, *Experiential Learning, Individualized Instruction, Learning Activities, Personal Interests, Secondary Education, Self Evaluation, Values, Work Attitudes, Work Experience Programs

This student career guide is designed to assist mildly mentally disabled secondary students to examine personal characteristics and to relate these to various work placements. Following a brief overview of the guide (section I), section II contains four feedback activities designed to allow students to explore their preferences in work situations and to compare the on-site experience with presite activities and academic work. There is a chart for relating school subjects and occupations through worker trait groups, a work activity checklist, a work situation checklist, and an aptitudes assessment exercise. Section III explores sixteen values in relation to the world of work. Provided are two exercises, one to be completed during orientation and the other while at a site placement. Section IV is composed of twelve experience-site placement activities dealing with types of businesses, preferences for ideas, people, or things, physical conditions, finding work, adaptive skills, physical demands, education and training, occupational mobility, work benefits, labor unions, and sex roles. A site-placement log is also provided to record the results of the activities. Section IV provides ongoing summary activities to be completed after each site placement and an end-of-the-year assessment. (Other guides within the program are Formative Evaluation Plan CE 019 716, Experience Site Learning Guides CE 019 717, Student Program Guide CE 019 718, Resource Person's Guide CE 019 719, and Learning Coordinator Guide CE 019 720. This guide describes the types of instruments to be used in the evaluation of Iowa's experience-based career education (EBCE-MD) project for mildly mentally disabled secondary students. Part I provides an overview of the formative evaluation data required for project operation. Copies of various instruments are included (instructor questionnaire, student interview, principal and local board member questionnaire, and EBCE student end-of-year questionnaire). Part II pertains to the formative evaluation of project staff. Provided are an overview of data requirements and a resource person questionnaire. Part III provides an overview of evaluation data requirements for EBCE-MD students. Instruments pertaining to student evaluation include an employer evaluation of students, a nine-week evaluation form, and a parent opinion survey. Finally, section IV describes the project log in which the three types of data are to be summarized and stored. (Other guides in the program are Student Career Guide CE 019 715 , Experience Site Learning Guides CE 019 717 , Student Program Guide CE 019 718 , Resource Person's Guide CE 019 719 , and Learning Coordinator Guide CE 019 720 . Provided are samples of three experience-based career education (EBCE) experience-site learning guides. Each sample is organized into four basic parts. The first part describes the nature of the site (e.g., name of site, address, lunch arrangements, special regulations). The second part gives a brief description of the different sections of the experience site (e.g., bookkeeping, pricing, installation). The third part provides information about the resource person (RP), including job title, number of students the RP can handle at one time, and special kinds of possible involvements with students that the RP can expect. The fourth part gives a brief description of each RP's job in task-statement form. General activities are identified regarding what a student could do while placed with each RP. These general activities are categorized as to whether the student may only observe, perform with no prerequisites, or perform with specified prerequisites. The fourth part also describes specific skills areas in which the student would become involved. (Other guides in this program are Student Career Guide CE 019 715 , Formative Evaluation Plan CE 019 716 , Student Program Guide CE 019 718 , Resource Person's Guide CE 019 719 , and Learning Coordinator Guide CE 019 720 . This student program guide is designed for mildly mentally disabled secondary students in experience-based career education programs (EBCE). Section I provides a brief overview of the document. Section II contains four activities for use in determining career interests and aptitude; included is a chart for relating school subjects and occupations through work trait groups, a work activity checklist, a work situation checklist, and an aptitudes assessment summary. Section III contains a worker trait group (a comparison of kinds of work, work activities, and work situations) and a sample experience-site selection form. Section IV provides a sample form of an EBCE student program outline (basic student information, educational history and needs, a summary of courses, credits, and objectives chosen to meet needs, and a place for student and instructor signatures). Section V contains sixteen EBCE course descriptions, including title, general content, examples of sites and activities which fit courses, and curricular areas related to each course. Section VI provides a course and interest matrix (sixteen EBCE courses are compared with the EBCE concepts, subconcepts, and interest areas). The concluding section includes a sample individual program management form to be used for student progress assessment and updating. (Other guides in the program are Student Career Guide CE 019 715 , Formative Evaluation Plan CE 019 716 , Experience Site Learning Guides CE 019 717 , Resource Person's Guide CE 019 719 , and Learning Coordinator Guide CE 019 710 . Identifiers-*Resource Staff

This guide is designed for people in the community who volunteer their time and work places for experience-based career education programs for mildly mentally disabled secondary students. The first section provides explanations of experience-based learning, resource persons, community explorations, student projects, and task analysis. The second section provides a brief checklist to be used for planning time with students. The third section discusses student expectations of resource persons, suggestions for what to say, and hints for being an effective resource person. The next section discusses a resource person's role in evaluating student learning and describes what four students gained from a community experience. Also provided is an interview with an experienced resource person. The concluding part contains questions and answers relating to resource persons (e.g., student behavior problems, child labor laws, and liability). (Other program guides are Student Career Guide CE 019 715 , Formative Evaluation Plan CE 019 716 , Experience Site Learning Guides CE 019 717 , Student Program Guide CE 019 718 , and Learning Coordinator Guide CE 019 720 . This booklet on Ontario (Canada) apprenticeship programs describes regulated and non-regulated trades in the following four categories: (1) construction, (2) industrial, (3) motive power, and (4) service. The introductory section covers what apprenticeship is, educational requirements, credits for academic and skill achievements, finding an employer, and certification. The remainder of the booklet covers from thirteen to twenty-one trades within each of the four trade categories and for each trade includes the following: education requirements, length of training program, minimum wages, duties and skills, and other information (includes dates that regulation and certification became effective). Some representative trades included under each of the four categories respectively are as follow: (1) brick and stone mason, construction boilermaker, electrician, general carpenter, and lineman; (2) general machinist, mold maker, tool and die maker, chemical plant operator, and patternmaker; (3) alignment and brakes mechanic, farm equipment mechanic, motor vehicle mechanic, service station attendant, and small engine mechanic; and (4) baker, barber, dry cleaner, hairdresser, and butcher. A list of miscellaneous non-regulated trades is attached. (EM)

Descriptors-*Adjustment (to Environment), *Adult Education, Blacks, Counseling, Curriculum, Educational Administration, Educational Attitudes, Instruction, Measurement, Migrant Education, *Migrants, Program Planning, Rural Education, *Rural to Urban Migration, *Rural Urban Differences, Self Esteem, Skill Development, Social Relations, Testing, Transfer of Training, *Urban Education

As part of a panel on rural education, Dr. Edgar M. Easley spoke on the topic Urban-Rural Education - Relieving the Tension''. Based on findings from literature of adult migration to urban areas, Dr. Easley stated the following implications for adult education teachers and administrators: (1) that the tension found in rural migrants related to adult education is personal, and in great measure attitudinal; (2) there are four areas in which tension can be reduced: curriculum, counseling, social interaction, and support services; (3) studies indicated much of the beliefs about rural-urban transition is myth or half-truths; (4) more data is available on comparisons of rural and urban blacks than other ethnic groups; (5) implications can be drawn from the data relative to program planning; (6) some data is inconclusive and does not provide a definite answer to questions posed; (7) the key to relieving the tension in rural migrants is adaptation, rather than novel or segregated programs for rural migrants; (8) administrative concerns do not appear to be as important as instructional concerns; and (9) future studies should investigate the following areas of concern: curriculum, reliable tests and measurements, transfer of skills programs, and self-esteem enhancement. Identifiers-United States

This monograph is a review and analysis of over fifty research and development projects sponsored by the Office of Research and Development which have dealt with welfare recipients and the low-wage employed. The author examines the process by which welfare recipients move into the employed ranks and the extent to which this is accomplished through participation in employment and training programs. It is pointed out by the author that women receiving Aid for Families with Dependent Children (AFDC) fall into three groups: about 10% who are on welfare most of their working years, about 40% who fluctuate between low-income employment and welfare, and about 50% temporarily on welfare because of circumstances. A significant reported finding is that AFDC mothers with the highest education and recent work experience leave welfare more readily than other mothers. In addition, about half of the children of welfare households move out of poverty. According to the author, people move off welfare when they find jobs to enable them to achieve a higher living standard than welfare provides. Studies reviewed by the author demonstrate that 47% of the low-income people employed may remain poor, 25% may be out of poverty most of the time, and 28% may be out of poverty about half of the time. Descriptors-*Criminal Law, *Decision Making, *Guidelines, Justice, *Models, *Parole Officers, Policy Formation, Program Descriptions, Program Development

The general purpose of this study was to develop and implement, in close collaboration with parole authorities in various states, improved procedures for parole decisions. A discussion of the general nature of the paroling policy or guideline models sought is presented, with emphasis on providing a means for repeated assessment and revision of policy. This is followed by the general methods used. Two types of guideline models were developed, called sequential and matrix models. The specific guidelines produced with the seven different jurisdictions are presented, utilizing the two general model types. Suggestions for guideline development based on experience in this study are presented, as is a discussion of differing models and of some moral issues that arise from the results of the project. The report is generally addressed to parole board members and others in leadership positions in the criminal justice system. (KA)

Descriptors-College Curriculum, *Delivery Systems, *Educational Games, *Employment Qualifications, Higher Education, *Job Skills, Organizational Effectiveness, Program Descriptions, *Simulation, *Skill Development, Training

This monograph is one of a series developed for curriculum in higher education which prepares personnel for employment in local, state, and regional levels of Employment and Training Administration programs of the U.S. Department of Labor. This publication describes a simulation game called Pipeline'' rather than a regular university course. The game is intended to represent major aspects of employability programs and to surface a number of issues related to the organization, management, and delivery of services in employment and training programs. The constraints of the game allow participants to assume ownership for their actions during the game, thereby assisting participants to locate problem areas and to pose solutions. At the end, participants move from a simulated setting to a better understanding of the real problems which exist within Employment and Training Programs. This document addresses the following topics: an overview of development and employability programs, simulation of the employability system, game preparations, rules, game facilitator's responsibilities, and debriefing. Descriptors-*Career Development, Counseling, Decision Making, *Delivery Systems, Employment Counselors, *Employment Qualifications, Guides, Higher Education, *Job Skills, *Occupational Guidance, *Program Planning, Skill Development

This monograph, produced by the Manpower Development Higher Education System, is designed to lead service deliverers through a series of lectures, exercises, and demonstrations which will enable them to understand the essentials of putting together an employability plan which is consistent with both the principles of human development and the limitations of program and labor market. Trainees should already possess fundamental interviewing, assessment, and relationship skills. The two-day training program contains an overview of the entire employability process through a simulation game. This is complemented by a series of activities which relate to the various aspects of employability planning such as assessment, job choice, and tracking of participant progress. Topics addressed include: work role as a personality modifier, decision making, assessment, behavior contracting, behavioral objectives, Goal Attainment Scale, and Employability Planning forms. Descriptors-Delivery Systems, *Educational Programs, *Health Personnel, Health Services, *Mental Health, *Professional Continuing Education, Program Descriptions, *Program Planning, Seminars, *Sex Education, Sexuality, Training

This final report describes three 10-day training programs for health professionals which were conducted in 1975, 1976, and 1977. All included a mixture of general sex behavior information and special health and mental health topics, methods of presentation (e.g.; lecture, panel, audiovisual, etc.), and types of presentors (e.g.; researchers, service providers, service consumers, etc.). All three programs included an optional two-day attitude reassessment workshop. Each successive program was altered in accordance with two main sources of suggestions - - the evaluations of the participants in the preceding program, and recommendations of staff members concerning trends in public interest, new research findings, and reports from other training programs. The model'' program [illegible] therefore, three programs offered one time each to three different groups of participants. A training the trainers'' effect is described. Project implications important to planners of training programs in human sexuality are drawn together in a set of guidelines. All materials developed for the project are included. (Author/JLL)

Sex Differences in Initiation of and Adjustment to Divorce.

Pub Date- 76
Note-25p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Adjustment Problems, *Divorce, Family Problems, *Marital Instability, Marital Status, *Marriage, Research Projects, *Sex Differences, Suicide

Men and women were randomly chosen from courthouse divorce files. After initial contact by mail and by phone, those who agreed were mailed questionnaires developed to assess adjustment to divorce and to obtain information about the nature of divorce. Of those sent questionnaires, 44% completed and returned the assessment; the total sample consisted of 133 subjects. A sex difference in decision to separate was found, with both men and women reporting that the decision had been the woman's. Women showed better adjustment than men on a divorce adjustment scale. In addition, women reported significantly fewer suicidal feelings than males. However, males had significantly lower factor scores on the Profile of Mood States for tension and on the Semantic Differential for stability. Other Profile of Mood States and Semantic Differential measures did not reveal significant sex differences. (Author)

Ballmer, Helene Cozby, Paul C.
Family Environments of Women Who Return to College.
Pub Date- 76
Note-15p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Adjustment (to Environment), Family (Sociological Unit), *Family Environment, *Family Role, *Females, *Married Students, *Parent Role, Research Projects, *Student Role, Womens Education

The purpose of this study was to investigate the nature of the family environment of women who have shifted from the role of wife/mother to that of wife/mother/student. The Moos Family Environment Scale and the Locke-Wallace Marital Adjustment Scale were utilized. Subjects were 39 married couples in which the wife was a returning college student and 39 couples in which the wife was primarily a homemaker. The results indicated that the families of women returning to college differed from the families of nonreturnees on a number of dimensions, suggesting both positive and negative aspects of the wife's returning to school. Such findings could have implications for counseling women who are returning to college. The need for longitudinal studies to determine the impact on the family created by a woman's return to school is suggested. (KA)

Chandler, Anne L. Weinstein, Harold P.
Teaching Placement: An Interactional Model.
Pub Date- 78
Note-8p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Inservice Education, *Inservice Programs, *Job Placement, Models, *Rehabilitation Programs, *Teaching Models, *Vocational Rehabilitation, Work Environment

A three-part model is presented which has been developed for use in teaching a basic course in placement as a component of the rehabilitation process. Its primary foci are the interaction of traditional treatment strategies, placement as a process, and the concept of the client in the environment. The model allows for the presentation of a variety of theoretical and practical aspects of placement, as well as for the critical analysis of specific strategies in an organized manner. This permits students to maximize their assimilation of the information. Adaptation of the teaching model to systems other than rehabilitation and to inservice training programs for agencies and facilities is also discussed. (Author)

This practicum describes a videotaped growth group/learning community experience designed and facilitated by a counselor as a practical application of Carl Rogers' theory on encounter groups. The goal was to increase students' interpersonal effectiveness. The purpose of the practicum was fourfold: (1) to form a learning community and videotape three group meetings as part of the learning strategy; (2) to apply Rogerian theory; (3) to evaluate student response, learning, and growth; and (4) to produce a demonstration videotape (edited from the three videotapes) to illustrate the learning community experience. A total of 12 meetings (one per week) were held. Videotapes were used for feedback. After the last meeting, each student filled out an evaluation questionnaire. On the whole, students reported that they were reasonably satisfied with the experience. They stated that they had gained new communication skills or improved ones they already possessed. Students reacted favorably to the videotapes, feeling the experience was useful in modifying their behaviors, enhancing self-image, and increasing self-confidence. Recommendations for expanded implementation of the practicum are included. (Author)

Olson, Marsha S. Thomas, Patricia J.
Preenlistment Drug Experiences of Navy Women and Men; A Comparison.
Navy Personnel Research and Development Center, San Diego, Calif.
Report No.-NPRDC-TR-78-28
Pub Date-Aug 78
Note-35p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Alcoholic Beverages, *Drug Abuse, *Enlisted Personnel, Females, *Individual Characteristics, Individual Differences, Lysergic Acid Diethylamide, Marihuana, *Military Personnel, Research Projects, *Sex Differences, *Surveys

The purpose of this study was to replicate, with female respondents, a 1975 survey of male preservice substance abuse and its correlates. The Navy's Drug Experiences Questionnaire was administered to 519 women in June 1976. Responses were compared to those of the 1975 male sample. Results showed that female and male preservice drug experiences were similar. No significant differences were found in the proportions of female and male (49.8 vs. 47.0%, respectively) nondrug users, marihuana-only users (22.2 vs. 25.8%), and other drug users (28.0 vs. 27.2%). Significantly more men than women were found to have used hallucinogens, and frequency of drunkeness during the previous year was significantly higher for men than for women. The relationships between substance abuse and racial or ethnic membership, age, high school grades, level of education, geographic origin, size of hometown, and preservice delinquency were similar for both sexes. Despite the finding that patterns of preservice substance abuse of women and men entering the Navy are similar, it is difficult to predict what effect the enlistment of more women will have on the service's drug problems.

Further research with samples of both sexes to determine the extent of substance abuse during the first enlistment is recommended. (Author)

The Interpersonal Orientation in Mental Health Consultation: Toward a Model of Ethnic Variations in Consultation.

Pub Date-Apr 78

Note-21p.; Paper presented at the Annual Meeting of the Western Psychological Association (58th, San Francisco, California, April 19-22, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Biracial Elementary Schools, *Consultants, *Consultation Programs, *Cultural Differences, Cultural Interrelationships, Elementary Education, Elementary School Counselors, Ethnic Stereotypes, *Interpersonal Competence, Interpersonal Relationship, *Mental Health Programs, Models, State of the Art Reviews

This paper, based on a mental health consultation project in an inner city elementary school, examines the process of consultation in a biracial organization and advances four propositions about the interactions: (1) that there are black-white differences in orientation to the consultant-consultee relationship; (2) that these differences are along the dimension of interpersonal vs. instrumental competence; (3) that these differences have significant implications for the effectiveness of the consultation process itself; and (4) that ethnic differences in orientation to consultation can be generalized to other interpersonal transactions between blacks and whites. Some of the specific problems associated with consultation in biracial situations are discussed, such as mutual stereotyping, mutual mistrust, and problems of interpreting communication and social behavior. "Critical incidents" are presented to illustrate these problems. Finally, a model of interpersonal orientation-interpersonal competence in mental health consultation is proposed. This model is an effort to conceptualize both the stages and the themes involved in the consultation process. (Author)

Identifiers-*Congress 95th

This document is comprised of the hearing and briefing on International Women's issues before the Subcommittees on International Organizations and International Development of the Committee on International Relations, House of Representatives, 95th Congress. The purpose of the joint session was to explore the administration's request for the United Nations Decade for women, and to investigate the United States Agency for International Development (USAID) request for women in development. An additional purpose was to gain a better understanding of the reasons why it is important to consider the situation of women in relation to international human rights and to multilateral and bilateral international development efforts. Testimony from administration representatives and public witnesses focuses upon such issues as women in decision-making positions in the U.N. Secretariat, the division of male/female employees in the Policy Planning Office at AID; the situation of women in development, and other aspects of the U.N. Decade for Women. (KA)

A Comparative Study of Handicapped and Nonhandicapped School Dropouts.

Pub Date-78

Note-10p.; Paper presented at the Annual Meeting of the American Educational Research Association (Toronto, Ontario, CANADA, March, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Dropout Characteristics, *Dropout Problems, Dropout Research, *Handicapped Students, Individual Characteristics, *Mentally Handicapped, *Potential Dropouts, Research Projects, Secondary Education, Student Alienation

Certain aspects of the dropout problem, specifically the relationships between certain characteristics of handicapped and nonhandicapped dropout populations, were examined. A group of eight school districts which had special education projects funded through the Texas Education Agency participated in data collection of demographic variables and interviews of dropouts. Results revealed several distinct differences between handicapped and nonhandicapped dropouts in the sample. Of the characteristics of the handicapped group, three of the most distinct were failure to make the junior-to-senior-high-school transition, lack of future plans, and more positive views of the educational system. Suggestions for utilizing these differences in educational decision making are made, including earlier identification of potential dropouts in order to provide remediation and/or intervention programs, and provision for exit counseling and career awareness for all dropouts. Interorganizational Dynamics in the Development of a School Consultation Program.

Pub Date-Mar 78

Note-14p.; Paper presented at the Annual Meeting of the American Orthopsychiatric Association (55th, San Francisco, California, March 27-31, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Administrator Attitudes, *Change Strategies, *Consultation Programs, Exceptional Child Services, Guidelines, Human Services, Mental Health Clinics, *Mental Health Programs, *Organizational Development, Prevention, Professional Services, *Schools

The development of community mental health center (CMHC) school consultation programs is analyzed within an interorganizational framework. From the perspective of the CMHC, the school system can provide access to a large target population and bestow legitimacy to the CMHC's overall consultation program. From the school system's point of view, the CMHC can provide clinical resources and expertise. While CMHC consultants often wish to involve themselves in the analysis and modification of basic school system policies and practices, school personnel are likely to resist such non-clinical interventions. Strategies of consultation are suggested which maximize the opportunities of both parties to achieve their organizational goals and which improve the consultant's ability to become involved in policy areas where he or she has expertise. The analysis illustrates basic problems in the nature of the relationship between human service and educational organizations, problems which in part derive from the differing, but overlapping mandate each organization receives from society. Use of the Personal Delivery'' System for Assessment of Drug and Alcohol Attitudes and Usage Patterns.

Spons Agency-Washington - Greene County Drug and Alcohol Planning Commission, Washington, Pa.

Pub Date-78

Note-12p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Alcoholism, *Community Surveys, *Cost Effectiveness, *Data Collection, *Questionnaires, *Research Problems, Research Projects, Social Science Research

Identifiers-Drug Users

Community data concerning drug and alcohol usage patterns was assessed via a unique personal delivery'' system. The system, which can be used for collecting other community data produced a return rate of 45% and was very economical. This system largely overcomes the main drawback of the mailed questionnaire (low return rate) by (1) having questionnaire distributors establish rapport with the subject, (2) personally convincing the subject of the importance of the study, (3) getting a foot in the door'' with a personal commitment from the subject, and (4) giving the subject two different ways to return the questionnaire. Although the stress is on a data collection system, several brief summary tables are included to give an overview of the results that were collected. (Author/BN)

Judgment Analysis as an Experiential Facilitator in Adult Education Settings.

Pub Date-19 Apr 78

Note-7p.; Paper presented at the Annual Meeting of the Western Psychological Association (58th, San Francisco, California, April 19-22, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Adult Education Programs, *Adults, *Decision Making Skills, Educational Experience, Interaction Process Analysis, *Leadership Training, Peer Evaluation, Postsecondary Education, *Profile Evaluation, Program Descriptions, *Teaching Methods

The present paper describes the implementation of Judgment Analysis (JAN) as a useful experiential facilitator in the educational process. JAN first appeared in the literature in the early 1960's as a tool for capturing the decision-making policies of individuals. After individual policies are ``captured,'' the process groups individuals into existing homogeneous groups which are heterogeneous to other existing groups. As an example of the use of JAN as an experiential tool in the learning process, adult participants in an executive development program were asked to make decisions regarding a number of applicants for positions within a large organization. The applicants' profiles contained various measures of personality, aptitude, achievement, and demographic data. After the policies of the students were ``captured,'' students were given feedback as to which variables they were emphasizing in their decision-making process. They were also statistically grouped with other students who had similar policies, based on the JAN results. The students were then asked to compare their ``captured'' policies with the policies they perceived themselves as using and with policies of other students. The experiential exercise allows for exploration of decision policies, enhanced with personal involvement of participants. The process always generates enthusiasm and insights, and provides feedback to the students so that decisions can be monitored, evaluated, discussed, revised and re-evaluated. (Author/BN)

Descriptors-*Adolescents, *Alcoholism, Delinquent Identification, *Drug Abuse, *Drug Addiction, *Predictor Variables, *Puerto Ricans, Research Projects, Surveys
Identifiers-*Puerto Rico

Using 1968 data collected from junior and senior high school students in Bayamon, Puerto Rico, substance usage patterns for heroin and alcohol were predicted for 1975-6. A sample of 1,000 of the initial 5,000 students were selected for re-interview; half were selected to be at high risk of substance abuse and half were selected randomly. Some 657 young people were interviewed, and 130 parents were interviewed when the target young person was unavailable. A 17% prediction of the variance in heroin usage and 33% of the variance in alcohol usage were possible. Two quite different predictive patterns appeared. For the later heroin user, academic failure was the major predictor. Later heroin users tended not to be bothered by nervousness, not anxious about tests, to have parents who generally did not know what they were doing, and to be reserved rather than outgoing in their personality. Other variables predicting heroin usage were poverty, early money-earning, possible deafness, and a rural background. The later heavy alcohol user was most likely male, low on social desirability traits, and low on conscientiousness, but tending to be enthusiastic. Parents tended not to know what their child was doing, and academic achievement was lower than average. (Author/CKJ)

Identifiers-*Puerto Rico

Experimental measures to identify individuals at high risk of drug use can be developed from study data. Negative side effects of identification efforts can be lessened or eliminated by the use of unobstrusive measures in the monitoring process. Regarding heroin use, different measures are suggested to monitor the following variables: academic failure indices, nervousness, parental lax discipline, test anxiety, sociability, poverty, earning money early in life, and hearing difficulties. Different ways of obtaining these measures are discussed. The prevention of alcohol use involves monitoring the following factors: gender, personality, parent-child relationships, academic performance, behavior patterns, financial status, and health. Different measures to use in obtaining these factors are presented. Other uses of the findings are suggested. (Author/CKJ)

Descriptors-Academic Aspiration, Adolescents, *Alcoholism, *Drug Abuse, *Educational Attitudes, Intervention, Low Achievers, *Occupational Aspiration, *Puerto Ricans, Research Projects, Screening Tests, *Sex Differences, Student School Relationship
Identifiers-*Puerto Rico

A longitudinal study of educational variables and drug use was conducted by interview with 635 young Puerto Rican adults. Half had been selected as representing a high risk'' population, half a normal risk'' population. Correlational analyses revealed that the use of all drugs was associated with a negative attitude toward school among both sexes. Academic performance was poorer for males who later had greater involvement with all drugs, but this effect was less consistent among the females. Inconsistent results for the two sexes were also observed on the effects of educational and occupational aspirations on drug usage. Discriminant function analyses, aimed at predicting drug preference from academic characteristics yielded significant functions for males, but not for females. Two significant functions found for males indicated that occupational aspirations were most discriminating among drug usage categories. (Author)

Identifiers-*Puerto Rico

In a longitudinal study of precursors of drug usage, data collected in 1968 on health variables was related to substance usage patterns obtained in 1975-76. Some 657 young Puerto Ricans were interviewed for this study, drawn from a pool of about 5,000 questionnaired in 1968. The major findings were that the health factors associated with drug involvement were mainly those of habit and fatigability. Other factors which could be used as descriptors of specific substance users included sensory impairment and digestive problems as well as not having psychosomatic or mobility problems. The best predictors were found in the area of: habits, especially sleeping patterns; facial appearance; sense receptors (eyes, ears); mobility and activity restrictions; heart trouble; nervousness; and the taking of prescription medicines or pills. The highest number of associations as well as the best predictive ability was found in the marijuana and alcohol groups. The least amount of significant relations and predictors was found in the realm of heroin use. (Author)

Descriptors-Annotated Bibliographies, *Community Change, Community Surveys, *Data Collection, *Decision Making, Human Services, *Needs Assessment, Research Problems

This document deals with a common problem: the fact that ``needs assessment'' is often required by law and regulation, but there is little agreement on what the term means or what the process entails. The uses and definitions of the term ``needs assessment'' are examined and categorized along with the various methodologies which are ascribed to it. These categories include needs assessment: (1) as survey research; (2) as consumer demand analysis; (3) as a process of problem identification and diagnosis; (4) as policy priority setting, and (5) as other types of data or analysis. The bibliography presents abstracts of selected sources which tell the types of document, definition of ``need'', definition of ``needs assessment,'' methods of collection and analysis, other information, and comments or critiques of the literature. Note-41p.; Paper presented at the Annual Conference of the National Council on Family Relations (San Diego, California, October 12-15, 1977)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Attitude Tests, *Family Relationship, *Marriage Counseling, Questionnaires, Research Methodology, Research Projects, *Test Construction

Identifiers-*Johnson In Law Study

This study completed the initial stages in the development of the Johnson In-Law Attitude Scale, which is an instrument designed to measure attitudes toward one's family of in-laws, both before and during the marriage, and relationships with parents. A thorough review of literature relative to in-laws is included. The study revealed that the entire family of in-laws represents multifaceted and complex relationships which are not easily measured by a small number of items. It also pointed out the need for theory development. The paper explores the methodological considerations and implications of studying in-law relations in terms of the endless possibilities an individual has for in-laws. The attitude scale, while statistically reliable and valid, did not appear to be sensitive to individual family differences, composition, and special situations. The paper suggests alternative means of studying in-laws, as well as future implementation of the Johnson In-Law Attitude Scale. The use of the interview method, given adequate time and other resources, was suggested as a more controllable means of understanding and predicting in-law adjustment. (Author)

Moral Development and Life Outcomes. Spons Agency-National Inst. of Education (DHEW), Washington, D.C.
Pub Date-Jun 78
Grant-NIE-6-74-0096
Note-116p.
EDRS Price MF-$0.83 HC-$6.01 Plus Postage.
Descriptors-Adjustment (to Environment), Attitudes, *Cognitive Processes, *Economic Status, *Ethical Values, Interpersonal Competence, *Job Satisfaction, Males, *Moral Development, Parent Role, Research Projects
Identifiers-Hollingshead Two Factor Index of Social Position

Individuals who differ in moral reasoning have been found not only to achieve different stations in life but also to have considerably different values and strategies by which they conduct their lives. The nature of individuals' life outcomes was measured in this study using the status of the person's job as well as both structured and open-ended questions dealing with attitudes toward job, marriage and parenting. It was concluded that persons at higher stages of moral development are more likely to hold higher-status jobs, but there is no evidence that they are more satisfied with them. In the realm of life attitudes, higher-stage men used discussion as a socialization technique in childrearing and valued independence in their children. One feature distinguishing the thinking of these individuals is the ability to see a situation from the perspective of another. This was most evident in their method of resolving marital conflict through role-taking. (BN)

Descriptors-*Career Change, *Career Development, *Employee Attitudes, *Industrial Personnel, Interpersonal Relationship, *Job Development, *Organizational Communication, Program Descriptions, Workshops

In 1975, Lawrence Livermore Laboratory implemented a Career/Life Planning Program for all employees. The program's aims are to assist employees in taking responsibility for their own careers, revive their creativity, and stimulate active career planning. The program is staffed by counselors with a combination of psychological and technical backgrounds. Components of the program include: individual career and life-transition counseling; a library of occupational and educational information; and a series of career planning workshops. One result of the workshops is the development of an individualized career strategy plan. Employees participating in the Career/Life Planning Program cluster into four areas: (1) those assessing how they are doing in their current careers; (2) those who are exploring or seeking alternate careers; (3) those who are seeking to improve interpersonal communications; and (4) those who are interested in personal growth. Participants' evaluations have been extremely favorable. Supervisors of over half of the participants have reported continuing long-term improvement in employee productivity, morale, and attitude. Through the Career/Life Planning Program, many of Lawrence Livermore Laboratory's employees have taken charge of their careers and become their own career managers.'' (Author)

For many years, social agencies and mental health professionals have been frustrated in their attempts to treat acting-out or delinquent youth. Proposed alternatives have usually resulted in minimal parental involvement in therapy and have also required that the adolescents leave their respective communities in order to be treated. The Adolescent Residential Treatment and Education Center, or ARTEC, in Salt Lake City, Utah, is one approach to this problem and preliminary research indicated that it is providing an effective and needed service to the people of Utah. By combining various therapeutic approaches with a special educational program, ARTEC has been able to demonstrate that behavioral change is possible and measurable in a residential treatment setting. Identifiers-*Aging

This issue of Generations spotlights the rural elderly. The articles first cover a basic overview of the rural aged. Next is a range of policy issues related to rural service delivery followed by articles on research projects of concern to policy makers and service delivery personnel. Several fund raising and service programs are described. Pointed out is the reality that service delivery in rural areas often calls for innovative organization of resources such as crossing county lines, and using almost total volunteer labor and special technology i.e. radio and telephone systems. Thompson, Mary L.
Clinical Application of The Change Process''.
Pub Date- 78
Note-9p.; Not available in hard copy due to marginal legibility
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Behavior Change, *Change Agents, Community Services, *Correctional Rehabilitation, *Delinquent Rehabilitation, Program Descriptions, *Rational Therapy, Social Problems, *Youth Problems

A change process described in the work of Yochelson and Samenow was adapted to students committed as delinquents to a state correctional facility. Their criminal profile accurately described the majority of the offenders. While minor problems continued, their frequency was reduced by as much as nine times. Serious incidents occurred only after the student terminated his contract. Meeting with the change agents almost daily and being held accountable for all choices seemed to act as an effective, immediate deterrent. (BN)

A Model Competency-Based Paraprofessional Training Program in Gerontology. Final Report.

Spons Agency-Michigan State Dept. of Education, Lansing. Vocational-Technical Education Service.
Pub Date-Jun 78
Note-124p.
EDRS Price MF-$0.83 HC-$6.01 Plus Postage.
Descriptors-Adult Development, Age, Behavioral Objectives, *Educational Gerontology, *Educational Programs, Models, Older Adults, *Paraprofessional Personnel, *Performance Based Education, Postsecondary Education, *Vocational Education

Through funding from the Michigan Department of Education, a small private college in a suburban area outside Detroit developed a three-year competency-based paraprofessional training program in gerontology. During the first year of the program, courses and competencies were developed and 50 paraprofessionals were recruited; in the second year new courses were developed for this advanced group of 40 who wished to continue and a new group of 45 were recruited; and in the third year training was provided for the 40 who wished to continue from their first year; job counseling was provided and a follow-up study was conducted on those who had finished training. Objectives for the final year include a training sequence objective, a job counseling objective, and a follow-up study objective. Appendices contain faculty assessment of student achievement, student evaluation of course objectives, self-evaluation forms and questionnaires. (Author)

Identifiers-*Older Americans Act

This Hearing concerns the nation's rural elderly, and focuses on the Elderly Indian in Arizona. Problems addressed include: the lack of transportation, the lack of adequate housing and nursing homes, the scarcity of home care and homemaking services, and insufficient income. Programs in existence, as well as programs that are needed are discussed. The Older Americans Act, which provides support to persons 60 years and older and their spouses, regardless of income level, is examined in relation to its current funding limitations to potential Indian recipients. Information collected will be used to develop and implement a national policy on aging. (Author/JLL)

Identifiers-*Older Americans Act

Due to the smaller populations of rural areas, the greater distances between places, the generally smaller and one-dimensional economic bases, and the movement of younger persons away from rural areas, the rural elderly have unique problems. Few services are available which are designed to help elderly persons remain in their homes rather than in institutional care facilities. The Terre Haute area is representative of a rural environment. Testimony received from a number of witnesses addresses three specific topics: (1) the provision of services to the elderly under the Older Americans Act; (2) the energy problems of the elderly; and (3) health care delivery systems for the elderly. Information collected will be used to develop and implement a national policy on aging. (Author/JLL)

Gestalt Therapy and the Specious Present.

Pub Date-5 Oct 78

Note-11p.; Paper presented at the Annual Conference of the North Central Association for Counselor Education and Supervision (Chicago, Illinois, October, 4-6, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Counseling Theories, *Existentialism, *Individual Psychology, Literature Reviews, Nondirective Counseling, *Perception, Personality, *Psychotherapy, Self Congruence

Identifiers-*Gestalt Therapy

Whereas Gestalt Therapy purports to apply the principles of Gestalt psychology to psychotherapeutic situations, its emphasis upon the here-and-now and upon sensations as distinct from meanings is directly contrary to the spirit and assumptions of Gestalt theory as developed by Max Wertheimer and others. When Gestalt therapy does succeed, it is by escaping its intended focus. This is not to argue that there is no therapeutic potential in a convergence of forces within the individual upon what can be called the here-and-now. Such a focus should, however, be an open gateway to past and future. The specious present has its maximum therapeutic value when it enables the individual, in some accommodated sense, to step outside of time and into eternity. (Author/JLL)

The Developmental Relationship Among Moral Judgment, Moral Conduct, and a Rationale for Appropriate Behavior.

Pub Date-Apr 78
Note-11p.; Best copy available; Paper presented at the Annual Meeting of the Western Psychological Association (58th, San Francisco, California, April 19-22, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Child Psychology, Children, *Cognitive Development, Developmental Psychology, *Developmental Stages, Maturation, *Moral Development, Research Projects, Self Control, *Sex Differences, *Socialization
Identifiers-*Kohlberg (Lawrence), *Piaget (Jean)

Piaget's and Kohlberg's interview and scoring methods for assessing moral judgment in children were empirically compared. Based on cognitive development and social learning theories, six hypotheses were tested on 139 elementary school children. After being interviewed, the children participated in a moral conduct task. Multiple linear regressions and analyses of variance were computed using the variables of age, sex, rationale, Piaget interview score, Kohlberg interview score, and moral conduct score. The Piaget and Kohlberg interviews correlated only 46% with each other. Results indicate that: (1) moral judgment increases with age; (2) moral conduct increases with age; (3) boys obtain higher moral judgment scores than do girls - - confirmed by Kohlberg's but not by Piaget's method; (4) girls conform to rules better than do boys; (5) moral judgment and moral conduct are positively related - - confirmed by Kohlberg but not by Piaget scores; and (6) provision of a rationale does not necessarily result in a higher positive relationship between moral judgment and moral conduct. Results support the cognitive developmental position, but may reflect differences in the instruments used, children's limited ability to use words and memory spans, and sex differences in social learning. A follow-up study was conducted. (Author/JLL)

Benefits and Problems of Egalitarian Marriage: A Study of Role-Sharing Couples.

Pub Date-2 Sep 78
Note-37p.; Paper presented at the Annual Meeting of the American Sociological Association (San Francisco, California, September 2, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Adults, *Androgyny, Expectation, Family Life, *Feminism, *Life Style, *Marriage, Research Projects, Role Conflict, *Sex Role, Socialization, Working Women
Identifiers-*Egalitarian Marriage, *Role Sharing Couples

A role-sharing marriage is one in which the husband and wife share equally the rights and responsibilities traditionally assigned to one or the other sex as part of their ideal family role, in the areas of breadwinning, decisionmaking, and domestic chores. A marriage style based on sexual equality is rarely found in practice and subsequently has been mostly unstudied by sociologists. Benefits and problems in such marriages were examined among 31 couples involved in successful role-sharing relationships. Data collection techniques included several face-to-face interviews with husbands and wives, time-budgets, personality inventories, and attitudinal questionnaires. Results indicate that role-sharing enhances self-actualization and better family relations, at least for certain couples. At the same time, there exist considerable social barriers to the widespread abandonment of traditional family roles. For instance, vestiges of sex-role socialization make it difficult for couples to equitably share responsibility for all domestic chores, inflexible work hours make sharing childcare difficult, and traditional attitudes about children's needs stand in the way of fathers participating more in childrearing. These barriers can be expected to disintegrate with time. (Author/JLL)

A Telephone Survey Approach for Assessing Community Needs and Recruitment.

Pub Date-Feb 78

Note-17p.; Best copy available; Paper presented at the Annual Convention of the California Personnel and Guidance Association (Los Angeles, California, February 17-20, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Community Colleges, Community Relations, *Educational Needs, Higher Education, *Needs Assessment, Open Enrollment, Outreach Programs, Program Descriptions, *Publicize, School Community Programs, *Student Recruitment, Surveys

The Telephone Program which was initially implemented at College of the Canyons ran from February 16, 1977 to June 24, 1977. The Counseling Department coordinated and implemented the program using a volunteer student coordinator and student workers. The program was developed in order to accomplish four objectives: (1) recruit new students from all backgrounds and areas of the Santa Clarita Valley; (2) assess the educational needs of this diverse community; (3) inform the community of the college, and explain its community based, open door pholosophy; and (4) obtain community opinion and suggestions regarding the college. The program was two-phased. Phase one consisted of immediate recruitment just prior to the beginning of the Spring Quarter. Phase two also placed emphasis on recruitment and additionally incorporated a questionnaire to assess community needs. Student workers telephoned into the community from various locations in the college. They called at all times of the day and evening, using a telephone script and questionnaire to obtain information. Results were compiled and presented to the college's Board of Trustees. The response from the community was positive - - people were pleased to learn about college offerings and feel the college was truly interested in their needs. The following year a CETA worker was hired, especially for this project, and the program was continued. (Author/JLL)

Fantasy Play in Child Psychotherapy.
Spons Agency-National Inst. of Mental Health (DHEW), Rockville, Md.
Pub Date-78
Grant-MH-16444
Note-87p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-*Behavior Patterns, Child Psychology, *Children, Creative Expression, Developmental Psychology, *Helping Relationship, Maturation, *Pretend Play, Research Projects, *Supervision, Therapists, *Training
Identifiers-*Self Presentation

Relationships among adult and young children's behavior in extended play encounters were examined. One group of normal six-year-old children completed 20 play encounters, while a second group of clinic-referred children completed 15 play encounters. Each child encountered either a trained/supervised or an untrained/unsupervised college undergraduate. Analyses of videotapes made of the non-directive'' play encounters indicated that the children who encountered trained/supervised undergraduates emitted greater numbers of fantasy behaviors, especially those indicative of mature, coping and adaptive functioning than did children encountering untrained/unsupervised undergraduates. Adult involvement in play and allowing the child self-direction seemed key behaviors in eliciting such child behavior. (Author/JLL)

Descriptors-*Class Activities, Curriculum Guides, *Elementary Education, Elementary School Students, *Humanistic Education, Human Relations, *Individual Development, Progressive Education, *Psychoeducational Processes, *Self Actualization, Self Concept

Self-science is an experience-based program designed for children from the second grade through the upper elementary grades. Its aim is to equip children with affective and cognitive skills that can broaden their understanding and functioning in all learning and social situations. Students are taught to use scientific inquiry methods in studying themselves, within small-group "laboratory" situations. Special attention is given to helping students to discover their own best learning styles and study habits. The curriculum was field-tested at the Nueva Learning Center in Hillsborough, California. The course may be taught over one or two school years. It may be offered as an elective or included as a mini-course within other curriculum areas, such as language arts, social studies, or health. The program consists of 64 lessons grouped under 10 goals. The first two sections of this handbook discuss what self-science is and how to teach it. The next two sections contain 64 step-by-step lesson plans for the curriculum. Several appendices offer suggestions on classroom management, record-keeping, and evaluation. (Author/JLL)

Gittman, Betty
Associations Between Reasons for Dating, Orientation, Commitment and Behavior: Verification of a Study by McDaniel.
Pub Date-78
Note-12p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Adults, Assertiveness, *Dating (Social), *Individual Psychology, Marriage, *Mate Selection, Peer Influence, Research Projects, *Social Development, *Socialization
Identifiers-*McDaniel (Clyde O)

A study of dating behavior by McDaniel was replicated, using a single adult population instead of college undergraduates. The hypothesis stated that recreational dating was associated with peer orientation, low commitment and assertive behavior; that mate selection dating was associated with family orientation, medium commitment and assertive-receptive behavior; and that anticipatory socialization dating was associated with personal orientation, high commitment and receptive behavior. Computation of product moment correlation coefficients provided evidence that none of the predicted associations were supported by the data except those predicting a relationship between anticipatory socialization and high commitment, and anticipatory socialization and receptive behavior. High product moment correlation coefficients between variables indicated that there may be confounding of variables on the McDaniel instrument. (Author)

Identifiers-*Health Maintenance Organizations

This paper describes the use of a particular therapeutic modality behavioral groups in a relatively new delivery system called a Health Maintenance Organization. The program described, run under the George Washington University Health Plan, offers short-term structured groups designed to aid people at particularly difficult or vulnerable developmental periods. Many of the groups are aimed specifically at helping people develop coping skills, problem-solving techniques and self-control strategies to deal with present and future problems. They include topics such as women's sexuality, weight reduction, coping skills (teaching physiological and cognitive relaxation techniques and assertiveness training), cognitive restructuring (focusing on interpersonal interaction and the modification of irrational and self-defeating cognitions), couples, smoking cessation, women's issues, seniors, career counseling self-help, adolescents, and parenting. The document presents, for each group, a statement of the goal, rationale, member characteristics, group characteristics, materials and research instruments. (Author)

Personalized Instruction, Group Process and the Teaching of Psychological Theories of Learning.

Pub Date-Aug 78

Note-16p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, CANADA, August, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Academic Achievement, *Classroom Environment, Contingency Management, *Effective Teaching, *Group Dynamics, Higher Education, *Individualized Instruction, *Learning Processes, Psychoeducational Processes, Research Projects, *Student Motivation, Undergraduate Students

An innovative approach to teaching learning theory to undergraduates was tested by comparing a modified Personalized System of Instruction (PSI) group process class (n 19) to a traditional teacher-centered control class (n 32). Predictions were that academic performance and motivation would be improved by the PSI method, and student satisfaction would increase as a result of attention to group process. Academic performance and motivation increased as predicted, but students' ratings of satisfaction with the instructor were lowered. Limitations of the study regarding long-term follow-up and separation of the independent variables warrant further investigation. (Author/JLL)

Lowman, Joseph

New Areas for Preventive Programing: Sudden Infant Death Syndrome.

Pub Date-Aug 78
Note-17p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, CANADA, August, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Crisis Therapy, *Grief, Helping Relationship, Home Visits, *Infant Mortality, Intervention, *Mental Health Programs, *Parent Counseling, Parents, *Prevention, Program Descriptions, Research Projects
Identifiers-North Carolina, *Sudden Infant Death Syndrome

Crisis intervention programs for persons experiencing the sudden death of family members or surviving natural disasters have been advocated as methods of primary prevention, although few have actually been implemented. A program utilizing nurses to deliver grief intervention to parents losing a baby to Sudden Infant Death Syndrome (SIDS) was examined as an illustration of such preventive programing. This project covered the state of North Carolina and involved a sample of 154 subject families, after the infants' deaths, three home visits were conducted. Psychological goals of the visits were: (1) to reduce parents' guilt by countering inaccurate explanations for the death; (2) to encourage expression and acceptance of grief and to reassure them that this normal grieving process would end; and (3) to provide support in coping with problems. Demographic data on the families was similar to that reported elsewhere in that younger, unmarried, and nonwhite mothers were overrepresented. Because parents of SIDS victims experience profound feelings of guilt and especially severe crisis reactions, programs relieving guilt and providing additional support to them are felt to have significant preventive potential. Data tentatively supporting the conclusion that the SIDS grief intervention program had a beneficial impact on the participants. (Author/JLL)

Descriptors-*Counseling Programs, Counselor Training, Helping Relationship, Interagency Coordination, *Intervention, *Medical Treatment, *Mental Health Programs, Program Descriptions, *Psychological Services, Referral
Identifiers-*Health Maintenance Organizations

A Health Maintenance Organization (HMO) clinic on Chicago's Near North Side is currently offering physical and mental health care to Public Aid recipients. Psychological services are provided by a mental health co-ordinator (Ph.D. level) who supervises one or two counselors of M.A. status. The co-ordinator's other responsibilities include consultation with other staff members about patients, and close association with the head of Social Services, with whom many patients are shared. Counselors' responsibilities include testing and abortion counseling. Problems encountered and solutions formulated during the first year of the clinic's operation concern inappropriate referral to social services, patient absenteeism, and patient's attitudes of hostile dependency. Implications for counselor training are in the skill areas of interviewing, testing, and reporting of information. (Author/JLL)

Assessing Local Mental Health Need: A Multi-Method Strategy.

Pub Date-Aug 78

Note-17p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, CANADA, August, 1978); Figure 1 is of marginal legibility

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Census Figures, Demography, *Evaluation Methods, *Incidence, *Mental Health Programs, *Mental Illness, *Needs Assessment, *Prediction, Research Projects, Social Indicators, Statistical Analysis

A multi-method strategy was developed and applied to the assessment of mental health need in the catchment area of a small community mental health center. Social indicators including census data and health and welfare statistics were used to make an initial needs assessment. These findings were validated and supplemented through a survey of personnel in agencies dealing with community problems, and an analysis of statistics on clients and services delivered by the mental health center. Results indicated a significant convergence among the three strategies. A secondary analysis revealed that the survey of community perceptions contributed significantly, above and beyond social indicators, to the prediction of local mental health need. Finally, a

summative index of mental health need, based on all three methodologies, utilized in the identification of high need census tracts. In conclusion, the value of a coordinated needs assessment strategy based upon at least two independent methodologies has been demonstrated. While local mental health centers may profit greatly from the readily available Mental Health Demographic Profile data, community surveys appear to make significant additional contributions, especially in the common situation where census information is somewhat dated. Reis, Harry T.
Self-Presentations of Just Social Exchange.
Pub Date-Aug 78
Note-19p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, CANADA, August, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Behavior Theories, *Individual Psychology, *Justice, Literature Reviews, Personality, *Prosocial Behavior, *Psychological Characteristics, Rewards, Self Concept, *Social Exchange Theory, Social Psychology, Values

A self-presentational framework for understanding how people define a just exchange and why behaving justly is important to them is proposed. A case is posited for two self-presentational principles of justice that one is responsive to the perceived beliefs of significant others in determining what is just; and that one usually comes to believe that his view is the fair one. These tenets should be equally applicable to a self-presentational analysis of any significant ego-involving social behavior. Current research which is compatible with this view is discussed. The dramaturgical approach to impression management presented stresses a contract among interactants to maintain particular definitions of situations and role relationships to give meaning and order to social interaction. Thus, self-presentation becomes a dynamic conception of people structuring their relations a propos to their life-space, rather than a theory of how to win friends and influence people. (Author/JLL)

Seiquist, Jack

A Staff Develoment Project: Enhancing Attainmnent of Career Center Goals By Determining Staff Needs and Objectives.

Pub Date-12 Dec 77
Note-44p.; Ed.D. Thesis, Nova University
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Community Colleges, *Conflict Resolution, *Decision Making, Governance, Higher Education, Humanization, Models, Motivation, *Needs Assessment, *Organizational Communication, *Personnel Evaluation, *Staff Improvement

This practicum assisted staff in (1) identifying and prioritizing problems and needs in the areas of communication and decision-making; (2) determining objectives relevant to these needs; and (3) developing a plan of action for attaining top priority objectives. After an orientation meeting, each staff member was interviewed in private and asked to respond to the same set of questions. Afterwards, three staff meetings were held, and the nominal group process (NGP) was employed to identify and prioritize staff needs. The NGP resulted in three top-ranked needs: (1) utilizing a number of helpful communication attitudes; (2) using specific communication skills; and (3) revising the procedure for staff evaluation. These needs were transformed into staff objectives, and a plan of action was developed. Staff evaluation of interviews and meetings was positive. Principal recommendations included making use of intrastaff recognition as a means of positive reinforcement, resolving interpersonal problems directly and as soon as possible after they develop, changing over to current evaluation practices sucessfully used by managers in education and business, and holding follow-up meetings with the Director of the Career Center to discuss staff feedback and to assist in revising the evaluation procedure. Marijuana: College Students' Expectations.

Pub Date-Mar 78

Note-25p.; Paper presented at the Annual Meeting of the Eastern Psychological Association (49th, Washington, D.C., March 29-April 1, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Behavior, *Beliefs, Cognitive Processes, *Drug Abuse, *Expectation, *Marihuana, Research Projects, Self Congruence, *Sex Differences, Undergraduate Students

College students' expectations regarding the physiological, psychological, and social effects of marijuana were investigated. A sample of 210 undergraduates stated their expectations about the effect of the drug by answering a series of structured-response type questions. Also, Ss provided background information related to their expectations about marijuana. Overall, the data suggest that students' expectations about the effects of marijuana were largely contrary to research findings and tended to discount potentially harmful consequences of the drug. Marijuana use was considered an educational issue, and decriminalization of it was strongly favored. Users, occasional users, and nonusers differed significantly in expectations about marijuana effects which lent support to hypotheses based on the theory of cognitive consistency. Of interest were sex differences on selected background variables. Women as compared to men seemed to hold more disapproving attitudes about the use of marijuana, reported greater difficulties in obtaining the drug, used it less frequently, and knew fewer marijuana smokers. Expectations about marijuana should be taken into account when trying to develop relevant drug education programs. (Author/JLL)

Self-Concept: An Alternative View for Education. A Presentation in the College of Education, Dialogue Series, New Mexico State University.

Pub Date-14 Sep 78

Note-28p.; Figures on pages 19-22 marginally legible due to small print

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Academic Achievement, *Class Management, Educational Research, Elementary Secondary Education, Models, *Research Problems, *Self Concept, *Self Evaluation, *Student Behavior, Student Development, Students

A cogent model of self concept may provide educators with the tools to predict and induce change in the classroom behavior of students. The nature of measurement operations, management operations and particularly, the relationship between self concept and behavior are delineated. Discussion focuses on how such behaviors are acquired, manifested and modified by students, and how emotional correlates influence student behavior. The functional potential of self concept, and the organization of self descriptive/evaluative behavior are also explored. Self concept relates to other student behavior, and the development of self concept can be utilized positively by both the student and the educator. This formulated model of self concept implies that, if effectively used and reinforced, self concept can provide a student with the self-information he needs for decision making and self-directed changes in behavioral patterns. The educator, by utilizing well organized and appropoate instructional methods, can play an essential role in the development of self concept skills in pupils. (PK)

Female Offenders in the Federal Prison System.

Department of Justice, Washington, D.C.

Pub Date-Jan 77

Note-39p.; Pictures may reproduce poorly

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Correctional Rehabilitation, Delinquent Rehabilitation, *Federal Programs, *Females, *Prisoners, Program Descriptions, Program Development, *Rehabilitation Centers, *Social Problems

This report on the female offender in the Federal Prison System describes the response of the Bureau of Prisons to its mission of protecting society while also preparing offenders for release. Detailed descriptions are included of what happens to them in the Federal correctional system, particularly programs of counseling, education, training and recreation available to help them make the decision to rehabilitate themselves. The programs described are designed to help the women avoid further entanglement with the law when they are released into the community. (BN)

Perseverance of Discredited Self-Perceptions: Beyond the Debriefing Paradigm.

Spons Agency-National Inst. of Mental Health (DHEW), Rockville, Md.; National Science Foundation, Washington, D.C.

Pub Date-Aug 78

Grant-MH-26736

Note-14p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Attribution Theory, *Feedback, *Performance Factors, *Persistence, Research Projects, *Self Concept Tests, *Self Congruence, Social Reinforcement

The apparent external validity of the finding that self-perceptions of ability persevere after the basis for such impressions has been totally discredited was examined. In this study, subjects persevered in their perceptions of personal persuasiveness even after it was revealed that the initial success or failure upon which their impressions were based had been predetermined. Specifically, they formed perceptions of their ability to convince another student to donate blood, then learned that the ``persuaded'' person was actually responding not to the subject's arguments but to a prearranged script. But even after learning that their self-perceptions were based on false feedback, they continued to act according to them. Contrary to predictions and previous findings, however, instructions to explicitly explain an initial outcome did not increase its subjective likelihood. This finding may be explained in terms of the ``sufficient'' conditions which normally prompt individuals to explain social events. (Author)

Adolescents' Perceptions of Teachers' Caring and Achievement Press Related to Sex, Track, Program, and Achievement.

Pub Date-Oct 78
Note-11p.; Paper presented at the Annual Meeting of the Northeastern Educational Research Association (Ellenville, New York, October, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Academic Achievement, *Achievement Need, Adolescents, *Affective Behavior, Classroom Environment, Expectation, High Achievers, *Low Achievement Factors, Research Projects, Student Attitudes, *Student Teacher Relationship, *Teacher Attitudes

A group of 3,000 7th through 12th graders were surveyed to investigate their perceptions of how much teachers cared about them and the degree to which they felt teachers urged them to achieve. Of the adolescents surveyed, 39% felt that teachers never or rarely seem to care about them. This is a crucial dimension, since teacher warmth has been shown to be relevant to achievement. The differences with respect to student characteristics were not as great as expected, considering previous research on how teacher expectations and attitudes vary. Although teachers are thought to have lower expectations for students in the lower tracks, from the students' point of view there was little difference in pressure to achieve among the various academic groupings. At the same time, it is of some concern that the lower-achieving students did not report that teachers care about them to the same degree as the better students did. (BN)

High-Risk Neighborhoods and High-Risk Families: The Human Ecology of Child Maltreatment.

Pub Date-78

Note-30p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Child Welfare, Disadvantaged Environment, *Family Problems, *Neighborhood, *Parent Child Relationship, Research Projects, *Social Problems, Statistical Studies

This study used multiple regression analyses to identify the socioeconomic, demographic and attitudinal correlates of neighborhood differences in the rate of child abuse and neglect. Comparison of actual vs. predicted rates defined high- and low-risk neighborhoods. These risk scores'' then become variables for inclusion in additional neighborhood-level analyses, as well as in analyzing family-level interview data concerning stresses and support systems. A pair of neighborhoods matched for socioeconomic level was selected, one high-risk, the other low-risk. Interviews with expert informants ranging from elementary school principals to mailmen were used to develop neighborhood profiles. Samples of families were drawn from each neighborhood, and interviews conducted to identify stresses and supports, with special emphasis on sources of help, social networks, evaluation of the neighborhood and use of formal family support systems. The results lend support to the neighborhood risk scores. Families in the high-risk neighborhood, though socioeconomically similar to families in the low-risk neighborhood, report less positive evaluation of the neighborhood as a context for child and family development. Furthermore, they reveal a general pattern of social impoverishment'' that parallels findings at the neighborhood level. (Author)

The Advocacy or Avoidance of Only Children.
Pub Date- 76
Note-6p.; Best copy available
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Birth Order, *Child Development, Children, *Family Planning, *Family Relationship, Intellectual Development, Intelligence Factors, Literature Reviews, Policy Formation, *Siblings

A brief review of the psychological literature on the characteristics of only children is presented in order to determine if the one-child family should be avoided or advocated. The relevant literature is found to be limited in quantity and conceptualization of the only child. Previous literature is divided into three types of study: those with conflicting results; those reporting no differences between only children and others; and those coinciding with the negative stereotype of the only child, especially as regards to IQ score and sex-role identification. It is concluded that the evidence currently cannot support either the advocacy or the avoidance of one-child families. (Author)

Consumer Control in Community Mental Health: Active or Passive?

Pub Date-78
Note-17p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, CANADA, August, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Advisory Committees, *Citizen Participation, *Citizens Councils, *Community Development, *Community Service Programs, *Mental Health Programs, Program Descriptions, *Program Effectiveness

This paper points out that both formal and informal historical precedents in community mental health have emphasized citizen participation as an essential element of the system's success. It reviews citizen involvement procedures in use in one midwestern catchment area, and concludes that citizen representation appears to be inadequate, in particular in terms of geographical and occupational variables. It then contrasts the community mental health approach with a seemingly more effective strategy used by community development workers in the same community. Differences between the two methods are analyzed in relation to an active-passive continuum of staff effort to gain citizen input. The mental health approach is characterized as a passive strategy, while the community development method is shown to be an active one. Conclusions are, first, that community mental health staff should take more active steps toward citizen-provider interaction; and, second, that specific strategies should be developed to govern the extent and type of consumer control to be utilized within the system. Personality Characteristics and Evaluation of Women's Role.

Spons Agency-Lamar Univ., Beaumont, Tex.

Pub Date-78

Note-7p.; Paper presented at the Annual Convention of the Southeastern Psychological Association (24th, Atlanta, Georgia, March 15-18, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-College Students, *Females, Personality Studies, *Personality Tests, Questionnaires, Rating Scales, Research Projects, *Role Perception, Self Actualization, *Sex Differences, *Sex Role

The relationships between several commonly utilized women's role questionnaires and several personality inventories was investigated. Undergraduates students (120 females, 80 males) completed several personality and sex-role questionnaires including the Personal Orientation Inventory (POI); Rotter's Locus of Control Scale (I-E), MAFERR Forms A, B, C, Attitudes towards Women Scale (AWS) and the Women as Managers Scale (WAMS). The questionnaires were administered during two separate sessions one week apart. An intercorrelation matrix was computed on the scores for each scale of the POI and the score for each of the other inventories, and then subjected to a principle axis factor analysis with Varimax rotation (BMD-08M). Results confirmed that several sex-role inventories (the WAMS, AWS, MAFERR Forms A and B) essentially measure a similar characteristic manner of evaluating women and their role, and that only moderate relationships between evaluation of women's role and identified personality characteristics of the subjects exist. The results of the study may help to account for the inconsistencies in previous research which utilized various women's role questionnaires to suggest personality characteristics. (Author)

Effects of Self-Presentational Strategy and Empathic Instructions on Observers' Attributions.
Pub Date- 77
Note-21p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Attribution Theory, College Students, *Empathy, Evaluation Methods, Factor Analysis, Helping Relationship, Interaction Process Analysis, *Observation, Performance Criteria, *Performance Factors, Research Projects, *Role Playing, *Task Performance
Identifiers-*Self Presentation

The influence of empathy on observers' attributions for an outcome achieved by an actor was examined as well as self-presentational strategies when observers ~~either~~ expected to assume the actor's role later (Role-Playing). On videotape, observer-subjects (N 160) watched an actor succeed or fail at an interpersonal influence task, after being given information designed to lead them to expect either a successful or unsuccessful task outcome. Subjects then made attributions for the therapist-actor's performance. In contrast to standard observers, empathic observers tended to make flattering attributions about the actor's performance on situational variables in positive expectency situations. In addition, role-playing observers made flattering attributions about the actor's performance through their reports on the dispositional variables and engaged in attributions similar to those reported by no role-taking observers. Results suggest that the predictions of role-taking observers which tend to minimize dispositional attributions for the actor's performance due to the self-presentational benefit of maintaining the actor's innocence in task outcome were not supported. Descriptors-Child Care, *Group Counseling, Interaction Process Analysis, Intervention, *Nurses, *Parent Child Relationship, *Parents, *Premature Infants, Program Evaluation, Research Projects, *Self Help Programs

A preventive intervention program based on self-help groups for parents reinforced by the involvement of veteran parents, those who had a premature infant during the past 12 months, and professionals to provide support and information was evaluated. Sets of randomly selected parents (N 35) met weekly in a small group of four to six couples during the first six months of their premature infant's life with the veteran mother and an experienced neonatal nurse. Other couples (N 35) receiving routine care served as a control group. Group parents exhibited a very positive response and high attendance. Group and control parents were compared on: (1) number and duration of hospital visits and telephone calls to the nursery; (2) a psychiatric interview assessing parenting ability; (3) objective ratings and parental attitudes towards hospitalization and their caretaking role; and (4) direct observation of parents and infants during parental nursery visits and during the first three months at home. Preliminary results indicate that group parents make more hospital visits, call to inquire about their infants more, and are more comfortable in their caretaking role. (Author)

Sex Education for Gifted and Talented Youth.

Pub Date-Oct 78
Note-20p.; Best copy available
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Ability, Cognitive Processes, *Curriculum Development, Elementary Secondary Education, *Gifted, Guidelines, *Individual Characteristics, Learning Activities, Learning Characteristics, *Sex Education, *Sexuality, Talented Students

This paper summarizes the indicators of extraordinary ability in young people; selects for more careful scrutiny some characteristics of the talented and gifted that would influence the content, sequence, and methods of sex education; and suggests the broad outlines of a differential curriculum of sex education. Data documenting advanced physical, intellectual, emotional, social and creative development provide parallel inferences about the sexuality of a gifted population. Guidelines for differentiating sexuality curriculums include the following: (1) exposure to experiences, materials, and information which are outside the bounds of the regular curriculum; (2) opportunities to elaborate on the regular curriculum through additional working time, materials and experiences; and (3) self-initiated study, projects and activities. Available from-Harris M. Cooper, Center for Research in Social Behavior, 111 E. Stewart Rd., Columbia, MO 65201
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Academic Achievement, Elementary Education, Elementary School Teachers, *Expectation, Locus of Control, Performance Criteria, *Performance Factors, Research Projects, Student Ability, Student Behavior, *Student Teacher Relationship, *Teacher Attitudes

Theoretical and practical implications of the proposition that teachers' differential behavior toward high and low expectation students serves a control function were tested. As predicted, initial performance expectations were found related to later perceptions of control over performance, even when the initial relationship between expectations and control was removed, while initial control was not found related to later expectations. On a practical level, the effects of teacher participation in an expectation experiment were assessed. Unalterable'' teachers, whose expectations were found most predicatable from the sex and I.Q. of their students, reported not being affected by experiment participation while alterable'' teachers did. Students of alterable'' teachers showed greater relative reading gains over the school year than students of unalterable'' teachers. Means indicate that alterable'' lows closed the gap between themselves and alterable'' highs, and that by the end of the school year unalterable'' lows tended to have lesser effort-outcome covariation beliefs than unalterable'' highs, while students in alterable'' highs showed a relative gain in effort-outcome covariation belief when compared to unalterable'' lows. Developmental Role-Taking Deficits in Institutionalized Juvenile Delinquents.

Pub Date-Mar 78

Note-8p.; Paper presented at the Annual Convention of the Southeastern Psychological Association (24th, Atlanta, Georgia, March 15-18, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Basic Skills, *Behavior Development, *Behavior Patterns, Delinquents, Females, Institutionalized Persons, Research Projects, *Role Perception, *Role Playing, *Self Control, *Social Development

Identifiers-*Matching Familiar Figures Test (Kagan)

The relationship between self-control and role-taking deficits as exhibited by 37 female institutionalized juvenile delinquents was assessed by Chandler's measure of social egocentrism. Subjects, matched on the basis of their scores on the Matching Familiar Figures (MFF) Test, were randomly assigned to treatment or control groups. The treatment groups made up skits, viewed their productions on videotape, and replayed the skits until each member had played each part. The control groups created videotaped documentaries about the institution, but did not participate as actors in the productions to avoid practice in role-taking. As predicted, a large proportion of the subjects (73%) exhibited role-taking deficits; however, there was no significant correlation between role-taking errors and latency scores on the MFF Test. Results suggest either that there is no systematic relationship between role-taking and self-control, or that the self-control measures used in this research were inadequate. (Author/HLM)

Berg, John H. Archer, Richard L.

Disclosure or Concern: A Look at Liking for Norm-Breakers.

Pub Date-Aug 78
Note-19p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, CANADA, August, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Behavior Patterns, College Students, *Communication Problems, *Disclosure, *Emotional Response, *Interaction Process Analysis, Norms, Perception, *Reactive Behavior, Research Projects, *Response Mode, Student Attitudes

An experiment was conducted in which perceptions of an individual responding to an initial disclosure were examined. Observer subjects (N 315) read a brief description of a first encounter between two women. During the meeting one of the women made either an intimate or a non-intimate disclosure (low vs. high initial intimacy). The other woman responded in one of five ways: with an intimate disclosure (high-return-disclosure), a non-intimate disclosure (low-return-disclosure), acknowledgement and sympathy (concern), concern-plus-high-return-disclosure, or concern-plus-low-return-disclosure. Regardless of initial intimacy, the most favorable impressions of the respondent were formed in the concern'' condition. When the respondent made a disclosure of her own, the interaction predicted by the normative hypothesis was replicated. Results indicate there is a possibility that a disclosure reciprocity norm may not apply to conversations. (Author)

Impressions of a Disclosing Other Following Own Disclosing.

Pub Date-Aug 78
Note-16p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, CANADA, August, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-College Students, Communication Problems, *Disclosure, *Emotional Response, *Interaction Process Analysis, *Interpersonal Attraction, Observation, *Perception, *Reactive Behavior, Research Projects

The effects of an instigator's and a respondent's disclosure on impressions of the revealing respondent were examined in a pair of experiments. The first experiment assessed the effects of both own and other's disclosure on a participant perceiver. After meeting a confederate partner, female undergraduate subjects (N 83) were induced to make an intimate or superficial disclosure by means of a forced compliance'' procedure. In return, their (videotaped) partner then disclosed on either three intimate or three superficial topics. Subjects who made intimate disclosures reported no more attraction toward the partner than did those who made superficial disclosures, but a clear effect for other's disclosure was found in the impression rating analysis. Subjects formed more favorable impressions of the confederate when she disclosed intimately (the revealer-liking effect). Comparisons made between these data and those of the second experiment (an observer replication using the subjects' actual disclosure tapes and the manipulations from the first experiment) showed that female observer subjects predicted greater attraction on the part of participants who had made intimate disclosures than those who made superficial disclosures. Additionally, subjects also differed with the participant in their perceptions of the confederate. (Author)

Descriptors-*Academic Achievement, *Classroom Arrangement, *Classroom Environment, Educational Research, Elementary Education, Elementary School Students, Interaction Process Analysis, Self Directed Classrooms, *Student Behavior, Student Responsibility, *Student Teacher Relationship, Teacher Responsibility
Identifiers-*Open Classrooms

Fourteen classrooms were grouped according to environmental format (open/mixed/traditional) and differences in teacher-student interaction patterns and perceptions of responsibility for outcomes assessed. As predicted, open classrooms showed the highest percentage of dyadic interactions. Also as predicted, open classrooms tended to show the lowest percentage of group interactions, highest percentage of interactions concerned with a student's individual work, and lowest percentage concerned with answering specific academic questions.

Contrary to prediction, teachers of traditional classrooms rated students more personally responsible for failure than open classroom teachers. Finally, students in more open classrooms tended to perceive themselves as more responsible for success than students in traditional classrooms. Results are discussed in light of the philosophical bases which lead to the adoption of the open classroom format. (Author)

Interference Effects on the Recall of Pictures, Printed Words and Spoken Words.

Pub Date-Mar 78

Note-18p.; Paper presented at the Annual Meeting of the American Educational Research Association (Toronto, Canada, March 27-31, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Cognitive Processes, College Students, Higher Education, Language Processing, *Language Research, *Memory, *Pictorial Stimuli, *Recall (Psychological), *Retention, *Verbal Stimuli

Identifiers-*Interference

Thirty college undergraduates participated in a study of the effects of acoustic and visual interference on the recall of word and picture triads in both short-term and long-term memory. The subjects were presented 24 triads of monosyllabic nouns representing all of the possible combinations of presentation types: pictures, printed words, and spoken words. Each triad presentation was followed by a visual, acoustic, simultaneous, or no interference task. After each triad and after the complete presentation, the subjects free-recalled as many nouns as possible, indicated presentation type, and rated their confidence in the presentation type. The results showed that in short-term memory, picture recall was superior to that of both printed and spoken words under conditions of acoustic and simultaneous but not visual interference. The lowest recall in both long-term and short-term memory was found for spoken words under the acoustic interference condition. (FL)

Some Psycholinguistic Dimensions of the Silent Reading Process. A Pilot Study.

Pub Date-Aug 77
Note-30p.; Paper presented at the Annual Meeting of the Australian Reading Conference (3rd, Melbourne, Australia, August 28-31, 1977)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Cloze Procedure, Context Clues, Elementary Education, Language Research, Miscue Analysis, *Psycholinguistics, Reading Comprehension, Reading Diagnosis, *Reading Processes, *Reading Research, *Reading Skills, *Silent Reading

A modified cloze procedure was used in two studies designed to gain insight into the silent reading process. In the first, involving a small group of third- and fourth-grade children, several stories were prepared based on the assumption that the cloze procedure might be manipulated to reveal a reader's use of semantic, syntactic, and graphophonic cuing systems. As a result of this study, five specific reading/language abilities were identified: finding clues by referring back or ahead into the text, using information already known about the story line or topic (real world knowledge''), using the cumulative and logical buildup of a story line or topic to make predictions, and using letter clues (replacements controlled by the remaining orthographic clues). A second study was designed around stories that contained deletions made according to the five strategies. The subjects, 39 third-through seventh-grade students, were grouped as above average,'' average,'' and below average'' readers and administered a cloze procedure task. The results indicated that the above average readers' silent reading behavior was different from that of below average readers. The essential differences centered on focus, the employment of reading strategies, real world knowledge, and the ability to handle graphophonic clues. (FL)

An Analysis of Three Tests: Durrell Analysis of Reading Difficulty,'' Diagnostic Reading Scales'' (Spache), and the Analytical Reading Inventory'' (Moe and Woods), Based upon Scores Attained by Elementary Students in Grades One, Two, Four, and Six.

Pub Date- 78

Note-48p.; Report prepared at Southwest Missouri State University

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Comparative Analysis, Elementary Education, Oral Reading, Readability, Readability Formulas, *Reading Diagnosis, Reading Level, Reading Research, *Reading Tests, Silent Reading, *Test Reliability, *Test Selection

The distinguishing characteristics and relationships found among the Analytical Reading Inventory,'' the Durrell Analysis of Reading Difficulty,'' and the Spache Diagnostic Reading Scales'' in terms of readability levels, oral and silent reading results, and independent and instructional reading levels were examined in a study involving 117 first, second, fourth, and sixth graders. Each student was administered the oral and silent selections of the three tests during a three-day period. The results indicated that, of the three tests, the readability levels of the Spache scales were the most commensurate with the numerical levels specified for the reading selections. However, no significant differences were found in the scores on the oral and silent reading subtest levels of the three tests. (Tables of data, organized by grade level, are appended.) (FL)

Frameworks for Examining Comprehension and Discourse: An Overview.

Pub Date-Oct 78

Note-15p.; Paper presented at the Annual Meeting of the North Central Reading Association (21st, Notre Dame, Indiana, October 20-21, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Cognitive Processes, *Discourse Analysis, Elementary Secondary Education, Higher Education, Information Processing, Learning Processes, Models, *Reading Comprehension, *Reading Processes, *Reading Research, Research Methodology, *Semantics, Verbal Learning

Identifiers-*Schema Theory

Overviews of schema theory, which focuses on the cognitive operations engaged in by the reader, and discourse analysis, which focuses on structural characteristics of the text itself, are presented in this paper. The first section explains the notion of cognitive schemata (patterns of expectations that are applied to incoming information) and discusses six essential constituents of schema theory: schema states; schema variables; instantiation; activation; episodic, semantic, and schematic memory; and high versus low integrity processing. It then presents insights into the verbal learning process that can be drawn from schema theory. The second section traces the roots of discourse analysis and discusses the following forms: cohesion analysis (which is closely associated with the surface structure of the text), propositional analysis (in which the text is analyzed in terms of semantic content rather than linguistic form), and story grammar (which attempts to define broader relations among broader segments of text than the other two techniques). Descriptors-*Basic Skills, *Cognitive Development, Educational Research, Elementary Education, *Environmental Influences, Foreign Countries, Intelligence Factors, Longitudinal Studies, *Reading Research, *Skill Development

Identifiers-*Finland

A group of 767 children in Finland were studied over their first six years in school to discover what kind of variation there is in school readiness, what kind of development takes place in these variables during the basic school period, what relationship exists between these variables, to what extent heredity explains the differences, how far the differences depend on structural factors, and how far the variables can be explained by process variables. The children came from four northern and two southern communities, three rural and three urban. They were tested for intelligence, initial reading and mathematical abilities, social status, physical growth, and achievement and personality. Among the results were the following: intelligence and cognitive attainment correlated highly; clear differences in all the basic variables showed up, generally favoring the urban and southern districts; children in the rural northern areas gained most in reading skills, intelligence, and mathematical skills; intelligence was connected with literacy skills from the beginning; by the sixth grade, good readers were less neurotic and social; and the children in the northern areas who started behind the other children caught up by the end of the sixth grade. Identifiers-*Denmark

This document reviews the changes in reading in Denmark from 1934 to 1976 and discusses factors that brought about the changes. The paper indicates the importance of the library in reading development and notes that children use the library more extensively today than they did earlier. Changes in society and their effects on the educational system and on reading instruction are mentioned. The paper concludes by suggesting that study and research on reading in Denmark can be illuminated by further historical research and by consideration of the experience of other countries. (TJ)

Descriptors-Comparative Analysis, *Educational Practice, *Educational Theories, Elementary Education, Intermediate Grades, Literature Reviews, *Program Evaluation, *Reading Comprehension, *Reading Programs, *Reading Research

The purpose of this study was to examine theories of reading comprehension and instruction as they relate to instructional practices in the middle grades. Following an extensive review of literature in the theoretical areas upon which reading programs are normally based reading, language, learning, and teaching specific characteristics within each area were identified, and a program rating instrument was constructed. This instrument was used by three teams of specialists to assess seven reading programs in classroom situations. The results indicated that the programs do not have consistent or coherent theoretical bases; what differences they do have are obscured by their internal inconsistencies and their large areas of overlap. Even though the program analyses did not yield any significant differences, four major theoretical positions were identified that might be useful in future discussions of reading programs. (A bibliography and six appendixes of data are attached.) (RL)

Descriptors-Cognitive Processes, *Comprehension, *Comprehension Development, Elementary Secondary Education, Higher Education, *Language Development, Language Learning Levels, Language Patterns, *Language Research, *Language Skills, Linguistic Competence, Structural Analysis

A total of 224 subjects participated in a study to determine how children and adults comprehend logical connectives. Specifically, the study examined the effects of age, content, and practice on the encoding and combination of logical relationships expressed by six types of logical connectives: conjunction, disjunction, conditionality, biconditionality, simple affirmation, and simple negation. The subjects were drawn from grades 2, 4, 6, 8, 11, 12, and college. Half completed a task that required them merely to encode the connectives; the other half were required to combine as well as encode them. The results revealed significant effects of task, age, session, and connective, with comprehension of different connectives developing at different rates. Children as young as second grade encoded the connectives in consistent ways; however, it was not until fourth grade that they showed evidence of consistent combination of connectives. In general, comprehension of the conjunctive connective was the easiest, while comprehension of the conditional and biconditional connectives proved to be the most difficult. (Tables of results are included.) (FL)

Descriptors-Elementary Education, Grade 4, Memory, Readability, *Reading Comprehension, *Reading Research, *Recall (Psychological), *Semantics, *Syntax

Thirty-two fourth grade students were divided into two equal-sized groups according to reading ability. Each student read and recalled four passages from fourth-grade texts. The passages were either an original version, a semantic simplification, a syntactic simplification, or a combined rewrite. One week later, each child read and recalled alternate versions of the same passages. Able readers recalled significantly more appropriate responses in all passage versions on each test day than did the less able readers. Their recall for all but the combined versions was approximately the same for the two days. Able readers also, produced more details from the combined versions. Both groups remembered most of the superordinate propositions on both days, suggesting that improvement in recall was the result of remembering subordinate propositions. Less able readers remembered proportionately more with semantic simplification than with the original and syntactically simplified versions. For all subjects, the syntactic/original combination depressed recall during the second reading, and the semantic/combined versions increased it. (Sample passage versions are included.) (TJ)

Descriptors-Basic Reading, Comparative Analysis, *Context Clues, Elementary Education, Phonics, *Reading Instruction, *Reading Research, *Word Study Skills

A study compared two groups of second grade children (one receiving code-emphasis reading instruction and the other receiving eclectic reading instruction) on their ability to generate target words deleted from sentence frames, given minimal graphemic information. Target words were either a high-frequency word or low-frequency synonym while sentence frames provided three levels of contextual information. Results suggested a small advantage for code-emphasis subjects. This was primarily noticeable in responses to low-frequency target words, particularly when contextual constraints were weak. The findings indicate that both contextual constraints and word frequency were significant factors in ease of word identification. (TJ)

Chunking Method of Teaching and Studying: II.

Pub Date-Aug 78

Note-15p.; Paper presented at the Annual Meeting of the American Psychological Association (Toronto, Canada, August 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Cognitive Processes, *Educational Research, Higher Education, Memory, *Retention Studies, *Study Skills, *Teaching Techniques

Identifiers-*Chunking, *Outlining

Data from three general psychology classes were used in a study of the chunking method of teaching and studying. Two classes participated in a study on chunking study outline (CSO) length, and one in a study on retention rates. Results of students with high and low cognitive processing capacities (CPC) were also compared. It was found that a CSO should be short, that retention following learning with the chunking method may be near perfect, that test performance was affected by the type of knowledge tested, and that CPC may have some effect on long-term retention. The relation between CPC and test performance, however, appears to be insignificant when using the chunking method. (Samples of short and long chunking study outlines are appended.) (TJ)

Picture Chunking Effects in Concept Learning.

Note-14p.; Paper presented at the Annual Meeting of the American Psychological Association (Toronto, Canada, August 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Cognitive Processes, *Concept Formation, *Educational Research, Elementary Education, *Learning Processes, *Pictorial Stimuli, *Recall (Psychological), Teaching Techniques, *Visual Learning

Identifiers-*Chunking

Thirty-three second graders participated in a study to discover the value of teaching concepts using picture attribute chunking (PAC). It was hypothesized that PAC would yield superior concept learning performances compared to a picture attribute list (PAL) treatment and a word-alone treatment. The children, selected on the basis of a pretest that determined their knowledge of the concepts to be learned, were divided into three treatment groups. They were taught 14 concepts and given immediate posttests and delayed posttests of recall and recognition. On the immediate recall posttest, the PAC treatment results were superior to the word and PAL treatments. On the immediate recognition posttest, the PAC was superior to the other two and the word treatment was superior to the PAL. On the delayed recall posttest, there were no significant differences among the treatments. On the delayed recognition posttest, the PAC was superior to the PAL and word treatments. (TJ)

Middle School Reading Focus: Content or Child?

Pub Date-Oct 78
Note-12p.; Paper presented at the Annual Meeting of the College Reading Association (22nd, Washington, D.C., October 19-21, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Child Development, *Class Management, Cognitive Development, *Curriculum Planning, Elementary Education, *Middle Schools, Models, Moral Development, Personality Assessment, *Reading Instruction, Reading Material Selection, Reading Programs, *Student Centered Curriculum, Student Characteristics
Identifiers-Gordon (Chad), Kohlberg (Lawrence), Piaget (Jean)

According to recent research data, a successful reading program in the middle school requires a change in educational emphasis from content (skill orientation) to a curriculum determined by the cognitive, moral, and social-emotional development of the child. Three developmental models that provide tools for educators in developing such a curriculum include those of Jean Piaget, Chad Gordon, and Lawrence Kohlberg. Piaget's model provides a basis for deciding the cognitive level of reading content, while that of Gordon describes unavoidable value conflicts or crises in one's interaction with significant others. Kohlberg's model outlines definite stages of moral development related to an individual's cognitive development. In addition to developing a composite personality of the middle school child according to these models, the educator planning the reading curriculum must deal with two other variables, behavior (expected and actual) and environment. A classroom management model based on consideration of these variables provides realistic reading assignments drawn from the interest and cognitive levels of the individual student and it adjusts teaching methods, grouping processes, and supplementary materials according to the areas of a child's personality that are in need of growth and development. Evaluating Comprehension.
Pub Date-Nov 77
Note-10p.; Paper presented at the Annual Meeting of the California Reading Association (11th, Anaheim, California, November 2-5, 1977)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Cognitive Measurement, *Complexity Level, *Comprehension, Elementary Education, *Evaluation Methods, *Language Arts, *Language Development, *Language Patterns, Linguistics

One method of evaluating comprehension and language growth consists of analyzing the oral or written answers to questions about stories read to or by students and about visual representations. The method is applicable to various content areas at all levels of instruction. The T-unit or communication unit, the linguistic unit that cannot be further divided without loss of its meaning, is the basic measure for this method. In analyzing language samples, the T-units are identified and the average number of words per unit is figured. In evaluating comprehension, the basic measurement would be the correctness or appropriateness of the response for the situation. The measure beyond that would be the length of the response as measured by the length of the T-unit. It can be demonstrated that the number of words used by students in answering questions is directly related to the types of questions teachers ask. Questions considered to be of lower comprehension level elicit far fewer words than questions asked at a higher comprehension level. (Sample analyses are included.) (TJ)

The Effects of Prose Structure on the Recall of Fifth Graders and College Students.

Pub Date-78

Note-15p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Ability, Cognitive Processes, *Discourse Analysis, Elementary Education, Higher Education, Performance Factors, *Prose, Readability, Reading Comprehension, *Reading Research, *Recall (Psychological), *Textbook Research

Three passages of fifth-grade readability were read and recalled by 24 high- and low-ability fifth graders and college students. These passages were characterized as either narrative (high degree of temporal linkage), expository (logical linkage and abstract content), or mixed (logical linkage but with content suggestive of a narrative). The results were analyzed on the basis of qualitative and quantitative aspects of the subjects' recall. A significant, monotonic increase in recall was observed between groups, while no overall effects for texts or interactions were shown. However, post hoc analyses did show a very strong effect for texts within the fifth-grade/high-ability group. While low-ability fifth graders had equal difficulty with each of the texts (possibly reflecting decoding difficulties) and the college subjects recalled them with equal ease, the fifth-grade/high-ability group recalled the passage with the presumably more familiar narrative structure better than the expository ones, despite similarities in content. Descriptors-*Concept Formation, Decoding (Reading), Elementary Education, Language Research, *Reading Development, *Reading Processes, *Reading Research, *Semantics

Eighty-four elementary school children participated in a two-part experiment replicating an earlier experiment that tested the hypothesis that children would offer semantic explanations for words presented orally more frequently than for words presented in written form. This experiment used subjects from a population different in socioeconomic characteristics, in achievement and ability levels, and in the way they were instructed from those in the earlier experiment. In the first stage, subjects were asked to look at word lists and rate 18 words as known and 18 as unknown in oral form and a second set of 18 known and 18 unknown words in written form. In the second stage, children were asked to explain how two words (presented in one of four configurations: both known, both unknown, the question word known and the choice word unknown, and the choice word known and the question word unknown) went together. It was found that children gave more semantic responses if either the question word or the choice word were known or if the word were in the oral rather than the written mode. The word in the oral mode seemed to have more stability for the upper middle-class children of this experiment than it seemed to have for the lower middle-class rural children of the earlier experiment. Verbalization of Schemata Over Time: Investigation of Changes for Fifth Graders and Adults.

Pub Date-78

Note-12p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Cognitive Processes, Elementary Education, Higher Education, *Reading Processes, *Reading Research, *Verbal Communication

Identifiers-*Schemata

Studies of 42 fifth-grade students and 36 college undergraduates were conducted to test changes in verbalizations of schemata over time and in response to informational jolts. In both experiments, subjects were asked to write everything they could think of about dinosaurs and then to put those ideas in order of importance. Two weeks later, the subjects were divided into three groups: one was asked to repeat the earlier task; the second was asked to provide information in response to the traditionally taught statement, ``Dinosaurs are cold-blooded ancestors of today's reptiles''; and the third group was asked to respond to the recently proposed statement, ``Dinosaurs are the warm-blooded ancestors of today's birds'' (the informational jolt). Subjects were asked to put their ideas in order of importance and then were asked to indicate the statement with which they were more comfortable. It was found that language users responded to informational jolts and altered verbalized schemata. Verbalized schemata changes occurred over time and changed differentially according to the presence or absence of an informational jolt. (TJ)

Working with the Functionally Illiterate Adult.

Pub Date-Oct 78

Note-8p.; Paper presented at the Annual Meeting of the International Reading Association Great Lakes Regional Conference (3rd, Cincinnati, Ohio, October 12-14, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Adult Basic Education, *Adult Learning, Adult Literacy, Dropout Problems, *Functional Illiteracy, *Illiterate Adults, Literacy Classes, *Literacy Education, Student Attitudes, Teacher Attitudes

Functionally illiterate adults differ in several ways from children in a learning setting: they have a broader range of experience, they are more rigid and resistant to change, they know what they want from education, they are free to drop out at any time, they may have a long history of failure, they want to see immediate and visible progress, they may become easily discouraged, and their attempts to learn may be hampered by family or financial problems. The most important factors in literacy education are the teacher and the extent to which that teacher is able to build four components into the program: love, student self-worth, fun, and student participation in making meaningful decisions. Most dropouts occur because of poor teachers, the course content, or the scheduling and location of instruction. (TJ)

The Effects of Miscue Analysis Instruction on Judgments of Seriousness of Oral Reading Errors.

Pub Date-78
Note-11p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-College Students, *Error Analysis (Language), Higher Education, Linguistics, *Miscue Analysis, Preservice Education, *Reading Instruction, *Reading Research, *Summative Evaluation, Teaching Methods

To determine whether miscue analysis instruction changed their perceptions of the seriousness of certain kinds of errors in children's oral reading, 60 undergraduate and graduate students were given an error survey to complete before and after being given such instruction. Each of the 32 items of the survey consisted of a pair of sentences, with children's oral reading errors marked. Students were instructed to choose the sentence with the most serious error. Items were selected according to whether the errors were graphically similar to or different from the text, semantically normal or odd, syntactically normal or odd, with or without meaning change, and a dialect variation or not. Results indicated that meaning change was a crucial factor in students' judgments of error seriousness both before and after miscue analysis instruction. However, instruction did appear to affect the way students viewed the seriousness of certain kinds of errors; in particular, dialect variations were viewed as less serious than other errors. (FL)

Reading: Cue Use, Achievement and Comprehension in an Adolescent Population.

Pub Date-78

Note-19p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Adolescents, Context Clues, *Cues, *Miscue Analysis, *Psycholinguistics, *Reading Achievement, *Reading Comprehension, Reading Diagnosis, *Reading Research, Secondary Education, Semantics

More than 5,000 reading miscues by 96 eighth and ninth graders were analyzed in a study designed to define specific relationships among cue use and to extend research based on Kenneth Goodman's psycholinguistic theory to the secondary level. The students read two easy and two difficult passages orally and answered questions based on them. Each miscue was rated for the achievement level of the subject based on total comprehension score; comprehension of the passage in which the miscue occurred; the graphic, grammatical, and semantic match of the miscue to text; and whether it was corrected. The results showed that students who disregarded cues were poor readers and did not comprehend, and that making distinctions across levels of grammar and graphics increased their comprehension. In addition, good readers who did not comprehend corrected more meaning-changing responses in partly grammatical structures, and more poor grammatical responses in sentences that retained sentence meaning. This indicates that information on one dimension helped readers correct information on another. When good readers minimized attention to grammatical and graphic disparities and focused on retaining sentence meaning, they comprehended material. The findings suggest that Goodman's theory can be applied successfully to the reading behavior of secondary students. (FL)

The Relationship between Retail Merchandising in the Content Area and Its Effect on Comprehension and Reading Rate as Measured by Retail Merchandising Reading Tests Given to Selected Secondary School Students in Metropolitan Toronto.

Pub Date-Jul 78

Note-40p.; M.S.Ed. Thesis, State University of New York, Potsdam

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Content Reading, *Reading Comprehension, *Reading Rate, *Reading Research, *Retailing, Secondary Education, Sociocultural Patterns, Success Factors, Vocational Education

A total of 99 students from a Toronto secondary vocational school participated in a study to determine whether students who studied retail merchandising differed significantly in comprehension and reading rate from students who did not study retail merchandising. An experimental group composed of 50 merchandising students and a control group of 49 nonmerchandising students were given a passage on merchandising content material to read silently for one minute. After reading the passage, each student completed ten multiple-choice comprehension questions. Grade level, age, sex, race, ethnic background, and scores on a reading for understanding (RFU) measure were also elicited in order to discover factors related to reading success. The findings indicated that the study of retail merchandising had no effect on reading comprehension but did affect reading rate. The students displaying the greatest success in reading were older students in higher grades, females, whites, nonethnics, and those with high RFU scores. (An appendix contains copies of the reading tests and guidelines for the conduct of research in Toronto schools.) (FL)

Construction of Ideational Scaffolds during Reading.

Pub Date-78

Note-14p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Cognitive Processes, *Content Reading, Higher Education, *Medical Students, *Reading Comprehension, *Reading Improvement, *Reading Research, *Study Skills

Thirty-six students participated in a study of a program designed to help first-year medical students construct an ideational scaffolding as they attempted to understand their texts. They were divided into two groups: an experimental group that was given an instructional program on how to develop a hierarchical structure while reading, and a control group that received no instruction. At the end of the instructional period, the control group and the experimental group were given a reading assignment and a comprehension test. It was found that the total test score for the experimental group was higher than the score for the control group, that there was no significant difference between the two groups on scores on higher-level and middle-level concept categories, and that the experimental group did significantly better on the lower-concept category. A surprising result was that although most of the students in the experimental group were observed to construct on paper a structured overview as they read, there were no differences in the words-per-minute for the reading task between the two groups. (TJ)

Choral Reading: Who Has the Time? Why Take Time?

Pub Date-Oct 78
Note-13p.; Paper presented at the Annual International Reading Association Great Lakes Regional Conference (3rd, Cincinnati, Ohio, October 12-14, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Choral Speaking, Elementary Education, *Group Reading, *Interpretive Reading, *Poetry, *Reading Instruction, *Teaching Techniques

Choral reading can be used by teachers to enhance children's appreciation for poetry and to develop their personal, social, psychological, cognitive/affective, and language values. It is useful for teachers to begin by creating an awareness in children of the basic elements of choral reading: tempo, rhythm, pitch, stress, and juncture. Then an arrangement of the work to be read must be made: the reading can be in unison, antiphonal, cumulative, or by single voices. In presenting a sequence of choral speaking skills, teachers might begin with repetition of sounds, then go to repeated refrains, simple unison reading, and finally to small group work. The poem must be scored so that groups and individuals will know when to speak, and it should be marked so that all agree on the emphasis. In many poems, it is possible to create a verbal obbligato to provide a background appropriate to the poem. (TJ)

Investigating the Effectiveness of MRM Instruction on Improving Comprehension of Paragraphs.

Pub Date-78

Note-8p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Comprehension Development, Higher Education, *Reading Comprehension, *Reading Instruction, *Reading Research, *Study Skills, Teaching Techniques

A study of the effects of using the MRM (message unit verb unit message unit) instructional system on reading comprehension was studied using 69 college freshmen, 37 in an experimental group and 32 in a control group. Both groups were engaged in a variety of activities designed to promote greater reading efficiency as a regular part of their course work. In addition to the regular reading program, the experimental group worked during part of the class time with the MRM system. The procedures required the experimental group to read a selection of approximately 150 words from a text and peruse the selection for three words or short phrases (message units) they determined to be important to the essential message contained in the selection. The units were then used as the major part of a sentence containing a main idea in the selection, and the contents of the main idea sentence became the basis for determining the MRM unit that appeared to be the central idea relative to the message as a whole.

Comprehension gains were determined through pre- and posttest administration. No substantial differences were found favoring the experimental subjects. (TJ)

An investigation was conducted to ascertain the effects of the structured overview on both the short-term and long-term comprehension of average and below average readers. The subjects were 143 college students classified as average or below average readers and randomly assigned to either a structured overview (65) or a control group (78). Both groups read an article of college level difficulty; students in the structured overview group completed a prereading, teacher-guided discussion of major concepts from the article as they were depicted on the overview. Both groups completed a ten-item multiple choice test on the article immediately following the reading and again one week later. Results showed a significant difference in short-term comprehension favoring the structured overview over the control group, and a significant difference in short-term comprehension favoring average readers over below average readers in both groups. There was no significant difference between the groups on the long-term measure. The differential effect of the overview for average and below average readers suggests that reading achievement is an important independent variable in investigations of adjunct learning aids. (TJ)

Descriptors-Behavioral Objectives, Educational Games, Elementary Education, *Individualized Reading, *Instructional Materials, *Learning Activities, *Reading Improvement, *Reading Instruction, Reading Skills, Skill Development, *Teacher Developed Materials

Activities and games that have been used successfully in elementary classrooms are contained in this booklet intended for use by educators who wish to develop simple and inexpensive individualized reading materials. The activities emphasize the improvement of a variety of skills, including knowledge of antonyms, categorizing, compound words, main idea, prefixes, sentence meaning, and syllabication. Each activity identifies the skill to be developed, lists the materials needed, and offers directions for students and for construction of materials. The booklet concludes with a number of word lists for use in starting the games or activities. Among them are lists of C'' and G'' words, synonyms, compound words, survival words, words describing types of transportation, and CB slang. (FL)

Descriptors-*Discourse Analysis, *Literature Reviews, Memory, Models, *Prose, *Reading Comprehension, *Reading Research, Recall (Psychological), Retention Studies, Semantics, Structural Analysis, Structural Grammar

Identifiers-*Center for the Study of Reading (Illinois), *Schemata

This literature review explores research that has been done on prose comprehension and retention. The first section discusses investigations of factors that affect the amount of recall, including instructionally relevant experiments, research using additional context as external aids, and investigations that test the generalizability of verbal learning results to connected discourse. The second section discusses representation of text structures, including representations of logical relations, representations concerned with more complex relations, formal models of text structure, and story grammars. A third section discusses the use of world knowledge to aid comprehension, including schemata, frames, and prototypes; necessary inferences; scripts, plans, and goals; the script-elaboration model; and experimental evidence in support of the elaboration theory. The paper closes with general conclusions and implications for education. (TJ)

Identifiers-*Center for the Study of Reading (Illinois)

The standard dictionary definition of a metaphor a word or phrase applied to an object or concept that it does not literally denote in order to suggest comparison with another object or concept is inadequate in that it does not deal with whole sentence metaphors and that it provides no way of distinguishing between a metaphor and a semantic anomaly or a falsehood. A superior, alternative definition is that a metaphor is the use of an expression that is contextually anomalous and for which the metaphoric tension is in principle eliminable. Tension elimination can be conveniently discussed in terms of three functions that metaphors can perform: expressing things that are literally inexpressible, conveying concepts in a compact manner, and expressing ideas vividly. Results of experiments on the comprehension of metaphors suggest that two important variables affecting the comprehension of nonliteral uses of language in general, and of metaphors in particular, are the nature of and the amount of contextual support. Finally, it might seem that there is an important difference between metaphors and similes because the apparent violation of conversational postulates, at least of the sincerity postulate, is immediately obvious in the case of the metaphor, but much less obvious for the simile. Identifiers-*Center for the Study of Reading (Illinois)

A study involving 80 undergraduate students was undertaken to test the use of imaginal and verbal strategies to remember and comprehend concrete and abstract prose passages. Sets of three to five words were selected from each passage. After reading a passage, the subjects were instructed to process the words either verbally or imaginally by writing a series of sentences or by drawing a picture. In a second session, the subjects were given two tests: a multiple choice test to measure the subject's understanding of the relationship between elements of each word set, and a production test to test the subject's production of the relationships between the study words. The results showed that on the multiple-choice tests the verbal strategy was better than the imaginal strategy, and the effect of the concreteness of the passage and the interaction between concreteness and strategy were not significant. On the production test, there was a trend in favor of the verbal strategy, the effect of concreteness was significant, and the interaction between concreteness and strategy was not significant. (TJ)

Identifiers-*Center for the Study of Reading (Illinois)

To provide a structure for describing different approaches to testing, five dimensions along which reading tests may differ have been identified. They are: test uses, item generation, item revision, assessment of precision, and validation. Each dimension contains variations that reflect O.K. Buros's distinction between differentiation and measurement. These dimensions were used to profile representative reading comprehension tests. Only standardized, norm-referenced achievement tests, whose uses emphasize differentiation, were found to have an inference system consistent with those intended uses. No tests were found having inference systems consistent with such intended uses as certifying competence, diagnosing strengths and weaknesses, and tracking progress uses that emphasize the measurement function of tests. Tests constructed using a domain-referenced approach would yield such an inference system and fill some gaps in the array of currently available measures of reading comprehension. (Author/FL)

Identifiers-*Center for the Study of Reading (Illinois)

Informal reading models, although more like metaphors than truly scientific models, may be just as useful in making instructional decisions as formal models are in physical science. Models are a vital part of the instructional process even when teachers are not consciously aware of their presence. Three classes of reading models are bottom-up models, which assume that the translation from print to meaning begins with the print; top-down models, which assume that the translation process begins in the mind of the reader with an hypothesis or guess about meaning; and interactive models, which assume that the two types of processing are interactive. Components that are included in most models of reading are attention and capacity, memory, sensory capabilities, and perception, while common exclusions from models are intelligence, motivation, and instructional setting. Alternative, and sometimes opposing, decisions derive from alternative models in the areas of initial program emphasis, reading subskills, skill sequence, integration of reading activities, amount and type of practice, attention to oral reading errors, selection of reading materials, and diagnosis and remediation of reading difficulties. Teachers should try to articulate and make explicit whatever implicit models seem to guide their teaching behavior. (GW)

The Relationship of Self-Concept, Knowledge of Reading, and Teacher Effectiveness.

Pub Date-78

Note-9p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Effective Teaching, Elementary School Teachers, *Knowledge Level, Primary Education, *Reading Instruction, *Reading Research, *Self Concept, Teacher Attitudes, *Teacher Characteristics, Teacher Evaluation, Teaching Experience, Teaching Skills

The relationship of teacher self-concept, knowledge of skills for teaching reading, and teaching effectiveness as judged by reading supervisors was examined in a study of 101 primary school teachers. The teachers were administered self-concept and knowledge of reading tests, and the effectiveness of each teacher was evaluated by a reading supervisor and the school principal. In addition, the teachers rated their own effectiveness. Their years of teaching experience and background were also examined. The results indicated that teacher self-concept and years of teaching experience were the best predictors of teacher knowledge of reading, while the knowledge factor was a highly significant predictor of teacher effectiveness. Other findings suggested that the most effective teachers as judged by reading supervisors had the least knowledge of skills for teaching reading and the poorest self-concept and that, conversely, those teachers judged least effective had the greatest knowledge of skills for teaching reading and the highest self-concept. A Comparison of Small Group and Individualized Instruction in Junior College Remedial Reading Programs.

Pub Date-Dec 78

Note-11p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-College Freshmen, *Individual Instruction, Junior Colleges, Junior College Students, Reading Improvement, *Reading Instruction, *Reading Research, Reading Skills, *Remedial Reading, *Small Group Instruction

A total of 108 junior college freshmen participated in a study comparing the effectiveness of small group instruction with individualized instruction in remedial reading programs. Sixty of the subjects were taught in a small group classroom setting (ten students per class), while the remaining subjects received individualized instruction in a laboratory setting. Instructors were asked to emphasize word recognition, vocabulary, and comprehension skills. An analysis of pretest and posttest scores indicated that the teaching of reading comprehension and vocabulary skills was more effective when done in small group sessions than in individualized sessions. The Validity of IQ, Underachievement, and Differential Vocabulary as Predictors of Remedial Reading Success of Seventh and Eighth Grade Low Achievers.

Pub Date-May 79

Note-72p.; M.Ed. Thesis, Rutgers, The State University of New Jersey

EDRS Price MF-$0.83 HC-$3.50 Plus Postage.

Descriptors-Economically Disadvantaged, Elementary Education, Intelligence, Learning Processes, *Low Achievers, Masters Theses, Minority Group Children, *Predictor Variables, *Reading Achievement, *Reading Research, *Remedial Reading, Underachievers, Vocabulary Skills

Forty low-achieving seventh and eighth grade students were involved in a study to ascertain whether intelligence, underachievement, or the difference between aural and sight vocabularies could predict relative learning rate with respect to reading achievement gains. For purposes of the study, relative learning rate'' was defined as the ratio of the learning rate during remediation to the learning rate prior to remediation. The subjects, more than 70% of whom were nonwhite and 50% of whom were economically disadvantaged, were administered standardized intelligence and reading achievement measures and an experimental differential vocabulary test in late 1977, and a reading achievement posttest in May 1978. Analysis of the test data showed that the three predictor variables were not effective in forecasting remedial reading success; moreover, there was a trend for subjects with low predictive characteristics to gain more than subjects with high predictive characteristics. The findings suggest that the use of intelligence scores and underachievement measures based on intelligence and prior reading achievement are unreliable for economically disadvantaged, minority low-achievers. More than 50 college students participated in an investigation of the extent to which content area study skills programs influenced the attrition rates and grade point averages of health science students whose performance was marginal. Two experimental study skills programs were developed. In the first, 11 students were placed in a how to study the sciences'' course that lasted for one semester. While the attrition rate for this group was lower than that for a matched control group in a general survey study skills course, there was no significant difference in the grade point averages of the two groups. In the second program, 23 students were placed in a studying the sciences'' five-week minicourse. After the course, the grade point averages of these students were slightly, but not significantly, higher than their averages before the course. Overall results indicate that marginal students require more than a one-semester or half-semester study skills course. (FL)

Basic Literacy through the Content Areas in the Secondary School.

Pub Date-Nov 78

Note-8p.; Paper presented at the Annual Meeting of the California Reading Association (12th, San Francisco, California, November 9-11, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Basic Skills, *Content Reading, Daily Living Skills, Human Development, *Humanistic Education, Integrated Activities, Intellectual Disciplines, *Language Skills, *Literacy, Process Education, Secondary Education, *Skill Development, Study Skills, Teaching Techniques

One of the necessities of basic literacy basic knowledge is divided into specific content area disciplines for instructional purposes; but the other need competence in language skills can and should be taught by teachers in all disciplines. High school content area teachers can promote the tenets of basic literacy by emphasizing the effective use of skills to process the growing scope of human knowledge, by teaching students how to read and study independently, and by teaching language skills that are relevant and pertinent to their particular academic disciplines. Specific techniques that teachers can use include having students share experiences, study together in small groups, rewrite materials in their own words, and do as much supplementary reading in the subject area as possible. Teachers can also use "job contracts" when making assignments, establish lesson procedures that prepare students for learning the materials, note appropriate study procedures, point out patterns of informational organization, explain the use of graphic aids, reinforce printed materials with the audiovisual materials, foster student vocabulary development and word recognition skills, structure assignments to ensure their successful completion, and use open-ended questions that apply the information and skills to lifelike situations. Identifiers-Arkansas

A total of 107 Arkansas kindergarten teachers responded to a questionnaire designed to identify their attitudes and practices. The questionnaire elicited information concerning the teachers' experiential background, the methods and materials they used to teach reading skills, the prereading and reading skills taught, and their opinions about reading instruction in kindergarten. The results showed that the majority of respondents had more than three years of teaching experience and had completed one or more reading methods courses. The majority also indicated that they used commercial and teacher-made worksheets, taught phonics skills, and gave instruction in writing letters of the alphabet. Seventy-six percent of the teachers responded that they were opposed to formal reading instruction in kindergarten, preferring instead a more traditional readiness language development program. The actual teaching practices reported, however, suggest that these teachers go beyond such a program in their instruction. (FL)

Descriptors-Elementary Secondary Education, Grade 10, Reading Ability, *Reading Comprehension, *Reading Research, Reading Skills, *Reading Tests, Standardized Tests, *Test Construction, *Testing Problems, *Test Validity

Identifiers-Stanford Test of Academic Skills

Reading comprehension tests usually contain reading passages followed by multiple choice questions about the passages; but one potential weakness of this format is that the questions may be passage independent,'' answerable without necessarily reading the passage first. When examining this phenomenon by assessing a particular test, the Stanford Test of Academic Skills,'' researchers administered two forms of the test to 101 tenth graders. One group (49 students) answered Form A test items without reading the passage, then read the Form B passage and answered those questions. The other group (52 students) read the Form A passage and answered its questions, then completed Form B test items without reading the Form B passage. Analysis of test scores shows that both groups achieved significantly higher scores in passage-independent conditions than chance (normal distribution approximations) would predict. These results, coming in the midst of greater demands for tests of basic skills such as reading proficiency, raise doubts about the value of standardized reading tests as they are presently constructed. (RL)

Identifiers-*Oral Language

To ascertain what type of environment exists in elementary classrooms in the United States to stimulate oral language, questionnaires were mailed to 500 classroom teachers. Data from the 412 respondents indicated that 83% believed their college courses in language arts had not prepared them to encourage the development of children's language, and 25% believed that reading to children was good because it increased vocabulary. In addition, the results showed that teachers were not clear on the purpose of oral language, that they did not understand the relationship between oral and written language, that 75% of the schools surveyed did not have an oral language curriculum, and that generally little attention was paid to the oral language of children as long as they could answer the teacher's questions. Teachers could improve instruction in oral language by creating an environment in which children are encouraged to develop oral language, combining Michael Halliday's theory that language use and purpose are the heart of language learning with Walter Loban's concept of growth stages in syntactic complexity, and by teaching children to use the oral language process of talking to others or to themselves as one step in the reading process. To investigate relationships among reading scores, college academic performance, degree expectations, self-assessed skills, and retention, data from The Nelson-Denny Reading Test'' and background information from The New Student Survey'' were correlated with the freshman year academic performance and enrollment status at the beginning of the junior year of 490 students. Comparisons of correlations by academic fields of study revealed differences in predictive strength of the variables. The data indicated students' self-assessed skills were significantly related to actual reading scores, and that academic performance and retention could be predicted with moderate reliability using the Nelson-Denny Reading Test scores and students' self-assessed degree of preparation, and their degree expectations. Descriptors-Cognitive Processes, College Students, *Cues, Higher Education, Memory, *Reading Processes, *Reading Research, *Semantics, Time Factors (Learning), *Word Recognition

Identifiers-*Center for the Study of Reading IL

College undergraduates participated in a cost/benefit analysis and a speed/accuracy analysis of semantic priming in a lexical decision task. In both studies, half the cues were neutral and half were words from 30 semantic categories. Word targets were the category names, and nonword targets were derived from those names. The cue-word was valid 80% of the time and invalid 20% of the time. In the first experiment, cue time, a between groups factor, was either 200, 300, 400, 500, or 700 milliseconds (msec). It was found that valid cues produced facilitation at cue times as short as 400 msec, and invalid cues produced inhibition at cue times as short as 200 msec. The second experiment used a response-signal technique to collect information about the speed/accuracy trade-off in a lexical decision task. Cues were always presented for 800 msec, and targets were presented for varying time periods. Results indicated that subjects are capable of trading accuracy for speed, invalid cues can lower discriminability, and response bias in an active component in priming. The two experiments indicate that discriminability, criterion bias, and response bias seem to be integrated in providing facilitation, but that simple applications of criterion bias or response bias alone do not adequately explain the facilitation effect. Descriptors-*Association (Psychological), Associative Learning, *Cognitive Processes, Comprehension, Connected Discourse, Higher Education, *Language Research, *Reading Processes, Recall (Psychological), *Semantics, *Verbs

Twenty college students, ten each in the experimental and control groups, were the subjects of an experiment designed to demonstrate that integration of verb meanings occurs in connected discourse. Six paragraph-length stories, each of which included one or two critical sentences containing a general verb, were presented orally to the subjects. The experimental versions included an extra sentence or phrase whose meaning, when combined with the meaning of the general verb, was hypothesized to produce the meaning of a particular more specific verb. After hearing the stories, the subjects were administered a recall test containing four to eight sentences from each story, each with a missing word that the subjects were asked to fill in. The verbs of the critical sentences were always used. Results showed that subjects in the experimental group were more likely to recall the specific verb than were control subjects, that the effect of inserting material was stronger for some pairs than for others, and that the inserted material acted specifically to shift recall from the general verb to the particular specific verb predicted. Identifiers-*Center for the Study of Reading (Illinois)

A set of procedures for coding internal state words (those words representing mental states and perceptual experiences), developed for application to data on the language of young children and those with whom they converse, is described in this report. The report first discusses the rationale for studying cultural variation in vocabulary use, the cognitive consequences of vocabulary growth, and the rationale for studying internal state words. The following procedures used for coding words are then described: determination of the proportion of each speaker's total tokens at home and at school that were internal state tokens and the proportion that occurred in each of three domains (cognitive, perceptual, and affective), the coding of the tokens for ``semanticity'' (the relation of the word's meaning to the meaning of the utterance as a whole), and the assignation of a dictionary definition to each semantic token. Sample dialogues between children and adults are then presented to illustrate possible categories to which mental state words can be assigned. The report includes numerous tables of data on such topics as categories of internal state vocabulary, distributions of internal state tokens for individual children, and categorizations of specific internal state words used. Note-8p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978) ; Not available in hard copy due to marginal legibility

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Basic Reading, *Educational Research, *Illustrations, *Pictorial Stimuli, Primary Education, *Reading Materials, Student Reaction, *Textbook Research

A study was undertaken to determine what factors distinguish low potency pictures (those that elicit a relatively low amount of language) from high potency pictures. Pictures were selected from eight first and second grade readers and classified according to the Picture Potency Formula. The results indicated that three factors were found to be consistently present in pictures to which children responded highly, but were not present in pictures to which children responded to a lesser extent. These factors were the number of actions, the number of children, and the number of people in the pictures. (TJ)

Marxism and Communication.

Pub Date-Aug 78
Note-19p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (51st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Capitalism, *Communication (Thought Transfer), *Economic Development, *Language, Language Role, *Mass Media, Research, Semiotics
Identifiers-*Advertising, Communication Research, Engels (Friedrich), Marx (Karl), *Marxism

Karl Marx and Friedrich Engels had little to say specifically about communication and language, but their works hint at the direction their critique of communication might have taken. Language and consciousness are conditioned by specific means of production and sociopolitical circumstances and are therefore ideological. The domain of ideology coincides with the domain of signs (words with meaning); whenever a sign is present, ideology is present. Each class within a society accents the particular connotations of its signs that enhance its own interests; these different accents result in the class struggle. The ruling class in capitalism creates and sustains its ideology and restricts social intercourse by organizing the economic forces of society. Also, capitalism and the mass media developed together as it became necessary for merchants to be aware of world events. The mass media exploit workers by attempting to make the capitalistic ideology uniaccentual. As part of the production process spread by the mass media, advertising exploits workers in the economy and in the world market. Communication research, like most social sciences, is grounded in the status quo and reproduces the uniaccentuality of the ruling class ideology. (TJ)

Hermeneutics and the Study of Communication.

Pub Date-Aug 78

Note-41p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Communication (Thought Transfer), Greek Civilization, *Historical Reviews, Intellectual Disciplines, *Intellectual History, Language, Linguistics, *Literature Reviews, Philosophy, Reading Comprehension, Research, Semantics

Identifiers-*Communication Research, *Hermeneutics

The manner in which hermeneutics (the study of the interpretive process) has treated the phenomenon of interpretation is examined in this paper. Following a historical review of hermeneutics from its Hellenic roots through the phase of traditional hermeneutics to the major reformulation of the field by Friedrich Schleiermacher and Wilhelm Dilthey in the nineteenth century, the paper describes contemporary phenomenological hermeneutics. It points out that in phenomenological hermeneutics meaning is fundamental, subjectivity is redefined as being-interpreted, objectivity is redefined as historicity (the ongoingness of interpretation beyond the existential possibilities of individuals), language is an active presence in the constitutive structure of meaning or existence, understanding is an event of language, and communication is the ongoing process of interpretation within language. It then discusses Paul Ricoeur's theory of comprehension and his model that permits the isolation of major issues in any theory of interpretation; and it outlines the work of contemporary French "poststructuralists." The conclusion discusses stumbling blocks to the isolation and identification of the methodological implications of hermeneutical theorizing and discusses the implications of hermeneutics for current social theorizing and communication research. Time of Decision and Media Use During the Ford-Carter Campaign.

Pub Date-Aug 78
Note-29p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Decision Making, *Elections, *Mass Media, *Media Research, Persuasive Discourse, Political Affiliation, *Political Issues, Speech Communication, Surveys; *Voting
Identifiers-*Presidential Campaigns

Data from a series of surveys of voters in the Midwest, conducted during the 1976 presidential election campaign, were used to explore the effects of the campaign in relation to when people decided for whom to vote. A second purpose was to consider the adequacy of the traditional dichotomous model of voters: people who make up their minds early pay close attention to the media campaign, while people who make up their minds late pay little attention to the media campaign. The results indicated the following: exposure to the campaign is necessary for media effects; partisan precommitment is sufficient to prevent those effects; in the absence of precommitment, those exposed to the campaign will make their decisions on the basis of its content; and in the absence of precommitment, those who are not exposed to the campaign will vote on the basis of prior party identification. Finally, those who decided for whom to vote during the campaign made up 40% of the sample. (TJ)

Descriptors-Broadcast Industry, Communication (Thought Transfer), Competition, *Court Litigation, *Economic Factors, Federal Regulation, *Freedom of Speech, Journalism, Laws, *Mass Media, *News Media, *Newspapers

Identifiers-*Ownership

A number of constitutional and economic problems are involved in the process of insuring a free press. The enforcement of antitrust laws by the Justice Department can, but does not, provide adequate safeguards for the public. Beginning with the 1945 Supreme Court decision, Associated Press v. United States,'' many court decisions have been made concerning competitive principles, antitrust, and newspapers. Some of the issues involved include diversity of news and opinions; newspapers acting as local monopolies; the growth of newspaper chains and the resulting demise of independently owned newspapers; the financial difficulties of purchasing, establishing, and operating a competing newspaper; joint operation of competing newspapers; the fairness doctrine; the powers of the licensing agency for the broadcast industry; and divestiture when a newspaper owns a radio or television station in the same city. Any answer to the question of how to insure the existence of a free press must include a program that encourages new capital investment in the newspaper industry to stimulate competition, thereby forcing newspapers to give greater attention to opposing views and matters of public interest. The Development and Application of a Cognitive Map'' to the Daily Newspaper Newsroom.

Pub Date-Aug 78

Note-42p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Behavior Patterns, *Cognitive Processes, *Employee Attitudes, Group Norms, Journalism, *Media Research, *Newspapers, *Organizational Communication, Personality Assessment, *Personal Values, Socialization, Social Values

Identifiers-*Cognitive Maps

People's cognitive maps (images of self, beliefs and values, evaluations of relationships with individuals and groups) determine attitudes and behavior, provide the basis for communication, and determine in part their response to events. The cognitive map of an organization performs the same function for groups. Thirty-five newspaper employees from five daily newspapers in New York, Connecticut, and Massachusetts were interviewed to discover demographic characteristics and then were asked to do a Q-sort of 50 items related to personal values. Five distinct types showed up: the free spirit (a generally upbeat outlook on life, better educated, younger, less experienced); the grim upholder of the social order (orientation based on traditional values, slightly older than and less educated than the sample average); the disciplined independent (views work as a major element of life, efficient, self-controlled, has high-responsibility positions); the responsible hedonist (concerned with personal pleasure and comfort); and the benevolent moralist (has intense views about the propriety of the beliefs and actions of others). Descriptors-*Composition (Literary), Educational History, *Educational Research, *Educational Trends, *English Instruction, *Grammar, Higher Education, Language Skills, Secondary Education, *Teaching Techniques, Writing Skills
Identifiers-Composition Process

The first section of this paper notes that, out of the frustration they feel in lacking a coherent, definitive system for sequencing language instruction, English teachers sometimes turn to the system of grammar teaching used in the past. It then suggests that the English teaching profession is moving through a Romantic age toward a new Classical era and sketches three stages in current writing theory and practice: the controversy about the effect of grammar instruction on writing (Romantic doubt), the freeing and development of students' ability (Romantic optimism), and combination of an emphasis on individuality with an emphasis on system (Classic emphasis). It then discusses research into writing as a process, writing for audiences, the history of writing instruction, and the relationship of writing to consciousness. The second section of the paper describes 25 teaching techniques that permit an open-choice, experience-based format for writing while allowing for some "grammar interventions" during prewriting, editing, and proofreading. Four appendixes provide sample materials; student worksheets; an outline of competency levels in grammar and usage, sentence structure, and paragraph development; and a class-composed poem generated in the process of teaching grammar. Story and Discourse: Narrative Structure in Fiction and Film.

Pub Date-78

Note-267p.

Available from-Cornell University Press, 124 Roberts Place, Ithaca, New York 14850 ($14.50 cloth)

Document Not Available from EDRS.

Descriptors-Creative Writing, *Discourse Analysis, *Fiction, Films, *Literary Analysis, *Literary Conventions, Literature, *Narration, Story Telling, *Theories

The purpose of this book is to provide a reasoned account of narrative structure, the elements of storytelling, and their combination and articulation. As explained in the introductory chapter, the what'' of narrative is the story, its events (actions, happenings) and existents (characters and settings); the way'' of narrative is discourse, or expression, which includes the structure of narrative transmission (whether a real, implied, covert, or overt narrator or no narrator at all) and its manifestations. Each of these components is illustrated with discussions of novels, short stories, and films in four chapters about story events, story existents, the discourse of nonnarrated stories, and covert versus overt narrators. Rather than categorizing the types of narrative form and development, the discussions identify features that mark the degree to which particular narrative components come to bear on the literary work as a whole. Two indexes (author/title and subject) and a diagram of narrative structure according to the proposed theory complete the text. (RL)

Descriptors-*Cognitive Development, *Cognitive Processes, College Freshmen, *Composition (Literary), *English Instruction, Higher Education, *Moral Development, Rhetoric, *Writing Skills

Identifiers-*Kohlberg (Lawrence)

Freshman composition students have difficulties in moving to new stages of cognitive ability similar to the difficulties experienced by poorer writers in moving to new levels of syntactic maturity. A model of moral/cognitive development created by Lawrence Kohlberg indicates that human responses to moral choices move through as many as six stages of moral growth. Freshman composition students assigned one of Kohlberg's moral dilemma problems consistently gave responses that were between Kohlberg's stages three and four. One implication of this finding is that more accurate developmental models for teaching writing must go beyond those for remedial-level instruction to develop a model of cognitive growth in nonremedial students. Kohlberg notes a moving ahead and falling back in moral-cognitive development which seems to be paralleled in the development of cognitive complexity and rhetorical strategies. A second implication may be that the cognitive growth of students must be initiated by putting students in writing and discussion situations that lead them toward the level of moral/cognitive development typical of those who appreciate most literature. More highly developed writing and cognition will be fostered by teaching the terminology of complicated perspectives. (Student responses to a moral dilemma problem are appended.) (TJ)

The Movement of Taboos: A Message-Oriented Approach.

Pub Date-Aug 78

Note-46p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Behavior Change, *Beliefs, *Change Strategies, *Communication (Thought Transfer), Information Dissemination, *Mass Media, Media Research, *Social Change, Social Values

Identifiers-*Taboos

Defining "taboos" as laws, norms, or personal beliefs specifying situations in which behaviors or topics should not be performed or communicated about, this paper provides a conceptual and theoretical communication perspective governing the movement of taboos in social change situations. Applying Joseph Woelfel's message-oriented linear force aggregation theory to taboos, the paper provides a theoretical rationale for five methods of taboo removal: relabeling the taboo, offering "diffuser" incentives, legalizing it, promoting the idea of popular approval of it, and creating a festive atmosphere around it. The paper also discusses ways in which mass media antitaboo campaigns can overcome the barriers that seem to mitigate media effects, and it concludes with a list of five hypotheses to test the role of the media in taboo-reducing campaigns. Note-31p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Court Litigation, Freedom of Speech, Guidelines, *Journalism, *Legal Problems, *Legal Responsibility, *News Media, News Reporting, *Photographs, Photography, *Privacy, Torts

Reviews of publications about privacy law, of recent court actions, and of interviews with newspaper photographers and attorneys indicate that torts of privacy often conflict with the freedoms to publish and to gather news. Although some guidelines have already been established (about running distorted pictures, ``stealing'' pictures, taking pictures in courtrooms), some areas of uncertainty exist in the expansion of privacy laws to include torts of false light (misrepresenting the facts either by darkroom or lens distortion or by misinformation in captions), invasion of privacy (publishing embarrassing private facts), and appropriation (making money at the expense of someone's privacy). In general, photographers have not adjusted their picture taking procedures, tending to let editors and attorneys sort out the difficulties attendant to printing news photographs. But procedures could be developed to minimize exposure to lawsuits. Besides the general rules already established, these procedures might include getting identifications from all principals in shots (making them aware of the picture taking), requiring photographers to check captions on their photographs prior to publication, and providing a standard release form for all minors who are photographed. The Reader, the Text, the Poem: The Transactional Theory of the Literary Work.

Pub Date-78

Note-188p.

Available from-Southern Illinois University Press, Post Office Box 3697, Carbondale, Illinois 62901 ($10.95 cloth)

Document Not Available from EDRS.

Descriptors-Content Reading, *Critical Reading, *Impressionistic Criticism, *Literary Analysis, Literature, *Literature Appreciation, *Poetry, Response Mode, Theories

Identifiers-*Reader Response, *Transactional Criticism

Transactional literary theory centers on the reader's contribution in the two-way relationship with the literary text, lifting the reader to a prominent, essential position along with the author and the text. It develops the premise that the reader evokes a literary work through selective attention to the details of the author's "paper and ink." Two types of reading are distinguished: "efferent" reading refers to what the reader "carries away" from the reading event (information, facts, solutions, required actions), while "aesthetic" reading refers to the feelings, attitudes, and ideas aroused in the reader during the actual reading. The degree to which readers use efferent or aesthetic reading activities affects their conception of the literary transaction. As examples from various types of literature show, these elements of transactional literary theory explain how readers evoke a poem,

understand the openness or constraints inherent in particular texts, and interpret, appreciate, criticize, and most of all personalize the literary value of the text they read. The final result that transactional literary theory intends, then, is not so much to understand the completeness of a book as to understand the completeness of the reader. (RL)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Academic Education, *English Instruction, Higher Education, Intellectual Disciplines, *Language Instruction, Language Teachers, Linguistics, *Literature Programs, *Professional Occupations, *Teaching
Identifiers-*Professionalism

The issue of professional identity is of special concern to academicians in the humanities, especially those involved in the study of modern languages and literature. There is the problem of self-definition. Even reviewing the past of modern language and literature study affords no simple definition, as English as an academic subject has no clear ancestry and too many relatives. The confusion of ancestry and vagrancy of aims is further complicated by vigorous and rewarding hybridization with disciplines such as psychiatry, philosophy, and history. Singleness of professional purpose is also difficult to find. However, there is one feature that does practically unify today's academic teaching of modern languages and literature, and that is professionalism itself. A profession is a calling requiring long and intensive academic preparation to acquire knowledge that is to be put directly to the service of other human beings in a fiducial bond of trust. However, economic crisis and the technologizing of culture are creating problems in maintaining the high-mindedness that professionalism calls for. (TJ)

Descriptors-Audiences, *Broadcast Industry, *Commercial Television, Community Problems, *Conflict, *Legal Problems, Mass Media

Identifiers-*Ownership

Providing an extensive, factual account of the controversy regarding the sale of a television station in Bloomington, Indiana, this paper presents a description of the legal issues involved, discusses the correspondence between the author and the purchasers of the station, outlines the justification for filing a Petition to Deny the transfer, and analyzes the final outcome of the case. As reported in the paper, the controversy revolved around six major complaints regarding the transfer: the application submitted by the buyer was not a realistic one for the city of Bloomington; there were errors in the Federal Communications Commission (FCC) required ``Ascertainment of Community Needs'' that biased that ascertainment against Bloomington; the buyers violated provisions of the Communications Act limiting foreign investment; there had been an unauthorized transfer of control of the station; there had been an unauthorized move of the main studios from Bloomington to Indianapolis; and the FCC did not investigate the effects of this transfer upon the local service to Bloomington. The paper discusses how these allegations were factually supported and argued, as well as why, after several months of delay, the author withdrew the Petition to Deny. (MAI)

Descriptors-Educational Methods, *English Instruction, Graduate Study, Higher Education, Individualized Instruction, Learning Activities, *Library Science, Research Skills, *Teacher Education, Teaching Methods, Writing Skills

In contrast to a graduate degree in English that stresses analysis, synthesis, and criticism, and limits practical experience in teaching methods for reading and writing, graduate study in library science can provide exposure to learning resources for prospective teachers. Such programs provide experience in the use of book and nonbook resources, automation, and audiovisual teaching devices, as well as techniques for matching learners with the right resources, handling large research topics effectively, understanding modern business management, and exploring all of the areas involved in adult education. Such library science experience enables the teacher to be a helper-advisor to the students, rather than an authority figure, and places the educational emphasis on mastery learning and individualized instruction. Rather than diminishing the value of English graduate work, education in library science presents a vehicle of communication and a new teaching style for the many facets of English instruction. Descriptors-Audiences, Communication (Thought Transfer), *Editing, *Educational Games, *Evaluation Methods, Higher Education, Journalism, *Journalism Education, Publications, *Self Concept, *Teaching Techniques, Writing Exercises

Two exercises that can be used with journalism students to help them clarify and think through the editorial process are the repertory grid and the coorientation model. A technique developed in England by the followers of psychologist George Kelly, the repertory grid asks students to rank ten or twelve authors on criteria such as social acceptability, professional effectiveness, and liberalism-conservatism. The student then decides which authors are closest and which are farthest from his or her ideal self'' and actual self.'' The follow-up discussion clarifies the issues involved in defining oneself (or a more detailed analysis is achieved through the use of a computer). The second exercise, the coorientation model, requires students to rank or rate story titles or leads according to interest or probable readership for themselves and for a clearly defined audience. These ratings are then compared with hypothetical play in editing a publication or with actual survey results of audience ratings. Effective use of these two techniques involves consistent discussion and evaluation on the individual level, along with statistical analyses. (Author/MAI)

Existentialism and Feminism.

Pub Date-Dec 78

Note-13p.; Paper presented at the Annual Meeting of the Modern Language Association of America (93rd, New York City, December 27-30, 1978)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Authors, *Characterization, *Existentialism, *Females, *Feminism, Fiction, Individualism, *Literature, Novels, *Sex Discrimination, Twentieth Century Literature

Because the term feminism linguistically narrows the essence of woman's existence when it is used consistently to describe female writing that deals with individual freedom and considered choices, it is essential to distinguish between feminism and existentialism. While feminism is primarily concerned with women in the context of a dominant male society, existentialism is a broader term that characterizes an individual's awareness of life's choices and an eventual definition of one's life according to a meaningful context.'' Therefore, the female writer or the female fictional character who chooses her way of life, who suffers the anxiety associated with freedom, isolation, and nonconformity and still remains free, demonstrates the tenets of existentialism. Some examples of novels that contain existential heroines include the writings of Kate Chopin, Joan Didion, Margaret Atwood, and Margaret Drabbie. To describe as feminist these women whose views and actions coincide with the philosophy of existentialism is limiting and therefore sexist. (MAI)

Authorizing Authority.
Pub Date-Dec 78
Note-9p.; Paper presented at the Annual Meeting of the Modern Language Association of America (93rd, New York City, December 27-30, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Classroom Communication, Communication (Thought Transfer), Creativity, Effective Teaching, English Instruction, Group Dynamics, Group Structure, Literary Analysis, *Literature Appreciation, Power Structure, Secondary Education, *Student Teacher Relationship, Teacher Influence, *Teacher Role
Identifiers-*Subjective Criticism

In contrast to a teacher-dominated literature classroom where authority rests with the one who has the power to grade, a classroom dedicated to cultivating the creative process breaks down the traditional hierarchies (such as theory and practice, text and reader, and organization and improvisation) and concentrates on the needs of the individual student in the context of the group. In such a classroom, the teacher's role is to discern with the students, through their collective responses to literature, the group's perceptions of the text and to relate those perceptions to the collective and subjective frames of reference from which they issue. The teacher functions as an expert in the sense of experience, and yet is just another reader whose interpretations are to be experienced and experimented with in the context of the group. This type of teaching requires students to recognize their act of creating meaning in what they read and demands the reciprocity of each class member to make it work. When a class learns to activate its own power to know and create, it becomes its own authority. (MAI)

Street Photography from the Subject's Viewpoint.

Pub Date-Aug 78

Note-21p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Attitudes, *Journalism, Media Research, Photographs, *Photography, *Public Opinion, *Reactive Behavior, Response Mode

To investigate the reaction of the public to being photographed on the street, a study was devised whereby seven photojournalists approached people on the street, photographed them, and requested identification for a questionnaire follow up. Of 102 people approached, 87% cooperated fully with the photographers and 81% of that group returned the questionnaires regarding their reactions to being photographed. Responses to the questionnaire indicated that while the majority of people approved of street photography, 40% qualified their approval contingent on the permission of the subject. Other questionnaire responses revealed the following: most subjects were surprised, and some suspicious, about being photographed; few had any knowledge of photography; most felt that they were being photographed because of their actions, rather than their physical attributes; and the majority did not remember specific actions that pleased or annoyed them, but rather had a general reaction to the photographer and the experience. EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Educational Problems, Higher Education, *Historiography, Intellectual Disciplines, *Journalism, *Literature Reviews, *Research Problems

Identifiers-*Journalism History

The failure of journalism historians to address important philosophical and methodological issues has led to a loss of vitality in historical research and teaching. As far back as the early 1950s, this situation attracted considerable concern, but it was not until the late 1960s that complaints were transformed into critical historiographical reflection. A review of articles that have offered critical reflections on journalism historiography indicates that only a handful of journalism historians have given serious consideration to the origins of the problems in their field; that, of those, most have failed to penetrate to the heart of the philosophical and methodological assumptions from which the difficulties have spread; and that, with only a few exceptions, journalism historians have not utilized or developed viable alternative perspectives. To ensure the survival and growth of the field of journalism historiography, serious ongoing reflection should be given to three main problem areas: the journalism historian's field of investigation, the making of historical judgments, and the task of historical revision. Descriptors-*Assignments, *Business English, *Course Content, Course Objectives, Higher Education, *Instruction, Learning Activities, Secondary Education, Teacher Education, *Teaching Methods, *Technical Writing, *Writing Skills

The intent of this book is to acquaint teachers with the realistic situations and composing processes that they can use when teaching business, report, and scientific writing. An introductory chapter provides a working definition of technical writing that reflects such essential writing components as recording the experience and having an awareness of the audience, purpose, and format of the communication. Three chapters then discuss the general categories of technical writing (business, report, and scientific), providing explanations of the categories, working definitions illustrated by specific examples, lists of skills necessary to perform the writing tasks, and sample instructional activities for a variety of grade levels (high school and early college). The concluding chapter shows how to implement the discussed ideas in secondary classrooms, focusing on evaluation methods and interdisciplinary approaches. Appendixes provide suggested resources for implementation (an annotated bibliography, suggestions about potential audiences and situations for assignments, and general tips to writers about paragraph organization and editing) and examples of business, report, and scientific writing formats (resumes, job descriptions, laboratory reports, police reports, and abstracts). Obscenity Law Since Miller: Another Troublesome Balancing Formula.

Pub Date-Aug 78
Note-53p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-*Censorship, *Court Litigation, *Evaluation Criteria, Freedom of Speech, Laws, *Legal Problems, Publications, *Standards, State Legislation
Identifiers-*Obscenity

A 1973 Supreme Court decision (Miller v. California) established the system of defining obscenity on the local level according to the following criteria: first, prurient appeal and patent offensiveness are to be determined by a community rather than by a national standard; second, sexually explicit materials are judged obscene only if specified as such by state or federal law; and, finally, sexually explicit communications are protected only when they are judged to be of serious literary, artistic, political, or scientific value. During the past five years, each criterion has created problems and aroused controversies involving the definition of a relevant community, the subjective attitudes of jurors, the development of state guidelines on obscenity, and valid judgments regarding the quality of questioned material. In addition to the confusion it has produced, the shift to local standards in obscenity prosecution has required repeated appeals to higher courts and has thereby established a process similar to the original national standard that governed judgments on obscenity. Incentives for Motivating Students on a High School Newspaper Staff.

Pub Date-Aug 77

Note-13p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (60th, Madison, Wisconsin, August 21-24, 1977)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Faculty Advisors, *Motivation Techniques, Questionnaires, *School Newspapers, Secondary Education, *Student Motivation, *Student Publications, Surveys, *Teacher Influence

To learn what techniques work for motivating staff members of student newspapers, questionnaires were sent to 203 high school newspaper advisers, mostly in Ohio. Of these, 112 responded. The advisers were asked to indicate each technique listed in the questionnaire that they had tried and to evaluate the technique as a motivator. Individual conferences, professional media recognition, bylines, and field trips were generally thought to be of value in motivating staff, while awarding pins, cups, and certificates was thought to provide little motivation. The major source of motivation was thought to be the enthusiasm and personal involvement of the adviser. (The questionnaire is included, along with reactions to each technique.) (TJ)

Should Scientists Be Involved in Teaching Science Writing and If So, How?

Pub Date-Aug 78

Note-15p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Core Courses, *Educational Improvement, Educational Needs, Engineers, Higher Education, Journalism Education, *Science Curriculum, Scientists, Skill Development, *Technical Writing, *Writing Skills

Identifiers-*Science Writing

Realizing the importance of writing skills in communicating with other professionals and in educating the public, scientists and scientific institutions have renewed their interest in the writing education of science students. Informal surveys show that technological and engineering schools are reinstituting writing requirements and staffing the classes, in part, with scientists or engineers. Besides cooperative teaching, the direct involvement of the scientific community in writing skills development also includes science faculty efforts to single out students with writing problems and refer them to special writing clinics. In addition, more technological institutions are teaching science writing for general audiences, as evidenced by a 1977 directory of such courses and programs. Professional societies are also supplementing the universities' efforts with programs of their own designed to improve the willingness and ability of their members to communicate with the public. What remains for scientists and science educators to do is to help journalism students, especially those interested in science journalism, to learn about science, thereby increasing their ability to write about it. Scientists can do this by assisting in course development, being available as resource persons to such classes, and encouraging greater interaction between the journalism students and the science community. Identifiers-*Composition Process

The materials in this manual include the activities and creative writing samples from a summer inservice writing skills workshop conducted for 32 teachers from seven school districts. The outlined writing activities cover a variety of topics that involve describing real and imaginary objects, naming objects in a newly created world, writing poetry using printed words from the newspaper, composing shopping lists for characters from children's stories, creating slogans for campaign buttons, and writing according to the forms used in obituaries, television guides, and advertisements. The manual also contains detailed lesson plans developed by the workshop participants, a discussion of the place of basic skills in writing, suggestions for evaluating student writing, a bibliography of teacher resources on writing, and ideas for expository writing that require using the community and school as resources. Descriptors-Community Attitudes, Community Problems, *Conflict, *Disadvantaged Groups, Editorials, Financial Problems, *Journalism, Minority Groups, *Newspapers, *News Reporting, Power Structure, Press Opinion, Race Relations, Racial Attitudes, *Social Problems
Identifiers-*Community Newspapers

Interviews with ten reporters and editors for community newspapers, all winners of Pulitzer Prizes for articles that dealt with nonelite groups, formed the basis for the information presented in this paper. Among the topics discussed are problems caused by the close proximity of the community press to its readers; the economic and physical perils faced by Southern journalists who have taken unpopular racial positions during times of civil rights strife; problems faced by community press reporters due to insufficient resources for adequately covering the news; social and economic pressure on the community press to uphold the status quo, and the consequent tendency of the community press to refrain from reporting on controversial subjects such as the social conditions of nonelite groups until such time as they result in a confrontation situation; and the potential power of the community newspaper in reducing violence and curbing tensions when conflicts do occur. It is concluded that the community press only occasionally speaks up courageously in coverage of nonelite groups. (GT)

Descriptors-Behavioral Objectives, *Childrens Books, *Creative Reading, *Critical Reading, Educational Resources, Elementary Education, Fiction, *Language Arts, *Literature Appreciation, *Reading Instruction, Reading Materials, Reading Skills, Student Motivation, Teaching Guides, Unit Plan

Intended to provide educators with units that will help them create student enthusiasm for reading, reinforce the teaching of reading skills, and interrelate the language arts with other areas of the curriculum, this book contains guides to 27 works of children's fiction. The guides are arranged in order of increasing difficulty and cover ten picture books, four ``transitional'' novels, and thirteen longer novels. Each guide opens with a brief plot summary, including a list of themes emphasized in the book. Next, a brief appraisal of the book's appeal to children, its strengths, and other relevant information is presented. The problems children might have in reading the book are discussed in a section of reading considerations, and a list of initiating activities offers suggestions for ways to introduce children to the book. Each guide also contains a list of discussion questions, suggestions for activities in art and media, creative dramatics, and composing, and a list of instructional resources. (FL)

The Black Press and the Bakke Case: An Analysis of Coverage.
Pub Date-Aug 78
Note-21p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Black Attitudes, Black Leadership, Content Analysis, Editorials, Journalism, Media Research, *Newspapers, *News Reporting, *Press Opinion, Racial Discrimination, *Reverse Discrimination, Social Problems, *Supreme Court Litigation
Identifiers-*Bakke v Regents of University of California

The content of four black newspapers was analyzed to determine how they covered the Regents of the University of California v. Bakke'' case, in which the Supreme Court ruled against rigid race quota programs such as the one that had prevented Allan Bakke, a white man, from being admitted to medical school. Each issue of the four newspapers the New York Amsterdam News,'' the Los Angeles Sentinel,'' the Atlanta Daily World,'' and the Chicago Defender'' was examined during the ten-month period preceding the argument of the case before the Supreme Court and during the period immediately following the June 1978 decision. Among the findings were that the coverage of the Bakke case was scarce; that after the Supreme Court ruling the Amsterdam News'' far exceeded other newspapers in the amount and type of coverage, while the Sentinel'' and the World'' continued to give little attention to the case; that coverage was event-oriented rather than issue-oriented; that, while most editorials took a definite anti-Bakke stand, some took no position in the controversy; that relevant letters to the editor were almost nonexistent; and that most articles did not receive front-page or prominent coverage. The findings suggest that today's black press is a chronicler, rather than an interpreter, of issues and events affecting the black community. (GT)

Changing Patterns of Mass Media Use and Effects in an Urban Squatter Settlement.

Pub Date-Aug 78
Note-35p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Changing Attitudes, Communication (Thought Transfer), Correlation, Developing Nations, *Development, *Environmental Influences, Foreign Countries, *Life Style, *Mass Media, Migrants, Political Attitudes, Research, Sociocultural Patterns, Urban Areas, *Urbanization
Identifiers-*Media Effects, Turkey

To test the impact of mass communication on the modernization of individuals living in the countries of the Third World, a follow-up study was devised (the original occurred in 1962), whereby migrant residents in Ankara, Turkey, were interviewed regarding the effects of urbanization on their lives. While economic and living conditions had improved for the 65 original respondents interviewed, the study revealed very little change in behavior and attitudes, other than an overall decrease in the use of mass media and an increase in awareness regarding the value of voting to effect political change. The findings did not support theories that attribute great importance to the impact of urbanization and mass media in changing traditional lifestyle patterns. (Comparative tables are included.) EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-American Indians, *Assignments, Bias, Blacks, Composition (Literary), *Cultural Awareness, Learning Activities, *Mass Media, Media Research, Mexican Americans, *Minority Groups, *Minority Role, News Media, Perspective Taking, Secondary Education, *Stereotypes

The reading list and assignments in this study guide are designed to involve high school students in examining the media from a nonwhite perspective. The beginning assignments require students to assemble their own bibliography relating to minority groups in the media, to examine the lives and contributions of specific Chicano, black, and American Indian news writers; and to assess the minority group stereotypes conveyed in print. Other assignments involve the evaluation of minority images in television and motion picture presentations, an examination of media treatment of the artistic contributions of nonwhite persons, and content comparisons of minority newspapers. The final project consists of an exhibit that uses some form of the media to publicize the research findings of the class. (MAI)

Reaping between the Lines: Non-Verbal Cues to the Journalistic Interview.

Pub Date-Aug 78

Note-50p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Body Language, Communication Skills, *Interaction Process Analysis, Interpersonal Competence, *Interviews, *Journalism, Literature Reviews, *Nonverbal Communication, Paralinguistics, Proximity

Identifiers-Proxemics

Maintaining that the nonverbal elements of communication are ultimately more significant than the verbal elements in determining the eventual success or failure of the journalistic interview, this paper attempts to assist journalists in understanding the complex and subtle nonverbal characteristics of the interview environment. Based on the research findings and observations of 78 sources from a variety of disciplines, the paper first discusses the motivations, barriers, and biases inherent in interviews. It next analyzes three categories of nonverbal communication and relates each to the process of journalistic interviewing. The three categories are: paralanguage (nonverbal components of the speech act), including voice set and nonverbal vocalizations; kinesics (body language), including emblems, illustrators, regulators, affect displays, and adaptors; and proxemics (the relationships between the communicator's body and other people or objects). The paper also analyzes the role of such nonverbal attributes as personal appearance, attractiveness, skin color, height, sex, and the use of time. It concludes with a discussion of the pros and cons of notetaking and notetaping in the interviewing process. (FL)

Descriptors-Childrens Books, *Childrens Literature, Cultural Background, Elementary Education, Ethnic Origins, Ethnology, *Folk Culture, *Folklore Books, Legends, Story Telling, *Translation

In addition to the documentation, annotation, and provision of contextual information that the authentic translation of folklore materials demands, folk stories that are intended for children should reflect the basic mythic patterns of good literature in their translated structure. The aims in translating such stories for children are to recreate the original with a respect for its cultural context, provide background information that explains motivation and behavior, construct a dramatic context for the nonverbal communication on both sides of an issue, organize the tale so that it progresses naturally and with credibility and authority, and make the story vital without compromising its vision of how the world works. Descriptors-Communication (Thought Transfer), *Composition (Literary), *Language Arts, *Learning Activities, Primary Education, *Teaching Techniques, *Writing Exercises, *Writing Skills

The writing activities in this book are designed to help children build writing skills through the communication of their own ideas, discoveries, and feelings. Developed and field tested as part of a basic skill development project, the book presents a rationale for primary children's writing, outlines the fundamentals of teaching writing, and offers detailed suggestions regarding classroom management. The specific, and often illustrated, lesson plans outline sequences of activities and suggest immediate and subsequent follow-up exercises. They cover a wide variety of writing activities including personal scrapbooks, playing with words, class books, greeting cards, nonsense rhymes and stories, comic strips, television guides, science journals, tall tales, and yarns. Descriptors-Chinese, *Chinese Americans, *Content Analysis, Immigrants, Journalism, Language Usage, Layout (Publications), *Migration Patterns, *Newspapers, *News Reporting, Political Attitudes, Racial Discrimination, *United States History

The background and the current status of Chinese newspapers in the United States are examined in this paper. The first section considers early immigration patterns of Chinese people, their immigration to the West Coast of the United States beginning in the mid-nineteenth century, laws passed to exclude Chinese from legally entering the U.S., and the recent liberalization of U.S. immigration quotas for Chinese. Among the topics discussed in the second section are the early history of Chinese newspapers in the U.S., the way in which the Chinese press in the U.S. has been linked with events in China, current readership for Chinese newspapers, problems involved in setting type for Chinese characters, and the trend toward use of a colloquial newspaper style. The third section describes ten currently published Chinese newspapers and presents tables of data about them that show the amount of newspaper space devoted to news, nonfiction, fiction and literature, and advertising; the space devoted to specified geographic areas in China and the U.S.; and the space devoted to the inauguration of Chiang Ching-kuo as President of the Republic of China and to Zbigniew Brzezinski's visit to Peking. A brief concluding section notes problems peculiar to the Chinese press in the United States. (GT)

The three articles in this journal issue focus on composition problems and alternatives. The topics discussed are compositional invention, composition based on students' experiences, and an oral technique for teaching basic composition. The issue also contains reviews of recent publications in the field of composition. (FL)

Middleton, Kent R.
A Case Against First Amendment Protections for Commercial Advertising.
Pub Date-Aug 77
Note-49p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (60th, Madison, Wisconsin, August 21-24, 1977)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Business Communication, Censorship, Civil Liberties, Constitutional History, *Constitutional Law, Consumer Protection, *Court Litigation, *Freedom of Speech, *Information Dissemination, Mass Media
Identifiers-*Advertising

Although extending constitutional protection to commercial expression might benefit the consumer, the First Amendment is the wrong instrument for carrying out what are basically economic policies. While in most First Amendment cases the nature of the content determines whether it is constitutionally protected, advertising is distinct in that it draws its meaning or identification from the product or service it promotes. The eighteenth century offers little proof that the framers of the Bill of Rights would have excluded commercial advertising, since commerce and expression were not distinct concepts at that time. However, the free trade of ideas for the effective functioning of a democracy, which is emphasized in the First Amendment, is not the same as the free trade involved in commerce. Protecting advertising weakens the First Amendment in that it requires more administrative regulation, and the protection of false ideas (intended for democratic debate on important issues) is misleading for the consumer. If the courts wish to deal with advertising as a constitutional issue, they can rule that bans on advertising violate the Fifth and Fourteenth Amendments by depriving persons of liberty or property. Moore, Roy L. And Others
Mass Media Influence on Adolescent Consumer Behavior.
Pub Date-Aug 77
Note 23p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (60th, Madison, Wisconsin, August 21-24, 1977)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Adolescents, Behavior Patterns, *Cognitive Development, Communication (Thought Transfer), *Consumer Economics, *Consumer Education, Credibility, Elementary Secondary Education, Family Influence, Interaction, *Mass Media, Media Research, Peer Influence, Retention, Socioeconomic Influences, Student Attitudes
Identifiers-*Advertising, *Media Effects

Questionnaires completed by 607 middle school and high school students provided data about the learning of selected advertising-related cognitions among adolescents and on the short-term effect of these cognitions and other communication variables on adolescent consumption behavior. Among the findings were the following: susceptibility to advertising was positively related to amount of mass media use, exposure to mass media entertainment content, and amount of family communication about consumption matters, and negatively related to age and socioeconomic status; girls appeared to be more susceptible than boys to advertising; no significant correlates to adolescents' general attitudes toward advertising were found; perceived credibility of advertising was positively related to amount of exposure to entertainment and public affairs content in the mass media and negatively related to socioeconomic status; and retention of advertising information was positively related to age, amount of communication with family and friends about consumption matters, and socioeconomic status. The findings also suggest that adolescent consumer behavior may stem from social learning processes rather than from exposure to mass media or advertising. (GT)

The Role of Communication in Acculturation of Foreign Students.

Pub Date-Aug 78

Note-36p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Acculturation, American Culture, *Communication (Thought Transfer), Credibility, *Cultural Context, *Foreign Students, Higher Education, Interaction, *Mass Media, *Socialization, Social Values, Television Viewing

To determine the role of communication channels, particularly mass media, in the socialization of foreign college students, a study was devised whereby foreign students from three central Illinois universities responded to a 27-item questionniare on American values. The questionnaire called for agree/disagree responses on such topics as the individual's perception of American values, channels of mass and interpersonal communication, credible sources of information, and social pressures (if any) that influenced conformity to American values. Analysis of the questionnaire data indicated the following: mass media, particularly television and books, played a significant role in foreign students' perceptions of American values; foreign students who regarded their friends as credible sources of information perceived American values more accurately; television (a mass media channel) and teachers (an interpersonal channel) were the major internalizing forces; and direct contact with American friends contributed to a positive image of America, while isolation from American contacts resulted in negative evaluations of the country. Education for Journalism in Korea.

Pub Date-Aug 78
Note-14p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Educational Needs, Educational Objectives, *Educational Problems, Foreign Countries, Higher Education, *Journalism, *Journalism Education, News Media, *Newspapers, News Reporting, *Political Influences, Political Power
Identifiers-*Korea

Marked by a history of political opposition and fluctuations of control that have occurred in the name of national development and modernization, the Korean press (consisting of 34 newspapers) today produces a somewhat typical eight-page newspaper that is a mixture of Korean and Chinese characters. As most of the newspapers are clustered in the capital city of Seoul, so are the major institutions of higher learning. Although an estimated 250 students receive journalism degrees annually, Korean journalism departments face the following problems: a lack of teaching materials and textbooks; a lack of understanding by media practitioners regarding the importance of professional journalism education; a lack of coordination between the journalism departments and media agencies, particularly in the area of hiring students to work for newspapers; a shortage of experienced teaching staff and necessary instructional facilities; and the failure of journalism graduates to pass the tests for employment administered by various newspaper companies and radio-television agencies. Strange, Dorothy Flanders Kebbel, Gary W.
Identifying Causes, Not Symptoms, of Writing Problems.
Pub Date-Aug 78
Note-17p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Communication (Thought Transfer), *Communication Problems, Composition (Literary), *Error Analysis (Language), Grammar, Higher Education, *Journalism Education, Language Arts, Language Patterns, Language Skills, *News Writing, Sentence Structure, *Thought Processes, *Writing Skills

Most of the mechanical and content errors in the sentences written by journalism students can be attributed to four faulty patterns that can be traced to errors in the thinking process: fragmented sentence parts, personification, bureaucratic coding ("officialese"), and compressed sentences. While acceptable in spoken communication where clarification can occur rapidly, sentence fragments in writing cause redundancy, errors in the use of phrases and clauses, and lack of agreement between subjects and verbs or pronouns and their antecedents. Personification, a form of bureaucratic language that gives things human characteristics, results in incomplete thinking and inaccuracy in writing because it does not allow thoughts to follow a logical pattern. Somewhat related to personification, coded language is the result of using words to hide, rather than to convey, meaning. Such messages rely heavily on abstract words and ideas, as well as on lengthy sentence structure. In an attempt to reduce codes to journalistic style, some students tend to overcompensate by compressing the essential thoughts out of a sentence. Correcting these faulty thought patterns involves a basic understanding of sentence parts and concentration on the construction of simple declarative statements. (MAI)

Ethnic Newspapers in the United States.

Pub Date-Aug 78

Note-30p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Acculturation, Cultural Differences, Cultural Pluralism, *Ethnic Groups, *Ethnicity, Financial Problems, *Journalism, Media Research, *Newspapers, Political Attitudes

Defining ethnic newspapers as those published in a foreign language or in English that address themselves to a national group, this paper presents an overview of such papers currently published in the United States. The paper is organized into three sections. The first deals with the functions served by ethnic papers, including aiding in assimilation, helping to preserve ethnicity, filling news gaps, serving as watchdogs of foreign governments, and contributing to the diversity of political and social thought in the United States. The second section covers the drawbacks of ethnic papers, specifically their high mortality rate, increasing financial difficulties, and the problem they face of incurring criticisms that they are anti-American if they attempt to be outspoken organs in their communities. The third section discusses the future of the ethnic press and concludes that the current emphasis on exploring cultural roots and learning second languages will affect its role. (FL)

Genderlects: A Brief Review of the Literature.

Pub Date-Nov 78

Note-15p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (68th, Kansas City, Missouri, November 23-25, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Bias, Communication (Thought Transfer), *Females, *Language Research, Language Role, *Language Styles, *Language Usage, Literature Reviews, Males, Power Structure, Research Methodology, *Sex Differences, Sex Discrimination, Sex Role, *Sex Stereotypes

Stereotypes about the way women talk grow out of knowledge of nonlinguistic, societally assigned sex role traits and of linguistic correlates of those traits. Among the findings of research on male/female speech differences are that, contrary to the stereotype, men talk more than women; men's conversation is task-oriented, while that of women is ego enhancing to others; in most speech communities women use more standard phonology and syntax than men; and women use certain female-typed words in some circumstances. Such differences are learned as linguistic aspects of a sex role and are neither genetic nor universal. Not all studies have found sex-linked language differences, and the findings of many studies reflect a comparison of women with men of presumably the same, though in reality lower, class status, due to a methodological bias. In addition to differences in language usage, conversations between the sexes often involve interruptions of women's speech, and a lack of attention to women's conversation by men. But even if a woman exactly duplicates men's language use, she will not be evaluated in the same way, since subjective appraisals of women and men as speakers are based on an interaction between a speaker's activities and the language and sex role stereotypes known to the listener. Hampsten, Elizabeth

Rural Woman Writers: Beginnings of Selfhood; I am not Aristocratic.

Pub Date- 78

Note-13p.; Study prepared at the University of North Dakota

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*American Literature, Authors, *Diaries, *Females, *Letters (Correspondence), Literary Analysis, *Lower Class, Nineteenth Century Literature, *Rural Population, Twentieth Century Literature

Rural working-class women of the late nineteenth and early twentieth centuries are rarely heard from as writers. The letters and diaries of such women that are available give virtually no information about culture, politics, or the arts, and they practically never contain an opinion. Instead, they provide minute, repetitive observations, with occasional flashes of insight. The women wrote not to make distinctions but to assert a pattern. Their writing contains a strong sense of the presence of other women in their consciousness, while men are apt to be blurred or peripheral. Frank discussions about death, sex, birth control, the weather, health and disease, and the price of food are common to this literature. (Examples from women's letters and diaries are included.) A Comparative Study of Sex Role Stereotyping in GDR (German Democractic Republic) and USA Children's Readers.

Pub Date-Mar 77

Note-24p.; Paper presented at the International Studies Association Conference (St. Louis, Missouri, March 1977); Not available in hard copy due to marginal legibility of original document

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Basic Reading, *Cross Cultural Studies, Elementary Education, Females, Foreign Countries, *Illustrations, Males, *Reading Materials, *Sex Fairness, Sex Role, *Sex Stereotypes, Textbook Bias, Textbook Evaluation, *Textbook Research

Identifiers-*German Democratic Republic

To determine whether elementary reading textbooks from a socialist country contained less sex-role stereotyping than previously-studied United States readers, an analysis of 374 books from the German Democratic Republic (G.D.R.) was undertaken. A sex bias index was calculated for both the G.D.R. and the U.S. books by finding the average difference in the percentage of major character role and career role assignments for males and females. The results showed that while male major characters dominated both U.S. and G.D.R. textbooks, the dominance in the G.D.R. readers was less marked (3:1) than in the U.S. texts (4:1), and that females appeared in career roles significantly more often in the G.D.R. texts than in the U.S. readers. The findings confirmed that sex bias is significantly lower in the G.D.R. readers. An analysis of the illustrations used in the G.D.R. readers supported the findings. In addition to a more realistic portrayal of males and females, the illustrations in the G.D.R. texts also reinforced a definite set of social and political values, showing the interaction of children with adults and emphasizing the role of women and children in important historical events. (Tables of findings and an explanation of the sex bias index are appended.) (FL)

The Teacher-Student Writing Conference: New Approaches.

Pub Date-Nov 78
Note-12p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (68th, Kansas City, Missouri, November 23-25, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Composition (Literary), *Conferences, Higher Education, Secondary Education, *Student Teacher Relationship, *Teaching Techniques, *Writing Skills
Identifiers-*Teacher Student Conferences

Teacher-student writing conferences should provide students in composition classes with concentrated attention to their writing consonant with the teacher's in-class persona and instructional objectives. Some alternatives available to the instructor and the conferee include watching the teacher compose, sharing and revising journal entries, revising one another's writing, talk-writing (using a tape recorder), values clarification, analysis of a writing model, and one-to-two conferencing (two students meeting with the teacher). For college composition teachers, office hours provide time for conferencing, but secondary teachers have more difficulty scheduling time. Free periods, study halls, special class sessions, and time between classes can be utilized for five- to ten-minute conferences employing these strategies. Although it is assumed that writing conferences are helpful in improving student writing, there is little empirical evidence that this is true. Further research in this area is needed. (TJ)

City Magazines Find a Niche in the Media Marketplace.

Pub Date-Aug 77

Note-14p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (60th, Madison, Wisconsin, August 21-24, 1977)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Audiences, Demography, *Marketing, Mass Media, *Media Research, *Periodicals, Publications, *Publishing Industry, Reading Interests, Sociocultural Patterns, Success Factors, Surveys

Identifiers-Advertising, *City Magazines, *Readership Analysis

The responses of 36 publishers and editors of city magazines magazines such as "Chicago," "MPLS," and "Texas Monthly" that are published primarily for a local or regional market provided data for an analysis of the positioning of these magazines in the media marketplace, factors leading to their success, their audience composition, and their problems. The editorial content of such magazines is usually in a jaunty, informal style, and typical articles are informational, investigational, or personality profiles, with a definitely local orientation. Survey respondents attributed the success of the magazines to the fact that they fill the gap between national and local media, aiming a particular editorial style at an audience that advertisers see as potentially good customers. Readers were most often characterized by the magazines as affluent, well-educated consumers, obviously an appealing group to advertisers who are willing to pay a premium to reach such markets. With all their success, however, city magazine publishers noted several problems they must surmount, including establishing a strong local identity; building circulation; finding good editorial sources/materials; the burgeoning costs of paper, printing, personnel, and distribution; and acquiring advertising support, especially from national advertisers. (A list of survey respondents is attached.) (RL)

A Developmental Writing Course for the Liberal Arts Student.

Pub Date-Nov 78

Note-11p.; Paper presented at the Annual Meeting of the South Atlantic Modern Language Association (50th, Atlanta, Georgia, November 9-11, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Assignments, *Basic Skills, *Composition (Literary), *Developmental Programs, *English Instruction, Higher Education, Library Skills, *Teaching Techniques, *Writing Skills

A developmental English program for a liberal arts college should be individualized and intellectually challenging to students entering a four-year baccalaureate program. Such a program must emphasize motivation, flexibility, and a well-conceived progression for acquiring skills. It should view writing as a holistic process and should use such techniques as group methods, individual teacher-student sessions, peer tutoring, or the ``talk-write'' method. An introduction to the library and to the use of library skills should be included in a developmental course. Criteria for selecting topics should include grouping assignments around a common theme and assigning topics that are in the student's previous range of experience, are worthy of college-level writing, are concrete and limited in scope, and are related to regular academic disciplines. A developmental writing course should also encourage students to view writing as a reflection of critical thinking. (TJ)

Time Series Analysis of Alternative Media Effects Theories.

Pub Date-Apr 78
Grant-DOT-FA76WA-3820
Note-28p.; Paper presented at the Annual Meeting of the International Communication Association (Chicago, Illinois, April 25-29, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Community Problems, *Mass Media, *Media Research, *News Media, Newspapers, *News Reporting, Press Opinion, *Public Opinion, Television Research
Identifiers-*Media Effects

A study was conducted in the Washington, D.C., area to test mass media effects in a community controversy. Five possible theories were hypothesized to explain the effects media have on a community: indirect and direct effects, null effects, agenda setting, reverse effects, and reverse agenda setting. During the 16-month test period of the British and French Concorde supersonic jet flights into Dulles International Airport, a noise complaint telephone number was publicized and complaint calls were coded. Also, mass media coverage of the controversy was monitored by tabulating the number of Concorde-related statements appearing in the Washington Post,'' on NBC, CBS, and ABC national newscasts, and on television station WTOP, which had the highest rated local news programs. After the tabulations were analyzed, it was found that three of the theories (direct and indirect effects, agenda setting, and reverse agenda setting) received some empirical support. However, expanding from statistical tests, it can be argued that the direct/indirect effects theory best explains the data. (TJ)

Implications of Recent Research in the Computational Paradigm.''

Pub Date-Apr 78

Note-18p.; Paper presented at the Annual Meeting of the International Communication Association (Chicago, Illinois, April 25-29, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Artificial Intelligence, *Cognitive Processes, *Communication (Thought Transfer), Communication Skills, Comprehension, *Computational Linguistics, *Computer Science, Concept Formation, Content Analysis, Research, Theories

Identifiers-*Communication Research

Describing cognitive science as a new discipline based upon the integration of elements of psychology, computer science, linguistics, philosophy, and education, this paper argues that such a discipline has important implications for the field of communication. Following an overview of the literature of cognitive science, the paper offers an explication of the computational paradigm underlying the new discipline. It then refutes attacks that have been made upon the paradigm's assumption that artificial intelligence research and psychological experimentation should be mutually heuristic because they both seek a unified theory of the cognitive processes performed by any system capable of certain tasks. In an illustration of the kinds of theoretical concepts that are emerging from cognitive science, the paper describes a recently proposed theory of story comprehension. In conclusion, the paper argues that cognitive science has important implications for communication research in the areas of content analysis methodology, the theory of messages, and the theory of communicative competence, and it outlines a proposed research project designed to illustrate those implications. (Author/FL)

Ulrich, Walter
The Construction of the Affirmative Plan.
Pub Date-78
Note-14p.; Essay prepared at West Georgia College
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Debate, *Guidelines, *Persuasive Discourse, *Planning, Public Speaking, Secondary Education, Speech Communication, Speech Skills

Because the affirmative plan in debate cannot be modified once it has been criticized by the second negative, it is important that the affirmative team word the plan carefully in simple and concise language, assuring that it upholds all possible policies and contains only those planks that support the resolution. Other considerations in constructing such a plan include specifying the technology or law that will be used to implement the plan (or creating a board or agency to review the technology), deciding when the plan will go into effect, and determining how it will be adopted and what decisions will regulate its possible repeal. Effective planks that assist in the development of the plan include creation of agencies or boards to supervise implementation, elimination of loopholes, guidelines that ban preliminary injunctive relief or state level circumvention, and an intent plank that ensures that the agency will follow the affirmative plan. Although a plan preemption plank is open to attack by the negative team, it is a legitimate affirmative strategy when it represents part of a comprehensive program, places the affirmative team on an equal footing with the negative, aids in examining the core effects of a proposal, and reflects the real world happenings. Cernada, George Sun, T. H.

Knowledge into Action: The Use of Research in Taiwan's Family Planning Program. Paper No. 10.

Hawaii Univ., Honolulu. East-West Center.

Pub Date-Jul 74

Note-43p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Case Studies, *Change Strategies, *Communication (Thought Transfer), Contraception, *Family Planning, Foreign Countries, Information Utilization, *National Programs, Research, *Research Utilization

Identifiers-Communication Research, *Taiwan

Focusing on the effects that research on the Taiwan family planning program has had on social change, both in the intergration of research findings into national action programs and in the dissemination of these ideas to other Asian countries, this report discusses five individual case studies and presents a summary and analysis of the research data. The first case illustrates how an action-oriented research program served as a base for the national expansion of an individual program and describes the organizational setup and approaches that expedited research utilization. A communication-oriented study with clear objectives, stressed in the second case, demonstrates the value of a single agency, the importance of feedback, the value of building on previous research, and the benefits of communication among research and staff members. The third case describes a nonfertility incentive plan, its regional implications, and the role of foreign aid in implementing the plan. The final two cases illustrate, respectively, reasons why contraceptive research findings are not applied and the value of giving close attention to feedback from field workers and consumers of the service. Women's Communication and Family Planning in Rural America: The Case of Bushler Bay. Case Study No. 4.

Hawaii Univ., Honolulu. East-West Center.
Pub Date-Jul 78
Note-100p.
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-Anthropology, Case Studies, *Communication (Thought Transfer), Contraception, Family (Sociological Unit), *Family Planning, *Females, *Interpersonal Relationship, Research, Rural Areas, *Rural Family, Social Structure
Identifiers-*Communication Research

A study was devised to determine why family planning communication in a Washington state village has been successful despite the lack of planned programs or focused attempts at directed change. Three major social organizational principles affecting family planning communication were analyzed: the occupational split between public employees and locals (the remainder of the population), the prevalence of age-grading in female grouping and friendship patterns, and the role of kinship in women's lives. Based on the assumption that important cultural elements surface in time from observing and interacting with community members, the study revealed two generalizations that crosscut the social organizational principles. The first, relating to the cultural significance of occupations, indicates that people categorize themselves and others according to occupation. The second generalization focuses on two features that characterize all three principles of social organization: individuals relate to others according to occupation, age-grade, and kinship; and values and choices are determined in the context of these relationships. (An analysis of the local homemaker's

organization is appended.) ([illegible])

The Organizational Communication Consulting Spectrum.
Pub Date-Apr 75
Note-20p.; Paper presented at the Annual Meeting of the Michigan Speech Association (Kalamazoo, Michigan, April 1975)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Business, *Business Communication, *Communication Skills, *Consultants, *Consultation Programs, *Organizational Communication, Professional Services, Program Planning

Surveys of businesses and business managers indicate that developing communication skills within organizations is a priority. Communication consulting exists over a wide spectrum of activities that include guest speaking, conducting workshops, and conducting management training programs. These three processes can include a ``canned program'' that can be used again and again with different groups. Three other areas of consulting are more ``demand responsive,'' apply to individual situations, and require a greater degree of diagnostic ability. They are: part-time consulting; contracted consulting; and full-time, in-house consulting. The most difficult part of consulting is getting started. The consultant must become known and then must sell himself or herself to a company. The initial meeting with the potential client is crucial in clarifying the needs of the client and the possible services of the consultant. (TJ)

The Nonsexist Communicator.
Pub Date-78
Note-168p.
Available from-Communication Dynamics Press, P.O. Box 555, East Elmhurst, New York 11369 ($9.95 paper)
Document Not Available from EDRS.
Descriptors-*Communication (Thought Transfer), Communication Problems, Communication Skills, Females, Guidelines, *Language Attitudes, *Language Usage, Nonverbal Communication, *Organizational Communication, Reverse Discrimination, *Sex Discrimination, *Sex Fairness, Sex Role, Sex Stereotypes, Verbal Communication

Designed as an aid in eradicating sexism in communication, this manual attempts to promote an understanding of sexism, to deepen the commitment to eliminate it, and to develop a nonsexist communication style. The first chapter presents the concept of nonsexist communication and then introduces the idea of reverse sexism. It includes an analysis of a reverse sexism story and suggests many nonsexist communication techniques. Chapters two through five provide methods for overcoming sexism in such forms of written communication as letters, memoranda, reports, corporate and administrative manuals, policy and procedural statements, job information instruments, and employee information publications. In addition, these chapters present methods for correcting any sexist written communication. The final chapter extends nonsexist principles into the oral and nonverbal media. Each chapter concludes with exercises designed to increase awareness of sexism. The first of two appendixes contains a set of guidelines for converting sexist materials into nonsexist communication and a list of nonsexist words and phrases. The second appendix is a selected bibliography of publications related to communication sexism. (FL)

Producing a Public Relations Program for Disabled Adults.
President's Committee on Employment of the Handicapped, Washington, D.C.
Pub Date-78
Note-25p.
Available from-President's Committee on Employment of the Handicapped, Washington, D.C. 20210 (free of charge)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Adults, Communication (Thought Transfer), *Handicapped, Human Services, *Information Dissemination, Mass Media, *Physically Handicapped, *Publicize, *Public Relations

Before establishing a public relations program for disabled persons, it is essential to understand their needs and capabilities, involve these persons in the planning, know what state and community programs are available in the area, and define a fundamental purpose for the program. Knowing editors and writers at local newspapers, radio stations, and television stations and preparing honest, concise statements are basic to the effective use of such promotional devices as press releases, press conferences, media appearances, and speeches. Other public relations techniques that can assist a program for the disabled include the use of photograph displays, open houses, job fairs, media interviews of handicapped persons, book and author promotions, media job announcements for the handicapped, speaker bureaus, dedications of public buildings, community thank-you messages, meetings with officials from the community, public service announcements, and awards. Because the promotion of a public relations program requires competitive public service advertising, money sources or volunteer services must be solicited. Possible resources for donated publicity materials include local university art departments, private advertising or public relations firms, and public interest organizations. (MAI)

Ulrich, Walter
Tabula Rasa as an Approach to the Judging of Debates.

Pub Date-Nov 78
Note-18p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Communication (Thought Transfer), *Debate, Evaluation Criteria, *Evaluation Methods, Higher Education, *Justice, Persuasive Discourse, Public Speaking, Secondary Education, *Speech Communication

While several paradigms for judging debate have been thoroughly discussed, the view of the judge as a tabula rasa has received little treatment. The tabula rasa approach can take the form of a framework added onto a traditional judging framework, or it can take the view that making debate theory debatable is only one of several implications of tabula rasa judging. The tabula rasa approach is justifiable because it encourages sound debating and because it is consistent with the assumptions of debate. In general, a tabula rasa judge believes that debate theory is a debatable issue and that the judge should attempt to be neutral in a debate round. There are four issues beyond this general principle that divide tabula rasa judges into subgroups: whether or not there are any issues not debatable in a round, the amount of argumentation needed to support a theoretical position, what to do with the theoretical argument once it has been decided, and what to do in the absence of theoretical arguments. Proof Beyond a Reasonable Doubt as Proof to a Reasonable Degree of Certainty: An Experimental Test of an Hypothesis Advanced by State Trial Judges.

Pub Date-Nov 78

Note-28p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978) ; Reproduced from best copy available

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Communication (Thought Transfer), Court Cases, *Due Process, *Justice, Legal Problems, *Research

Identifiers-*Communication Research, *Juries

A study was conducted to discover whether jurors perceived a difference between instructions to assign guilt on a beyond a reasonable doubt'' standard as compared with a to a reasonable degree of certainty'' standard. The main study included 88 communication students who read a case summary and one of four versions of jury instructions. They were then divided into six-person juries composed of people who had received identical versions of the jury instructions to deliberate the case. One group of jurors received burden-of-proof instructions emphasizing reasonable doubt, a second set emphasized reasonable certainty, a third set combined the two, and a fourth set had no instructions. After a verdict was reached or the jury was declared hung,'' subjects were asked what their final vote in the deliberation had been and how strongly they believed in the defendant's guilt. It was found that the reasonable doubt'' instruction and the composite instruction produced almost identical results while the reasonable certainty'' instruction produced both belief-in-guilt ratings and a conviction rate lower than either of the first two. The no-instruction condition produced the highest mean rating of belief-in-guilt and the highest conviction rate. (TJ)

Descriptors-Behavior Patterns, *Bibliographies, *Communication (Thought Transfer), *Geriatrics, *Gerontology, Individual Development, Interpersonal Relationship, *Older Adults, Research, Social Relations, Speech Communication
Identifiers-*Communication Research

This extensive bibliography contains more than 1,800 entries about communication and aging. The citations include journal articles, unpublished papers, speeches, dissertations, research studies, and books that relate aging and the aged to a variety of topics, including the following: physiological deterioration, socialization, political activities, self-esteem and self-concept, behavior problems, behavior patterns, transportation and housing problems, retirement and leisure activities, personality development and disorder, ethnicity, family relationships, interpersonal relationships, sensory thresholds, sexual activities, social interactions, intercultural differences in attitudes toward the aged, the needs of the aged, care of the chronically ill, methods of physical and psychological therapy, marital relationships and problems, death anxiety, and death education. EDRS Price MF-$0.83 HC-$4.67 Plus Postage.

Descriptors-Administrator Attitudes, Broadcast Industry, *Cultural Activities, *Fine Arts, Material Development, *Media Research, Planning, *Programing (Broadcast), *Radio, *Television

The findings of a planning study of arts and cultural programing on commercial and public radio and television are summarized in this report. Focusing on the decision making process on arts and cultural subjects in the broadcast industry, the report presents information on the following topics: how the phrase "arts and cultural programing" is understood by key broadcast executives, the terminology used in the industry to describe significant arts and cultural programing, the kinds of programing designated by the industry as "arts and cultural," how the amount of money and broadcast time for arts and cultural programs compare with those provided for other types of programs, the method used in the industry to determine audiences for arts and cultural programing, the means of support for such programing, and the kinds of programs that would be used if they were available. Problems in the Analysis and Performance of Literature in Translation.
Pub Date- 76
Note-16p.; Study prepared at California State University, Chico
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Interpretive Reading, Language Patterns, *Semantics, *Textual Criticism, *Theater Arts, *Translation

An important part of the task of an oral interpreter performing a piece of literature in translation is to deal with some of the difficulties inherent in the analysis and performance of such literature. The interpreter must examine the basic accuracy of the text; decide which of several translations to use in performance, choosing the one that best renders both the spirit and sense of the original text; be aware of what can be lost in translation, such as double meanings; realize what is seldom translatable, such as aberrations in punctuation or forms integral to comprehension of the message; and show what the original would have been like had it been conceived in English. (Extensive footnotes and illustrations are included.) (TJ)

Hensley, Carl Wayne

The Death of a Rhetorical Vision: Disciples of Christ and Social Change.

Pub Date-Nov 78
Note-30p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Christianity, *Cultural Context, Culture, *Organizational Change, Religion, Religious Conflict, *Religious Cultural Groups, *Rhetoric, *Social Change
Identifiers-*Disciples of Christ

The Disciples of Christ, an indigenous American religious movement born on the frontier, grew rapidly until early in the twentieth century. Its growth was based on a rhetorical vision that offered a plausible interpretation of the data of the senses and accounted for developments in human activity and conditions. That rhetorical vision was linked to democratic political fantasies of the worth of the individual and of rural-agrarian supremacy. It decayed from a dynamic drama of restoration of the pristine New Testament church to a rigid structure of institutionalization. Faith and imagination go together, translating spiritual truths into the fantasy world view of the culture, and while ultimate truths remain constant, the rhetorical approach must change. Liberal and conservative Disciples lost sight of this principle and lost most of the persuasiveness enjoyed in the early days. When the vision fragmented in the conflict with cultural change and the new European theology, most of its millennial eschatology faded out. A religious rhetoric that neglects the eschatological frame of reference is not true to the biblical message nor to the needs of modern people. (TJ)

Comstock, George And Others

Television and Human Behavior.

Pub Date-78
Note-510p.
Available from-Columbia University Press, 562 West 113th Street, New York, New York 10025 ($16.95 cloth, $9.95 paper)
Document Not Available from EDRS.
Descriptors-Audiences, *Behavior Patterns, Children, Content Analysis, Human Living, Literature Reviews, Mass Media, Politics, Popular Culture, Programing (Broadcast), Research Methodology, Social Sciences, *Television, *Television Research, *Television Viewing, Viewing Time
Identifiers-Advertising, *Audience Response, *Media Effects

To compile a comprehensive review of English language scientific literature regarding the effects of television on human behavior, the authors of this book evaluated more than 2,500 books, articles, reports, and other documents. Rather than taking a traditional approach, the authors followed a new model for the retrieval and synthesis of scientific information based on review of the literature, the establishment of an information service to search through the literature and disseminate materials, and the designation of the first author as principal investigator and organizer of the book. The book discusses television research according to the following topics: an overview, past and future; content analysis of various program types; audience analysis; television in everyday life; the effect of television on children and other specific audiences; television in politics and advertising; the psychology of behavioral effects; and the future of television. In addition to a lengthy reference section, the book provides a name and subject index. (MAI)

Response to The Paradox and Promise of Small Group Research,'' Revisited.

Pub Date-Nov 78

Note-11p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978); Not available in hard copy due to marginal legibility of original document

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-*Communication (Thought Transfer), Group Discussion, *Group Dynamics, *Group Relations, *Interaction Process Analysis, Research Methodology, *Research Needs

Identifiers-*Communication Research

An example of how the quality of research on small groups could be enhanced is to develop a framework of scholarship around a series of hierarchical guiding questions concerning the functions of communication in the small group, the characteristics of the behavior and of the producers of that behavior that determine the extent to which particular functions are served, the way in which functions of communication are affected by the context in which they occur, and the interrelationships of the functions of communication in the small group. Such a structure of questions would make it possible to build a meaningful inventory of extant scholarship; would better equip researchers to respond to and overcome criticisms advanced about the field as a whole; would increase the importance of the role of theory; and would increase the potential for synthesis, comparability of research findings, meaningful criticism, and construction of methodological tools for advancing knowledge in a rigorous and systematic fashion. Interpersonal and Small Group Communication Research in 1977: Review and Commentary.

Pub Date-Nov 78

Note-29p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978) ; Not available in hard copy due to print quality

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Bibliographies, Communication (Thought Transfer), Intellectual Disciplines, *Literature Reviews, Questionnaires, *Research Methodology, *Research Needs, *Research Problems, *Speech Communication, Surveys

Identifiers-*Communication Research

A review of more than 100 articles and papers in interpersonal and small group communication (ISG) research done in 1977 and a survey of active researchers revealed that it was difficult to identify significant trends in content and methodology as well as to note specific advances and problems reflected in the research. However, six issues or themes emanating from 1977 ISG research are: researchers are increasingly concerned about the lack of adequate theoretical foundations for ISG research, many researchers are concerned about the tendency to exceed the conceptual boundaries of human communication, many researchers are disappointed by the quality of questions that are addressed, many ISG researchers remain concerned by the prevalence of the "law of the hammer" (the tendency of social scientists to inflict an available methodology on phenomena regardless of the appropriateness of that methodology), ISG researchers recognize the lack of adequate focus and clear conceptualization reflected in recent research, and ISG researchers appear eager for and in need of extended and thoughtful exchanges among themselves. (A bibliography of 1977 ISG articles and the questionnaire used in the survey are appended.) (TJ)

Descriptors-*Communication (Thought Transfer), *Group Dynamics, *Group Relations, *Interaction Process Analysis, *Research Needs, Speech Communication

Identifiers-*Communication Research

Speech communicators need to return to applied research, developing theoretical statements about how groups might work better and testing the validity of those statements. Among the tasks that group communication researchers might take up are determining the range of applicability of generalizations concerning different kinds of groups, studying the factors that increase or decrease the probability that a minority will accept majority opinion, studying creative groups to determine the range of generalizability for current theoretical statements, and questioning category systems currently in use. They might also manipulate factors that are used to distinguish groups to see whether manipulating those factors alters the probabilities of outcomes in predictable ways, look at how groups have learned from their past successes or failures, attempt to perceive and specify the underlying rules that seem to govern the discourse of rule-governed groups, and see how information processing leads to impression formation of others in the group and how that impression affects one's behavior toward each of the others. Strategies of Communication in Recent Experimental Theatre.

Pub Date-Nov 78

Note-16p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Audiences, Body Language, *Communication (Thought Transfer), *Drama, Information Theory, *Nonverbal Communication, Perception, Symbols (Literary), *Theater Arts, Theoretical Criticism

Identifiers-*Experimental Theater, Foreman (Richard), Wilson (Robert)

Because it focuses on questions of communication, the experimental theatre of the 1970s, particularly that created by Robert Wilson and Richard Foreman, can be analyzed according to two distinct theories regarding the communication process. The first theory defines communication as a process in which the communicator selects and transmits messages to a receiver using both verbal and nonverbal channels and with the receiver providing the feedback; the second describes the communication process as the encoding and decoding of messages. To deepen his understanding of nonverbal channels, Wilson explored a wide range of body exercises and examined the atypical perceptual world of the deaf, brain damaged, and mentally ill; he also produced unique images from his own imagination. In his theatre pieces, Wilson uses pacing, lack of assigned meaning, and redundancy to present new understandings and perceptions to the spectator. In contrast, Foreman's vision turns inward and involves minute examination of the process that transforms the perceptual field into perception. Foreman's theatre pieces, which center on the manner in which perceptions are decoded, take the form of a series of tableaux that are continuously being composed, held, and recomposed for the viewer to decode. Descriptors-College Curriculum, *Course Descriptions, *Cultural Images, Curriculum Research, Educational Resources, Females, Higher Education, *Mass Media, Popular Culture, School Surveys, *Sex Role, *Womens Studies

Drawing on questionnaire responses given by 46 universities offering women's studies programs, on information contained in ``Media Report to Women'' (a monthly publication for women interested in media), and on a variety of books, films, and periodicals, this report identifies the topics concerned with women and the media that are taught in broadcast education courses, the universities that offer the courses, and the materials they use. The report presents lists of course objectives and projects and of specific topics developed in one particular course. It also offers a description of a course on masculine and feminine images in film, including the topics and films covered; and it lists the television programs, periodicals, novels, films, and music that are evaluated by students in a course on the images of women in popular culture. A list of the universities responding to the survey and a bibliography of materials related to the study of women and the media are also provided. (FL)

Descriptors-*Behavioral Objectives, *Curriculum Development, Curriculum Guides, Educational Alternatives, Elective Courses, Elementary Secondary Education, Instructional Materials, *Language Arts, Listening, Program Development, Reading, Sequential Approach, *Skill Development, Speaking, Writing

Designed for use by local schools in developing language arts programs, this guide is organized into eight sections. An introductory section contains a rationale for language arts in the school program, discussions of the characteristics of a good language arts program and of student language rights, lists of general communication goals for students, and suggestions for use of the guide. Four sections list sequences of minimum skills in the areas of reading, writing, listening, and speaking and suggest the appropriate grade level for introducing each skill. Two sections deal with alternative language arts programs for middle, junior high, and high schools, and a concluding section discusses special electives related to language arts. (FL)

Selected Characteristics of Artists: 1970: Self-Employment, Migration, Household and Family. Research Division Report No. 10.

National Endowment for the Arts, Washington, D.C.

Pub Date-Nov 78

Note-28p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Architects, *Artists, Authors, *Demography, Employment Patterns, Family Characteristics, Migration Patterns, Musicians, *Occupational Information, Occupational Mobility

Based on data concerning the artist population of the United States collected in the 1970 census, this report examines three patterns in the lives of artists. The first chapter analyzes self-employment patterns and includes information about the size of the self-employed artist population, its earnings, and a breakdown of self-employment patterns according to occupation. The occupations discussed are authors, architects, painters/sculptors, photographers, and musicians/composers. The second chapter presents data on the migration patterns of artists between 1965 and 1970. Specifically, their migration from region to region and to major metropolitan areas is analyzed. The final chapter examines the household characteristics of artists and includes information on their living arrangements, families, children, and marital status. (Twelve tables and six lists of figures are included.) (FL)

The Hippocratic Oath and Standards for Organizational Communication Consultants.

Pub Date-Nov 78

Note-12p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Communication (Thought Transfer), *Consultants, *Ethical Values, Information Networks, *Organizational Communication, *Organizational Effectiveness, Public Relations, *Standards

The basic issues faced by organizational communication consultants can be considered according to five general principles. First, the communication consultant must be objective and unbiased in interacting with the client. When a conflict of values occurs, objectivity and honesty can be maintained if the consultant assumes responsibility for any personal decisions, recommendations, and changes discussed with the client. Second, communication consultants must maintain high standards of professional competence by providing only those services for which they have been uniquely trained and by admitting limitations regarding areas of expertise that are outside of their scope. Third, strict standards of confidentiality must be maintained, not only on ethical grounds, but for legal reasons as well. Fourth, the consultant must be familiar with the ethical standards of the profession, particularly those that govern the moral and legal practices of the corporation and the demands that the corporation places on the individual employee. Finally, the individual must not only be aware of the impact that his/her consulting practices have on the corporation, but must regularly evaluate and revise these practices. (MAI)

Roots'' and Racial Attitudes: A Cross-National Study.

Pub Date-Nov 78
Note-16p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Black History, Blacks, Commercial Television, *Cross Cultural Studies, Mass Media, Programing (Broadcast), Public Opinion, *Racial Attitudes, Racial Factors, *Slavery, Television Research, Television Surveys, *Television Viewing
Identifiers-*Audience Response, England, *Roots, United States

To compare American and English audience attitudes after viewing the television production of Roots,'' a study was devised whereby sample groups from both countries were surveyed regarding their perceptions of program content and its historical accuracy, their judgments regarding the show's portrayal of slavery, and their personal racial attitudes. Results of the survey indicated the following: both American and British samples revealed heavy exposure to Roots''; both audience samples considered the series to be a credible portrayal of the conditions of slavery; the British viewers, however, thought that the blacks suffered more than white immigrants at the same period, while 26% of the American audience disagreed; more British than American viewers regarded the present day black as equal to the white in trustworthiness and incentive; both groups revealed a low correlation between the viewing of Roots'' and changes in racial attitudes; and American nonviewers of Roots'' tended to avoid the show more because of their negative racial attitudes, while for British nonviewers different tastes in programing affected their choices. (Tables are included.) (MAI)

Televised Values and Family Values: Teaching Receivership Skills to Elementary School Children.

Pub Date-Nov 78

Note-9p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Cognitive Development, *Communication (Thought Transfer), Elementary Education, *Ethical Values, *Personal Values, *Teaching Techniques, *Television

Values are more easily discussed than manipulated or measured. A curricular development project aimed at developing critical television viewing skills has developed a curriculum for the middle school grades. The project is based on the assumption that children can utilize certain viewing, listening, and reading skills and analytic procedures to modify source, message, and medium effects, and that these skills and procedures can be taught in the regular classroom. Among the goals of the project are to prepare young persons to identify and evaluate the values and value conflicts embedded in much of television content, and to provide experiences in value clarification, including the consideration of reasonable alternatives to the problem solutions presented in television programs. One classroom approach is to work out descriptions of children's favorite television characters, identify the values represented by the characters, and explore values inherent in different situations. This process can help teach children value identification, value clarification, and value judgment. (TJ)

Descriptors-Building Operation, Educational Legislation, Elementary Secondary Education, *Federal Aid, *Federal Legislation, School Construction, School Districts, School Maintenance, Tables (Data)
Identifiers-*Public Law 81 815, *Public Law 81 874, School Disaster Aid

Public Laws 81-815 and 81-874 were enacted in 1950 to assist school districts financially burdened as a result of certain federal activities. Under Public Law 81-874, payments for maintenance and operation of local schools are authorized when local revenues are reduced by the federal acquisition of real property, when the district provides education to children who reside on federal property, or when there is a sudden increase in school attendance due to federal activities. Under Public Law 81-815 federal financial assistance is authorized for school construction in districts having substantial enrollment increases due to federal activities. In 1965 both laws were amended to include federal disaster assistance to schools. The bulk of this report is made up of tables detailing the administration of both laws since 1951 with an emphasis on 1977. Tables for P.L. 81-874 show such data as applications submitted, appropriations, entitlements,

payments, expenditures, number of children eligible for payment, and payments for transportation, custodial, and maintenance services. Tables for P.L. 81-815 show such figures as appropriations, per pupil construction costs, applications, projects approved, and numbers of classrooms provided. The last table shows federal funds reserved for disaster assistance for fiscal years 1966-77 and 1977. The data indicate substantial program growth since the laws were enacted. (Author/JM)

The Structure of the New York City School System: Research Problems and Research Agenda.

Pub Date- 77

Note-24p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Board of Education Policy, *Change Strategies, Educational Administration, Educational Change, Educational Improvement, Educational Policy, Elementary Secondary Education, Organizational Change, *Policy Formation, Public School Systems

Identifiers-New York Public Schools NY

Current dissatisfaction with operations of the New York City school system calls for policy proposals based on a better understanding of the system, rather than on economic issues. Any policy proposals aimed at reform must describe the goals of suggested programs and indicate how they relate to the goals of other programs. An evaluation of student performance is essential. Also important is a consideration of costs and outcomes of the proposal, the role played by the consumer, and the successful placement of students and personnel in the system. Since the New York City system is too aggregative, properly structured decentralization would be an appropriate route to take. For example, local school boards should be permitted to design their own school systems, paying particular attention to the heterogeneity of the community. The role of the teachers' union, migration to avoid taxation, and contracting out for educational services are other factors to explore when initiating policy reform in the New York system. School Finance Litigation: The Use of Data Analysis.

Pub Date-77

Note-26p.; Figures 1 and 2 may be marginally legible

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Court Litigation, *Data Analysis, Educational Finance, Elementary Secondary Education, Equal Education, *Finance Reform, Graphs, School District Spending, Tables (Data)

School finance cases are relying increasingly on data analysis to show inequities. Such cases are based on the assumption that some state school finance systems are failing to achieve fiscal and educational equality. Data analysis can be used to show such things as the use of wealth as the primary determinant of a certain school district's expenditures or the insufficiency of equalization aid to equalize access to educational revenues. Four major pieces of data are required for empirical analysis: property wealth, expenditures, state aid, and equalized tax rates. Methodological problems encountered in data collection include determining the best source of data or the best method of counting pupils. Presentation of data must be simple and clear or the court will misunderstand or discount findings. Tables are used to show such things as comparisons of districts with high and low property wealth. Graphs are used to show such relationships as the link between property value per pupil and operating expense per pupil or the link between expenditures per pupil and educational services. Although data analysis techniques may be sometimes difficult for courts to comprehend, indications are that the use of data analysis in school finance cases is going to grow. (Author/JM)

Descriptors-Economic Disadvantagement, Educational Finance, Elementary Secondary Education, Equal Education, *Equalization Aid, *Federal Aid, *Finance Reform, State Aid, Tables (Data)

Although federal aid is not a large portion of school funding, it has a large effect on schools. Federal education aid flows mainly to poor states, central cities, and rural areas. Where states exercise discretion in allocating federal aid, distribution follows the general distribution pattern of the basic state aid formula. If a state has an equalizing formula, federal aid distribution can enhance state school finance equity. While state aid is based on variations in property wealth, federal aid compensates for variations in family income. Consistency of federal and state aid distribution policies requires better measures to assess the wealth of individual school districts. Federal interest in promoting and sustaining school finance reform peaked with the Rodriguez decision. Yet the movement to provide intrastate school finance equalization will continue to stimulate national debate for many years. This is because there are still major intrastate inequities and because federal equalization aid could help fund finance reforms in both rich and poor states. Finally, a program of general federal aid would mean that the federal government would no longer provide programs that later become a major local or state burden and strain a state's ability to fund its own finance reform programs. (Author/JM)

Evaluating Vermont's System of Financing Education and Recommendations for Equalizing State and Local Education Finance Programs. Executive Summary of the Final Report.

Educational Testing Service, Princeton, N.J. Education Policy Research Institute.
Pub Date-Mar 77
Note-19p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Educational Finance, Educational Research, Elementary Secondary Education, Equal Education, *Equalization Aid, Expenditures, *Finance Reform, *Financial Policy, *State Aid
Identifiers-Property Wealth, *Vermont

This report describes and summarizes the final report of a 1976-77 study of Vermont's system of raising and distributing educational resources. In this study, Vermont's school finance system was analyzed, several alternative school finance formulas were simulated, and an extensive school finance data set and data set documentation were compiled. This executive summary presents 30 findings and 14 recommendations contained in the final report. The research attempted to discover how educational resources in Vermont can be distributed in a way that provides greater equality of educational opportunity. It also addressed how educational revenues in Vermont can be raised in a more adequate and equitable manner. Findings and recommendations focus on educational needs and expenditures, measurement and distribution of wealth, impact of the current school finance system, and availability and reliability of data. The report also offers a list of activities the state of Vermont should undertake as part of an ongoing system of evaluation and research. (Author/JM)

Educational Testing Service, Princeton, N.J. Education Policy Research Institute.
Pub Date-Aug 76
Note-25p.; Figure 1 may be illegible
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Computer Science, *Data Analysis, *Educational Finance, Elementary Secondary Education, *Finance Reform, Simulation, State Aid
Identifiers-*New Jersey, State Aid Formulas

This data system was formulated to analyze school finance issues in New Jersey. It is intended for simulation and analysis of the effects of school finance reform. The system has three components. The first is the data base containing such information as district enrollment, property valuation, or financial information. The second is the aid allocation component that simulates the effects of aid allocation models. The analysis component analyzes the alternative aid allocation models. In the data base component, school districts are classified by socioeconomic factors and community type. The data system uses a data base management system that is flexible and will support a wide variety of analyses. The system is intended to analyze the impact of the present state aid formula; the impact of alternative measures of wealth, effort, or student need; and the impact of alternative state aid formulas. A simulation of alternative methods of taxation will also be possible. A glossary of terms used in the system concludes the report. (Author/JM)

Descriptors-Computer Science, *Data Analysis, *Educational Finance, Elementary Secondary Education, Equalization Aid, Finance Reform, Simulation, *State Aid
Identifiers-School Finance Equalization Management System, *State Aid Formulas

This overview acquaints prospective users with the School Finance Equalization Management System (SFEMS), a computer-based system designed to answer questions about state aid distribution. SFEMS can determine such things as the current pattern of aid distribution, the current pattern of tax effort, or the effect of alternative expenditure and taxation systems. The system is composed of three phases: data collection, aid allocation, and analysis. The data collection component contains all data relevant to the problems being addressed. In the aid allocation component, alternative school finance plans are simulated and new expenditure levels and tax rates are predicted. In the analysis phase, allocation alternatives are compared and evaluated. Several formulas can be used to equalize the allocation of state aid. These are guaranteed valuation, percentage equalizing, district power equalizing, foundation programs, or a general form. State aid formulas that are not equalizing include minimum aid formulas, save-harmless provisions, and categorical aid. The effects of all these allocation formulas can be analyzed through a sequenced report, a frequency report, or a Gini report. (Author/JM)

An Examination of the Boston School System's Budgetary Process.

Pub Date-12 Dec 77

Note-85p.; Not available in paper copy due to marginal legibility of original document

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Administrator Role, *Budgeting, Educational Administration, Educational Research, Elementary Secondary Education, Interviews, Organizational Effectiveness, *School District Spending

Identifiers-Boston Public Schools MA

This study tried to determine if the new methods of budgeting and new organization instituted by the Boston School System in 1976 appeared to be effective in bringing runaway spending under control. Data were gathered through interviews with school department personnel, consultants, personnel in agencies responsible for school monitoring, and members of public interest groups. Budget and enrollment figures since 1962 were gathered. Formulation and approval of the budget were analyzed and an operations analysis of the effectiveness of the school department and old and new budget systems was done. Findings indicate basic weaknesses in the previous formulation of the school budget but that the new cost-centered system promises significant improvement. Deficit spending is the fault of factors outside the control of the school system. Special education and bilingual education account for some budget increases. The costs of desegregation, often cited as causing school budget inflation, are less significant than previously thought. The collective bargaining system also causes budget inflation. At the roots of the school system's problems are past Boston School Committees with little expertise or responsiveness to the public, although this situation promises to improve. Administrator roles need to be clarified and the level of administrator expertise improved. (Author/JM)

Matthews, Kenneth M.

School Business Officials and the Price of Education in Georgia.

Pub Date-2 Nov 78

Note-9p.; Paper presented at the Georgia Association of School Business Officials Annual Conference (13th, Albany, Georgia, November 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Administrative Personnel, Costs, Educational Finance, *Expenditure Per Student, *Financial Support, Public Relations, *School Community Relationship, School Taxes, Tax Support

Identifiers-*Georgia

Between the 1966-76 and 1976-77 school years, expenditures per pupil for the maintenance and operation of Georgia public schools rose 146 percent. Even after adjustments for inflation, this is a substantial increase. Faced with taxpayer resistance to increasing taxes, educational leaders can choose from three options. They can adopt an aggressive public relations program to gain financial support; they can voluntarily reduce requests for revenue; or they can merely keep asking for more funds until taxpayers refuse to pay. If the first option is chosen, educational leaders must convince the public that if schools are to meet the expectations of society, public education must have a significant portion of our financial resources. If the second option is [illegible] educational leaders must be sure not to overreact and ask for [illegible]n the public is willing to pay. The third option fails to take advantage of the duty of educational leaders to influence public opinion. Public confidence in the management of public education can be influenced greatly by the success school business officials have in applying sound management practices and keeping the public informed of their progress. Education and Drugs. Report of the Education Sub-Committee of the Alcohol and Drug Authority.
Western Australia Education Dept., Perth.
Pub Date-Dec 76
Note-54p.
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Administrator Role, *Alcohol Education, Drug Abuse, *Drug Education, Drug Legislation, Elementary Secondary Education, Foreign Countries, *Health Education
Identifiers-*Australia

In Australia, drug and alcohol education should be an integral part of a total health education program with an emphasis on developing student decision-making powers. The use of explicit information about drugs and attempts to scare people away from drugs may actually be counterproductive and encourage drug abuse. The teacher is the primary health educator in the school, and speakers on health from outside the school must be used in moderation. There are a number of shortcomings in the current provision of drug and health education. There must be stronger support for health education, commencing in the primary school. A number of agencies are available for drug education and counselling. Greater coordination of all agencies is called for. There should be more opportunities for continuing education for health teachers. Many groups in the community can benefit from health education programs. The mass media may at times inadvertantly encourage drug use and ought to be more responsible. Legislators ought to keep an open mind about the desirability of legal sanctions against drug use. Related materials in the appendix include surveys of student drug use, a proposed drug education program, and a recommendation for the principal's response to drug abuse in the school. (Author/JM)

Descriptors-*Community Education, Community Involvement, Elementary Education, *Inservice Education, *Inservice Programs, Interpersonal Competence, *Leadership Training, *Management Development, Needs Assessment, Parent Participation, *Principals, School Community Relationship, Teacher Discipline, Urban Schools, Workshops

Thirty elementary school principals from twelve Michigan urban school districts attended a series of inservice training programs emphasizing the development of management skills necessary for elementary principals to administer a comprehensive community education program. Each monthly session of the year-long program was dedicated to a specific skill area. Chapters 1 through 9 describe in detail the topics: (1) program needs assessment and introduction to the general concepts of community education; (2) interpersonal process recall; (3) parent/community involvement; (4) assessing building needs and building budget planning; (5) the Flint Community Education Model, program and process in action; (6) corrective discipline for professional personnel, improving instruction through staff evaluation; (7) the family and community structure; (8) interviewing techniques and program assessment; and (9) project evaluation and wrap-up. The appendices contain a series of building activities that have been used successfully by elementary principals to get the community involved in their schools, and a series of yearly designs for planning parent/community involvement. Descriptors-Administrator Responsibility, Corporal Punishment, *Crime, Delinquency, Discipline, Elementary Secondary Education, Expulsion, Federal Court Litigation, Public Schools, School Vandalism, Supreme Court Litigation, Suspension, Teacher Responsibility, *Violence

This book analyzes changes in the nature and extent of student crime and violence in American public secondary schools from 1950 to 1975. Specific attention is given to the types of juvenile crimes, disorders, and disruptions that most strongly influence the administration of schools and generally require administrative responses. School responses to student misbehavior are also discussed. (Author/PKP)

Identifiers-Pennsylvania, *Teacher Rights

This handbook, intended for use by teachers, administrators, and school board members in Pennsylvania, discusses constitutional, statutory, and case law related to the rights and obligations of teachers. Divided into fifteen chapters (with appendix and selected bibliography), the first four deal with education as a governmental function, the purpose of education, and Pennsylvania's organization for education. Chapters five through nine discuss the legal status of teachers generally and under Pennsylvania statute, the employment of teachers (certification, contract rights), and employment security, teacher tenure, and retirement. Chapter 10 deals with tort liability of school districts and school employees, chapter 11 with collective bargaining, and chapter 12 with miscellaneous statutory duties, rights, and limitations of teachers. The final two chapters deal with the professional status of teachers, professional organizations, and code of ethics. (PKP)

Identifiers-State Court Litigation, West Virginia

This handbook is designed for use by board members, administrators, and teachers to aid them in understanding the legal aspects of governance, management, and operation of public schools in West Virginia. Substantial discussion is devoted to sources of school law (common law, state and federal constitutions, state and federal statutes); the legal framework of West Virginia's public schools; student, teacher, and administrator rights and responsibilities; and financing public education in West Virginia. There are brief discussions of legal aspects of collective bargaining and accountability in West Virginia. Significant state and federal court decisions related to public education outside West Virginia are included, as are interpretations of state statutes pertaining to education by the state superintendent of public instruction and the state attorney-general. Altering Collective Bargaining: Citizen Participation in Educational Decision Making.

Pub Date-76

Note-179p.

Available from-Praeger Special Studies, 383 Madison Avenue, New York, New York 10017 ($18.95)

Document Not Available from EDRS.

Descriptors-Boards of Education, *Citizen Participation, *Collective Bargaining, *Community Control, Contracts, Court Litigation, Decision Making, Educational Policy, Elementary Secondary Education, Federal Legislation, *Governance, Political Issues, Public Schools, State Legislation, *Teacher Employment, *Unions

Identifiers-*Scope of Bargaining

The major focus of this study is on altering the current structure of collective bargaining in public education to provide for adequate community participation. Concentrating on big city school systems where minorities and the poor have historically been apart from the educational policy-making process, the study finds that the scope of bargaining between teachers' unions and school boards has expanded into various policy areas, giving the unions increased power to define public school policy and leaving those historically disenfranchised groups in urban centers even further removed from involvement in the policy-making process. This study finds that while the number of educational policy issues has increased in recent years, the power to resolve these issues has shifted to a small group of professionals (board negotiators, union staff, and third-party neutrals) who, the author asserts, are not necessarily accountable to the public. It proposes alternatives for reforming the collective bargaining structure in public education to increase citizen input. (Author/PKP)

The Finance of Education. An Explanation for Non-financial Administrators and Trustees of Educational Institutions.

Spons Agency-Saint Mary's Coll., Winona, Minn.
Pub Date-78
Note-43p.
Available from-Saint Mary's College, Winona, Minnesota 55987 ($2.50)
Document Not Available from EDRS.
Descriptors-Educational Administration, *Educational Finance, Expenditures, Higher Education, Income, Investment, *Money Management, *School Accounting
Identifiers-Cash Flow

This booklet on the finance of education is designed for nonfinancial administrators and trustees of institutions of higher education. It is meant to familiarize such educational officers with basic concepts, ideas, terminology, and practices in the financial realm. No attempt is made to present analytical details, economic elaborations, or complex fiscal patterns of interest to professional financial managers. The premise of the volume is that if the material resources of a college or university are to be utilized effectively in furthering its educational missions, the trustees and chief executive officers ultimately must be the responsible agents for sound financial management. As responsible agents, these trustees and officers should understand the role and basic principles of accounting (as explained in chapter 1), the management and investment of cash flow'' (as explained in chapter 2), and the processes and risks of investments (as described in chapter 3). Office of Education (DHEW), Washington, D.C.
Pub Date-78
Note-219p.; For a related document, see ED 135 062; Some tables may be marginally legible
EDRS Price MF-$0.83 HC-$11.37 Plus Postage.
Descriptors-Comparative Analysis, *Educational Finance, Educational Legislation, *Equal Education, *Equalization Aid, Expenditure Per Student, *Finance Reform, *School District Spending, *State Aid, State Legislation
Identifiers-Wisconsin

This volume contains three papers that evaluate student equality resulting from school financing programs. The papers are based on the premise that student equity can be measured by comparing how much school districts spend. In the first paper the author presents a systematic analysis of several measures of equity and the implication of using each measure. In the second paper, the authors evaluate each state's accomplishment in equalizing student expenditures between 1970 and 1975. The data for the 1970 analysis were derived from 5,100 school districts and for 1975 from 6,100 districts. The authors conclude that overall national expenditure disparities have not decreased and may have, in fact, increased. The final paper is an evaluation of the 1973 Wisconsin school finance reform law. The detailed paper provides insights on how a sweeping reform package can be virtually nullified because of inconsistencies inherent in the legislation. (Author/JM)

Identifiers-*Sex Equity in Educational Leadership Project, University of Oregon

Since the turn of the century women have predominated as professionals in public schools, yet women have never held parity with men in management. Educational institutions are deprived of the leadership skill and competence of people who happen to be female. In addition, children are faced daily with sex-typed role models that influence their career aspirations and perpetuate the cycle. This chapter from Women and Educational Leadership: A Reader,'' edited by Sari Knapp Bichlen and Marilyn Brannigan, is about one attempt to reduce the barriers that exclude women from educational leadership. The Sex Equity in Educational Leadership Project (SEEL) at the University of Oregon has attempted to develop a multilevel system model for changing women's role in educational leadership. This chapter has three sections: a description of the current context for changing women's roles in schools and in society, a review of explanations from social science theory and data, and a description of the SEEL project with recommendations about what other states can do to increase the number of women as educational managers. Environmental Pressure and School Organizational Structures.
Pub Date-Sep 78
Note-41p.; Paper presented at the Annual Meeting of the American Sociological Association (San Francisco, California, September 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Community Attitudes, *Cooperation, Correlation, *Environmental Influences, Grievance Procedures, *Group Unity, Interpersonal Relationship, Junior High Schools, Middle Schools, Norms, Organization, *Organizational Communication, Social Science Research, Tables (Data), Teacher Administrator Relationship, *Teacher Associations, Teacher Strikes

This paper examines effects of pressure from the community and teachers' organization on interaction patterns or structures within schools, specifically on normative consensus, upward communication, and facilitative dependence. These structures help determine the extent of cooperation and support teachers receive. Questionnaire data from virtually all administrators and 253 teachers in a stratified random sample of 34 junior high and middle schools are used for a school-level correlation analysis. Community pressure generally disrupts the structures of cooperation, but at severe levels of intrusion into the school, the effect may be reversed as administrators and teachers close ranks against the community. Teacher organization pressure increases consensus among teachers but decreases it between faculty and principal and between principal and superintendent. Such pressure reduces the receptivity of the principal to teacher ideas (in their eyes, at least), although enhancing his actual knowledge of teacher concerns. Finally, teacher organization activity at the district level makes it harder for school personnel to help one another. These findings are interpreted in the light of changes in school-environmental relations, wherein community delegation of authority to professionals is giving way to community surveillance and influence in the schools. Descriptors-*Board of Education Role, Boards of Education, Foreign Countries, Governing Boards, *Inservice Education, Literature Reviews

Identifiers-Canada

This study is divided into two parts. The first part is an overview of the literature on boards. This includes consideration of boards of directors of business corporations, of school boards, and of social service boards. The review assesses this literature in terms of its relevance for improving social service boards. Also included is a detailed review of literature directly related to the improvement or training of boards of directors. Methods and materials are discussed. The second part of the report makes some suggestions about the kinds of programs that might be effective and gives some proposals for further action. Six models of board training are suggested special seminars; retreats for a single board; institutes for board chairmen, executive directors, or board members; the provision of self-study materials and ideas; short-term consultation; and long-term consultation. The ``Hip Pocket Guide Trainer's Handbook'' offers a training design, suggested procedures, and a complete set of materials for conducting a workshop or training program on planning and evaluation using the ``Hip Pocket Guide to Planning and Evaluation'' as a participant workbook or text. The training design incorporates a variety of active learning techniques for teaching a step-by-step process for defining a problem, setting objectives, deciding among alternate strategies, preparing for implementation, and designing and using evaluative information. The training design can be used with participants from the same organization or from different organizations. It can be used with participants interested in learning skills for individual and organization problem-solving and task management, as well as for project planning, budgeting, and proposal writing. The training program presented involves a six-week series of six half-day sessions. (Author)

The Tasks of Secondary Education: Conflicting Expectations of Parents, Educators and Students.

Pub Date-Feb 73

Note-40p.; Figure 3 may be marginally legible

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Community Surveys, *Educational Objectives, Individual Development, Parent Attitudes, Questionnaires, Secondary Education, Statistical Data, Student Attitudes, Student Opinion, Tables (Data), Teacher Attitudes

Identifiers-*British Columbia (West Vancouver), *Task of Public Educ Opinionnaire (Downey et al)

This study attempts to define the principle tasks of secondary education as perceived by parents, educators, and students in one Canadian suburban school district in 1971. In addition, it compares their opinions with those of similar groups in the United States and Canada surveyed a decade earlier. The Task of Public Education (TPE) Opinionnaire was used to measure responses to 16 goals that are broken down into four principal dimensions of individual development: intellectual, social, productive, and personal. Three figures present samples of the questionnaire and six tables analyze the results. Parents, educators, and students all agreed on the primacy of the intellectual dimension in secondary education, findings which are similar to those of the Downey and Hartrick studies done a decade earlier. However, the 1971 West Vancouver results show much greater concern for international harmony and for developing a desire for knowledge than the 1960 and 1961 Downey and Hartrick studies, which emphasize national patriotism and the efficient use of the 3 Rs. The stated value of the study is in the information it provides educational policy-makers in this district. (Author/LD)

Patterns of Participatory Management in Schools.

Pub Date-Jun 76
Note-44p.; Paper presented at the Annual Conference of the Canadian Association for the Study of Educational Administration (Quebec City, Quebec, June 1976)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Assistant Principals, *Decision Making, Educational Research, Elementary Secondary Education, Foreign Countries, Principals, Tables (Data), *Teacher Participation
Identifiers-British Columbia, *Participative Decision Making, *Participative Management

This study attempted to determine the actual and preferred decision-making levels of teachers and principals in schools. Subjects included approximately 30 principals and 675 teachers from elementary and secondary schools in a large suburban school district in Vancouver, British Columbia. Subjects completed a questionnaire on decision-making in their schools. Among the findings to emerge from the study was that both elementary and secondary teachers desired more decision-making in schools. Principals and assistant principals were identified as making more decisions that any other group and were on the whole satisfied with their levels of decision-making. Teachers believe that principals' involvement in decision-making is larger than principals perceive it to be, and, conversely, principals believe teachers to have more involvement in decision-making than teachers believe they have. This study confirms the results of earlier studies that showed that preferred levels of teacher participation in decision-making are greater than actual levels of decision-making. It also confirmed earlier findings that teachers' desire for participation in school decision-making varies with the decisional area. The study suggests that more collegial decision-making systems in schools will produce greater teacher satisfaction and organizational productivity. (Author/JM)

Attitudes Toward the Public Schools: A Canadian American Comparison.

Pub Date-Jun 77

Note-22p.; Paper presented at the Annual Conference of the Canadian Association for the Study of Educational Administration (Fredericton, New Brunswick, June 1977)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Community Attitudes, *Community Surveys, Comparative Analysis, Educational Research, Elementary Secondary Education, Foreign Countries, *National Surveys, *Public Opinion, Public Schools, Surveys, Tables (Data)

Identifiers-British Columbia (Vancouver), Gallup Poll, United States

This study compared the findings of the 1969-76 Gallup polls on education with findings from three Canadian surveys on attitudes toward public schools. The Canadian studies were done in 1973, 1975, and 1976 in two large suburban school districts in Vancouver, British Columbia. In each of the Canadian surveys 200-250 adults were interviewed. Both the Gallup poll and the British Columbian surveys revealed discipline as the major problem facing schools. The majority of Canadian and American respondents queried favored improved programs and services rather than expulsion for students not interested in school. Subjects from both countries agreed that students do not work hard enough in school. Most respondents favored a system of national, state, or provincial testing. While the Gallup poll and the 1973 Canadian study showed the public almost equally divided on whether the schools' readiness to try innovations was too great, not great enough, or about right, the later Canadian studies showed a growing reaction against educational innovation. And although a majority of Americans were opposed to school tax increases, a majority in each of the Canadian samples would approve a needed increase. Most Canadian and American respondents felt that schools were doing an average or better than average job. (Author/JM)

Citizen Advisory Committees: The Faulty Lightning Rod in the Storm of School-Community Relations.

Pub Date-Jun 78
Note-22p.; Paper presented at the Annual Conference of the Canadian Association for the Study of Educational Administration (London, Ontario, June 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Advisory Committees, Boards of Education, Case Studies, *Citizen Participation, *Conflict Resolution, Decision Making, Educational Research, Elementary Secondary Education, Foreign Countries, *Parent Participation, *School Community Relationship
Identifiers-British Columbia

This case study investigated the capability of school citizen advisory committees to collect, contain, and dissipate conflict. It examined the activities of the Ideal School citizen advisory committee in Vancouver, British Columbia, in 1976-77. The committee attempted to block a decision by the school board to move the school to a new location within another high school. Although several possible alternate sites were considered by the committee and the board, agreement could not be reached, and the board announced its plans to complete the relocation. An angry attack in the media was then launched on the school board by Ideal School teachers, parents, and community residents. Nevertheless, the move was accomplished. Four months later, a board attempt to move the school to an elementary site provoked a strong protest by residents of the elementary school neighborhood. In response, the school board chose yet another site, and the move was successfully made. The conclusion from this experience was that advisory committees function well in attracting and focussing conflict but are not effective at containing or dissipating the conflict. The committee could not prevent the school system-community conflict from exploding into the wider public arena. (Author/JM)

Identifiers-New York

This study was the second year of a project that attempted to formulate criteria for project evaluation and funding decisions. Activities were designed to produce measures of project impact for vocational education projects. The second year's work focused on refinement of impact variables, and a survey of directors of vocational education concerning their priorities for impact variables. Local education agencies (LEAs) in New York State were asked their opinions about whether the impact variables were valid and whether it would be feasible for them to collect the data required. Six project impact variables were considered the most valid. (1) Students trained have positive attitudes toward work. (2) Training increases student employment options. (3) Employers are satisfied with graduates of the program. (4) Graduates are working in occupations for which they are trained. (5) Project objectives are fulfilled. (6) Training objectives are met in the most cost-effective manner. The LEAs queried indicated that collection of necessary data would be feasible but that they could use support with data collection in several areas. The next steps required are a review of the impact rating forms and development of additional related rating forms and the preparation of a funding and evaluation handbook for LEAs. (Author/JM)

Education by Choice: The Case for Family Control.

Pub Date-78

Note-249p.

Available from-University of California Press, 2223 Fulton Street, Berkeley, California 94720 ($10.95)

Document Not Available from EDRS.

Descriptors-Decision Making, Educational Philosophy, *Education Vouchers, Elementary Secondary Education, *Family Involvement, *Parent Participation, Program Descriptions, Racial Integration

Identifiers-Freedom of Choice, Quality Choice Model

This book examines the philosophical issues, possible variations, and implementation of voucher plans of educational choice. The voucher system proposed here (the Quality Choice Model) is based on the assumption that a voucher system can ensure the equal provision of educational resources to children regardless of residential mobility or ability to afford private school. The volume traces the history of choice in education in this country and links voucher plans with a belief in the value of ideological and educational pluralism. The problems that may be raised as a result of the effect of voucher plans on racial integration are addressed. The authors make a case for families being allowed to make educational choices for their children. Most of the book deals with the best design for a voucher plan, including admissions policies, consumer information, fair selection, transportation, teacher certification, transfer policies, regulation of competition, governance, and formation. Descriptors-Educational Administration, Elementary Secondary Education, Political Power, *Principals, School Districts, Superintendents, *Team Administration

Identifiers-Drucker (Peter), Iowa

These remarks touch on a variety of topics related to educational administration and the management team. The author recognizes the need for superintendents, principals, and district teams to have a new performance-based management philosophy and system. He believes that although most approaches to educational management tested in the 1960s failed to meet expectations, the experiences gained from this testing form a basis for more successful approaches. The author lists seven of Peter Drucker's recommendations concerning the functioning of the management team. The author mentions that many principals feel the management team is only a myth and that principals have no real power. He notes that principals today feel powerless and frustrated but that many people believe the principal is the critical person in the educational process. He then lists five ideas about what a management team should be and how it can be beneficial to principals. He further lists 11 questions a district should ask itself to see if it has an adequate base on which to build a management team. In closing, the author mentions some experiences concerning management teams in Iowa. (JM)

Wood, Carolyn J.

Participatory Decision Making in a Localist Task Group: A Case Study.

Pub Date-Mar 78

Note-28p.; Paper presented at the Annual Meeting of the American Educational Research Association (Toronto, Ontario, March 27-31, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Affective Behavior, Affective Tests, Case Studies, *Decision Making, Elementary Education, *Group Dynamics, *Group Relations, Group Unity, Leadership Responsibility, Open Education, *Organization, Organizational Effectiveness, *Organizational Theories, *Participant Involvement, Problem Solving, Self Directed Groups

Participatory decision-making strategies have been suggested as effective in groups with the task of solving unstructured problems or creating innovations. Concerned about evaluating children's affective growth in open classrooms, eight educators in a large metropolitan area agreed to meet regularly after school hours to develop an instrument to assess affective growth in children. The five teachers and three administrators who formed the Open Education Evaluation Group (OEEG) were drawn from five local elementary schools and shared an interest in open education. The case study of the OEEG suggests that there may be important differences between the desire of the group participants to use these strategies and their ability to use them effectively. After 15 months the OEEG, using participatory strategies, failed to accomplish its goal. The presentation focuses on problems in four areas that appeared to have implications for the OEEG's failure: skill level, consensus decision-making, self-oriented needs, and hierarchical differentiation. Report No.-DHEW-NIE-P-770202
Pub Date-Oct 78
Note-29p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Anti Social Behavior, *Behavior Problems, Delinquent Identification, *Discipline Problems, Educational Environment, Failure Factors, *Literature Reviews, Parent Child Relationship, *Research Reviews (Publications), School Responsibility, School Vandalism, Secondary Education, Student Teacher Relationship, Teacher Role, Television Viewing, Truancy, Violence

This paper reviews the problems of antisocial student behavior in schools, tries to identify causes, and examines programs and procedures for remediating and preventing such behavior. This review focuses particularly on senior and junior high schools and all forms of antisocial, aggressive, disruptive behaviors that interfere with school functioning. The report concludes that the problems of school discipline, violence, crime, vandalism, and truancy have grown to large proportions in many American schools. Principals and school boards often seem reluctant to admit the problems that begin or are caused by forces outside the school. Poor home conditions, television violence, a climate of crime in the community, gangs, and peer crime influences are all initial contributors to the problems that surface in schools. But, the author contends, the school also contributes with poor teaching, a negative school climate, a dose of failure for many students, and irrelevant curricula. The school can take positive action along with other youth agencies to alleviate the problem and even create a positive social and academic climate in which all youth can succeed. A set of recommendations for action by educators is presented. (Author)

Descriptors-Decision Making, Economic Climate, Elementary Secondary Education, Foreign Countries, *Innovation, *Management Systems, *Program Budgeting, *Resource Allocations, School Districts
Identifiers-*Canada, *Zero Base Budgeting

Zero-base budgeting (ZBB), a systematically structured approach to budgeting, has the potential to improve policy attainment, resource reallocation, program review, and information systems. Some 300 businesses, a dozen states, one municipality, and one school district in the United States have operationalized the concept. Many private and public institutions in Canada are considering ZBB. The purpose of this paper is to provide the conference participant with the critical information regarding adoption of ZBB. Specifically, the paper addresses the following ZBB topical areas: (1) environmental context, (2) historical development, (3) definition, (4) assumptions, (5) managerial underpinning, (6) planning relationships, (7) basic steps, (8) five operational examples including a school district, (9) assessment of the five examples, (10) PPBES/ZBB compatibility, and (11) design and implementation considerations. Improved policy attainment and resource allocation through ZBB have been found to be more effective in a restrained economic environment, a time of competing priorities for scarce resources, and public disenchantment with public programs. As Canadian education is faced with these policy issues, ZBB should be seriously considered by provincial governments and local school districts. (Author)

Descriptors-Case Studies (Education), *Educational Change, Educational Improvement, *Educational Innovation, Educational Objectives, Educational Policy, Elementary Secondary Education, Foreign Countries, *Futures (of Society), *Policy Formation, *State Departments of Education
Identifiers-*Alberta

Policy-making is viewed in this paper as a major mechanism for meeting the educational aspirations of the provincial publics and inducing improvements in the quality of education. The reconstructionist's transmittal and traditionalist's transformation ideological philosophies are merged as legitimate symbiotic functions of education; thereby giving rise to the proposal for provincial governments and education departments to adopt a ``pro-retrospective'' policy-making mode, with a higher priority ordering for the futures mode. Several provincial policies are examined in the Alberta context to ascertain the policy-making mode of the Alberta Department of Education. Some reasons are cited from literature that help explain why educators are generally reluctant to accept the prospective policy-making mode. Finally, nine recommendations are advanced and operational explication regarding each recommendation developed for improving provincial educational metapolicy (policy-making process) and the quality of policies through the ``pro-retrospective'' mode. The conclusion, and overall theme of the paper, suggests that if a ``pro-retrospective'' policy-making mode is not adopted by provincial governments and departments of education, we might be reliving yesterday tomorrow, instead of shaping tomorrow's future. Toward an Human Resource Accounting (HRA)-Based Model for Designing an Organizational Effectiveness Audit in Education.

Pub Date-3 Jun 76

Note-39p.; Paper presented at the Annual Conference of the Canadian Society for the Study of Education (Quebec City, Quebec, June 1976); Figures 1-4 may by marginally legible

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Accounting, Educational Quality, *Efficiency, Elementary Secondary Education, Evaluation Methods, Graphs, *Human Resources, Management Information Systems, *Models, *Organizational Effectiveness, Organizational Theories, *School Organization

The major purpose of this paper was to develop a Human Resource Accounting (HRA) macro-model that could be used for designing a school organizational effectiveness audit. Initially, the paper reviewed the advent and definition of HRA. In order to develop the proposed model, the different approaches to measuring effectiveness were reviewed, effectiveness was defined, a functional goal-setting rationale was developed, a goals/growth framework was established, and the effectiveness-efficiency relationship was identified. The six identified effectiveness variables were briefly discussed and the model summarized. Finally, eight implications to educational effectiveness were identified and explained. (Author)

Toward the Improvement of Public Policymaking: A Policy Sciences Developmental Construct.

Pub Date-7 Jun 77
Note-30p.; Paper presented at the Annual Conference of the Canadian Society for the Study of Education (Fredericton, New Brunswick, June 1977)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Educational Policy, Government Role, *Organizational Theories, *Policy Formation, *Political Science, *Public Policy, Social Change

Meta-megapolicy, a concept mix of the policy sciences discipline, is viewed as central to attempts at improving public policy-making. Rooted in the prevailing societal values, public policies are envisioned as the result of a policy-making process in which megapolicy is utilized to determine the needed changes in policy, and metapolicy is utilized to sharpen the focus of megapolicy. A conceptual framework, in the form of a five dimensional developmental construct, is presented that may enhance the policy-making process in such public sectors as education. The five dimensions of the construct allow each policy-maker to choose the specifics within each dimension that are pertinent to the policy issue of the policy-maker's choosing. Implications for policy-making and for the policy sciences are examined. (Author)

The National Dissemination Leadership Project (NDLP) is a special project of the Council of Chief State School Officers (CCSSO) funded by the National Institute of Education (NIE). The project provides a secretariate to facilitate communication among state education agencies (SEAs), NIE, and other agencies and individuals concerned with improving dessemination programs in education and to encourage development of such programs at the state levels. This report lists the objectives of NDLP, presents the organization's background, discusses the organization of CCSSO, and presents a series of premises expressed by SEA representatives of SEAs' responsibility in terms of dissemination. The final portion of the report restates each NDLP objective, explains the efforts that have been made to meet each objective, states observations, and offers recommendations. (MLF)

Identifiers-Cincinnati Public Schools OH

Board of Education Action Motion No. 16 requires each school in the Cincinnati system to establish a discipline committee to establish a formal structure designed to encourage cooperative efforts between and among staff, students, parents, and other concerned citizens. The focus of these cooperative efforts is to improve pupil behavior. This document has been developed as a general resource for school discipline committees and offers many how-to-do-it suggestions to help local committees work through the organization, planning, and evaluation processes. This information is, however, in no way meant to be all-inclusive. Suggested sources of resources for program development are included as are several appendices providing background information on board policy; administrative procedures on suspension, expulsion, and removal from school; and related information. The Roles and Responsibilities of Instructional Supervisors. A Report.

Pub Date-1 Oct 78

Note-85p.; A report by the ASCD working group on the roles and responsibilities of supervisors; Some tables may be marginally legible

EDRS Price MF-$0.83 HC-$4.67 Plus Postage.

Descriptors-*Administrator Education, *Administrator Role, Bibliographies, Certification, Elementary School Supervisors, Elementary Secondary Education, High School Supervisors, Literature Reviews, School Surveys, Supervisors, *Teacher Supervision

This publication is the product of a working group assigned the responsibility of examining the role and responsibilities of instructional supervisors. In addition to reviewing the 1977 report of another working group, the members of this group examined existing certification and preparatory programs for instructional supervisors; conducted rather lengthy telephone interviews with the executive directors of major professional organizations that work with, prepare, or employ instructional supervisors; conducted telephone interviews with members of those organizations; and made an analysis of published information concerned with the preparation, roles, and responsibilities of instructional supervisors. Members of the group conclude this report with recommendations based on their findings. The findings indicate that under existing conditions instructional supervisors must play a dual role and suggest that there are really two groups of instructional supervisors: administrative and consultative. Responsibilities for the two positions are different and different preparatory and experience programs are recommended. (Author/IRT)

Identifiers-*Central Susquehanna Intermediate Unit PA, *Linking Agents

Basic science is a process by which new knowledge is discovered; engineering is the process by which this new knowledge is made useful for practical situations or to solve particular problems. In education, new products are developed, research is completed, and the knowledge base is expanded, but there is no corollary to the engineer to make applications and solve problems with the information produced. The Central Susquehanna Intermediate Unit, as a regional education service agency, has attempted to establish the concept of educational engineering and, through multiplier training, has also attempted to establish ``resident engineers'' in each participating school district. EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Annotated Bibliographies, *Community Schools, *Educational Alternatives, Educational Objectives, Elementary Secondary Education, *Evaluation Methods, *Open Education, *Program Development
Identifiers-*Free Schools

This bibliography is divided into eight subsections. The first section lists articles on community schools and schools without walls. The second encompasses the effects of alternative education. Student attitudes, academic achievement, and parental reaction are some of the variables assessed in the articles in this section. The third section is on evaluation of alternative schooling and presents both formal and informal assessment models. A brief mention of the peculiar requirements of alternative schooling in regard to facilities is made in the fourth section. Free schools, sometimes termed storefront schools or street academies, are the subject of the fifth section. The sixth section examines the need for alternative education and the specific goals that it can achieve. Section seven deals with open education. The final section is an introduction to some facets of program development in alternative education. Once the decision is made to opt for alternative education and the goals are set, these articles can provide guideposts in program construction. (Author/IRT)

Descriptors-Administrator Attitudes, Community Attitudes, Data Collection, Educational Needs, Elementary Secondary Education, *Needs Assessment, Organizational Climate, Program Descriptions, Questionnaires, School Surveys, *Statistical Surveys, Student Attitudes, Tables (Data), Teacher Attitudes
Identifiers-*School Community Climate Survey

One way that a school system can systematically assess its needs and assure that plans for improvement reflect the participation of all concerned groups is through use of the School Community Climate Survey (SCCS). The SCCS is a process for gathering information on people's attitudes, analyzing these attitudes in terms of perceived needs, assigning priorities, and reporting the results in an understandable fashion. By asking staff and community members to state the "desired" and "actual" condition of the school district in response to a number of questions on educationally related goals, school leaders can learn more about their school-community climate. The SCCS will not make decisions nor is it self-administering. Administrators who use it will have to determine who will be surveyed and then select a sample of that population. Instructions are provided that enable them to select a random sample of the recommended size and to use their existing organization to distribute and collect questionnaires. The questionnaires provided may be used as a part of the total SCCS package, or administrators may prepare their own questions and design sets of forms. The resulting survey data may be processed and analyzed by their organization using the SCCS software or by Battelle through a contractual agreement. (Author/LD)

Descriptors-Administrator Role, *Motivation Techniques, *Need Gratification, Principals, Program Descriptions, Secondary Education, Secondary School Teachers, Self Actualization, *Teacher Motivation

Identifiers-Maslow (Abraham H)

The most prominent component of successful schools is a motivated teaching staff, with the principal as the key. Motivation is an intrinsic drive toward the fulfillment of personal needs and the improvement of one's perceived status. Teachers who are aware of Abraham Maslow's Hierarchy of Human Needs'' are better able to set personal goals and to assist others in setting goals. Motivation deficiency occurs when an individual is completely frustrated in attempting to gratify a specific need. Decrease in national test scores, participation in union-type activities perceived as demeaning, criticism from the general public, and unmet student demands have all contributed to the failure of teachers to fulfill needs of self-esteem. A principal must assume the responsibility of teacher motivation if the fullest potential of both teachers and students is to be realized. The principal must aggressively utilize all his or her influence and talents to create the synergy that comes when the goals of teachers are the same as the goals of the school. Examples are given of efforts made in several school systems to motivate the professional staff. (Author/LD)

Document Not Available from EDRS.

Descriptors-Arbitration, Collective Bargaining, *Court Litigation, Labor Demands, *Labor Legislation, *Labor Unions, *Union Members

Identifiers-National Labor Relations Board, Steel v Louisville and Nashville Railroad

This monograph analyzes the law of fair representation, as applied by the National Labor Relations Board and the courts, and its implications for individuals, union officials, and management. As employees increasingly turn to judicial and administrative agencies to protect their rights, the duty of fair representation has become a doctrine of growing importance for unions and employers. Since Steele v. Louisville and Nashville Railroad, the duty of fair representation has been defined as the obligation of the union, as exclusive bargaining agent, to represent fairly and impartially the members in a given bargaining unit. A breach of that obligation can result in an employee suit against the union for injunctive relief and damages. The author devotes individual chapters to the history of the duty of fair representation, negotiation, contract administration, arbitration, jurisdiction, and procedure. He emphasizes the continuing uncertainty over the final contours of the doctrine and its constant state of flux in the board and in the courts. The hesitant and often contradictory positions advanced by the board and the courts reflect a desire to strike a balance between individual union members and union interests as a whole. (Author/LD)

The Place of Theory in an Applied Profession: Where Might We Be Going in Organizational Theory?

Pub Date- Aug 77
Note-12p.; Paper presented at the Annual National Conference of Professors of Educational Administration (Eugene, Oregon, August 14-19, 1977)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Administrative Personnel, Educational Administration, Elementary Secondary Education, Higher Education, *Organizational Theories

In the sharpest possible contrast to the purely academic professions, the paramount feature of the applied professions such as educational administration is the primacy of the clinical focus. Their ultimate focus is not the pursuit of knowledge itself, but the effective attainment of practical goals where serious interests of clients are often at stake. The emphasis on theory that has characterized educational administration has been misguided. As members of an applied profession, administrators' primary concern is not the organization and extension of a relatively unified body of knowledge but the managing of ongoing processes, and the finding and implementing of solutions to problems. The direction educational administration takes in pursuing theory should be governed by the kinds of problems that are of the greatest concern to practitioners. (Author/IRT)

Middle School Challenges: Are We Meeting Them?
Pub Date-10 Nov 78
Note-17p.; Paper presented at the National Middle School Conference (Pittsburgh, Pennsylvania, November 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Curriculum, Elementary Secondary Education, Instructional Programs, *Middle Schools, Program Descriptions, Program Effectiveness

Before discussing the problems confronting middle schools, the author examines some characteristics of effective middle schools. Successful middle schools possess certain common elements in the areas of climate or learning atmosphere, instruction balance, teaching strategies, emphasis on achievement, guidance orientation, organization, teachers, and community relations. Challenges include meeting the uniqueness of learner characteristics and devising a program to meet these characteristics, attaining achievement levels signficantly higher than previous methods of organization, expanding the cadre of committed and dedicated teachers and principals, developing an appropriate system of evaluation to assess the effectiveness of the program, and developing effective programs of communication with the community. Descriptors-Depleted Resources, *Efficiency, *Energy Conservation, *Facility Guidelines, *Facility Requirements, Heat Recovery, Illumination Levels, Recycling, *School Improvement, *School Planning, Solar Radiation, Storage, Underground Facilities

This paper was presented during the time the author was president of the Council of Educational Facility Planners, International, (CEFP/I). The presentation begins with a summary of the state of the world's natural gas and petroleum supplies and states that since one-third of all energy consumed in the United States is to heat and cool buildings, schools offer a huge opportunity to conserve vast amounts of energy. The energy policy of CEFP/I is presented and used as the basis for a discussion of the commitment to human as well as finacial considerations in accepting or rejecting an energy conservation matter. The main thrust of the paper is that there is much that can be done today in a building design to dramatically reduce energy use as well as alter how and what energy supply is used. The author discusses 20 specific energy conservation items that can be applied today and describes how his architectural firm uses these considerations in the educational facility planning process. Educational Administration: The Search for the Canons of Expertise and Authority.

Southern Illinois Univ., Carbondale.

Spons Agency-Southern Illinois Univ. Foundation, Carbondale.

Pub Date-77

Note-38p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Administrative Principles, *Educational Administration, Educational History, Elementary Secondary Education, School Superintendents

At the turn of the century, there was no canon of expertise in administrative practice because laymen operated most of the schools, and there was no canon of authority in professional educational administration because there was no identifiable body of knowledge unique to administration of schools. As the administrative progressives began to see the emergence of a new vocation they turned to the following as sources of the canon of expertise and authority: the adoption and adaptation of business management science, the corporate model, and the new science of the educational intelligence and achievement testers; the development of specialized graduate school programs and degrees to identify standards of scholarship and practice; the institution of administrative certification through state departments to safeguard against the unknowledgeable and the untrained; symbiotic graduate school professor-student job placement networks, assuring the anointed the best available positions; the development of professional administrator associations to represent collective interests at state and national levels; and the keeping of voluminous educational records both to protect against the incompetence of subordinates and to demonstrate the effectiveness of the school program. Descriptors-Elementary Secondary Education, *State Aid, State Departments of Education, State Programs, *State School District Relationship

Identifiers-California, *Categorical Aid

This document contains discussion topics for a meeting with the California superintendent of instruction. The headings for the areas of concern are Positive Aspects of State Categorical Programs,'' Concerns with Assimilating Local, State, and Federal Programs,'' and General Administrative Concerns.'' Most attention is given to concerns under the assimilation heading, which covers program concepts and general ideas, regulation, parent involvement and site councils, business management, board-state department relations, and liaison with the state department of education. Recommendations for improvement are offered. (Author/IRT)

Descriptors-Board Administrator Relationship, *Board of Education Role, Collective Bargaining, Educational Planning, Elementary Secondary Education, Evaluation, Management, Organization, Personnel Evaluation, Public School Systems, Questionnaires, Team Administration

The authors define management as the process of making an organization purposeful and effective; it involves selecting, appraising, and developing people and linking them in their jobs in a way that enables an organization to achieve desired results.'' The authors divide their discussion into three parts. The first, Management in Education,'' looks at the current state of the art, the potential benefits of sound management, and what school boards can do to encourage development of a true management process for their districts. The second, Elements of Management,'' offers both basic principles and specific examples of what makes for good management. Chapters in this section cover getting organized to manage, building a management team, planning, information for decision-making, performance appraisal, the selection and development of teachers, paying for performance, and public and employee relations. The third, School Boards on the Job,'' examines some practical realities that make schools different from other organizations, the nature of school boards, and the role of the superintendent. Johnson, Richard T. Carlton, Patrick W.

Virginia School Board Members and Collective Bargaining: An Assessment of Attitudes.

Virginia Polytechnic Inst. and State Univ., Blacksburg.
Pub Date-78
Note-36p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Attitudes, *Boards of Education, *Collective Bargaining, Educational Research, Elementary Secondary Education, Grievance Procedures, Questionnaires, State Surveys, Tables (Data), Teacher Attitudes, Teacher Militancy
Identifiers-Virginia

Out of 832 Virginia school board members contacted, 460 responded to a questionnaire concerning their attitudes toward collective negotiations and militant teacher activities. The similarities between respondents and the general population were sufficient to support claims of generalizability. Analysis of variance revealed that school board members in Virginia are strongly opposed to teacher collective bargaining. They believe that the current situation is satisfactory for educational personnel and that management is adequate. Most respondents feel that collective bargaining has a negative effect on the balance of power in education and is eroding local control of educational policy and practice. Board members apparently have a low opinion of teacher leaders, believing they are motivated chiefly by self-interest. A majority of board members are contented with the state-mandated grievance procedures. They overwhelmingly perceived all types of teacher militancy as inappropriate. When this survey was compared with a similar survey of Virginia teachers, it was clear that board members' views on personnel relations are quite different from those of teachers. (Author/JM)

EDRS Price MF-$0.83 HC-$7.35 Plus Postage.
Descriptors-*Educational Finance, Elementary Secondary Education, Employee Responsibility, Employer Employee Relationship, Private Schools, Public Schools, *Racial Discrimination, School Organization, *Sex Discrimination, *State Church Separation, Student Responsibility, *Student Rights, *Supreme Court Litigation

This digest is a reference tool documenting 144 of the most important Supreme Court cases affecting education from 1859 to 1977, with emphasis on the decisions made during the past 25 years. Each case is written up in a three-part format that provides the facts and background of the case. The cases are organized into five sections: school district finance and organization; church-state relationships; student rights and responsibilities; employee rights and responsibilities; and race, language, and sex discrimination. Most cases listed affect students and staff in kindergarten through grade 12, but a few cases in higher education and juvenile law are listed. A glossary of legal terms is included. (Author/JM)

Excess Classroom Space A Case for Better Planning. District of Columbia Public Schools.

General Accounting Office, Washington, D.C.
Pub Date-30 Sep 77
Note-52p.; Best copy available
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Board of Education Policy, Capital Outlay (for Fixed Assets), Classrooms, *Declining Enrollment, Elementary Education, Enrollment Projections, Enrollment Trends, *Facility Case Studies, *Facility Requirements, Management Systems, School Improvement, *School Planning, *Space Utilization
Identifiers-*District of Columbia

This report identifies problems in planning for school construction by the District of Columbia Public Schools (DCPS) and discusses how the Board of Education can better administer its building modernization and renovation program. The aim of the study was to find out if DCPS' capital improvement planning system was providing essential data to the Board of Education to enable it to effectively plan for designing, constructing, or modernizing school buildings; and if the elementary school construction projects proposed or in progress were still warranted, especially since DCPS has been experiencing a steady decline in its elementary school enrollment. DCPS' capital improvement planning and monitoring processes were reviewed, including its policies for constructing new facilities and replacing or modernizing existing school buildings. The need for capital improvement projects in progress or proposed for funding during fiscal years 1976 through 1981 were examined. The report, after analyzing spaces available in nearby schools, advised that the Board of Education could save about $7.7 million of capital improvement funds by canceling its plans to build a replacement school and could improve the administration of the capital improvement program through better planning for the design, construction, or modernization of school buildings. Descriptors-*Bond Issues, Elections, Elementary Secondary Education, Graphs, Interest, National Surveys, Statistical Data, Tables (Data)

Identifiers-*Bond Sales

This report provides data on 1976 bond elections and bond sales for financing public elementary and secondary school facilities and equipment. The annual report is intended for educators, school boards, legislators, and educational researchers who require up-to-date knowledge of school bond sales for planning future school bond programs. Data, summarized by state, are presented in tables and charts containing information on the number and dollar value of bond issues voted on and passed and the number, dollar value, and net interest of bonds sold. The study revealed several general findings about bond sales nationally. Bond elections reached new lows in fiscal year 1976; only 770 issues were voted on and only 391 were approved. The dollar value ($970) of bond issues approved was the lowest recorded since the study began in 1958. Bond sales for fiscal year 1976 increased slightly over fiscal year 1975. The average net interest cost for fiscal year 1976 was 6.25 percent, down slightly from the previous year. The monthly average net interest cost reached a new high of 7.1 percent for September 1975. Descriptors-Computer Programs, *Employment Projections, Employment Trends, *Labor Turnover, Needs Assessment, *Personnel Needs, Planning
Identifiers-GS810 Program, HIREST Program, Log Probability Curve, LOGPRO Program, LPFILE Program, LPTEST Program, Retention Curves, Staffing Needs Planning

Staffing needs planning, as distinct from workforce planning, is the systematic estimation of the actions personnel managers must take to provide the required workforce in an organization. This handbook focuses on the pivotal aspects of staffing needs planning, including estimation of future vacancies and analysis and projection of employee turnover. The first section of the book briefly introduces staffing needs planning and the policy issues related to it. The second section explains details of manual methods of projecting turnover losses, including the nature of the retention curve and fitting and using the log-probability curve. Section 3 presents computer methods for analyzing turnover, advancement, and hiring needs, including LOGPRO, LPFILE, LPTEST, GS810, and HIREST. The handbook is designed for use by those with limited statistical training as well as by those who are technically proficient. The computer programs are intended to be general in application, complete, compact, simple, and fully documented. Appendices provide detailed documentation on the manual methods and the computer programs, including full computer program listings, operation manuals, and technical analysis. (Author/JM)

The Politics of Enrollment Decline.

Pub Date-2 Dec 78

Note-9p.; Paper presented at the Annual Meeting of the New Jersey School Board Association (Hightstown, New Jersey, December 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Administrator Role, Board of Education Role, Budgets, *Declining Enrollment, Educational Administration, Elementary Secondary Education, Financial Problems, *Politics, School Closing, State Aid

Identifiers-New Jersey

New Jersey's removal of $22 million from its 1979-80 state school aid payments requires that school administrators immediately establish priorities and explore options for dealing with enrollment decline. From 1969 to 1978 New Jersey K-6 enrollment has dropped 19.4 percent. The time for selecting reasonable approaches to declining enrollment is running out. Board members and administrators can either retain all schools, facilities, and programs in spite of great costs or cut programs, staff, and schools. Since the former alternative is unrealistic, the best place to start may be to urge citizens, teachers, students, and administrators to identify criteria to use for closing programs and schools. It is difficult to deal with enrollment decline because sometimes the best solutions are not the most politically expedient. Board members must make decisions destined to make them unpopular. Districts need to develop procedures for dealing with enrollment decline in as technical a fashion as possible. Today's need is for administrators able to plan for and manage declining enrollment problems, particularly declining budgets, new curriculum needs, job attrition, and school closure. Although there are no easy answers to the problem of declining enrollment, this period is an opportune time for leaders with commitment and a sense of history. (Author/JM)

Buchovecky, John G.
Development and Implementation of a Bus Driver Training Program.
Pub Date-25 Jul 78
Note-44p.; Introductory Practicum, Nova University
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Driver Education, *Educational Programs, Elementary Secondary Education, Equipment Maintenance, *First Aid, Practicums, Safety Education, *School Buses, *Student Transportation

A bus driver training program was developed and implemented in a rural school district in an effort to improve the driving skills of the bus drivers. The program was tailored to meet the needs of the bus drivers and utilized various community agencies for demonstration and teaching purposes. The subject areas included in the program were driver role and responsibility, pupil relations management and discipline, preventive maintenance, driving fundamentals, defensive driving, accident prevention and emergencies, first aid, vehicle familiarization, and current vehicle code. The practicum was originally scheduled as a 20-hour training program, but, at the request of the drivers, was expanded to 30 hours to include Red Cross first aid certification. Significant improvements were made in reducing the number of bus accidents and discipline referrals and in lowering preventive maintenance costs. The drivers evaluated the training program as worthwhile and beneficial to them in their work. (Author/MLF)

Concepts in Building Firesafety.

Pub Date-78
Note-269p.
Available from-John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016 ($22.00)

Document Not Available from EDRS.

Descriptors-Alarm Systems, Architectural Education, Architectural Elements, *Building Design, Building Materials, Design Needs, *Facility Guidelines, *Fire Protection, *Fire Science Education, Illustrations, *Safety, Site Analysis, Site Development, Thermal Environment, Ventilation

The goal of this book is to present in a graphical format the principles of design for building firesafety. The book's more than 270 illustrations represent the core of its coverage of factors affecting fire ignition and spread in buildings, building site planning for fire suppression and occupant rescue operations, protection by building materials and constructions, fire detection and suppression systems for buildings, smoke and heat venting techniques, escape and refuge principles for occupant protection, and finally the special case of firesafety for tall buildings. The contents are intended to help students of building design and fire science to understand the theoretical bases of building codes and standards, and to develop the fundamental knowledge needed to achieve firesafety in the built environment. In addition, the illustrations should facilitate understanding of building firesafety concepts by architects, builders, interior designers, and urban planners. An introduction to the concept of systems analysis applied to design for building firesafety is included and in the appendices are an extensive metric system conversion table for common building firesafety units and selected listings of firesafety references and standards of particular interest to the building profession. (Author/MLF)

Copiers and Duplicators for Audio Tape Cassettes: Criteria for Selection, Laboratory Test Findings, Manufacturers' Data Reports. EPIE Report: Number 84e.

Educational Products Information Exchange Inst., New York, N.Y.
Pub Date-78
Note-87p.
Available from-EPIE Institute, 475 Riverside Drive, New York, New York 10027 ($20.00; quantity discounts)
Document Not Available from EDRS.
Descriptors-*Audio Equipment, *Audiotape Recordings, *Dubbing, Educational Equipment, Elementary Secondary Education, Equipment Maintenance, Laboratory Techniques, *Merchandise Information, Performance Criteria, *Performance Specifications

Because needs for cassette duplication equipment differ, the user must match his requirements to the capabilities of manufactured products, and the essential product characteristics. To help educators in choosing cassette duplicators, EPIE has gathered data from manufacturers and tested 11 units. The first section of the report explains the difference between a duplicator and a copier, discusses equipment characteristics, and care and maintenance requirements for the equipment. For each machine tested the report contains external and internal photographs, description of the unit, operational and performance notes, and service and alignment considerations. Test results include measures of frequency response, signal/noise ratio, distortion, wow and flutter, maximum machine noise, rewind time, record time, track placement within specifications, and electric shock hazard. The tabulation of data supplied by manufacturers in response to a questionnaire is presented in a matrix to provide a comparison among the claims made by the different manufacturers. (MLF)

Butler, Loretta
Staff Development New Priorities for a New Era.
Pub Date-28 Mar 78
Note-12p.; Paper presented at the National Catholic Education Association's Annual Convention and Religious Education Conference (75th, St. Louis, Missouri, March 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Catholic Schools, Educational Research, Elementary Secondary Education, Ethical Instruction, *Inservice Teacher Education, Learning Theories, Reading Instruction, Special Education, *Staff Improvement, Teacher Centers
Identifiers-Education For All Handicapped Children, Higher Education Act Title IV B, Teacher Center Legislation

Staff development programs can help Catholic educators deal with critical problems now facing them. Parochial school teachers must become better able to prepare students to address difficult issues like dwindling resources or eroding morals. They must be given a knowledge of current theories of teaching and learning such as those of Piaget or Erickson. They need to learn about research findings concerning classroom management, reward systems, and conflict resolution. Training programs are needed on reading instruction and special education. Staff development programs addressing these and other contemporary issues must be regarded as an integral part of the educational process. The provisions concerning teacher centers in Title IV-B of the Higher Education Act may make it easier for parochial school teachers to have access to inservice education. The teacher centers provided by these acts must meet the needs of both public and nonpublic school teachers, and representatives of nonpublic schools must be included on their advisory boards. Inservice education centers must be in a place accessible to teachers. An area specialist responsible to the central school office might design programs for a given area. Finally, salary incentives for participating in inservice programs must be provided to teachers. (Author/JM)

School Staffing Ratios, 1977-78. ERS Report.
Educational Research Service, Arlington, Va.
Pub Date-78
Note-118p.; For related documents, see ED 149 459-461
Available from-Educational Research Service, Inc., 1800 North Kent Street, Arlington, Virginia 22209 ($12.50)
Document Not Available from EDRS.
Descriptors-Administrative Personnel, Educational Research, Elementary Secondary Education, Expenditure Per Student, National Surveys, Professional Personnel, Questionnaires, *Student Teacher Ratio, Tables (Data)
Identifiers-*Staffing Ratios, *Student Adult Ratios

The purpose of this report is to provide school administrators, school board members, and others with accurate, timely, and reliable data useful in comparing staffing ratios in school systems of similar enrollment size and expenditure level. Included in the report are 1977-78 pupil-staff and teacher-staff ratios. These data are presented separately for large, medium, small, and very small school systems and for five levels of current expenditure per pupil. The report also contains a tabular listing of specific staffing data and per pupil expenditure supplied by each reporting school system, with school systems listed alphabetically by state. Information listed was gathered from a questionnaire mailed to 1,918 school systems. Although no attempt was made to estimate national averages, a number of summary analyses were calculated. The mean number of pupils per teacher in reporting school systems was 20.3, ranging from 18.6 in very small school systems to 21.4 in medium school systems. For example, the mean number of pupils per total administrative staff member was 249.6, ranging from 224.1 in very small systems to 258.2 in large systems. (Author/JM)

Toward a Definition and Measurement of Equal Educational Opportunity. Final Report.

Connecticut Association for School Administration, Hartford.; Connecticut Univ., Storrs. School of Education.

Pub Date-78

Note-135p.; Final report of the Committee on School Finance and Equal Educational Opportunity

Available from-Thomas H. Jones, Dept. of Educational Administration, Box 0-32, Storrs, Connecticut 06268 ($3.50)

Document Not Available from EDRS.

Descriptors-Academic Achievement, Community Attitudes, Educational Attitudes, Educational Research, Educational Resources, Elementary Secondary Education, *Equal Education, Factor Analysis, School District Spending, Socioeconomic Status, Student Attitudes, Teacher Attitudes

Identifiers-Connecticut

Four questions were asked in this study: (1) Can educational opportunity be defined in terms of measurable alternatives? (2) Can the variables be grouped into separate meaningful factors? (3) What are the relationships among the factors? (4) Are the towns and school districts that are disadvantaged under one of the factors also disadvantaged under other factors? The first question was answered by examining educational literature to find that educational opportunity has been defined by school resources, socioeconomic status, attitudes toward education, and achievement. The remaining questions were answered by compiling data on 27 Connecticut towns. Data on school resources and socioeconomic status were gathered from the U.S. Census, the Connecticut State Department of Education, and the Connecticut Education Association. Attitude and achievement data were gathered through instruments developed by the researchers. In answer to the second question, factor analysis revealed that within each interpretation of educational opportunity there are factors that are statistically significant, interpretable, and educationally meaningful. Measured relationships among the definitions of equal educational opportunity, as examined by question three, are highly variable. Finally, although towns can be ranked by relative standing on each of the four definitions, rankings vary according to definition used. (Author/JM)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Collective Bargaining, *Continuous Learning, Educational Legislation, Elementary Secondary Education, Foreign Countries, Postsecondary Education, *Teachers
Identifiers-Act Respecting Collective Bargaining (Ontario), Labour Relations Act (Ontario), Ontario, Teachers Negotiations Act (Ontario)

Laws regarding Ontario teachers' collective bargaining have implications for continuing education. Continuing education'' here means a system of education that serves everyone irrespective of age and to which access at any time is a right. Teacher collective bargaining laws are important in a system of continuing education because these laws mandate who teachers will be and how they will be employed. In Ontario, the Teachers' Negotiations Act'' controls collective bargaining for teaching staff in tax-financed schools. An Act Respecting Collective Bargaining for Colleges of Applied Arts and Technology'' controls labor relations in community colleges, and The Labour Relations Act'' governs academic staff negotiations in universities. The concern here is with the implications of all three acts for the operation and growth of an educational system that provides access to learning resources for all members of society. The principal issues arising from all three acts are the impact of adversarial forms on previously collegial systems; the possible need for the inclusion of all immediately interested parties in negotiations; the tension between students' freedom to choose courses offered and teacher job security; and the application of precise job descriptions and workloads in an area like education where such things were previously undefined and flexible. Identifiers-Canada

Fourth in a series of publications addressing the legal implications of continuing education in Canada, this paper deals with school liability in accident cases and how that liability might change with an increase in adult students. Canadian school accident liability cases have traditionally evolved around the ``careful parent'' doctrine in which the teacher and school board are expected to take the same care to prevent accidents as would a careful parent. More relevant to a system of continuing education might be the doctrine of ``occupier's liability'' that demands that the teacher and school board should not be guilty of negligence in guarding against unusual danger. Also relevant, although not widely used, may be the new concept of ``individual supervision'' that holds that a supervisor ought to be even more knowledgeable than a careful parent about the possible dangers inherent in certain activities like gymnastics or the use of power tools. Both types of school liability cases, those involving organized school activities or unorganized activities, depend heavily on seven factors: age of the student, nature of the activity, amount of instruction the student received, the student's awareness, approved general practice, foreseeable risk of danger, and previous accidents in similar circumstances. (Author/JM)

Research Opportunities in Private Schools.
Pub Date-Dec 77
Note-22p.; Paper presented at the National Conference on Private Educational Research (Washington, D.C., December 1-2, 1977)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Comparative Analysis, Data Bases, Educational Philosophy, *Educational Research, Education Vouchers, Elementary Secondary Education, Foreign Countries, Minority Groups, Nonpublic School Aid, *Private Schools, Public Schools, *Research Opportunities, *Research Problems, School Law, School Organization, Urban Education
Identifiers-Canada

Private education as an area of study offers many opportunities to educational researchers. Four types of research that would include private education are discussed and examples of research possibilities under each type are offered. The first type involves fundamental educational processes. Suggested are studies of the effects of various levels of funding in schools and comparing school systems maintaining complex administrative bureaucracies with those that do not. Opportunities exist in Western Canada for comparing publicly supported Catholic schools with privately supported Catholic schools. The second type of research is that aimed at understanding private schools. Studies could concentrate on the social networks developed at private schools and their long-term functions. Another topic would be a comprehensive analysis of the legal problems of private schools, with emphasis on the special legal principles that apply to them. The third type of research would encourage more scholars to do research on private education. A carefully done analysis of major differences between public and private schools would be a starting point for many studies. The fourth type involves analyzing broad social issues. An examination of the roots of legal compulsion in education is suggested. (Author/MLF)

Nediger, W. G.
A Model of a Dynamics of Bargaining.
Pub Date-Jun 78
Note-30p.; Paper presented at the Canadian School Trustees' Association Congress on Education (1st, Toronto, Ontario, June 17-21, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Collective Bargaining, *Conflict Resolution, Graphs, *Mathematical Models, Negotiation Impasses, Organizational Theories, Tables (Data)

This mathematical model is intended to be a tool for the monitoring of the bargaining process and to provide the ability to predict the form of bargaining outcomes given certain initial conditions. It applies to situations in organizations in which the conflict between the expressed desires of interest groups are settled by a bargaining process that is usually free but is at times subject to a higher authority. Central to the model is a temporal description of the paths leading to agreement. Also central is a characterization of the process by which bargaining units reach a final solution. The resulting model is intended to shed some light on the succession of changes in the weights that are placed by the bargaining parties on their respective goals. It deals with the dynamics of bargaining regardless of whether that bargaining is distributive, integrative, or intraorganizational. An example and analysis illustrate the functioning of the model. McCready, William C.
Research on Private Education: Suggestions, Priorities and Obstacles.
Pub Date-1 Dec 77
Note-22p.; Paper presented at the First Meeting of the Washington Research Conference on Private Education (Washington, D.C., December 1977); Best copy available
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Bureaucracy, Classroom Environment, Educational Alternatives, *Educational Research, Elementary Secondary Education, Ethnicity, Minority Groups, Neighborhood Improvement, Parent Participation, Parochial Schools, *Policy Formation, *Private Schools, *Research Opportunities, *Research Problems, School District Autonomy, Social Integration, Social Planning

This paper is a preliminary discussion of a line of social inquiry stimulated by interest in both the continuing pluralistic nature of society and the continued support for alternative educational systems among various segments of the society. In a society where public education is increasingly becoming a monopoly, the question of free choice and the motive behind the free choices seem to be a ripe field for research and social investigation. Ten research topics are suggested that are aimed at furthering knowledge about private education and the contributions that it may be able to make to policy formulation in the educational and social sphere. Topics are the analysis of nonpublic, or private schools, in terms of (1) their use by inner-city Blacks and Hispanics, (2) parental involvement, (3) local control, (4) as alternative education, (5) social integration, (6) their influence on white people moving out of racially integrating neighborhoods, (7) neighborhood viability, (8) productivity and achievement, (9) classroom environment, and (10) bureaucratic structure. Identifiers-*Belgium

In most of the Western European countries, innovations in the primary schools are introduced by a central authority. After a decision is made to adopt a new curriculum or recommend a particular instructional procedure, inspectors introduce it to the teachers. This research report examines on the one hand the extent to which inspectors and teachers consider the innovations as desirable and realizable and on the other hand how these two groups motivate their personal views on the matter. The desired result was to learn which objectives are considered important by these groups and what importance they attach to different constraints. Respondents to a questionnaire were asked to choose and rank from a list of 12 motives and 18 constraints related to innovations in the primary school. The findings indicate that inspectors pay less attention to all the possible constraints than is required by their task, which consists of motivating the teachers for the innovation. Also, when inspectors point out constraints, the constraints are of a different kind from those considered important by the teachers. In a political-administrative innovation strategy, the authors conclude, inspectors must pay more attention to the adoption and the dissemination of the innovation and less to its implementation. The selection of the subjects taught at present in the primary schools and the way they are taught is not accidental. The subjects taught are determined by a network of interactions and communications between the school and other persons and institutions. Using the results of a teacher questionnaire, this report examines operational curricula and tries to determine by whom and what this daily practice is influenced. Purpose of the study was to make it easier to plan for future innovations in curricula. Factors that determine a teacher's behavior in the classroom and at school were listed as the persons, institutions, and sources the teacher interacts with and that he or she perceives as influencing concrete actions in the classroom. Constraints were defined as a datum (for example, too big a number of pupils in the class), a physical datum (too little room to make experiments on science), or an action of a person (a negative intervention by the inspector), and so on. Results show the teachers feel that certain decisions they make or wish to make are restrained by the way they are helped in their daily practice and the way the innovation policy is realized, and by factors that they themselves are daily and directly confronted with in their classroom. The major objective of this book was to outline, within the context of school and society, the emergence and evolution of certain critical economic, intellectual, political, and social dimensions of modernity and to demonstrate that in mature modernity each of these has reached a point of crisis. The book emphasizes the historicity of the modern age in the United States and Northwestern Europe and the point of concentration is on modern variables. Chapter 2 concentrates mainly on purposes of mass education as required by the nation state and Chapter 3 discusses the changing purposes of the higher learnings. Chapter 4 focuses attention on the delivery system the technology that has been established to achieve these ends. Chapter 5 explores the characteristics of modern school structures. The framework of presentation in these chapters is as follows. One or more critical modernization concepts are elaborated within a specific discipline context at the beginning of each chapter. Out of the outline emerges a discussion of one or more critical components of modern education that in turn is contrasted with its traditional counterpart. Following each of these discussions, the forces of protest or breakdown at play in the mature modern world are considered. The closing chapter dialectically postulates general trends in education that can be anticipated in the postmodern era. (Author/MLF)

Document Not Available from EDRS.
Descriptors-Behavioral Objectives, *Course Organization, *Curriculum Development, Elementary Secondary Education, Instructional Materials, Lesson Plans, *Program Planning, *Systems Analysis, Teacher Developed Materials, Textbooks, Vocational Education, Vocational Education Teachers

The preparation of appropriate and relevant instructional materials is essential to effective instruction. Instructional materials, usually in the form of a comprehensive course of study or training plan, should be based on a carefully planned, organized, and conducted analysis procedure. This analysis procedure may be used for the identification and selection of learning tasks in any subject matter area and for any level of instruction. To ensure that the analysis is carried out efficiently and that an appropriate course of study or training plan will result, this report suggests using a systematic approach. A systematic approach, including feedback provisions and a set of sequential components, will result in a usuable set of instructional materials when completed. This book is divided into three parts: preparation and description, identification and selection, and development and application of instructional materials. The three parts are presented in such a way that a student can move from a position of having very little knowledge about analysis and instructional material development to the completion of a comprehensive course of study or training plan designed for a specific instructional setting. This directory lists studies completed by graduate students and by staff in university faculties of education, provincial departments of education, boards of education, education associations, and other education institutions. The details in each entry were supplied by the contributors. Of the 761 studies included, 727 are in English while 34 are in French. There are 188 published and 573 unpublished studies. In the latter category are a great many theses submitted to Canadian universities. Entries are listed under subject headings. A French index gives the corresponding English terms used in the subject headings. An author index is at the back of the publication. (Author/MLF)

Problems involved in implementing curriculum changes in Asian countries is the subject of this report, presented in the form of a symposium. The Technical Working Group of the Asian Centre of Educational Innovation for Development (ACEID) met in September, 1976, to study the experiences of the following countries: India, Indonesia, Republic of Korea, Malaysia, Philippines, Singapore, Sri Lanka, and Thailand. The symposium includes summaries of case studies of curriculum development in each of the countries concerned. While many countries share the same process of implementing change, they are conscious of the need to improve their implementation strategies. One method that is discussed is the formation of networks of innovative projects within and between countries. (Author/LD)

Identifiers-*Curriculum Development Center of Malaysia, Malaysia

The Curriculum Development Centre (CDC) of Malaysia became an operating agency in January 1973 and became a division of the Malaysia Ministry of Education in May 1974. Its establishment was the culmination of over a decade of curriculum development efforts by the Ministry of Education. The CDC was an outgrowth of both the First and Second Malaysia Plans. The CDC is responsible for bringing Malaysian curricula up-to-date and ensuring that these curricula meet the changing needs of the Malayasian society. The major types of activities undertaken by the CDC include research, evaluation, development, testing, training, and extension services related to curriculum programs. Projects of the CDC include the special project for the improvement of science and mathematics teaching in the primary schools (Projek Khas); the secondary school science and mathematics project; the language unit and projects; the population education project; the social science studies project; the compensatory education project; the Pahang Tenggara Project: the prototype research and quality control unit; the evaluation unit; and the resource centre. The hisotry of two CDC projects, Projek Khas and the Lower Primary School component of the Compensatory Education Project, illustrate the activities and emphases typical of the pre- and post-1973 periods in the curriculum reform movement. Descriptors-*Administrator Role, Behavioral Science Research, *Educational Research, Elementary Secondary Education, *Management, *Occupational Information, *School Superintendents, Teacher Administrator Relationship, Work Attitudes, Work Environment, Working Hours

The study reported is a replication of Henry Mintzberg's study of five executives at work to determine the scope of their job-related activities. For this study superintendents in three suburbs contiguous to a large midwestern city were observed at work for one week, including evening meetings when they were scheduled. An attempt was made to record completely and objectively everything that occurred. The prominent propositions arising from Mintzberg's investigations were (1) managers work at an unrelenting pace; (2) managerial activities are characterized by brevity, variety, and fragmentation; (3) managers gravitate toward the more active elements of their work; (4) managers demonstrate a strong attraction to verbal media; and (5) managers maintain communication relationships with three groups superiors, outsiders, and subordinates. These propositions are discussed within the framework of the structure of superintendents' everyday activities, the characteristics of their work, and their network of contacts. The findings suggest that the structure and content of the superintendents' everyday activities are very similar to the activities of other chief executives in public and private organizations. Descriptors-Changing Attitudes, Citizen Role, Graduation Requirements, *Performance Based Education, Program Descriptions, Social Change
Identifiers-Oregon

Activity and interest in competency-based education are growing. As of March 1978, some type of competency-based education requirement had been instituted in 34 states. Many recent changes in American society are affecting competency-based education. For example, today's learners are likely to be lifelong learners, but their learning may be intermittent. Jobs are changing from low-skill manual labor jobs to high-skill technical positions. Needs and roles of the citizen, the consumer, and the family member are changing. Traditional high school graduation requirements are becoming obsolete. The five major characteristics of competency-based education are that it is a learner-centered philosophy, it is a policy demand, it is real-life oriented, it is flexible, and its standards are clearly articulated. Contrary to the opinion of critics, competency-based education is not really new or revolutionary, is not an emphasis on only the measurable, and does not underestimate the complexity of individuals and of social systems. Oregon was the first state to institute competency-based education and in spite of some implementation problems, the program is beginning to be successful. Competency-based education is certainly not all of education but it is the foundation on which all other schooling must be built. (Author/JM)

Descriptors-*Administrator Responsibility, Birth Rate, Community Attitudes, *Declining Enrollment, Elementary Secondary Education, Enrollment Influences, Population Trends, Reduction in Force, School Closing, Urban to Suburban Migration

Twenty years after the baby boom, U.S. population is falling and school enrollment is declining. Contrary to public expectations, smaller enrollment does not mean smaller school budgets, and balancing the educational budget will require cutting programs, closing schools, and reducing teacher force. The experience of the East Meadow (New York) school district, whose residents refused both to close underfilled schools and to approve the budget needed to operate the schools, illustrates the fact that education is no longer a high national priority. Enrollment decline is creating the need for every district to develop a reduction in force policy. Eliminating programs and closing schools will require careful setting of criteria. New creative ways for dealing with enrollment decline, such as space sharing, regrouping students, early teacher retirement plans, and teacher leaves of absence, while not able to radically change the course of events, might modify their impact. The gravest danger for administrators in dealing with declining enrollment is applying a short-term solution in lieu of long-range planning. It is necessary to have a master plan that incorporates opportunities for community, faculty, and administrator input. Although there are no ways to make education again a high national priority, this report offers suggestions for preparing for and modifying the impact of its decline. (Author/JM)

Descriptors-Comparative Analysis, *Cost Effectiveness, Educational Equipment, Educational Facilities, *Educational Resources, Expenditure Per Student, Instructional Materials, *Program Costs, Program Evaluation, School District Spending, Teacher Salaries

Comparing or estimating the costs of educational projects by merely using cost-per-student figures is imprecise and ignores area differences in prices. The resource approach to cost analysis begins by determining specific physical resources (such as facilities, staff, equipment, materials, and services) needed for a project. Then the cost of these resource requirements is estimated and totaled. This approach is useful for practitioners in determining the cost of implementing a project in their districts and for those desiring to compare cost information across projects and across districts. The resource approach generates two types of cost estimates the ``project comparable cost'' (PCC) and the ``district specific cost'' (DSC). To calculate the PCC, the same standard prices are used to calculate the costs of similar resources in all districts. To calculate the DSC, practitioners use the prices for resources in their own districts. The PCC is used in comparing the costs of projects in different areas while the DSC is used to compare or estimate the costs of projects within a district. An illustrative example of project cost estimation is provided. (Author/JM)

Descriptors-Academic Achievement, Dropout Rate, Dropouts, Educational Research, Elementary Secondary Education, Foreign Countries, Student Attitudes, *Student Reaction, Teacher Attitudes, *Teacher Strikes
Identifiers-*Ontario, Ontario (Toronto)

Summarizing three research projects, this report evaluates effects on students of secondary teachers' strikes in Ontario. The most important of the strikes examined is the stormy Metropolitan Toronto strike that stretched from November 12, 1975 to January 19, 1976. The studies were limited by the fact that they were begun after the strike was over and by lack of cooperation from teachers. The first study found no effect of strikes on student grades. The second study covered student attitudes toward teachers and the strike and found that of the substantial minority who reported the strike affected ability and motivation, most reported a negative effect. The third study reviewed data on dropouts from grades 9-13, interviewed dropouts, and concluded that strikes have impact on dropping out and on transitions to postsecondary education. Overall, the three studies suggest that strikes are most likely to have a negative effect on the academic learning of students in senior grades and in particular on learning in subjects like math and science where learning is cumulative. Although the studies did not focus on the effects of the strikes on teachers, informal contacts with teachers suggested that teachers after the strike were less idealistic about viewing teaching as a calling rather than a job. EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Educational Research, Elementary Secondary Education, *Enrollment Projections, Enrollment Trends, Statistical Data, Student Teacher Ratio, Teacher Employment, *Teacher Supply and Demand

Projections of U.S. public elementary and secondary school enrollments and teacher supply and demand for 1978-86 are summarized in this report. Where possible, the grade retention method is used; otherwise projections are based on three alternate fertility rate estimates. Enrollments in elementary schools have decreased since 1970 to 47.8 million in 1978 and are expected to decrease further to 44.5 million by 1983 and 1984. Starting in 1985, enrollments are expected to increase gradually. The most likely K-8 enrollment projection indicates that K-8 enrollment will decrease to a low of 29.9 million in 1985. Enrollment in grades 9-12 is expected to decrease to 13.2 million in 1986. If an intermediate estimate of pupil/teacher ratio is correct, the number of unemployed teachers should decrease slightly from 2.4 million in 1978 to 2.3 million in the early 1980s before climbing back to 2.4 million in 1985. Decreases in elementary enrollment have not always resulted in corresponding decreases in need for elementary school teachers because of decreases in pupil/teacher ratios. Enrollment decreases in secondary schools, however, are likely to be accompanied by significant decreases in teachers employed. There should be more than enough teacher graduates in the reserve pool to ensure a teacher surplus through 1986. (Author/JM)

Descriptors-Court Litigation, Elementary Secondary Education, *Federal Legislation, *State Legislation, Tables (Data), *Teacher Evaluation

Legislation concerning teacher evaluation has been limited to date, and surprisingly little litigation has reached the courts. Although there are federal overlays and local interplay, the law of teacher evaluation is largely a state matter. This legal report gives an overview of the federal and state laws, discusses what the statutes say, and summarizes case law concerning teacher evaluation. A special central section offers a tabular summary of state statutes and administrative regulations. The tabular categories indicate where evaluation procedures are formed, who is responsible for conducting evaluations, which categories of teachers are evaluated, when the evaluations are to take place, what is the scope of the evaluations, and how evaluations are to be conducted. Identifiers-*New Jersey

In 1973 the New Jersey Supreme Court ordered the legislature to define in operational terms the legislature's constitutional obligation to provide ``a thorough and efficient system of free public schools for the instruction of all children in the state between the ages of five and eighteen years.'' It also ordered the legislature to develop a new funding system to ensure that each district would be enabled to meet the requirements of the system defined by the new legislation. Shortly after the Supreme Court had rendered its 1973 decision, the state of New Jersey initiated efforts to deal with the state's obligations to provide adequate school facilities for all children. One purpose of this paper is to describe the process and findings of the various studies that were conducted to determine the unmet school facility needs of the state. A new education law was passed by the legislature and accepted by the New Jersey Supreme Court in January, 1976. It contains a new state school aid formula, including a new method for providing state aid for facilities construction. Therefore, a second purpose of this report is to evaluate the extent to which the new systems of state aid have worked to reduce the facilities disparities noted by the courts. Finally, this paper examines how other states have met their school facility needs and recommends methods for New Jersey that can be more successful than the methods in current use. (Author/MLF)

Descriptors-Bibliographies, Educational Programs, Elementary Secondary Education, State Legislation, *State Standards, Tables (Data)

This book represents the first part of a larger, 7,400 page Compendium of State Legal Standards for the Provision of Public Education." The entire study summarizes and categorizes the education laws and regulations of the fifty states and the District of Columbia in four areas: powers, duties, and functions; programs, materials, and facilities; quality of educational process; and accomodation and governance of students. This overview is being printed separately partly to familiarize a wide audience with the potential uses of the compendium and partly due to the usefulness of the overview itself. This volume includes the organizational outline and introduction to the compendium, thus providing a concise overview of the entire work. In addition, it contains 23 charts comparing important elements of various educational laws and regulation. The final pages include bibliographic information and two multistate agreements dealing with educational standards and interstate cooperation. (Author/IRT)

Identifiers-*Hamblen Elementary School WA, *Significant Organizational Change Carried Out

After a discussion of the innovation adopted (diagnosis of student learning difficulties, individualized instruction, and differentiated staffing) and its success, the authors examine the reasons for the program's successful maintenance. The objectives of the study were to identify the factors the staff perceived as influential to the maintenance of the project and to determine the three factors that were among the most and the least influential for the continuation of the project. Information was gathered from a questionnaire developed specifically for the study. The three factors considered the most influential were that the principal was enthusiastic throughout the program; that the educational beliefs, values, and attitudes of the total staff were similar; and that the staff thoroughly understood how to use, evaluate, and continually improve the program. The three factors considered the least influential were that the other teachers in the district approved the project, that the innovation had been successfully field tested in other schools, and that the teachers had at least as much training as other teachers in the district. The most significant factor was judged the enthusiasm of the principal. (Author/IRT)

Descriptors-*Building Design, Data Analysis, *Data Collection, Elementary Education, Middle Schools, *School Design, *School Organization, Space Utilization, Teaching Methods

The development of new instructional organizations has placed demands on school facilities that cannot be met adequately with the procedures currently used for school design. Organizational methods, for example, that stress small-group and individual work in non-age-graded settings are not accommodated easily by either of the two common forms of school structures in the United States the closed-classroom, eggcrate design, or the large, open-pod design. To improve the design of school facilities, a recording technique has been developed for gathering information on educational activities. A floor plan of a school that shows all areas that are potentially useable for school activities is labeled and the major characteristics of the spaces including equipment are recorded. For each activity observed, the location, duration, and equipment used are recorded, along with the type of activity and certain characteristics of the students and instructor. These data are then analyzed to yield information on instructional patterns, space and facility requirements, and student circulation. (Author)

Descriptors-Educational Research, Elementary Secondary Education, Equalization Aid, *Finance Reform, *Financial Policy, School Systems, State Aid, Statistical Analysis, Statistical Data, Tables (Data)

Identifiers-Colorado, Minnesota

This study examines various factors that influence school district spending and spending from locally raised taxes in Colorado and Minnesota. The factors include the levels of state and federal aid; the nature of the state general aid formula; local fiscal characteristics including the average market value of residential housing, the percent of the property tax base that is residential, and average household income; and various social and demographic characteristics including district size in terms of number of pupils, pupil growth rate, and factors that may be associated with the costs of education inputs. The report is divided into four primary sections with more technical material on the statistical equations placed in an appendix. Section 1 introduces the major issues. Section 2 briefly describes the history of school finance reform efforts in the two states studied. Section 3 summarizes the results of the statistical analysis and suggests how the aid formulas and various fiscal and other variables may influence school districts. Section 4 discusses how the results of such studies may be used in designing new state aid formulas that take into account district average income levels and other factors in formulating more sophisticated school finance simulation models. Identifiers-Tax Limitation Efforts

The success of Proposition 13 in California gave impetus to similar tax limitation efforts in other states. Information included in this booklet is intended to help local, state, and federal education finance policy-makers wrestling with this issue. The first section summarizes efforts in each state to limit taxation and expenditure both by legislative action and citizen petition as of August 1978. Section two describes procedures in each state for approving bond issues for school capital expenditures. The third section presents state requirements for approving current operating budgets as well as procedures for maintaining or increasing property tax rates for current operating purposes. This section also includes a description of tax and expenditure controls that already exist in many state public school systems. An insert updates state activity on tax and expenditure limitation as of October 1978. (Author/JM)

Descriptors-Comparative Statistics, *Educational Finance, Expenditures, Financial Support, Income, Property Taxes, State Aid, *State Government, *State Programs, State Surveys, Welfare
Identifiers-Revenues, *State Finances

The tables in this report summarize each state's revenues and expenditures for 1977. Information presented for each state includes per capita amounts of financial items; relation of finances to personal income; revenue by source; expenditure by character and object and by type and function; intergovernmental expenditure by type of receiving government and by function; capital outlay; indebtedness and debt transactions; cash and security holdings by purpose and type of asset; finances of state liquor stores and alcoholic beverage monopolies; finances of state-administered public employee retirement systems, unemployment compensation systems, workmen's compensation systems, and insurance trust systems; and population and personal income. An introduction summarizes each type of state expenditure for the whole nation, and a glossary defines related terms. (JM)

Descriptors-*Administrator Guides, Check Lists, Cost Effectiveness, Decision Making, Driver Education, Efficiency, Elementary Secondary Education, *Energy Conservation, Equipment Maintenance, *Fuel Consumption, Public Relations, Reference Materials, Scheduling, *School Buses, School District Spending, *Student Transportation

This handbook offers a practical approach for pupil transportation energy management by suggesting ideas to save fuel in the purchasing, planning, routing, scheduling, driving, and maintenance areas of the pupil transportation operation. The handbook is divided into seven parts. Part 1 and 2 provide insight into energy management in pupil transportation. Part 3 discusses the driving environment variables that influence fuel economy and provides a framework for practical recommendations. Part 4 presents step-by-step guidelines for reducing fuel use in the school district. Actions that can be taken to increase fuel economy in each area of the pupil transportation operation are discussed in Part 5. Part 6 offers helpful suggestions to implement fuel economy management. This is followed by a listing of additional tips to save energy and a conclusion in Part 7. Sources that can be called on for further information and assistance and a bibliography are included in Part 8.

Descriptors-*Administrator Guides, Check Lists, Cost Effectiveness, Driver Education, Efficiency, Elementary Secondary Education, *Energy Conservation, *Fuel Consumption, *School Buses, School District Spending, *Student Transportation

This publication series of five booklets presents a summary of tips for saving energy in pupil transportation. The first booklet offers guidelines and suggestions to assist school transportation administration in achieving better fuel economy and cost management goals. The second presents purchasing tips and shows ways to use benefit cost analysis to provide a comprehensive measure of investment performance in selecting school busses. The third booklet contains a pocket mileage record for driver use. The fourth offers tips for planning, training personnel, purchasing, and operation that lead to greater fuel economy, and the fifth booklet addresses some of the basic scientific principles involved in saving fuel. Leader Styles of Secondary Principals.
Pub Date-Nov 78
Note-88p.
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.

Descriptors-Educational Research, *Leadership Styles, Measurement Instruments, *Principals, Secondary Education, Tables (Data)
Identifiers-Administrative Grid, Organizational Climate Survey

Researchers attempted this study to develop an instrument capable of measuring the ``task'' and ``people'' orientation of leader styles so that scores could be plotted on the ``Administrative Grid'' developed by the researchers. The researchers reanalyzed data previously collected on the ``Organizational Climate Survey'' to discover if items on this survey could be used to plot leader styles on the Administrative Grid. They completed a factor analysis of 455 teacher observations gathered by the survey. Researchers found that 44 items were useful in describing the leader style of secondary principals. When the 44 items were reanalyzed, seven factors with significant eigenvalues were discovered in the instrument. These seven values divided into three dimensions task orientation, salary and benefits, and people orientation. Researchers concluded that the 44 useful items ought to be extracted from the 80-item instrument. The instrument was found highly reliable with as few as eight people. Researchers made several recommendations for further study. (1) Additional items for the survey should be developed. (2) The study should be replicated in elementary schools and with superintendents. (3) Further studies should determine if leader styles can be changed. A lengthy appendix presents data analysis and a copy of the ``Organizational Climate Survey.'' (Author/JM)

Descriptors-*Computer Programs, *Curriculum Planning, Experimental Programs, Foreign Countries, Scheduling, *School Schedules, Secondary Education

Identifiers-England, Oxford School Timetabling System

This experiment in using computer-assisted curriculum planning in two British secondary schools tested the practicability of using computers not only in the annual compilation of school timetables but, more radically, in the characterization of constraints that knock-on'' from one year's timetable to the next. The Oxford School Timetabling System was used. Delay and unanticipated expense resulted in both schools from lack of immediate computer access since errors had to be corrected by phone or mail. The aims of the preliminary project were met in the Hengrove School but initial outcomes were disappointing at the Wells Blue School. In the Hengrove School about 85 percent of original specifications were met and the timetable had been completed by the insertion of a further 7.7 percent of items in a slightly degenerated form by reducing the number of sets provided without alteration of the curriculum, and the insertion of 4.6 percent of items with some structural variation. While such use of computers is still in the preliminary stages, researchers believed the experiment made some small steps forward. The development of entity pooling techniques is a future priority, as is the ability of schools to make their own informed choices between alternative strategies for inching up'' in the final compilation stages. Descriptors-*Academic Achievement, *Class Management, Classroom Research, Educational Research, *Effective Teaching, Elementary Education, Student Behavior, Teacher Attitudes, Teacher Behavior, *Teacher Characteristics
Identifiers-Academic Learning Time

This executive summary of the multiyear Beginning Teacher Evaluation Study (BTES) focuses principally on the findings of Phase III-B of this research program on teaching effectiveness. One outcome of the BTES study was a concept that makes it possible to measure individual student learning by noting observable variables of student behavior in the classroom. Academic Learning Time (ALT), as the concept is called, is defined as the amount of time a student spends attending to academic tasks while also performing with a high success rate. The more ALT a student accumulates, the more he or she can be assumed to be learning. The study also revealed five general interrelated components of effective teaching: diagnosis, prescription, presentation, monitoring, and feedback. Teachers who pay attention to all these factors tend to have students who accumulate high rates of ALT. Two other variables that are correlated with effective teaching emerged from the study. One was academic orientation, or the extent to which the teacher emphasized, valued, and worked toward cognitive achievement. The other was orientation toward affect, or the extent to which the teacher was aware of, acknowledged, and valued student feelings. (Author/JM)

Identifiers-Florida, Georgia, Georgia (Atlanta), North Carolina, State Testing Program

This publication contains the edited text of the proceedings of the September 1976 Conference on Education for Georgia Legislators. Addresses by 20 experts from Georgia and around the country are presented. The proceedings are intended to help legislators, educators, parents, and others interested in deeper insight into the issues of educational accountability, school finance, school disruption, and collective bargaining. Five participants addressed issues surrounding educational accountability, focusing on outcomes of current accountability attempts, performance-based teacher certification, accountability attempts in Florida and North Carolina, and statewide testing in Georgia. Five speakers discussed school finance, including its politics, the role of the federal government and the courts, and school finance in Florida. One participant discussed the recommendations made by the Florida Citizens' Committee on Education, while another dealt with the more general topic of what parents expect from schools. Five experts on dealing with school disruption focused on this topic, making comments on discipline policies in Florida and Atlanta, Georgia, and school suspension policies in both conventional and alternative schools. Those speakers who addressed collective bargaining concentrated principally on teachers' bargaining rights and right to strike and California's new teacher collective bargaining law. (Author/JM)

An Analysis of Operations Costs Under Traditional and Year-Round Student Schedules in the Bethel Public Schools.

Washington Univ., Seattle. Bureau of School Service and Research.
Pub Date-15 Aug 78
Note-75p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-*Cost Effectiveness, Data Analysis, Educational Research, Elementary Secondary Education, Expenditure Per Student, Models, Program Costs, Program Evaluation, Statistical Data, Tables (Data), *Traditional Schools, *Year Round Schools
Identifiers-45 15 Plan, Bethel Public Schools WA

This study focuses on the differences in operating costs between the traditional 180-day school schedule and the 45/15 year-round schedule in the Bethel School District of Tacoma, Washington. Two approaches were used to identify and analyze costs of the following: building administration, teachers, secretaries, clerks and aides, instructional specialists, food service, transportation, custodians, maintenance, libraries, utilities, central administration, and instructional support. Model I was designed to investigate differences in cost per pupil in all categories before and after the year-round program was implemented. Model II was used to calculate the costs that would be incurred if the 45/15 plan was ended and the traditional schedule made operational. No differences were determined in Model I. In Model II, cost differences were found to be related to the alternative used to provide needed school space and services. (Author/LD)

The School Principal: Recommendations for Effective Leadership.
California State Legislature, Sacramento. Assembly.
Pub Date-Sep 78
Note-82p.; Appendix D may be marginally legible
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-*Administrator Education, *Administrator Evaluation, Administrator Qualifications, Administrator Responsibility, *Administrator Role, Elementary Secondary Education, Inservice Education, *Leadership, *Principals, *Professional Continuing Education, Reports
Identifiers-Leadership Effectiveness, Mangers (Dennis)

In 1977-78, California Assemblyman Dennis Mangers headed an Assembly Education Committee Task Force on elementary and secondary principals. The task force was established to review the adequacy of preservice training, evaluation, and continuing professional development of principals. Members addressed questions about the role of the principal, skills needed in the role, changes needed in preservice and inservice training, and ways to improve administrator effectiveness. The task force concluded that because of increased social pressures and a burgeoning number of mandated programs, the principal's role today is much more demanding. The investigation resulted in extensive findings and recommendations concerning preservice training and credentialing, principal recruitment and selection, administrator professional development, administrator support systems, and principal evaluation. The report concludes with the recommendation that a major effort must be made by state and local governments to define the role of principals, give principals adequate support and assistance, and hold principals accountable for defined tasks. A lengthy appendix presents the skills necessary for school leadership, the general criteria for the evaluation of principals, a scope and content statement for the administrative services credential, an analysis of educational programs administered by principals, and a list of task force members. Identifiers-Individually Guided Education, Virginia (Lynchburg)

This report describes the implementation of the Individually Guided Education (IGE) program in the Armstrong School in Lynchburg, Virginia. In IGE, the graded self-contained classroom is replaced by the multiunit school so that individualized learning can occur. There has been much demand for similar kinds of changes in schools, but most previous programs have been unsuccessful. The IGE system was begun in the Armstrong School in the fall of 1973 with strong support from the principal and less enthusiastic support from the staff. The school's implementation was inadequate in several areas, including infrequent Instructional Improvement Committee meetings, unproductive unit meetings, failure to properly utilize the IGE planning model, lack of adequate inservice training, and lack of administrative understanding and leadership. These inadequacies were observed by the author and cited in a questionnaire administered to teachers. In the spring of 1975, the author was appointed principal of the school. To solve implementation problems, inservice training sessions for staff and parents were held. Results of a questionnaire given to teachers and parents indicated acceleration of implementation, improvement of staff relationships, increased staff and parent understanding of the project, and agreement with the findings of several other IGE studies. The principal's leadership was an important factor in implementation. (Author/JM)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Boards of Education, Case Studies (Education), Conflict, Educational Administration, Educational Research, Elementary Secondary Education, Ethnography, Meetings, *School Superintendents
Identifiers-Elite Arena Model

Findings of this ethnographic study are the product of observations of the Capital Area School Board from January until September 1976. The data were fit into two models, the Dissatisfaction Theory of Democracy and the elite-arena model. Elite'' boards reach most decisions in private meetings and feel independent of the electorate. Arena'' boards debate issues publicly and see themselves as delegates of the people. Often during arena behavior of school boards, the board suffers high turnover and superintendents are not reelected. This study attempts to explain how superintendents manage to remain in office during such stormy periods. During the period described by the study a new superintendent promoted the abolition of elite behavior and the institution of arena behavior. Because of a split in the board, board meetings were full of conflict and turnover was high, yet the superintendent retained support. Researchers concluded that a superintendent may survive in conflict situations if the superintendent values arena behavior, separates administration from policy-making, administers policy enacted, and keeps separate from board factions. It was suspected that when board members do not value their own arena behavior, the conflicts will tend to be personalized and unmanageable. (Author/JM)

This report is the third annual response of the U.S. Commissioner of Education to the requirements of the General Education Provisions Act. It includes annual reports in the form of statistical data from the states describing state uses of federal education funds. The 11 summary tables were designed to satisfy these objectives: (1) to show every data item specified in the legislation; (2) to permit comparisons across all states and programs; (3) to show the characteristics of grantees and beneficiaries of the state-administered federal education programs; and (4) to illustrate the varying administrative policies of the states within their prescribed responsibilities to suballocate federal funds. A brief history of the process of requiring these annual reports precedes the data. (Author/LD)

Descriptors-Bibliographies, Educational Research, Elementary Secondary Education, *Finance Reform, Models, *Property Taxes, Statistical Analysis, Tables (Data)

Identifiers-*Connecticut

The author argues that the effect of tax capitalization on the value of property has been neglected in the judicial and legislative discussion of school finance reform, even though this phenomena may weigh heavily on an equitable solution to the current funding dilemma. He examines theoretical and empirical support for the thesis that if, because of differences in the taxable base, one town levies higher tax rates than a neighboring municipality in order to provide the same quality of public service, and if this difference is expected to prevail over time, then property values in the former community will be depressed relative to the value of identical property in the town where tax rates are lower. Consequently, at least part of the inequity in the current system of funding local services will be eased through tax capitalization. This analysis indicates that greater property wealth per pupil results in a lower price for education and this lower price in turn leads to greater per pupil spending. To credit property-based differences and the underlying price differences as the primary source of spending disparities across towns is simply incorrect. The evidence suggests that income differences across towns are more important than price differences. (Author/IRT)

Discipline: A Socially Literate Solution.

Spons Agency-National Inst. of Education (DHEW), Washington, D.C.
Pub Date-78
Contract-77-0031
Note-19p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Behavior Problems, *Communication Skills, *Conflict Resolution, Discipline Policy, *Discipline Problems, Educational Research, Elementary Secondary Education, *Problem Solving, *Student Teacher Relationship

This document is a summary of a book entitled tentatively Discipline: A Socially Literate Solution'' by the same author. The book, based on seven years of research and development, is intended to be a manual for educators and students. The method described takes as its starting point that discipline problems can be reduced significantly if educators collaboratively name patterns of conflict, analyze systemic causes, and democratically improve the rules and roles governing behavior. It lays out a theory on the causes of discipline problems in schools and then offers specific techniques for their amelioration. The summary presents an overview of the theory with examples and then indicates chapter by chapter the content of the book. (Author/MLF)

A Method for Record-Keeping and Analysis of Equipment and Related Costs by Educational Program.

Pub Date-19 Jul 75

Note-49p.; Figures may not reproduce

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Cost Effectiveness, *Educational Equipment, *Facility Inventory, Information Storage, Methods, Program Costs, *Recordkeeping, Records (Forms), *School Accounting, Secondary Education, Vocational Education

A system employing a micro-level approach to the ongoing recording of educational equipment costs by educational program was developed. The system was designed to depreciate equipment and to allow determination of annual costs by educational program; consumption; maintenance and repair; interest on the capital investment; and insurance for purchased, donated, and rented equipment used by one program only and that used jointly between two or more programs. Guidelines for implementation are provided. The system provides for cost analysis procedures that allow cost comparisons and the determination of cost relationships and trends. Cost data provided by this system facilitate determination of the cost portion of cost-benefit studies concerning educational programs. The data provided by this system, over a period of years, can be used to develop standards that can be used as a yardstick to measure program, school, and district operations. Such cost data can provide guidelines when projecting costs of adding new programs and expanding present programs. The conceptual framework provides a basis for further development of instruments and procedures in the area of educational cost analysis. (Author)

This paper distills from a research conference, arranged by the Council for American Private Education (CAPE), six questions that constitute an agenda for research on private education. Discussed after each of the following proposed questions are some of the past research studies relevant to the question, and the status of research in progress. (1) What organizational phenomena are most powerfully linked, either directly or indirectly, to widely valued pupil outcomes? (2) What can we learn, from studies involving private schools, about the range of feasible school influence on community well-being? (3) What data sources can be developed to make at least some of the special research opportunities in private schools available to scholars? (4) What are the major impediments to the development and perpetuation of private educational options in response to consumer demand, and what are the most promising strategies for limiting, reducing, or eliminating those impediments? (5) What are the circumstances, frequency, and range of existing relationships between public and private educational agencies? What mutual influences are exercised, with what consequences for communities as a whole? (6) How can we best advance our understanding of private schools as entities important in their own right, even apart from what we might learn about the fundamental processes that pervade all schools? (Author/MLF)

This document reports results of two applications of an alternative cost model to two-year college education programs. Purpose of the study was to identify nonoperational costs (costs other than instruction) that are not usually found in financial reports. Current educational cost practices report costs by jurisdictional units; the way costs are organized reflects the institution's organization. An alternative method the functional approach is described as more revealing of the true costs of a program. Cost studies were performed for two different programs, an occupational therapy program and a college preparatory chemistry program. This report closes with observations concerning implementation of a functional cost analysis, comments about how the two studies will be used internally, and a recommendation for those interested in further developing functional cost analyses evaluations. Critical Issues in the Preparation of Educational Administrators in North America.

Pub Date-May 78
Note-18p.; Paper presented at the International Intervisitation Conference in Educational Administration (4th, Vancouver, B.C., May 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Administrator Education, *Educational Administration, Elementary Secondary Education, Professional Training, Values

Educational administration in North America is in a state of disarray, according to the author, because of the conduct of its practice, the preparation of its practitioners, and the advancement of knowledge relevant to its practice. Issues involved in the long-range preparation for work in educational administration is the focus of this report, and six characteristics are explained as minimally essential to an individual's preparation: (1) a firm basis in clinical values, (2) a grounding in relevant academic disciplines, (3) specialized knowledge acquired from the relevant disciplines and clinical experience, (4) a strong emphasis on cognitive and instrumental values, (5) a knowledge of clinical problems, and (6) internalization of the values of socialization. Identifiers-*Wisconsin

During the fall of 1976, the Wisconsin Department of Public Instruction (DPI) initiated a statewide study of educational needs as they related to the missions of the DPI. Part of this study, called the Statewide Assessment of Educational Needs (SWAN), was a citizens opinion poll designed to review state-level priorities. Three topics were explored: the perceived importance of various DPI roles and responsibilities, the degree of public acceptance of various methods by which local districts might reduce operating costs, and the importance and amount of school emphasis on various educational goals. A few general education-related issues were also included. Completed interviews were obtained from about 79 percent of the population surveyed. The study presents background information about the respondents followed by a complete item-by-item listing of responses and a copy of the interview schedule. (Author/LD)

Identifiers-*Wisconsin

Produced as part of the Statewide Assessment of Educational Needs (SWAN) intended to study statewide educational needs as they relate to the mission of the Wisconsin Department of Public Instruction (DPI), this technical report presents the methods and findings of the administrator survey. The administrator survey was done to examine the importance and adequacy of Wisconsin DPI services and activities as perceived by local district administrators, school board presidents, elementary and secondary principals, and the coordinators of Wisconsin's 19 cooperative educational service agencies. School board presidents and administrators from 190 of Wisconsin's 436 school districts were surveyed. The areas on which opinions were sought were DPI general education services, services for the educationally disadvantaged, services for the handicapped, state financial aid, services for local administration and food service, and DPI technical support services. Respondents were also asked to indicate the two most important DPI activities in each of six general service areas. In general, the ratings show that service activities of a general nature are judged important and used by many districts. Tables are used extensively to present the results of the questionnaire, which is also included. (Author/IRT)

Descriptors-Educational Programs, Instructional Programs, *Program Descriptions, Secondary Education

Identifiers-*California

This document contains accounts of nearly 200 programs currently in operation in California intermediate and secondary schools. The programs described were selected from among a large number of programs nominated by personnel from schools, district offices, and offices of county superintendents of schools. Teams of state department of education and school district personnel visited each of the nominated programs to confirm the accuracy of the descriptions. The publication is designed for use by educators, parents, and school board members in developing new ideas for programs in their own districts. Each program account contains a program title, school location, brief description, a list of major and of supporting areas of concern, the target audience, a list of materials used, services available for persons wanting more information, information on the financial requirements for beginning the program, the manner in which the program is evaluated, and the name and address of a person who will supply further information. Identifiers-*California

This publication is one of the major efforts of a project designed to promote energy conservation in California schools. Suggestions are provided that can be adapted at individual school facilities to reduce energy consumption. The guide also focuses on the major concepts of the new state standards for energy conservation for new nonresidential buildings and contains explanations of how these standards affect schools. The introduction examines the evolution of architectural techniques in attempting to understand the nation's energy dilemma. This is followed by discussions of traditional fuels, ``new'' fuels, and fuels of the future. Suggestions are offered for school districts and architects to consider in planning new school facilities. Suggestions for improvements in existing schools are divided into those that may require minor expenditures and those that may require major expenditures. In the appendices are tables with information about solar projects and about some other nonsolar energy conservation projects; tips on hiring outside consultants; components of a good energy management program; and section drawings of schools that show effective uses of a number of energy conservation measures. A glossary and a selected bibliography complete the guide. (Author/MLF)

Descriptors-*Educational Administration, Elementary Education, *Individual Development, Management, *Principals

The first year in the principal's chair is professionally challenging and a stimulus to growth, but it can also be a lonely, frustrating experience. Dr. Margaret Nelson, principal of Reedville Elementary School in Aloha, Oregon, relates her experiences as a first-year principal that could be useful to anyone either considering or entering the field of educational administration. She discusses her experiences and makes recommendations in the following areas: management, evaluation, grievances, open-door policies, interpersonal relations, discipline, testing, conferences, grades, budgeting, maintenance, faculty meetings and staff relations, the relationship of the principal to the children, and the relationship of the community and the school. Although directed to new principals, this bulletin could also be of interest to superintendents, school board members, or anyone else involved in public school governance. (Author/LD)

A Legal Perspective on Revenue Bonds for Residence Halls.

Pub Date- 78

Note-13p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Bond Issues, *Court Litigation, *Dormitories, Higher Education, State Legislation

Presents basic legal issues fundamental to revenue bonds (bonds secured by pledging only the revenues from the facility for the payment of the principal and interest on the bonds) authorized for construction of college and university residence halls and provides reference to, as well as discussion of, court decisions giving specific attention to precedent on the issue of default. Concludes that with leveling of enrollments and retrenchment, universities will face difficult decisions and perhaps even litigation regarding the issue of payment or nonpayment of revenue bonds for residence halls. Identifiers-School Business Administration

Intended for both the student and the practitioner, this text examines the role and function of the school business administrator and offers practical information relevant to the job. The authors recognize that the function of school business administration has radically changed in response to social changes. They believe that conventional projections of resource requirements and availability are dysfunctional and must be replaced by an approach that can accommodate nonlinear variables. This approach is described as a planning approach. The volume incorporates considerations of emerging conditions such as new legislation pertaining to race and sex discrimination, the changing responsibilities of school principals in business affairs, the acceptance of program budgeting, the increased sophistication of information and management systems, and new patterns in collective bargaining. Topics discussed include management techniques, human relations and communications techniques, data processing, budgeting, personnel administration, accounting, auditing, reporting, purchasing, inventory control, distribution, building maintenance and operation, insurance programs, auxiliary services, and capital outlay. Criticism of the American public school has abounded since its inception. Among the favorite indictments of the mid-1970s is the alleged failure of the public school to adequately teach fundamental skills. This book is intended to help the reader assess contemporary attacks on public schools in an intelligent and responsible manner. It draws on a wide and varied range of materials that help the reader adopt the proper critical perspective. More than 35 authors and many different types of materials reflecting a variety of evidentiary procedures are included: essays, empirical studies, anthropological impressions, and personal accounts. The readings emphasize that while American public schools have admittedly suffered from some glaring weaknesses especially in the area of extending equality of educational opportunity to children from minority groups, on balance the record of performance is not one of which we should be ashamed. Identifiers-Women Administrators

This collection of articles is designed to help metropolitan school principals meet the challenges of their positions. It is especially concerned with how principals can contribute to effective education for students of markedly heterogenous backgrounds. The authors deal with such issues as the principalship and metropolitan administration, the actual role of principals, and principals' relationships to administrators, teachers, and students. Articles included are The Principalship as a Career'' by Edwin M. Bridges; What Principals Do: A Preliminary Occupational Analysis'' by Salley Columbus, R. Bruce McPherson, and Melany E. Baehr; The Principal against the System'' by Bernard C. Watson; A View of the Leadership Shortage in School Buildings'' by William W. Wayson; Creating a New Era for Schools and Communities'' by James G. Cibulka; The Social Context of Urban Education'' by Daniel U. Levine; Education and Ethnicity'' by Rodney J. Reed; Development of a Program'' by Staten W. Webster; Students' Rights'' by Michael E. Manley-Casimir; The Principal as a Moral Actor'' by Francis Schrag; What Principals Should Know about Teachers'' by Gertrude H. McPherson; Collective Bargaining and the Principal'' by Frank W. Lutz and William E. Caldwell; The Future of Middle Management in Education'' by Bruce S. Cooper; Principalship in an Economic Context'' by K. George Pedersen; and Women as Principals: Their Performance as Educational Administrators'' by Joan D. Meskin. (Author/JM)

Identifiers-Florida (Pinellas County), National Diffusion Network Programs

The prevention and resolution of student behavior problems were the goals of the Positive Alternatives to Student Suspensions (PASS) Program involving schools in Pinellas County, Florida. Workshops for staff and administrators aimed toward creating a humanized caring school. Classroom activities attempted to create situations in which students and teachers could get to know and appreciate each other. Programs for students run by a psychologist and social worker aimed at self-exploration and personal growth. Encounter groups for personnel stressed self-exploration and facilitation of positive interactions through values clarification, transactional analysis, and other applied behavioral science techniques. Parent training groups fostered open communication, sharing of concerns, problem-solving, and values clarification using techniques from parent effectiveness training, behavior modification, and transactional analysis. A time-out room'' provided a place where students could talk out personal problems before the problems became discipline problems. A Student's School Survival Course'' allowed students to receive positive feedback from teachers and other students. A Student's Home Survival Course'' used reality therapy, transactional analysis, and rational behavior therapy to help students explore positive alternatives for resolving problems at home. During the two years in which the program operated, the PASS schools had significantly fewer student suspensions than did control schools. (Author/JM)

Identifiers-*Piaget (Jean)

A two-phased training study attempted (1) to accelerate the rate at which a total of 8 severely and profoundly retarded children (mean age 57 months) developed the Piagetian concept of object permanence and (2) to demonstrate generalization of the higher performance on object permanence scale to other scales of sensorimotor intelligence and to the learning of expressive language. The first phase focused on training the Ss in the area of object permanence. In the second phase the Ss (4 from phase 1, 2 control and 2 experimental, and 2 newly selected Ss matched for age and etiology) received language training. Among results were that all of the phase 1 Ss achieved criterion for the highest item on the scale used; and that, in phase 2, Ss who had achieved object permanence (whether with or without training) progressed far more than Ss who had not mastered this concept. The proceedings of the Second Annual National Conference on Child Abuse and Neglect (1977) are presented. The first section contains discussions of the following delivery system-related topics: community resource development (planning community protective services, mobilizing communities, maximizing educational resources, approaching families-at-risk, starting local child abuse programs, family advocates, child abuse training); comprehensive services to families (model for family support system development, comprehensive emergency services, child abuse treatment, mechanisms for and effectiveness of intervention, crisis nurserys, foster care); services to special populations (multiproblem families, high-risk families, mentally retarded parents, child advocacy in the military, rural programs, urban programs); alternative approaches (lay therapy, the self-help movement); and management and staff development (case management evaluation, child abuse hotlines, case worker training, interview training, emotional involvement, the battered worker syndrome, mental health professionals). Part 2 deals with intervention strategies in the areas of client assessment (differentiating abusing and neglecting parents, predicting child abuse and neglect, assessing marital adjustment of abusive parents, assessing clinical screening instruments, assessing impulse control, identifying signals of stress in high-risk families) and treatment (medical role, a family systems approach, a counseling approach, a developmental approach, group therapy, treatment programs, student nurse home intervention programs, family resource centers). Appended is a list of the 154 contributing authors. (DB)

Early Manual Communication, Parental Hearing Status, and the Academic Achievement of Deaf Students.

Pub Date-Mar 78
Note-23p.; Paper presented at the American Education Research Association Annual Meeting (Toronto, Ontario, Canada, March, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Academic Achievement, *Aurally Handicapped, Communication (Thought Transfer), Deaf, Demography, Interpersonal Competence, *Manual Communication, *Parent Child Relationship, *Parent Influence, Social Adjustment

The paper describes some of the major demographic differences between hearing impaired students with normal-hearing parents and those with hearing-impaired parents, based on Office of Demographic Studies data, and attempts to illustrate the complex interaction involved between these variables, academic achievement, and early parent-child communication methods (i.e., manual or verbal). The authors, while not denying the data showing the superiority of deaf students with deaf parents on various measures of academic and social adjustments, nevertheless contend that when comparing students according to parental hearing status, to infer that such differences are due to communication history alone overlooks many educationally and personally significant variables that should be considered. Interactive Classroom Television Systems: Educational Impact on Partially Sighted Students.

Rand Corp., Santa Monica, Calif.
Report No.-Rand-P-5933
Pub Date-Feb 78
Note-94p.; Photographs may not reproduce clearly
Available from-Rand Corporation, 1700 Main Street, Santa Monica, California 90406 ($5.00)
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-Academic Achievement, Attitudes, *Audiovisual Aids, *Classroom Communication, *Closed Circuit Television, Elementary Education, *Low Vision Aids, Memory, *Partially Sighted, Perceptual Motor Coordination, Program Evaluation, Self Concept, Visually Handicapped, Visual Perception
Identifiers-*California (Los Angeles County), *Interactive Classroom Television System

The report presents the results of an evaluation of the educational impact in two Los Angeles County, California, elementary schools, of Interactive Classroom Television Systems (ICTSs closed circuit systems that permit continuous two-way visual communication between teachers and partially sighted students and enable such students to make the fullest possible use of their residual vision). The two ICTS sites and their participants are described, along with the project's evaluation design, the kinds of assessments employed, and the data collection schedule. In general, assessment of project outcomes over two years suggested that ICTS have a strong positive impact on the educational experiences of partially sighted elementary school students in the three areas evaluated: academic achievement, visually dependent skills (visual motor integration and visual sequential memory) and psychosocial mediators of school success (attitudes toward academic evaluation, toward peers, and toward self). Identifiers-*Pennsylvania

The guide, most of which consists of appendixes, forms, and formats, is an introduction to the process of developing individualized education programs (IEPs) for handicapped, gifted, and talented children in the state of Pennsylvania. Instructional components of the IEP are discussed in terms of annual goals, short-term objectives, and determining present educational levels. Some special considerations in IEP plan preparation are reviewed. Procedures for determining educational assignments and developing IEP plans are presented. Among the eight formats and forms provided are a request for permission to evaluate, a due process notice, and a pre-hearing conference response. Sample IEP plans, a bibliography of instructional objective sources, and quidelines for the preparation of teacher-written objectives are appended. (DLS)

Descriptors-Classroom Environment, *Cognitive Development, *Communication Skills, Community Resources, Creative Activities, Early Childhood Education, Environmental Criteria, Environmental Influences, Language Skills, *Mentally Handicapped, Motor Development, *Program Design, Program Evaluation, Program Planning, *Student Evaluation, Teacher Responsibility, Teaching Guides, *Teaching Methods

The guide is intended to help teachers teach mentally handicapped children who have been mainstreamed into preschool, nursery school, or first grade public school classes. Part 1 answers frequently asked questions regarding the definition of mental retardation, realistic expectations, emotional needs, discipline, and teaching approaches. Part 2 deals with program planning, design, and evaluation. Student evaluation topics include sensory awareness, motor coordination, use of materials, sustained play, language, accumulative knowledge, frustration tolerance, initiative, interpersonal relationships, imagination, and creativity. Environmental evaluation topics (on the three levels of safety and comfort, emotional support, and the program) include elements of space-time identity, articulation, transistion, scale, community vs. isolation, privacy, territoriality, and character. Suggestions are made for evaluating materials and for beginning procedures. Part 3 focuses on implementing the program and includes descriptions of first steps toward competency (developing a self image and personal and social skills); language and communication skills (developing sensory discrimination); creative activities (music, art, and creative movement); motor development (toys and equipment, muscle development); and utilization of community helpers as resources. Presented are the proceedings of the Third Annual Learning Resources Conference which deal with current directions in educational services for the severely handicapped. The papers are divided into three topical areas, the authors' names and addresses are supplied, and support material relating to some of the papers and a resource guide are provided. The first section contains two addresses (Legal Considerations in the Delivery of Services to the Severely Handicapped'' by W. Dussault, and LRCs as Advocates for Programs and Services for the Severely Handicapped'' by J. Crosson) and documents concurrent sessions dealing with least restrictive educational alternatives for the severely/profoundly handicapped, architectural barriers, community models, family direction services, and parental involvement. Section 2 contains the address The Programming of Materials for the Severely Handicapped'' (by A. Hofmeister) and documents concurrent sessions on individualized educational programs, assessment, medical conditions, classroom management, adaptive equipment, ancillary services, and early intervention. The third section deals with Training and Technical Assistance as Functions of Learning Resource Systems Serving the Severely Handicapped'' (by W. Lance) and documents concurrent sessions on personnel preparation, workshops, models for technical assistance, evaluation of the training and technical assistance, role of training institutes, training packets, and integration of severely multiply handicapped students. Descriptors-Administrator Guides, *Career Education, Community Involvement, *Evaluation Methods, *Handicapped Students, Parent Education, *Program Development, Program Evaluation, *Program Planning, Secondary Education, Student Evaluation, Teacher Education, Teacher Evaluation, *Workshops

Intended for administrators, the guide provides directions and materials for a series of workshops aimed at creating a team of people including educators, parents, and community workers, who can develop and monitor a career education program for handicapped students in secondary schools. The first of five sections gives an overview of the program components such as the workshop objectives and other preparatory and operational considerations. Chapter 2, on personnel responsibilities, contains information needed by personnel to become effective group facilitators, presentors, leaders, and participants in their specific workshop roles. A third chapter explains how a career education plan can be developed and implemented in secondary schools. Provided in Chapter 4 are specific procedures and measures related to conducting a needs assessment study, evaluating workshop effectiveness, and evaluating student competency attainment. A final chapter, which makes up the bulk of the document, outlines the content of each of 20 sessions with information on goals, objectives, activities, preparation, special considerations, and role of the trainer. Workshop topics include instructional strategies, community resources, the individualized education program, and student assessment. Appended are copies of baseline instruments, transaction instruments, outcome instruments, and an example of a career education plan. (SBH)

Identifiers-*Office of Demographic Studies

The report presents the results of an Office of Demographic Studies study of the communication patterns of a national sample of 657 hearing impaired children. The extent to which various modes of communication (such as manual or oral) are used with hearing impaired children is examined, and the relationships between communication patterns and a variety of educationally significant personal and background characteristics of the children are investigated. The relationship between communication patterns and school achievement test scores in vocabulary, reading comprehension, mathematics concepts, and mathematics computation are also examined. Appendixes contain copies of the data collection instruments, a list of the schools and districts which participated in the project, and an examination of the characteristics of the Ss as compared to a larger national sample from which they were drawn. After Abuse: Child Coping Patterns and Social Work Intervention.
Pub Date-76
Note-22p.; Published in Social Thought; v4 n2 Spring 1978
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Academic Achievement, *Aggression, *Anti Social Behavior, *Behavior Development, *Child Abuse, Depression (Psychology, *Foster Children, *Individual Characteristics, Primary Education,

Psychological Patterns, Rejection, Self Concept, Stress Variables, Verbal Communication

The hypothesis that abused children develop a life style of overt expression of aggression and depression was examined in a study of 56 physically abused first grade children who were placed in foster care due to parental physical abuse. As no test instrument existed, the Childhood Social Functioning Inventory was developed, pretested, and used to perform a multiple stepwise regression analysis of the association among overt aggressive behaviors, learned aggressive patterns of coping, depressive process, and social situation. Other factors considered included the child's behavior, verbal expression, stability of foster home placement, and academic performance. Among characteristics of the Ss were that 55% of the Ss were repeating first grade, all had fractures within the previous 4 years, and 53% were described as coming from middle class homes. Among findings was that the Ss coped with stress in school situations as their parents had coped with stress with them. This self defeating behavior served to further support Ss' already low self image. The Ss responded to parental figures (teachers and foster mothers) with a pattern of simultaneous aggression and depression because of earlier experiences of rejection, thus setting in motion a new pattern for rejection by parental love objects. Descriptors-Curriculum Guides, Educational Objectives, Mainstreaming, *Nursery Schools, *Parent Participation, *Preschool Education, *Preschool Teachers
Identifiers-*Bernice Wright Cooperative Nursery School

The document details the organization of the Bernice M. Wright Co-Operative Nursery School (BWCSN). The co-op approach in a university setting is discussed. Staff organization and family membership are outlined. Four specific educational objectives are listed, as are the school's characteristics. The integration of handicapped children into the school is discussed, both in relation to the child and also to his/her parents. Appendixes include, in part, a description of the Developmental Therapy curriculum objectives. (PHR)

Identifiers-*Southwest Regional Resource Center

The document presents the Southwest Regional Resource Center's (SRRC) final technical report on its major activities, products, and services for handicapped children from June 1, 1974, to September 30, 1977. The element summaries, which comprise the main text of the report, contain information on model development, regional task force work, direct appraisal programing services to children, sharing of resources with other regional resource centers and agencies, and the implementation of workshops and major conferences sponsored or co-sponsored by the SRRC. Not all activities nor all products are specifically mentioned, the intent being to summarize large areas of work to capture a broad picture of SRRC activities over the 3-year period. A supplemental materials index provides information on products from all regional resource centers, along with explanatory information. (Author/DLS)

Identifiers-*Texas

The final report, over half of which consists of appendixes, describes a three-phased career education program serving 40 gifted and talented Texas high school seniors, that combined guidance, mentoring, and on-the-job training. Phase I, Guidance Laboratory Experience, featured self-investigation and evaluation, career exploration, resource speakers, isolation of career areas, and mentorship interviews. In Phase II, Mentorship Laboratory Experience, students were placed in observer roles in specialized areas identified during Phase I. Phase III, Internship Laboratory Experience, placed the students in work experiences in the business sector. (Author/DLS)

Descriptors-*Emotionally Disturbed, Group Guidance, *Group Therapy, Intervention, *Program Descriptions, Public Schools, *School Involvement, Secondary Education
Identifiers-*Minnesota, *Project SAIL

The manual outlines the processes, policies, and actual program implementation of one component of a Minnesota program for emotionally disturbed adolescents (Project SAIL): the development of school-based therapy/intervention groups. The characteristics of SAIL students are described, and some considerations involved in providing group services within a public school setting are presented. The underlying beliefs and values of the SAIL groups are discussed, along with their composition, structure, and leadership. The five stages of group development (trust building, cohesiveness, power, intimacy, and termination) are outlined, and specific examples of characteristic behavior at each stage are presented along with strategies and activities that have been used by staff to facilitate the various stages. Some negative group situations and outcomes are also described. (DLS)

The report documents goals and activities of a 2-year project to study the effects of mainstreaming on the preschool child. The first year is said to have been concerned with the development of an observational and coding system for measuring the students' interaction, while the second involved validation of the system. Detailed data on student patterns resulting from mainstreamed placements are provided. Results of parent attitude questionnaires and interviews are discussed, as are results from 23 Head Start staff members. Nearly half the document is composed of five appendixes, including observational and coding guidelines. (CL)

Intended as a text to supplement inservice training for regular class teachers, the manual presents information on diagnostic-prescriptive teaching with mainstreamed learning disabled students. Ten sections focus on the following diagnostic aspects: referral, parent involvement, case history collection, assessment of academic abilities and disabilities, observation of learning modalities, auditory perception and language factors in learning, visual perception, psychological assessment, data analysis, and situational analysis. The final five chapters discuss delivering services (including preparing an individualized education program and selecting materials to fit the learning style), and strategies for teaching arithmetic, spelling, and reading. Increasing Elementary Students' Assignment Completion: A Data Based Method for Mainstreaming.
Pub Date- 78
Note-22p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Assignments, Data Collection, *Elementary Education, *Identification, *Low Achievers, *Mainstreaming, Reinforcement

A data based method for mainstreaming involving 120 elementary students (grades 1 through 5) enrolled in a resource room was utilized. Ss were monitored to find the percent of assignments they were completing in their regular classroom, and to determine the feasibility of using this data base to identify students who were not achieving, and to determine the effectiveness of an intervention procedure combining self-instruction with extrinsic reinforcement. Data was collected in three measurement conditions (baseline, intervention, and end of year check) for 12 students identified as needing extra help as an evaluation program. Six of the Ss exceeded the level of assignment completion necessary. (Author/BD)

Child Outpatient Discharges, 1975-1976: Description of the Sample.

Pub Date-Nov 77

Note-12p.; Paper presented at the American Association of Psychiatric Services for Children (Washington, D.C., November, 1977); For related information, see EC 113 317-318

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Emotionally Disturbed, Exceptional Child Research, *Mental Health Clinics, Personal Adjustment, *Psychotherapy, Success Factors

Identifiers-*Discharge (From Treatment)

A summary of child outpatient discharges from a mental health center over a 1-year period is given in terms of four classes of variables: client (age, diagnosis, impairment level), treatment time (length of stay, number of sessions, density of treatment), process (principal therapist by discipline, broken or cancelled scheduled appointments), and discharge (reason and need for further treatment). (CL)

Shure, Myrna B.

Model for Study of Client and Treatment Process in a Community Mental Health Center.

Pub Date-Nov 77

Note-7p.; Paper presented at the American Association of Psychiatric Services for Children (Washington, D.C., November, 1977); For related information, see EC 113 316-318

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Emotionally Disturbed, Exceptional Child Research, *Mental Health Clinics, Personal Adjustment, *Psychotherapy, Success Factors

Identifiers-*Discharge (From Treatment)

The paper reviews client and therapist attributes, treatment factors, and circumstances surrounding discharge from a community mental health center. Among findings cited are that degree of illness at the start of treatment was not a factor in how often appointments were missed; and that for those children judged to need further treatment, termination was most likely to be a family's decision and least likely a mutual one. (CL)

Sheinfeld, Sherri N.
A Study of Outcome and Cost.
Pub Date-Nov 77
Note-26p.; Paper presented at the American Association of Psychiatric Services for Children (Washington, D.C., November, 1977); For related information, see EC 113 316-317
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Emotionally Disturbed, Exceptional Child Research, *Mental Health Clinics, *Program Costs, *Psychotherapy

The third paper in a series summarizing treatment and discharge variables from a community mental health center focuses on the interrelationships among client, process, and outcome variables. Analysis of such factors as initial impairment level, treatment time, process variables, discharge variables and therapeutic outcome is said to have pointed out conclusions about treatment outcome and the following variables: average costs, number of sessions, degree of change, and treatment modality by cost. It is explained that outcome was not found to be directly related to cost, nor was the cost of varied outcomes related to treatment modality. (CL)

Descriptors-Cleaning, Clothing Instruction, *Daily Living Skills, Hygiene, Money Management, Program Descriptions, Rehabilitation Centers, *Residential Centers, Residential Programs, Skill Centers, Student Evaluation, Travel Training, *Visually Handicapped, *Visually Handicapped Mobility, *Visually Handicapped Orientation, Young Adults

The services of the Living Skills Center for the Visually Handicapped, a habilitative service for blind young adults, are described. It is explained that the Center houses its participants in their own apartments in a large complex and has served over 70 young people in 4 years. The evaluation section describes such assessment instruments as an administration of living skills evaluation, (for cooking, cleaning, care of clothing, financial management) and ~~on~~ administration of orientation/mobility evaluation (route directions, street travel, street crossings, stairs, spacial terms). The section dealing with orientation and mobility examines orientation to one's apartment and mobility in the neighborhood, (bank, department store, drug store, dry cleaners/laundromat, grocery store, post office, restaurants). Section 4 examines care of clothing (clothes cleaning, organization of closets and drawers, ironing, selection of clothes, and sewing). Such cleaning skills as scrubbing, cleaning floors, making a bed, and dusting furniture are described in section 5. The section on personal hygiene focuses on bathing, skin care, hair care, teeth, nail care, shaving, and care of self during menses. The final section deals with financial management and outlines the following areas of skills: basic math, coin identification, currency, coin operated machines, telephoning, credit, bills, security deposits, source of money, budgeting, insurance, banks, signature, writing checks, keeping a check record, bank statements, reconciling a bank statement. EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-*Autism, *Behavior Problems, *Class Management, *Classroom Techniques, *Discipline, Elementary Secondary Education, Emotionally Disturbed, Intervention, Operant Conditioning, Parent Role, *Policy Formation, Reinforcement, Severely Handicapped

The report documents a problem solving approach to the adoption of procedures for dealing with serious behavior problems of severely emotionally disturbed and autistic students in California public schools. Summarized are a review of the literature, an analysis of general techniques of student control, and a list of advantages and disadvantages of such behavior control strategies as physical intervention, timeout, and corporal punishment. The end product of the project is explained to be an approved policy list of eight types of behavior control for use by classroom teachers. Specific procedures are described, (including parent involvement), and maximum duration information is listed. (CL)

Identifiers-*Special Needs Identification Assessment Project

Part of a resource package designed to assist local education agency personnel in improving quality of instruction and supportive services to special needs students enrolled in vocational education programs, the eighth of nine instructor guides presents procedures for conducting a followup of students who have completed the vocational program and who are engaged in work and/or continued training. It is explained that information collected from learner followup should provide the instructor with a reading on the student's level of work adjustment and point out areas within the instructional program which may need to be strengthened. Example documents include a former student interview guide, a sample former student followup questionnaire, and a summary report form on the followup of former special needs students. (SBH)

Identifiers-*Special Needs Identification Assessment Project

Part of a resource package designed to assist local education agency personnel in improving the quality of instruction and supportive services to special needs students enrolled in vocational education programs, the last of nine instructor guides suggests several procedures for organizing and implementing an employer followup. It is explained that by collecting employer feedback on former student job performance and feedback from the former student, both the vocational instructor and the support services personnel have a strong basis for determining future student and program needs. Included are sample survey forms. (SBH)

EDRS Price MF-$0.83 HC-$4.67 Plus Postage.

Descriptors-*Academic Achievement, Elementary Education, Handicapped Children, Intermediate Grades, *Program Descriptions, *Program Development, Program Effectiveness, Program Evaluation, *Slow Learners

The paper describes the development of a program to meet the needs of 20 slow-to-learn developmentally delayed fifth and sixth grade students. Aspects covered include program rationale, strategy, design (including criteria for student selection and budgetary considerations), implementation (including information on individual lesson plans, structured classroom situations, and parent involvement), and program evaluation (analysis of students' math and reading achievement). It is reported that the average growth of Ss was 2 years in reading and 1.2 years in mathematics, with progress also noted for study skills and self concept. Among 12 appendixes are summaries of student scores on such tests as the Stanford Diagnostic Reading Test and the Wide Range Mathematics Achievement Test. (CL)

Descriptors-Attitudes, *Guidelines, *Handicapped, Instructional Materials, Language Guides, *Material Development, *Stereotypes

Intended for producers of educational materials, the document offers guidelines to assure that print and nonprint educational materials reflect a positive, fair, and balanced representation of persons with exceptionalities. Nine guidelines are discussed: (1) 10% of the contents should include or represent children or adults with an exceptionality; (2) there should be representation of persons with exceptionalities at all levels and in all areas of study; (3) representation of persons with exceptionalities should be accurate and free from stereotypes; (4) persons with exceptionalities should be shown in the least restrictive environment, participating in activities in a manner that will include them as a part of society; (5) in describing persons with exceptionalities, the language used should be nondiscriminatory and free from value judgments; (6) persons with and without exceptionalities should be shown interacting in ways that are mutually beneficial; (7) materials should provide a variety of appropriate role models of persons with exceptionalities; (8) emphasis should be on uniqueness and worth of all persons, rather than on the differences between persons with and without exceptionalities; and (9) tokenism should be avoided in the representation of persons with exceptionalities. Identifiers-*Education For All Handicapped Children Act

Reports from seven United Cerebral Palsy Association affiliates were collected to identify implementation issues and difficulties relating to the Education for All Children Act, P.L. 94-142. Data were compiled for the following major areas: the question of related services, the individual education plan, the due process hearing, least restrictive environment and private school placements, coordination with the private sector, public involvement, state responsibilities, funding sufficiency, preschool incentives, and determination of equal treatment. Among findings were that transportation services are frequently inadequate and have harmful effects on the child; failure of the due process system is a major problem in Illinois; and failures to develop inservice training programs for teachers and associated personnel have been documented in Ohio, Maine, Missouri, California and Maryland. Descriptors-Exceptional Child Research, *Handicapped Children, *Performance Based Teacher Education, *Teaching Skills

Twenty-three special education teachers and 13 special education student teachers rated 16 teacher competencies according to their importance. Results indicated that teachers were able to rate competencies, and that there was practically no disagreement in ratings between practicing special educators and student teachers. (CL)

Guidelines for the Identification of the Gifted and Talented.
New York State Univ. System, Albany.
Pub Date-Nov 77
Note-72p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-Conceptual Schemes, Elementary Secondary Education, *Gifted, *Models, Records (Forms), *Talented Students, *Talent Identification

A model for identifying gifted and talented students (grades K-12) is described. Characteristics of giftedness are seen to fall into three major clusters: cognitive and psychomotor capacities for acquiring fundamental skills and knowledge, creative problem-finding solving skills, and personal characteristics. Nineteen steps in implementing an identification program are outlined, and sample forms are provided (including a student interest survey, peer and adult nomination forms, a student self-assessment form, and rating scales). Descriptors-Aesthetic Education, Annotated Bibliographies, Cultural Differences, Elementary Secondary Education, *Gifted, *Instructional Materials, Language Arts, *Mathematics Materials, *Reading Materials, *Science Materials, Social Studies, *Talented Students, Textbooks

The bibliography includes references to approximately 1500 instructional materials for use with gifted and talented students. Entries usually include author's name, title, availability information and a brief annotation for the following areas (sample subtopics in parentheses): aesthetic education (recommended art and music textbooks); English language arts and reading (fantasy and autobiographies); mathematics; science; social studies (the Amish and contemporary issues); and general information (business, health, and industrial education). Also included are annotated bibliographies of professional materials and of information dealing with culturally different gifted and talented students. (CL)

A Comparison of Manual and Oral Language Training with Mute Retardates. Final Report.

Spons Agency-Illinois State Dept. of Mental Health and Developmental Disabilities, Springfield.

Pub Date-78

Grant-610-01; EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Childhood, *Custodial Mentally Handicapped, Exceptional Child Research, *Language Instruction, Manual Communication, Mentally Handicapped, *Sign Language, *Verbal Learning

The effectiveness of sign language was compared with verbal language instruction with 12 nonverbal severely retarded students (4 to 9 years old). Ss received either speech training, sign language training, or instruction in an area other than communication. During the second year, 10 Ss received training from their parents. Results indicated no significant differences between the three groups (sign language, speech, and placebo) for the total number of words learned or the linguistic level achieved, nor were there significant correlations among Ss' cognitive level and their learning of either sign language or verbal language skills. The hypothesis that Ss in the sign language condition would learn more words than SS in the speech training condition was statistically rejected, although all four signing condition Ss learned some signs while only two of the speech condition Ss learned to say any words. Labeling Versus Stigma: A Typology of Deviance in Special Education. Working Paper No. 814.

Yale Univ., New Haven, Conn. Inst. for Social and Policy Studies.

Pub Date-Nov 78

Note-29p.; Paper presented at the American Sociological Association Meeting (San Francisco, California, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Classification, Conceptual Schemes, Elementary Secondary Education, *Handicapped Children, *Labeling (of Persons), *Models, *Typology

The paper offers an analysis of how the misclassification of school children as cognitively disabled for placement in public school special education classes may have positive as well as negative consequences. This approach is used to criticize the sort of unilateral prohibition of misclassification mandated by the Education for All Handicapped Children Act (P.L. 94-142). Architects of the Act are seen to argue that misclassification inevitably causes stigmatization and other ill effects. The paper shows that to understand the experience of failure for the full range of children encountered in schools, one must take the degree of disability, the occurence of official identification, and the acceptance of stigmatization by students as three distinct and independent variables. The intersection of the three variables is noted to provide an eight-cell typology. Examples of each type drawn from the author's ethnographic studies of special education programs in public schools are offered to show that one of the cells are empty. It is concluded that banning misclassification protects children in some of the cells but at the cost of harming children in other cells. (Author/SBH)

Pilot Parents: An Organizer's Handbook.

Canadian Association for the Mentally Retarded, Toronto (Ontario).
Pub Date-77
Note-46p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Mentally Handicapped, *Parent Associations, *Program Development
Identifiers-*Parent Resources, *Pilot Parents

Intended for parents of mentally retarded children, the booklet describes the organization of a parent support program in Canada. Sections outline seven steps involved in the development of a Pilot Parents Program: (1) one or two parents in a local association for the mentally retarded chapter decide to start Pilot Parents; (2) a Pilot Parents organizing committee is set up; (3) Potential Pilot Parents are recruited from the association membership; (4) a short but intensive training program is held for Pilot Parents; (5) Pilot Parents is publicized in the community via a brochure, the local newspaper, radio, television; (6) Pilot Parents are matched with new parents; and (7) the matches are followed up and supported by the committee. Included are reading suggestions for parents, a list of suggested films and videotapes, and basic information (including an article titled Your Child is Mentally Retarded What Do You Do When You Find Out?'' by N. Middaugh). (SBH)

The Tagmemic Model and Language Variation.

Pub Date-77
Note-29p.; Extract from "Linguistics at the Crossroads," Jupiter Press, P.O. Box 101, Lake Bluff, Illinois 60044
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Dialect Studies, Language Attitudes, *Language Classification, Language Patterns, Language Research, Language Styles, Language Typology, Language Usage, *Language Variation, *Linguistic Borrowing, Literature Reviews, Regional Dialects, *Sociolinguistics, Spanish, *Tagmemic Analysis

This paper proposes a tentative notational or marking system which attempts to provide more information on the sociolinguistic constraints upon the use of linguistic features than has been the case in other systems. A review of other studies in language variation, particularly those of William Labov, suggests that much can be done toward interpreting and predicting the types of speech variation with more explicit knowledge of both the situational context and the actors. Research in language styles, attitudes, usage and lexicography shows a tendency to regard data in the light of the linguistic continuum and relevant sociolinguistic dimensions. The proposed notational system is presented under the headings of symbol, explanation and markedness. The pattern followed is a digraphemic one and the inventory of 50 items includes several dimensions that intersect with other areas. Through the use of 34 examples in Spanish, the tentative marking system is then applied at the clause, phrase and word levels. This implementation of the marking system suggests that it may exhibit the potential of providing much of the linguistic and extra-linguistic information needed to interpret changes in progress and their direction. Some discussion of implications for further investigation concludes the essay. (AMH)

A Proposed Resolution of Curious Conflicts in the Literature on Linear Syllogisms. Technical Report No. 8.

Yale Univ., New Haven, Conn. Dept. of Psychology.

Spons Agency-Naval Personnel Research and Development Lab., Washington, D.C.

Pub Date-Jun 78

Contract-N0001478C0025

Note-61p.; Paper presented at the International Symposium on Attention and Performance (8th, Princeton, New Jersey, August, 1978)

EDRS Price MF-$0.83 HC-$3.50 Plus Postage.

Descriptors-*Abstract Reasoning, *Cognitive Processes, Deep Structure, Error Patterns, Language Research, Linguistic Theory, *Logical Thinking, *Problem Solving, *Psycholinguistics, Psychological Studies, Sentence Structure, Surface Structure, Thought Processes

Identifiers-*Linear Syllogisms

Linear syllogisms present two premises, each describing a relation between two terms. The individual's task is to infer the relation among the three terms of the linear syllogism, and then answer a question about one or more of these relations. For example, John is taller than Bob. Sam is shorter than Bob. Who is the tallest?'' Students of reasoning have engaged in a vigorous debate regarding the representations and processes used by subjects solving linear syllogisms. This experiment was intended to isolate the source of conflicts in reported data sets for the linear syllogism problems. Eighteen adult subjects received linear syllogisms under instructions designed to yield speeds commensurate with error rates of about 10%. Latency and error data were analyzed both separately and jointly. The analyses revealed that the source of the conflicts in the literature is the failure of researchers to appreciate the complex interrelationships between latency and error rate. When these interrelationships are taken into account, the conflicts disappear. (Author/NCR)

Dyadic Interaction in Single-Word Speech. Papers and Reports on Child Language Development, No. 13.

Stanford Univ., Calif. Dept. of Linguistics.
Pub Date-Aug 77
Note-9p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Child Language, *Cognitive Development, Cognitive Processes, *Imitation, *Language Development, *Language Processing, Language Research, Language Skills, Linguistic Performance, Phonology, Psycholinguistics, Speech Communication, *Verbal Development, Verbal Stimuli, Vocabulary Development

This paper reports on two aspects of dyadic communication skills: verbal imitation, and response to questions and commands, as they relate to the development of semantic functions in three English-speaking children. The children, aged 16, 21 and 22 months, were unobtrusively videotaped during weekly free play sessions with their mothers. The videotapes were completely transcribed and then coded along three dimensions: action context, communicative interaction, and semantic function. The situations reported on here (imitation, and response to questions and commands) are categories on the communicative interaction dimension. It is hypothesized that verbal imitation performs an important communicative function, so the first question concerned the kinds of words children imitated. This was answered in three ways: (1) with respect to the word's position in the adult sentence, (2) with respect to the part of speech, and (3) with respect to the semantic function. A second means by which children indicate communicative skills is by appropriately answering questions and commands. The three children in this study displayed evidence that they were beginning to process questions and commands as a special kind of verbal input, particularly in the development of answers to yes/no questions and naming questions. This volume discusses (1) ways of introducing authentic language experiences; (2) the challenge to foreign language teachers and the status of the profession; and (3) communication both within the profession and with the general public. Revitalization of the Classics and ways of introducing authentic language via film, theater, music, and student exchanges are addressed in five essays. Factors which affect the professional tasks of foreign language teachers include student, teacher, and public attitudes and expectations. Educational and enrollment trends that affect the profession are covered, and directions in the education of prospective teachers and practicing teachers are discussed. Responsibilities of professional organizations in dealing with matters of articulation and standardization are considered, and the need to keep the public appraised of the relevance of foreign languages to their lives is emphasized. Possible sources of assistance outside the profession in getting the message to the public and methods of communicating to the public are discussed. (SW)

Identifiers-*Northeast Conference

The challenge to foreign language teachers at pre-secondary, secondary, and post-secondary levels is considered. Factors which affect the professional tasks of foreign language teachers are students' attitudes toward education and educational institutions, teachers' attitudes toward their jobs, and the public's demands for curricular change, quality education, and attention to special needs. The status of the profession is reviewed in relation to current trends in enrollment, post-secondary entrance and degree requirements, curriculum, certification, and emerging goals. Directions in the professional education of prospective foreign language educators and the status of the continuing education of experienced teachers are described with particular emphasis on the states that comprise the Northeast Conference on the Teaching of Foreign Languages. Broad-based academic and teaching-specialty preparation, broad-based experiential preparation, and competency-based teacher education approaches to the education of new and experienced language teachers are discussed. Appendices provide a Harvard University teaching fellow training model, a model assessment form of student participation and performance in a methods course, and examples of protocol modules. (SW)

Identifiers-*Northeast Conference

Communication within the foreign language profession and with the public is discussed. The responsibilities of national, regional, state, and local professional organizations in dealing with matters of articulation and standardization are discussed. Articulation means setting up common goals and ideals for foreign language learning and teaching for all languages in general and for specific languages. Articulation implies that national, regional, and local norms be set up to establish minimal competencies expected of both students and teachers. Teachers of the same language at a specific level and teachers of the same language on different levels need to communicate. Both formal and informal articulation between FLES, secondary, two-year college and four-year college personnel are needed. Articulation with foreign language personnel in adult education and with professionals in other disciplines is discusseo. There is a need to keep the public appraised of the continuing and growing relevance of foreign languages to their lives and of the integrative function of language study and its role in liberal arts and preprofessional education. Possible sources of assistance outside the profession in getting the message to the public are government agencies, consulates, parents groups, and civic associations. Methods of communicating the message to the public are covered. (SW)

Identifiers-*Lingua Francas, *New Guinea Pidgin

The majority of the languages spoken in Papua New Guinea are highly diverse, belong to many unrelated groups, and are spoken by small language communities. This situation has resulted in widespread multilingualism and the emergence of lingue franche,'' including the police-type, such as Hiri Motu. Hiri Motu, adopted as a symbol by the Papua Independence Movement, has acquired equal status in many respects with New Guinea Pidgin (NGP). The growth in the use of NGP has led to the emergence of a new, heavily anglicized sociolect, Urban Pidgin, which in turn has resulted in a weakening of the status of NGP both as an independent language and as a lingua franca. Although English occupies a prestige position in Papua New Guinea, recent attempts have been made to diminish this prestige. It seems likely that NGP will continue to surpass English in usage. In view of this trend, the government of Papua New Guinea has taken steps toward the standardization and lexical enrichment of the language, such as a proposal to establish a National Translation Service. Standardization efforts must concentrate not only on the lexicon of NGP but also on its grammatical structure. (AM)

This report describes bilingual education programs in England that promote the Welsh and Gaelic languages. The section on Welsh includes discussions of: the history of the Welsh language, the Welsh books scheme to promote the availability of published materials in Welsh, the activities of the national language unit of Wales, external examinations, proposals toward a national language policy on Welsh education, Welsh schools, and schools council committee for Wales. Also covered are higher education, teacher training, Welsh in the community, Welsh communities abroad, references and sources, select bibliography, and a list of organizations that promote the Welsh language. The section on Scottish Gaelic includes historical notes, Gaelic in the community, Gaelic in schools, external examinations, higher and further education, teacher training, teaching materials, select bibliography, and a list of organizations concerned with promoting the Scottish Gaelic language. A brief chapter on the Irish language is also presented. Various tabular and pictorial material statistically present the percentages of Welsh/English and Gaelic/English bilingualism. (EJS)

Identifiers-*Polytechnics

The aim of the conference discussed in this report was to make a critical appraisal of the achievements of language teaching in the polytechnics and similar institutions, and to attempt to suggest lines for future development. All speakers were encouraged to be critical and provocative in order to stimulate conference discussions on how language teaching can be improved. After an opening address entitled ``Modern Languages in the Polytechnics: Present and Future,'' specific addresses are presented along three themes with one or more speakers representing each theme. Summaries of discussion group reports for each theme are also presented. The first theme, ``Where Have We Got To So Far?'' includes a critical analysis of the achievements of language teaching in the polytechnics and other colleges. The second theme, ``Languages and Social Sciences: How Can They Live Together?'' encompasses two addresses, one on living with linguists and the other on bridging the gap. The final theme, ``Languages in the Schools and in Higher Education: The Interface,'' covers output from schools, input to education, output from higher education, and feedback to schools. Conference conclusions, recommendations, and a list of participants are appended. (EJS)

Descriptors-*Annotated Bibliographies, Audiovisual Aids, Booklists, Composition (Literary), Culture, Educational Resources, Elementary Secondary Education, Grammar, Higher Education, *Instructional Materials, *Language Instruction, Languages for Special Purposes, Language Tests, Reading Comprehension, *Reading Materials, *Second Language Learning, *Spanish, *Supplementary Textbooks, Vocabulary

This publication, part of an annotated bibliography of language teaching materials for Spanish, contains supplementary materials and readers with and without a recorded or visual component. It contains a contents list, the annotated entries, an index of authors, editors, compilers and adapters, and a title index. The first section lists supplementary materials on the following topics: (1) comprehension, (2) oral and written composition, (3) translation and prose composition, (4) structural exercises, (5) revision and test material, (6) phrase books and travellers' language guides, (7) vocabularies, (8) background study, and (9) special uses of language. The second section on readers provides the following information: basic bibliographical details, an annotation describing the material, a statement of components, and a guide to the linguistic and age-interest levels of the material and the tenses used. Only published material which is readily available in the United Kingdom or in areas where there is a UK distributor are included. A price list is included. (Author/AMH)

Descriptors-*Department Directors (School), Elementary Secondary Education, Faculty Development, Higher Education, Inservice Courses, Inservice Programs, *Inservice Teacher Education, *Language Instruction, *Language Teachers, *Teacher Education, Teacher Employment, Teacher Improvement, Teacher Interns, Teacher Programs

A series of eight papers on training of modern language teachers are addressed to the following topics: (1) the organizational and administrative framework of inservice training, with special reference to the probationary year; (2) the needs of the schools for teachers with particular abilities; (3) how institutions seek to equip students for teaching and subsequently help them during their first year; (4) the role of the LEA advisor; (5) how best to use existing resources to reinforce in-service training to satisfy future needs; and (6) the functions of a good head of department and how he can be trained for the task. A summary of conclusions is presented that includes specific proposals and suggestions concerning the ``divisions'' of in-service training: the probationary year, the early career years, and preparation for promotion and responsibility. Several other specific proposals are also offered for the continuing training of the modern language teacher. Two appendices present a discussion of intensive courses for modern language teachers and a list of conference participants. (EJS)

Identifiers-*French Railroad System

This bilingual French-English unit for first-year high school students discusses how to travel by train in France. It is divided into five parts: (1) Les Horaires,'' which teaches the twenty-four hour time system and how to read a timetable; (2) Le Billet,'' which teaches how to purchase a train ticket and the choices that are available; (3) A la Gare,'' an audio-motor lesson which emphasizes what can be done at a French train station and on a French train; (4) Le Train,'' which discusses information about the French train system and the parts of a train; and (5) Le Pauvre Americain,'' which presents observations and discussion of confused Americans on French trains. These modules are designed to be used consecutively although not necessarily on a daily basis. Each section is illustrated with pen and ink drawings and contains specific objectives, the evaluation procedure, necessary content information, the instructional procedure, a Lesson Aids'' section with dialogues, vocabulary exercises, check questions, and follow-up activities. A lesson in English containing useful information for the American traveler, several skits, a worksheet and a quiz complete the unit. (Author/AMH)

Identifiers-*French Postal System

This bilingual French-English unit on the French Post Office (PTT) is intended for beginning and intermediate students of French and is appropriate for individualized learning situations. The introduction specifies the general goal (to enable students to use the varied services of the French postal system), and outlines five specific performance objectives and general instructions to the teacher. The learning activities, illustrated with pen and ink drawings, are divided into four sections: sending letters and postcards, sending a package, making a telephone call, and becoming familiar with the other services of the PTT. Each of these sections revolves around a situation and includes the dialogue, necessary vocabulary, and self-tests. A final get-it-together" test and a crossword puzzle complete the unit. (AMH)

Available from-National Indochinese Clearinghouse, Center for Applied Linguistics, 1611 N. Kent Street, Arlington, Virginia 22209 (free)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Adult Education, *Adult Students, *Annotated Bibliographies, Career Development, *English (Second Language), *English for Special Purposes, Grammar, *Indochinese, *Instructional Materials, Language Instruction, Pronunciation, Reading Materials, Refugees, Resource Guides, Resource Materials, Second Language Learning, Textbooks, Vocabulary

This bibliography is designed to provide Americans who are working with Indochinese refugee adults with an idea of what materials are commercially available in the field of teaching English as a second language. Materials were chosen because they have been successfully used with Indochinese refugees over the last three years, or because they have been identified as needed. The focus is on the needs of the adult refugee who is planning employment or vocational training. The annotations refer to materials as being on the beginning, intermediate, or advanced level; this scale refers to ability to speak English and is not the same as level of education. The bibliography includes English as a second language (ESL) texts with emphases on course texts, pronunciation and fluency, readers, writing texts, vocabulary and idioms, grammar practice, ESL tests, and student references. Supplementary materials listed include ESL in specific vocational areas, employment skills, and survival skills. Teacher aids and information on the languages and cultures of the refugees are also covered. (SW)

Producing Exciting and Motivating Dittos.

American Council on the Teaching of Foreign Languages, New York, N.Y.
Pub Date- 78
Note-9p.
Available from-American Council on the Teaching of Foreign Languages, Materials Center, 2 Park Avenue, New York, NY 10016
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Classroom Games, Classroom Materials, Classroom Techniques, Elementary Secondary Education, Games, *Instructional Materials, *Instructional Media, *Language Instruction, *Motivation Techniques, Puzzles, *Student Motivation, Teacher Developed Materials, Teaching Methods, Visual Aids

This guide presents techniques to enable teachers to produce dittos that generate student interest. One major technique for creating different dittos is variation of format or layout; another way to create appealing dittos is to use color to emphasize a new spelling, grammar, or vocabulary point. Crossword puzzles, word searches, and anagrams (not necessarily in block form) can be used by teachers as motivational activities. Sketches or stick figures can also be drawn on a ditto as another technique to motivate students. Other techniques involve dittos that are cut apart; games, such as a form of Jeopardy; and programmed dittos where students cover up or fold back the answers until they have done the exercise. Variation of content away from the routine of grammar exercises or vocabulary drills can also be more exciting, for example, with a ditto that encourages communication. Examples, figures, and how-to'' instruction accompany the text. (EJS)

Descriptors-*Bilingual Education, *Bilingual Students, Curriculum Development, Curriculum Guides, *Curriculum Planning, Elementary Secondary Education, Information Needs, Information Science, Information Seeking, Information Utilization, *Library Instruction, Library Role, *Library Skills, Relevance (Education), *Student Needs, Teaching Methods, Teaching Models

Identifiers-*Limited English Speaking Ability

This model, a preliminary overview, suggests that learning library skills be integrated into bilingual bicultural programs, as limited English speaking ability (LESA) students need information skills to cope with a world in which current information is essential. Integrated library skills instruction, in which collaboration between teachers and librarians is necessary, is defined as two sets of general curricular and library skills objectives, activities, and assessments merged into a unified curriculum. Support for this instruction lies in the hypothesis that classroom teachers have a dominant role in influencing a student's library use or non-use, that library skills are taught most effectively when instruction is integrated into the actual curriculum, and that library skills should be taught as basic thinking and learning skills that provide a means for attaining other learning objectives and not as ends in themselves. General suggestions for implementation of such a program are given, and a table of steps for this process is appended. (MHP)

Yo Estoy Bien, Tu Estas Bien: An Introduction to TA in the Bilingual Classroom.

Intercultural Development Research Association, San Antonio, Tex.
Pub Date- 78
Note-8p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Bilingual Education, *Bilingual Students, *Classroom Techniques, Identification (Psychological), Individual Psychology, Interaction Process Analysis, Psycholinguistics, *Self Actualization, *Self Concept, *Self Determination, Social Psychology, Social Relations, Teacher Role, Teaching Methods
Identifiers-Berne (Eric), *Transactional Analysis

This study presents a rationale for working with the principles of transactional analysis (TA) in the bilingual/bicultural classroom, particularly to develop the child's self-concept. The two basic premises of TA are that all human beings have a fundamental worth that is neither increased nor decreased by anything they may do or refrain from doing, and that we are responsible to a great extent for choosing our own feelings and for deciding how to act upon them. The implications of these premises for the bilingual classroom are enormous: if a child's self-concept is consistently eroded by early and continued academic failure, if the language spoken by those he loves most is treated as a second-rate idiom, and if his home culture is denigrated or ignored, the conclusions that child comes to regarding his essential worth may not be positive ones. The objectives of applying the principles of TA to the bilingual classroom include providing a nurturing environment where positive strokes'' are freely given and received by all students and by the teacher; facilitating communication by teaching new communications skills; and giving students tools they can use in taking responsibility for their own actions and reactions and stopping inappropriate reactions. When these objectives are met, student self-concept is enhanced and learning can take place more readily, pleasurably, and effectively. (EJS)

Identifiers-*Science Language Correlation

This article presents a rationale for correlation of science with language instruction, whether English as a second language (ESL) or first language development. Science can provide a conceptual base for vocabulary and syntactic development. Numerous studies indicate that language ability can be significantly increased through participation in activity science programs. Units can be developed around students' previous experiences building upon their present knowledge and developing self-esteem. Focusing on behavioral objectives will help in planning science activities. Group work which will encourage student discussion and cooperation toward a goal should be planned. Suggested topics for units or learning centers include Foods of Ancient America,'' Mother's Medicines,'' and Clay Like the Indians Used.'' (Author/EJS)

Identifiers-Khmer

The three purposes of this guide are to provide information on the Khmer language, alphabet, and educational systems which will be useful to Americans teaching English to Cambodian refugees; to give specific suggestions for teaching Cambodians to write the English alphabet; and to provide teaching materials that deal with the particular pronunciation problems Cambodians have in learning English. The Khmer language is briefly described in terms of its origin and history; its sounds syllables, vowels, consonants, diphthongs, intonation patterns; its word formation prefixes, infixes, suffixes; and its sentence structure. The Khmer alphabet is discussed, and the history of education and literacy in Cambodia is briefly traced. A short overview of teaching English to Cambodian refugees is presented as is general information on pronunciation lessons, fourteen of which are included in the guide. Sources for further reference are appended. (EJS)

Using the Foreign Language Assistant: A Guide to Good Practice.

Central Bureau for Educational Visits and Exchanges, London (England).; Centre for Information on Language Teaching, London (England).; National Association of Language Advisers, London (England).

Pub Date-77
Note-32p.
Available from-Centre for Information on Language Teaching and Research, 20 Carlton House Terrace, London SW1Y 5AP, England
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Conversational Language Courses, Higher Education, *Language Instruction, *Language Programs, Modern Language Curriculum, Native Speakers, Secondary Education, *Second Language Learning, *Teacher Education, Teaching, *Teaching Assistants, *Teaching Experience, Teaching Methods, Tutoring

The guide is addressed to the colleagues of the foreign language assistant in the languages departments since the assistant's work, to a large extent, depends on a successful relationship with them. The foreign language assistant is defined as a native speaker of a foreign language, e.g. French, German, Spanish, Italian, who serves in a British school for a 1-year appointment. Assistants are usually between 20 and 25 years old, female, and future teachers. It is asserted that the formerly restricted role of the assistants, that of preparing oral examinations, providing the only spoken foreign language pupils ever heard (in some cases), and minimal involvement in departmental activities, should now involve the development of all language skills for a wider range of pupils. It is pointed out that this new role consists not only of linguistic and social contact with pupils, but of the preparation of materials and in-service training of language teachers. A summary of the main administrative arrangements that are typically made before an assistant arrives at a school is presented. The assistant's arrival and induction at the school are described, and the assistant's role in the school and in the classroom (middle school, intermediate level, sixth form) are also discussed. One appendix summarizes aids and activities for the assistant and another lists reference materials. (EJS)

Identifiers-*Native Language Ability

This paper examines some experimental evidence relating to the influence of second language learning on native language performance, including results from elementary school Latin programs, research on bilingualism and intellect, and elementary school programs in modern languages. Some studies of Latin FLES programs show that specially designed Latin curricula appear to improve English language arts test scores, although results are not always statistically significant. Studies in bilingual, immersion, and language-switch programs appear to have only marginal relevance, since determining variables are usually sociological, economic, or political rather than linguistic. Also, the difference between learning a language in a communicative setting as opposed to the traditional foreign language classroom must be accounted for. Studies comparing English language arts scores of French and Spanish FLES students with scores of non-language learners are not conclusive; those indicating a positive impact are susceptible to criticism. More conclusive evidence concerning the influence of foreign language study on native language usage will be provided only by a longitudinal study which takes into account I.Q., English ability before taking foreign language, socioeconomic status, language of the home, experience abroad, high school curriculum, language studied, and grade received. Tabular data are included. (EJS)

Descriptors-Adjectives, *Determiners (Languages), *Form Classes (Languages), *French, Function Words, *Grammar, Instructional Materials, Language Patterns, *Morphology (Languages), *Nominals, Pronouns, Sentence Structure, Suffixes, Syntax
Identifiers-*Noun Gender

This guide presents a system for determining the gender of French nouns that has been tested against 12,000 pages of general reading: novels, history, social science, law, finance, and the Bible. The guide discusses the rules for determining gender and also presents various lists of the non-routine or exceptions to the rules. It is asserted that French nouns fit into 20 patterns that cut the gender-memory effort by at least 90-92%; the system's underlying principle is management by exception'': using patterns to isolate the non-routine nouns for special attention. The guide is organized into three phases'' of increasing difficulty or complexity: phase I discusses non-mute (-e) nouns, natural persons (individuals), general mute (-e) nouns, and mixed-consonant mute (-e) nouns; phase II covers nouns from adjectives, ellipsis, (-que) nouns, chemical elements and compounds; and phase III includes gender profiles, notes for further study and an advanced list of exceptions for businessmen, and the why and how'' of the mute (-e) masculines. The normal sequence of development of Spanish phonology and Spanish grammatical patterns in the speech of native Spanish-speaking children, two to five years old, was studied to determine the syntactic structures and range of language variability at each chronological age level. Middle-class children, living in the Lower Rio Grande Valley of Texas, whose parents earned between $4500 and $20,000 a year, were interviewed for a total of about two hours. The elicitation technique was basically conversational and materials of different types were used, including dolls, cars, and storybooks. The first interview consisted mostly of general questions; the second concentrated on verb tenses and moods; and the final interview included a morphology test which utilizes Spanish nonsense words. An experimental Spanish phonology test was also administered. The child was asked to repeat certain sentences that contain all the phonemes and significant allophones of Spanish. Syntactic structures found in each age group, a discussion of certain grammatical features, and an examination of the deviations encountered at the age levels are presented. Examples are given for almost every structure, but the deviations are not included. It is suggested that the findings would be valuable to kindergarten and primary teachers, curriculum writers, and test developers. (SW)

Identifiers-*Critical Period Hypothesis

Recent studies in productive phonology among immigrants have supported the case for the existence of a critical or sensitive period in language acquisition. The present study proposes that the case for a sensitive period would be further strengthened by the discovery of comparable age effects for other linguistic abilities such as listening comprehension. It was hypothesized that the most powerful predictor of comprehension would be the age at which the individual had begun using English and that the amount of practice with second language and other attitudinal and usage variables would show only indirect relationships with comprehension skill. Sixty male Italian immigrants listened to taped English sentences masked with background noise at four signal-to-noise ratios. Comprehension scores were correlated with age of beginning English but were not predicted by number of years in the United States or by other variables investigated. Scores of those who arrived before early adolescence resembled those of native speakers, while those subjects who began English toward the end of adolescence showed a marked comprehension deficit. These results supported the hypothesis that a sensitive period exists for the acquisition of a second language. The discussion explores the sensitive period as a developmental concept and treats two themes that occur frequently in the acquisition literature: the importance of motivation and the role of input. Identifiers-Canada, Quebec (Montreal)

An investigation was undertaken to assess student attitudes toward learning and using French and their reasons for studying it. It was felt that a more thorough investigation of these issues might help to broaden knowledge of some of the non-educational, social consequences of immersion programs. English-speaking students in sixth and eleventh grades in both immersion classes and regular French programs were given a questionnaire intended to evaluate their feelings about using French, their actual use of the language outside school settings, their motivations for learning French, and their perceptions of their own competence in it. At the same time, the immersion students were asked to assess the immersion program itself. Results indicated that the immersion students felt more at ease about speaking French and were more competent than students in the regular program. However, there was no indication that immersion students sought opportunities to express themselves in French. These results were explained in relation to three possible variables: (1) the speaking skill was felt to be weaker than other language skills; (2) students' long-range motivation factors effectively minimized immediate usage; and (3) students' usage of the language reflected general social norms in the community. Finally, it is noted that immersion students were generally satisfied with the program and recommended it to other students. (Author/AMH)

This paper is the fourth in a series of studies focusing on the problems that Israeli students encounter in reading technical texts in English. This study deals with non-native students' understanding of what they read and on how their understanding compares with that of natives. Also being tested is a method for investigating students' understanding of texts. The theory of cohesion developed by Halliday and Hasan provided the researchers with a useful tool for analyzing the target text and for generating a series of questions. These questions were asked of a small number of native and non-native readers of English. It was found that cohesive factors distinguished non-native from native readers but it was not established which of these factors was most important in the reading process. It is suggested that collecting introspective information from non-native informants about how they answer comprehension questions could be helpful in understanding second-language reading. Descriptors-Bilingual Education, Bilingualism, *Bilingual Students, *Comprehension Development, Elementary Education, Expressive Language, Grammar, *Language Development, Language Proficiency, Language Research, *Language Skills, Linguistic Performance, Receptive Language, Second Language Learning, Syntax, Verbal Development, Vocabulary Development, *Vocabulary Skills

The purpose of this study is to compare the English syntactic structures produced in spontaneous oral language and the receptive English syntactic and vocabulary skills of bilingual Spanish and Indian children and monolingual Anglo-Americans, all of whom qualify for Title I elementary schools (Grades 1-6). People in Action, the Northwestern Syntax Screening Test (NSST), and the Peabody Picture Vocabulary Test (PPVT) were used to compare the subjects on these skills. Significant results were found when using multivariate analysis of variance on the three dependent measures of syntactic and vocabulary performance on the three levels of language. Multivariate, along with univariate, analysis showed significant differences on these variables among grade levels. Bilingual Spanish and Indian children were less able to comprehend verbal information as shown through the PPVT, and to understand and produce English syntactic structures as determined by their NSST and Developmental Sentence Analysis Procedure performances, than their monolingual Anglo-American peers. It is concluded that educational programs should be varied to match the language performance of individual children rather than be based on group scores, and therefore, majority language instruction and modifications of the manner of presentation of verbal instruction are needed for bilingual students in Grades 1-6, as well as inclusion of syntax and vocabulary instruction in the curriculum at all grade levels. Identifiers-Canada, Ontario

This study examines the hypothesis that the French used by a large number of Franco-Ontarians represents a linguistic system (or several systems) that differs from Standard French. In addition, a review of previous research leads to the inverse hypothesis, that Ontarian French represents a body of different systems or sub-systems that are more or less related to Standard French. It is proposed that Ontarian French is as valuable and efficient a communicative tool as is Standard French, when used among Franco-Ontarians in informal, everyday communication. The implications of this hypothesis are also examined with respect to: (1) interpretation of results on proficiency tests of Standard French, (2) development of further instruments to measure the proficiency of Franco-Ontarian students in French, and (3) development of classroom materials that focus on the particular needs of these students. This annotated bibliography on the teaching of modern foreign languages is the product of a West German information dissemination system that is similar to ERIC. The bibliography is published quarterly and lists items compiled in conjunction with the ERIC Clearinghouse on Languages and Linguistics as well as with a number of institutions all over the world. Most of the 81 items in this issue appeared in 1977 and 1978 but some are dated earlier. Althought the items deal primarily with modern language instruction several other areas of linguistics are considered. The entries include mostly German, English, French and Russian titles. The publication is composed of three main sections: (1) an alphabetical author/title listing of items, including full bibliographic citations and subject index terms; (2) abstracts of the items in German; and (3) a subject index developed from the descriptor terms assigned to each entry. These three main sections are preceded by directions on the use of the bibliography and lists of sources cited periodicals, publishers and institutions. The publication concludes with a cross-reference index of author/title to entry number. (TL)

Identifiers-*Subjunctives (Verbs)

An approach to teaching the subjunctive in the foreign language classroom is presented here. Based primarily on the work of the linguist William Bull, the numerous and vague ``rules'' are reduced to two essential principles that determine subjunctive use. The materials consist of a sixteen-page teaching guide, an outline for student use, and a set of coordinated exercises that explain the principles that govern the use of the subjunctive. The approach is designed for use with any first-year Spanish text that divides the subjunctive presentation into an analysis of the noun clause, the adjectival clause and the adverbial clause. Many drills and exercises from other textbooks may be used with it. Since first-year texts present subjunctive concepts alonq with the forms for the present subjunctive before introducing the imperfect, this approach uses the present tense in all examples and exercises. By translating or ``backshifting'' the main verbs into the past, the exercises are easily adaptable for teaching the past subjunctive as well. (Author/AMH)

This volume, one in a series on modern language testing, collects four essays dealing with current approaches to language testing. The introduction traces the development of language testing theory and examines the role of linguistics in this area. The Psycholinguistic Basis,'' by E. Ingram, discusses some interpretations of the term psycholinguistics'' and relates them to traditional and recent language testing practices. Psychometric Considerations in Language Testing,'' by J.L.D. Clark, discusses aspects of psychometric practice with regard to three broad categories of purpose within the area of language testing: (1) prognostic testing, (2) diagnostic testing, and (3) proficiency testing. The Sociolinguistic Foundations of Language Testing,'' by J.A. Fishman and R.L. Cooper, illustrates the usefulness of a sociolinguistic approach and provides justification for it by the construction of language assessment procedures. Pragmatics and Language Testing,'' by J.W. Oller, Jr., discusses in historical perspective the major concepts of pragmatics and relates them to language testing. (AM)

Identifiers-*Conversation

This handbook is a compendium of communication testing techniques submitted by French teachers from the United States, France, and Canada. The majority of the handbook consists of sample oral communication tests. The introductory section defines communication, outlines communications testing, and discusses listening comprehension, oral expression, and conversation. A general scoring system adapted from the Foreign Service Institute rating procedures by Bartz and Schulz is outlined, based on fluency, comprehensibility, amount of communication, and quality of communication. The sample communication tests are organized by category: listening comprehension, oral expression, and conversation. Within each category, the following sequencing is presented: beginner level, beginner-intermediate level, intermediate level, intermediate-advanced level, advanced level, and all levels (beginner, intermediate, and/or advanced). Information is presented on test preparation, administration, and scoring. Sample scripts and the English equivalents are provided, and a few diagrams are included. (SW)

Descriptors-Bilingualism, Black Dialects, Comparative Analysis, Content Reading, Elementary Secondary Education, *English (Second Language), Error Analysis (Language), Higher Education, *Interference (Language Learning), Language Skills, Literature Reviews, Nonstandard Dialects, Oral Reading, Phonology, Reading Comprehension, Reading Development, *Reading Instruction, *Reading Skills, *Second Language Learning, Semantics, Sociolinguistics, *Spanish Speaking, Syntax, Teaching Methods

This paper examines the questions of whether or not previous knowledge of Spanish (oral and/or written) interferes with an English as a second language (ESL) student's acquisition of English reading skills, which skills are affected, and what classroom techniques are successful in dealing with it. Two contrasting views of reading are examined: emphasis on oral reading skills and on reading for meaning. A review of the current literature includes: (1) tables illustrating sociolinguistic differences between Black English speakers and Spanish-speaking ESL students, (2) conclusions based on current literature and the author's experiences, and (3) Spanish vs. English sound/symbol relationships. Problems that are identified with the current literature are the undefined use of the terms bilingual'' and bilingualism,'' the nonlinguistic use of the term interference,'' failure to distinguish between interference and insufficient knowledge of English, and misinterpretations of sources. Do's'' and don'ts'' for teaching ESL reading to native speakers of Spanish and a bibliography are included. (Author/SW)

A teacher of English in Sweden reports on experiences in organizing international school correspondence and tape exchange in English classes. Goals of the correspondence are the teaching of language, teaching of the culture of other countries, and promoting better international understanding. School correspondence can provide plenty of popular nonfiction learning material that is useful in practicing and improving communicative skills. To promote communicative skills, the technique of dialogue in tape-slide shows has been used; pictures can be described through questions and answers in a relay dialogue. Students can bring their letters to read aloud in class, with commentaries in English, if possible. It is suggested that presenting pupils with verbal and pictorial items such as recordings, magazines, and song texts from English-speaking countries can stimulate interest in international correspondence. Identifiers-*Conversation, Grice (H P), Implication

The experiments described in this paper compare inference-based and expectancy-based models of the comprehension of indirect, non-literal expressions. The inference-based model claims that the comprehension of non-literal meanings requires more and deeper processing than the comprehension of literal meanings. The expectancy-based model rests on the presupposition that the speaker will respect Grician principles of conversation and will supply any information the hearer needs to know. The inference-based model discounts the relevance of this information in the inference process. The three experiments examined comprehension latencies for unfamiliar proverbs used both literally and figuratively after paragraphs of two lengths. In all three experiments, figurative uses of the proverbs were understood more rapidly than literal uses, and proverbs following long paragraphs were understood more rapidly than proverbs following short paragraphs. The data supported the hypothesis that comprehension is a unitary process concerned with determining what the other speaker means, and that ease of understanding is proportionate to the amount of shared information and presuppositions. Novel, non-literal uses of language are not intrinsically more difficult to understand than literal uses. (Author/AMH)

Identifiers-*Guessing

This paper reviews some of the strategies the receiver uses in the process of comprehending a message in a foreign language and discusses some of the ways in which the listener/reader goes beyond the actual physical form of the message during this process. The role of guessing is discussed in the context of the following theories: the signal-detection theory, information theory, an analysis-by-synthesis theory of perception and linguistic theory. The signal-detection theory implies that a process of decision-making is involved in comprehension. Information theory yields a definition of information as "the reduction of uncertainty." An analysis-by-synthesis theory of perception attributes to the perceiver an ability to predict and check "what goes with what." Finally, experiments in linguistic theory show that recall of sentences is meaning-preserving. Of particular interest is the work of Bever in listening and Schlesinger in the reading process. Their studies focus attention on anticipation as a strategy for comprehension, a finding consistent with an analysis-by-synthesis theory of perception. Although most experimental work has concentrated on the perceiver's ability to decode or anticipate the signal, many studies demonstrate the subjects' capacity to compound information which can be inferred from the information they are given. In conclusion, the implications of this discussion for the language teaching situation are indicated. (Author/AMH)

Identifiers-Community Language Learning, Silent Way

This volume contains six essays on both theory and practical learning techniques for second language learning. In ``Towards a Synthesization of Teaching Methodologies for TESOL,'' James W. Ney discusses synthesizing the audio-lingual approach and the cognitive-code theory of language learning. In ``Should We Teach Children Syntax?'' Heidi C. Dulay and Marina C. Burt provide data on the ``habit formation'' vs. ``creative construction'' nature of second language learning by children and report on a second study that sought to determine whether there is a natural sequence in children's acquisition of basic syntactic structures in learning different second languages. In ``Community Language Learning: A Discussion and Some Questions,'' Richard L. Light addresses the emotional as well as the cognitive aspects that are involved in learning. In a review of Caleb Gattegno's book, ``Teaching Foreign Languages in Schools: The Silent Way,'' Earl W. Stevick describes the Silent Way, which involves temporary silence after the teacher presents new material. In ``Non-Verbal Communication in the Classroom: A Frill or a Must?'' Carmen Judith Nine-Curt discusses non-verbal communication across cultures in ESOL and bilingual classrooms, including kinesis (movement), proxemic (space), haptic (touching), and parakinesic dimensions of communication. In ``Guidelines for the Certification and Preparation of Teachers of English to Speakers of Other Languages in the United States,'' William E. Norris presents a revision of criteria adopted by the TESOL Guidelines Conference, May 1970, and a preliminary draft by James E. Alatis. (SW)

Works by European and American educators from the Renaissance to the twentieth century are presented. A historical re-evaluation of foreign-language teaching combined with the scientific approach of modern linguistics can provide valuable insights for current teaching and learning approaches. Selections are presented from the writings of the following educators: Desiderius Erasmus of Rotterdam, Martin Luther, Juan-Luis Vives, Sir Thomas Elyot, Sir Roger Ascham, Michel de Montaigne, Eilhard Lubinus, Johann Amos Comenius, Tannegui Le Fevre, Claude Lancelot, Geraud de Cordemoy, Jacques-Benigne Bossuet, John Locke, Jenkin Thomas Philipps, Immanuel Kant, Johann Gottfried von Herder, Johann Heinrich Pestalozzi, Johann Gottlieb Fichte, Johann Friedrich Herbart, Thomas Arnold, Charles W. Eliot, and Maximilian David Berlitz. The introduction to the volume summarizes the ideas of each of the educators. (SW)

Identifiers-*Answers, *Questions

The assumption that question-answer sequences consist of two moves was examined using data from recordings of second-grade classrooms in Austin, Texas. Interactions initiated by children's spontaneous questions in informal, small group settings were evaluated. Twenty-nine dialogue samples are presented and analyzed. Four issues in the study of interaction are discussed: the selection of data for analysis, the use of ``null set'' in discourse, recognition of a ``notable absence,'' and the usefulness of a two-move unit for describing events in conversation. The data indicate that answers are negotiated, and that three moves, rather than two, are required to accomplish an inquiry sequence: a question, a reply, and an evaluation. The status of a reply as answer or nonanswer is not determined until a questioner contributes his evaluation. A replier therefore does not know how his reply fits into an on-going conversation until the questioner reacts to it. (SW)

Identifiers-*Formality, Speech Events

This paper considers a distinction frequently used in sociolinguistics and ethnography of speaking to describe speech events: their formality or informality. Three principle meanings of ``formality'' found in the literature concern whether the formality relates to properties of a communicative code, properties of the social setting in which a code is used, or properties of the analyst's description. Four aspects of formality that apply cross-culturally are: (1) increased structuring of speech; (2) consistency in terms of the social significance of variants chosen at different levels of communicative expression; (3) invoking of positional identities of participants; and (4) emergence of a focus in speech interactions. The role of these variables in cross-cultural comparison and a comparison of certain speech events among the Wolof and Mursi are discussed. All societies seem to make distinctions among speech events according to the four aspects of formality. Comparisons within a society and between societies can be made according to how they connect the various aspects of formality and what concomitant effects formalizing a speech event will have. Formality, in this view, is largely a process of focusing, which can operate along various dimensions. (SW)

Descriptors-Bilingual Education, *Bilingualism, *Bilingual Students, *Code Switching (Language), Communicative Competence (Languages), Elementary Education, English (Second Language), *Interaction Process Analysis, Interviews, Language Patterns, Language Research, Linguistic Patterns, Phonology, *Puerto Ricans, *Sociolinguistics, *Spanish Speaking, *Speech Communication, Syntax

This study of code switching among Puerto Rican children attending a New York City public school focuses primarily upon the correlation between interaction rules, as perceived by the participants, and code switching. Code switching strategies of a seven-year-old boy, an eight-year-old girl, and a 10-year-old girl in the bilingual third grade class were analyzed in two interactions: an individual interview with the researcher, a female New York Puerto Rican, and a domino game in which all three children participated. The interviews were conducted in both Spanish and English; the interviewer began in Spanish and then switched to English without warning. The study reaffirms other research concerning the ability of children to switch situationally with ease, the superior power/status of English vs. Spanish, and the use of stylistic or conversational code switching for emphasis, addressee specification, elaboration, and idiomatic expressions. The analysis also suggests that, as expected, bilinguals beyond the six-year-old "pre-operational stage" do not "only focus on one feature or variable of a situation at a time" (Genishi, 1976), but their language choices often reflect awareness of several social, linguistic, and situational variables. Child-adult dyads in question-answer interactions constrain code switching, and informal peer interactions stimulate it. Implications for bilingual education and appropriate research methodologies are briefly considered. Examples of dialogues are included. (SW)

English is spreading throughout the world far more rapidly than any other language; however, the level of sentimental attachment or genuine liking for English falls far short of the level of necessity-based desire to learn it. There is a possibility that the spread of English is decreasing: given some rapid economic or military change around the world, there could be a concomitant separation of peoples' attachment to English. In many countries, local authorities are engaged in language planning to foster the positive image of the national language for many functions for all people, and simultaneously to foster the spread of English in its function a difficult set of co-occurring goals. As the spread of English makes the rest of the world increasingly bilingual, the Anglophone world remains predominantly monolingual. There is substantial bilingual education in the United States, but it is primarily non-transitional; the level of functional bilingualism in the Anglo world is very low. The survival of America as a democratic civilization depends upon the survival of a pluralistic mythology through greater balance between English and the other languages in the U.S. It is the responsibility of CATESOL and all the TESOL's to work toward such a balance. Descriptors-Class Activities, Classroom Techniques, Communicative Competence (Languages), *Conversational Language Courses, *Discussion (Teaching Technique), *English (Second Language), Grammar, Language Enrichment, *Language Experience Approach, Language Fluency, *Language Instruction, Learning Activities, Questioning Techniques, Second Language Learning, Speech Communication, *Teaching Methods, Vocabulary

This paper describes a technique for giving ESL (English as a second language) students with rather limited English ability an opportunity to talk on a regular basis. The technique takes into consideration: (1) the time limitations of the classroom; (2) the tendency of some students to dominate discussion and the need for giving others opportunities to talk without pressure; (3) teacher preparation time; (4) the teacher's need to "keep things going" in class discussion; and (5) usability as a regular part of class activities. The technique makes use of the language-experience approach, and with student-generated questions allows the class, in a sense, to do the teacher's preparation. It is highly productive in extracting the maximum amount of English that the student knows in both a formal and grammatical as well as an informal and communicative way, on a meaningful level. The four steps involved in the technique include: eliciting questions; small groups or pairs of students asking and answering questions; writing only the answers in a paragraph, like a story; and formal reading or speaking of corrected papers by students. The total time for these steps is 50 minutes or longer. The details of conducting these four steps and further suggestions are presented. (EJS)

A set of specific and practical ideas for teaching language skills are presented, centered around the use of charts or "squares" of pictures that represent ideas that can be expressed in basic English. The focus is a story square, a system of pictures tied together by a plot and presented to the class as a puzzle. Squares for pronunciation can be used to help increase the ability to aurally distinguish and orally produce sounds that are often confused. Squares have been devised to contrast the present perfect, the simple past, and the "going to" forms of verbs. The story square involves three phases: discovering the story, asking simple questions based on the square, and using the square to deal with more complex structures. For lower-level classes, the plot can be streamlined to include only the essentials, and drills are chosen to meet student needs. From a basic plot, details and embellishments can be added depending on the level of the class. A square that has been used successfully with an advanced class is presented. It is concluded that the goal of the story square is to help enhance students' cooperative learning skills, to help them master basic grammar, and to improve their fluency. (SW)

The academic skills that students of English as a second language (ESL) require to survive in American educational institutions are identified, and ways of incorporating the skills into ESL classes or programs are suggested. The following academic skills are important to ESL students: (1) ability to take notes of lectures and textual materials; (2) ability to organize essay type examination questions and write accurately under the pressure of time; (3) ability to recognize and understand the thinking strategies implicit in objective type test questions; (4) ability to read at varying rates with high level comprehension; and (5) the ability to research and write a reference paper. Instruction can be individualized or in a group, but the skills should be introduced as systematically as possible. By using a syllabus, a teacher can proceed in structuring class lessons and activities as best fits each group of students. A procedure for teaching note taking is presented that is designed to help in outlining and in differentiating main divisions and ideas from supporting details. Each of the survival skills is introduced to the students, integrated with assigned texts, and reinforced through practice during the term. A formal outline pattern and a list of some useful materials for academic skills development classes and programs are appended. (SW)

Descriptors-*Applied Linguistics, Contrastive Linguistics, *Curriculum Development, *English (Second Language), French, Grammar, *Language Instruction, Linguistic Theory, *Teaching Methods, *Transformation Generative Grammar, Writing Skills

This paper describes a teaching method based on generative transformational grammar that has been successfully used in the ESL (English as a second language) classroom. The method and techniques are based on the Elgin-Rush study in which the problem of teaching basic writing skills to native English speakers was addressed. The present study addresses an extension of the use of the Elgin-Rush method to the teaching of grammar to intermediate ESL students. The method's underlying principles are to teach grammar by presenting the student with language data structured so as to isolate and illustrate one grammatical principle, and then to have the student formulate a rule that explains the data. The student will thus acquire more meaningful control of the grammatical rules of English, i.e. closer to the level of native competency. The 18 Algerian students involved in this study at San Diego State University were studying English to achieve high scores on the TOEFL (Test of English as a Foreign Language). The contrastive analysis technique was found most useful when used to illustrate only a specific presuppositional difference between the two languages. Four areas were chosen for grammar lessons: (1) the presuppositions of English verb combinations; (2) the presuppositions involved in complement choice in English; (3) the subordinating mechanisms of English other than use of complements; and (4) the function of prepositions in Engish. The ten exercises developed during the study are described, and samples are presented. (EJS)

Identifiers-*Limited English Speaking Ability

The test reviews in this guide are intended to be used by school personnel charged with locating and administering appropriate assessment instruments to limited-English-speaking elementary school children. Assessment instruments are reviewed for native speakers of Chinese, French, Italian, Navajo, Portuguese, Spanish and Tagalog. Each instrument reviewed met nine criteria and was analyzed for cultural bias by a cultural and linguistic review panel. The descriptive information section of each entry contains the following types of information: purpose, score interpretation, grade range, target ethnic group, administration time, administrator requirements, author, source and cost. The following types of tests are included: Language Dominance, English Language Proficiency, Native Language Proficiency, Achievement in Multi-Subject Areas, Achievement in Individual Subjects, Learning Styles (for Spanish-Speaking), and General Ability and Scholastic Aptitude. Four appendices provide a comprehensive index, a source index, a glossary of technical terms, and a bibliography. (AMH)

Knowledge of linguistics, a systematic understanding of language and languages, is a necessary qualification for language teachers. In language learning, a mini-language'' is constructed before fluency is approached. Interaction in the language is needed, and the teacher, as the partner in the interaction, must be able to work within the narrower limits of a mini-language. Understanding of the linguistic aspects of the specific language (the student's mini-language) and of general processes of language development and operation are needed by the teacher. A good background in general and English linguistics also would be a good prerequisite for taking university-level introductory language courses. A language course must give both a common core of the language and prepare students for effective self-instruction. Vocabulary building and use of the dictionary and language study for literary studies are addressed Ways that linguistics applies to language classroom activities are sketched, and experiences and insights from teaching a course in Hindi to students who were going to India are discussed. (SW)

Comprehension for the foreign language learner is discussed, and it is claimed that comprehension is not a by-product of the other skills but should be taught and tested throughout a course of study. The channel or medium used in communication will influence the understanding of the message. Differences involved in reading and listening comprehension are cited, and comprehension is discussed in terms of feedback and empathy. It is felt that drills and repetitions can hamper comprehension, as can excessive reliance on written material. Comprehension can only be taught by first eliminatinq the causes of negative feedback. The first basis for adequate comprehension is motivation and interest in the content of materials and activities. It is important to grasp the meaning of the whole; miscomprehension can result from hastily forming conclusions from segments. Teaching comprehension may profit from proceeding from phonological discrimination, to juncture contrasts, to dictation at increasing speeds, and to student note taking of a short speech. Comprehension tests must be designed with knowledge of the student's mother tongue, and tests should use material that is spoken English, as well as standard English. Probably the best test that has been so far devised for measuring listening comprehension is the cloze procedure. (SW)

Descriptors-*Child Language, Cognitive Development, Communicative Competence (Languages), Folk Culture, Language Development, Language Research, Language Skills, Legends, Linguistic Competence, *Narration, *Navajo, Peer Evaluation, *Peer Groups, Peer Influence, *Speech Communication, *Story Telling

The narrative performances of Navajo children were examined to determine the ways in which the skills of competently structuring a narrative are informally learned within the peer group. Ten- and eleven-year-old Navajo children, living near Window Rock, Arizona, were evaluated in telling stories about the most traditional figures of Navajo belief, skinwalkers (the Navajo equivalents of werewolves). The stories were collected from the children as they gathered in self-selected groups within the classroom. The narratives were told in English, the first language of most of the children. For the Navajo child, a peer group is not merely a collection of friends, but of family members. Six elements in the structure of a well-formed narrative, suggested by William Labov (1972), provide an organizational framework for the analysis. These elements are: abstract, orientation, complicating action, evaluation, result or resolution, and coda. Examples of the story-telling of specific children are cited. It is concluded that competence in ordering and structuring a narrative remains intimately connected with the interactions of a narrator's peers, for it is through peer group interaction that a child learns what is acceptable, what is exciting and involving, and what is culturally meaningful. The narrative competence in structuring the story cannot be measured simply on a scale of cognitive abilities and age-graded achievements. (SW)

Identifiers-*Bilingual Education Act 1968

This review of current federal and state legislation provides information on characteristics of bilingual education programs, mandated by law, that are of importance to evaluators. The legislative summaries are presented in two sections: across-states summary of legislative provisions and state-by-state summary of legislative provisions. Information is presented in the following categories: type of program, population to be served, participation of English-speaking students, census (determining numbers of students eligible for the program), census mandate (when a program must be provided), description of the program, grades to be covered, length of time for students in the program, student/teacher ratio, teacher/staff requirements and qualifications, staff training, materials requirements, community participation, and student assessment and evaluation reporting requirements. States differ in goals for native language outcomes, definitions of the populations to be served, types of programs to be provided, and length of time students remain in the programs. In the evaluation of a bilingual program, it is important to consider these differences whether the program operates under state or federal requirements. Even when it operates under federal policy or funding, it is likely that the local program will be affected by the provisions of the state. (SW)

Identifiers-*Chomsky (Noam)

It has long been said that there are an infinite number of English sentences. ``This is the cat that caught the rat'' is an English sentence. So is ``This is the cat that caught the rat that stole the cheese.'' ``This is the cat with white paws that caught the rat that stole the cheese'' is unobjectionable as well. Since a clear cutoff point cannot be specified, it is tempting to resort to the three dots. This study proposes that the argument from the lack of a clear cutoff point to infinity is a bad argument; the set of English sentences may be a fuzzy set rather than a standard set. Furthermore, it is argued that the initial question suppresses several quite distinct questions. A theory constructed to account for formal relations between sentences might warrant the positing of infinite semantic structures. A theory constructed to account for human understanding probably would not. The common claim that infinity is necessary if there are to be novel and creative uses of language is found to be entirely without substance. (Author/AMH)

Identifiers-*Mexico

This study of a group of American teenagers living in Mexico uses a series of questionnaires to measure their degree of bilingualism (in English and Spanish) and biculturalism (in American and Mexican culture). The main hypotheses of this investigation were: (1) after five or more years in Mexico, the teenage subjects will be at least functionally bilingual and bicultural, but their competence and performance are expected to be inferior to that of their monolingual and monocultural counterparts in the United States and Mexico; and (2) the English language and American culture will be dominant over the Spanish language and Mexican culture because of reinforcement by family and school, and because of prestige factors involved. The study's methodology included design or research scheme, testing and control groups, field work, and analysis of data. The data was collected through a battery of questionnaires and tests designed to ascertain general background, language and a cultural background, linguistic cultural association, linguistic acceptability, and dialect distinction. Results supported both of the study's hypotheses. The actual questionnaires and tabular statistical results are included in the text. (EJS)

Identifiers-*City University of New York NY, Institutional Evaluation, *Wessell Commission

The work of the Temporary Commission on the Future of Postsecondary Education in New York State is analyzed in this paper. Known as the Wessell Commission, it was created in June 1976 when the City University of New York (CUNY) was closed for lack of operating funds. Legislation permitting CUNY to reopen contained a provision for the comprehensive study of postsecondary education in the state by a temporary commission. Background information is provided on the enrollment shift, state student aid, interagency conflict, the leadership void, the city university crisis, and the state political environment. The commission was evaluated to assess the extent to which its stated objectives were accomplished and the general impact it had on state public policy for higher education. Interviews were held with the members of both the executive and legislative staffs of the commission. The 14 commission staff members who were interviewed indicated that there had been a definite need for the commission. The final report appeared to reasonably meet most of the stated objectives of the commission, especially those dealing with the Board of Regents, allocation of resources to the private institutions, and public sector governance. In the views of the staff, the commission had very little influence upon higher educational policy. The staff responses are analyzed and seven concluding observations are presented. (SW)

Examined is the success of Monash's Early Leavers' Scheme in terms of the performance, characteristics, and experience of successful applicants, and the manner in which the scheme has operated. The first section of the report provides background information on the establishment of the Scheme (to provide a modification to entry requirements for disadvantaged students) and describes selection methods (such as aptitude tests). Section 2 presents data regarding the number of applicants and numbers surviving at different parts of the selection procedure (the number of applicants was found to decrease each year), and outlines, in statistical form, socio-educational characteristics of the entrants (including age, sex, nationality, level and type of secondary education, postsecondary qualifications, and previous occupation). Section 3 details the performance and withdrawal rate of Early Leavers (the yearly pass rate was 80% and the withdrawal rate 15%). Results of entrant interviews are examined in section 4 (including information regarding financial support, personal life, academic problems, and vocational plans). The final section makes recommendations for methods of selection and the need for special assistance. Appended are an application form and entrant questionnaires. (BD)

Identifiers-*Australia, Selective Admissions

Information about the mature student in tertiary institutions in Australia was obtained in a 1976 survey. Responses from 98 institutions provided information on whether there were special entry schemes or other methods of entry for mature aged applicants, the selection procedures, the number of mature aged entrants in 1976, and the courses in which they were enrolled. Nearly all institutions have some relaxed entry provisions for mature aged students. Some have used existing provisions within their regulations to allow mature aged students to enter while others have introduced special schemes. A number of institutions have set separate quotas for these students. This action has removed them from competition with normal aged students and therefore made their entry independent of the supply of normal aged students. Selection methods usually involve multiple procedures, such as special tests, interviews, work references or experience, and academic background. Although institutions were not asked specifically about performance, 27 percent offered such information. Fourteen institutions stated that mature aged students performed better than normal aged students, and 12 stated that they performed just as well, and one stated that they had a higher dropout rate. Identifiers-Information Analysis Products

This review of academic programming considers changes that have occurred as a reaction to real or perceived shifts in institutional and social conditions and values, program design, and program approval, review, and evaluation. Among the conditions influencing programming decisions in the late 1970s are open-access policies, affirmative-action policies, the new majorities of part-time and female students, the demand for noncredit and nontraditional educational opportunities, developments in collective bargaining, and geographic duplication of degree program. The curriculum for American undergraduates typically contains three components: general education, the major concentration, and electives. It is shown that the undergraduate career is now divided almost equally among these three components, and that a growth in elective-taking has been at the expense of the general education component. Curricula have been redesigned to serve the increasing body of adult students, since the number of traditional-age college students has been declining. Program approval refers to a state agency's giving permission to an institution to offer a program. Program review involves analysis of an institution's existing programs, by a state agency, by the institution itself, or possibly by an accrediting group. In practice these terms often are used interchangeably. Publications and studies in various states on program review, approval, and evaluation are cited. A bibliography is included. (SW)

Identifiers-Faculty College Relationship, Information Analysis Products

The numerous types of individuals classified as part-time faculty are discussed, along with arguments for and against using part-time faculty, and their rights and status. A very diverse set of individuals with widely varying interests works part-time. The purposes for which they are employed vary widely as do the rules under which they work. Changing lifestyles and work attitudes demand flexible employment options. Civil service reforms recently passed or currently pending acknowledge changing attitudes toward work, and a Federal Employees Part-Time Career Employment Act of 1978'' requires federal agency heads and the Civil Service Commission to work toward increasing use of career part-time positions. Among the many advantages of having part-time faculty are that the contributions of young intellectuals are not lost because of the current Ph.D. surplus, people with family responsibilities can be accommodated, and retirement can be phased in. The arguments against using part-timers include the fact that they are an inexpensive source of labor, and established faculty and their unions view this as a serious threat to their own economic security. Some other concerns that are discussed are accreditation and teaching quality. Rights to employment security, equal compensation, and access to full-time faculty bargaining units are concerns of part-time faculty. A bibliography is included. (SW)

Papers are presented from the 1975 Society for Research into Higher Education European Symposium on Interdisciplinary (ID) Courses in European Education. Section one of the symposium on philosophy and background'' consists of an introduction by Professor Berger and discussion. Section two on some ID courses'' consists of the following papers: The Structure of the Four-Year Degree Courses at Keele,'' by D. G. Holloway; Interdisciplinarity in the Environmental Sciences,'' by J. G. Harvey; and The School for Independent Study at N. E. London Polytechnic,'' by D. H. Robbins. Section three on planning and administration of ID courses'' includes The Administration of Interdisciplinary Courses,'' by Z. C. Szkopiak and Development of an Interdisciplinary Course at the University of Nijmegen,'' by J. F. M. C. Aarts and C. J. A. M. van der Linden. Section four on research and development'' includes The SISCON Project: A Personal View of an Interdisciplinary Experiment,'' by David Edge; Operational Research, Interdisciplinarity and Higher Education,'' by D. A. Conway; and Methodological Issues in Evaluating Interdisciplinary Studies,'' by Rolf Schulmeister. Each section includes reports of a discussion group. (SW)

Identifiers-Sweden

The relationship between social science researchers and practitioners in various sectoral bodies is being investigated in Sweden to increase understanding of ``knowledge development.'' In addition to this general analysis, a subproject focuses on the knowledge development resulting from the interaction between consumer research and consumer policy. The investigation will analyze political and historical developments, activities and working conditions of the consumer policy bodies, and the concrete processes of knowledge production. Two other subprojects will focus on the relationship between research and practice in the areas of working-life policy and higher education policy. The general analysis of knowledge development will include a literature review of research policy and the theory of science and conceptual frameworks concerning ``research about research.'' Literature reviews and interviewing of researchers and practitioners will be undertaken in the subprojects. One or more processes concerning researcher practitioner relations in the development of knowledge will be studied in-depth. Working papers and references for each area of the project are listed. Identifiers-*LONG Project, University of Umea (Sweden)

The LONG project is a longitudinal study in progress at Umea University, Sweden, that is designed to assess the educational and professional beliefs of students in the fields of medicine, engineering, psychology, and economics. Beliefs concerning education may include free choice, the role of ability in success, and education as a motive for reward. Beliefs concerning vocational activity may include the role the student is to have vocationally and the best ways to put knowledge into practice. Pilot studies of the project have generated information based on students' recorded reflections about their fields of study; interviewing of students, teachers, and practitioners; and a literature review. Information gained from the pilot studies will be used to develop interview questions and structured situations for the main longitudinal survey to be undertaken beginning in the fall of 1978. Approximately 120 students will be contacted at least three times during their higher education studies. A cross-sectional survey of practitioners and teachers that parallels the main study is also planned. (SW)

Identifiers-*West Point

Coeducation at the U.S. Military Academy from June 1977 to April 1978 is analyzed. Summaries of individual research projects conducted to understand and evaluate specific aspects of coeducation are included. An open-systems model served as a conceptual guide for the study. The following areas were explored: individual adjustment, attitudes, social background characteristics, individual performance, attrition, unit performance and leadership, and institutional reaction. Data were obtained through periodic surveys, interviews, and observations of cadets and officers. The classes of 1980 and 1981 were highly similar in terms of abilities, interests, and attitudes. Sex differences that were found to exist for the class of 1980 were also found in the class of 1981. Men and women differed significantly in physical aptitude, in attitudes toward appropriate roles for women in society and in the Army, and in personal life-style preferences. Although men's attitudes toward appropriate roles for women in society tend to be traditional and relatively fixed, stereotypic attitudes and expectations toward women's abilities are giving way to a recognition of the talents and abilities of individual women cadets known. The report includes background information on the intellectual bases for the role of women in the military, information on women faculty and administrators, and a description of human relations lectures and workshops for cadets and officers. A bibliography, a sample "Attitude Toward Women Scale," schedules of activities, and a lesson outline on "Women at West Point" are included. (SW)

Identifiers-*University of Maryland College Park

Differences between freshman expectations at the University of Maryland in 1968 and 1969 were assessed using data from College and University Environment Scales (CUES). Two editions of CUES have been published. CUES I consists of 150 statements about university life that help to define the atmosphere of the institution as seen by the student. The five scales are practicality, community, awareness, propriety, and scholarship. CUES II includes four major changes: (1) the norms are based on a larger sample; (2) the items that had best discriminated between institutions were kept while others were eliminated; (3) new items were introduced in an attempt to keep pace with changing trends; and (4) two new scales were added (campus morale) and (quality of teaching/faculty-student relationships). During the summer of 1969 CUES I was administered to 484 students and CUES II was administered to 593 students who were entering the university. Large changes were recorded from 1968 to 1969 on three of the five scales in CUES I: awareness, propriety, and scholarship. A stress on self, society, and intellectual discipline is expected to be less important by the 1969 incoming freshmen, while caution and thoughtfulness are expected to be more evident. Only on the propriety scale did the CUES II results differ from the CUES I results. It is concluded that propriety'' as measured by CUES II is something different from propriety'' as measured by CUES I. (SW)

Descriptors-College Instruction, Faculty Evaluation, Higher Education, Institutional Research, Program Evaluation, Research Projects, *School Surveys, State Universities, *Student Attitudes, *Student Characteristics, *Student College Relationship, *Teaching Quality, *Undergraduate Students
Identifiers-*University of Maryland College Park

Students holding diametrically opposed opinions about the quality of instruction at the University were compared on a number of other attitude variables. A comparison was made of 2,310 students choosing item 2B and 1,625 students choosing item 3B on the 1969 University Student Census, an attitude and activities inventory given annually to all full-time undergraduates. There appear to be some differences between students who feel the best thing about the school is the quality of instruction'' (2B) and those who feel it is the worst thing about the school (3B). The 2B group tended to seek self-development and be stimulated by coursework and felt this coursework required more intensive study outside the classroom. They also tended to have higher educational aspirations, to live with their parents, and to have less well-educated fathers. Generally, the 2B group had more positive feelings about the university, its faculty, and facilities. They tended to feel that students had more channels for expressing complaints and policy-making opportunities, were more likely to feel students who disrupt the university should be suspended, and were less likely to perceive racism at the university than the 3B group. Identifiers-*University of Maryland College Park, Vietnam War

Differences between background characteristics and attitudes of participants and nonparticipants in campus demonstrations were studied. An anonymous questionnaire was administered to 5,671 University of Maryland, College Park, undergraduates during fall registration, 1970. Results show that 50 percent of the sample had participated in some campus demonstration during the past year and 50 percent had not. Compared to nonparticipants, participants tended to be upperclassmen, regard themselves as liberal or radical, and come from families with more income. Participants were also likely to feel that U.S. foreign policy, domestic crisis, and campus communications caused the campus disturbances rather than radicals or outside agitators. Participants also tended to be more against defense spending, selective service, and the war in Vietnam. Participants tended to feel that the National Guard intensified the violence on campus, that the President should not be supported in all circumstances, and that the university should disclose more about research and should not maintain non-academic student records. The implications of the results are discussed. Questionnaire results and statistical data are appended. (Author/SW)

Full-time undergraduate student responses to the University of Maryland 1970 University Student Census and to anonymous questionnaires are summarized. Ninety-four percent (22,000) of the students took the University Student Census, an activities and attitude survey given annually to all full-time undergraduates. Approximately 5,000 new freshmen took an anonymous questionnaire on social and political attitudes during summer orientation, and a similar questionnaire was administered to a sample of approximately 5,700 full-time undergraduates during fall registration. Data are presented on the place of residence and employment status of students, student reasons for attending the university, views about academic policies and procedures and non-academic services, attitudes toward black students, and political and social views. Responses were obtained about campus demonstrations, U.S. policy in Southeast Asia, and university issues. (SW)

Identifiers-*University of Maryland College Park, Vietnam War

Student activities relating to the Vietnam Moratorium'' during the month of November, 1969, at the University of Maryland were assessed using observer ratings and descriptions and a pre-post questionnaire. The observational procedure included: an adaptation of Bales Interaction Process Analysis; estimates of crowd size, participation, and mood; and a behavioral description. Ten different settings or events were observed. The questionnaire included items related to opinions and attitudes toward the moratorium, the Vietnam war, and the Nixon administration, and extent and type of participation. One hundred sixty-six subjects took both pre- and post-test questionnaires. The results show clear differences among settings: those settings or events that were focused specifically on protest of a given issue showed a greater degree of expressed hostility and tension-reducing interaction, as opposed to information-oriented interaction. The results of the pre-post questionnaire indicate a general reduction in extent of participation by students in moratorium-related activities from October to November. It was found that after the moratorium subjects tended to be more extreme toward either pole in their attitude. Theoretical implications of the results are briefly discussed and statistical data are appended. (Author/SW)

A seven-member research team conducted participant observer field research at the College Park campus of the University of Maryland during the October 15th, 1969, moratorium in order to obtain an account of what transpired on the campus as a whole. The following eight events or places were covered by the researchers: teach-in, classroom area, vending machine area, student union, residence hall, any small gathering, any large gathering, and one ``wild card'' event. The campus was relatively involved in the moratorium and related activities, although the general atmosphere remained quiet and activities unrelated to the moratorium were less common than usual. Valuable experience was gained in both the preparation and execution of the participant observer technique. (SW)

Identifiers-Full Time Students, *University of Maryland College Park

University of Maryland full-time undergraduate students who were 36 to 57 years old were compared to a random sample of younger students aged 18 to 35 years old on the 1970 University Student Census, an attitude and activities inventory. The older sample of 319 students was 50 percent male and 50 percent female, while the younger sample of 313 students was 60 percent male and 40 percent female. Subjects were compared on 14 demographic items and 28 Likert-type attitude items. Older students tended to be married and live off-campus and studied more and had more clearly fixed vocational goals than did younger students. Older students more often felt that the faculty and administration cared about students, that student disrupters should be suspended, and that Saturday classes were acceptable than did younger students. Older students were less in favor of coed housing or an abortion information service. Survey items and response data are included. (SW)

Identifiers-Information Analysis Products

Problems facing foreign students in American colleges and universities are examined. With the number of foreign students studying in the United States increasing each year (over 203,000 in 1976-77), services for foreign students need to be expanded with more emphasis on improving orientation programs. Preadmission screening and counseling are urged to familiarize potential students with the American educational system, standards of academic performance, and social behavior. Obstacles cited include the language problem, degree requirements, course structure; course content, and academic standards. The importance of academic advising to alleviate confusion over course options and program organization is discussed. Also considered are economic problems encountered by foreign students who come with limited funds and have unrealistic ideas about the availability of financial aid or other sources of income and did not anticipate inflation, changed or extended their coursework or overextended themselves buying American consumer goods. Problems of cultural assimilation are noted. Several possible solutions to ease the transition for foreign students are suggested: (1) standardized admissions information centrally organized and easily available; (2) more thorough orientation programs; (3) special training for teachers who instruct foreign students; (4) programs to prepare foreign students for reentry to their home countries; (5) maintenance of contact with foreign alumni. Identifiers-Starpower Simulation Game

Three types of workshops dealing with racism and sexism were conducted for 1900 incoming university freshmen as part of their orientation program. The methods were a structured discussion model developed by Sedlacek and Brooks (1976), a Starpower simulation workshop, and a movie discussion group. Students were randomly assigned to one of the three workshops and their responses to a post-workshop questionnaire were compared, using analysis of variance and Scheffe post hoc tests. The conclusion as to which workshop was best depended on the criterion employed: if the criterion is how good students feel about the experience, Starpower appears best and the Model the worst; if the criterion is planning to do something about racism or sexism, the Movie workshop appears best; if it is asked which workshop resulted in the most knowledge gained, the Model workshop is best. Findings highlight a classic problem in program evaluation: the tendency to view attitudes toward the experience as the criterion. Additional implications are discussed, and attitude test items, response data, and references are included. (Author/SW)

Descriptors-*Access to Education, *Admission Criteria, *Black Students, *College Admission, College Freshmen, Enrollment Rate, *Enrollment Trends, Higher Education, *Minority Groups, National Surveys, Statistical Data, Universities
Identifiers-Large Universities, Selective Admission

In 1975 a nationwide sample of admissions offices of 110 large, primarily white universities were surveyed on their admission of black freshmen and on their admission criteria. Particular emphasis was placed on further effects of budget cuts and on admission criteria for nonblack minorities. Responses from 107 schools, showed that the national median percent of black freshmen remained at five percent, as it was in 1974, compared to six percent in 1973, five percent in 1972, four percent in 1971 and 1970, and three percent in 1969. The southern region was the only region that increased (six percent in 1975, five percent in 1974). Nonblack minority enrollments of freshmen are presented, and western schools were revealed to have the highest percentages of nonblack minorities (six percent Asian Americans, and five percent Spanish-speaking Americans). While 24 percent of the schools reported some impact of tighter budgets in minority admissions programs in 1975, there was a rate of 40 percent in 1974. The number of schools employing open admissions has increased, as has the mean number of admissions criteria employed by the schools. The number of special programs is down, as is the number of schools employing different criteria for minority students. The arguments for considering race and sex-related variables in admissions are presented, and noncognitive variables useful in selecting cultural and racial minority students are suggested. Identifiers-University of Maryland College Park

In 1970, a randomly selected sample of 101 residents of the community surrounding the University of Maryland, College Park, were surveyed to determine their perceptions of campus unrest, and their responses were compared to student perceptions of the same events. Study variables were liberal-conservative self-ratings of the residents, political party identification, education, age, income, sex, race, and attitudes and behavior related to campus disruptions and the war in Vietnam. Some general conclusions were reached, but there was a great range of opinion among the College Park community residents. Based on the self-selected labels of liberal and conservatives, liberals tended to see the society and university at fault, and the conservatives tended to place the fault with the demonstrators. Younger community residents were more likely to feel that the National Guard intensified the violence and that foreign policy caused the disturbances. Older residents tended to feel that disrupters should be expelled, that the National Guard made the campus safe, and that outside agitators and spring fever caused the disruptions. A sample of 5,671 students were administered some of the same items. Students generally responded similarly to the liberal community group sample with respect to the war and to causes of the disturbances. Survey questions and response data are included. (SW)

Identifiers-University of Maryland College Park

A study was conducted at the University of Maryland to determine how consistently students perform on examinations in a given class and whether it is possible to alter this relationship through the introduction of an intervening variable, such as a reinforcing and encouraging letter from the instructor. Letter grades and test scores were obtained for all 315 students in an introductory psychology class in the Fall of 1969. Prior to the second exam, the 71 students who received grades of A or B on the first exam were randomly assigned to two groups, and 35 students in one of the groups received a letter from the instructor commending their performance and indicating expectations of similar subsequent performance. Correlations among the first three exams were computed for students receiving A's and B's on the first exam and the group receiving C's, D's, or F's, and for those in the A and B group who did and did not receive letters. Scores on subsequent tests were more highly related to the first exam for the group of students who received A's or B's on the first test than the group which received C's, D's, or F's. The difference was not great, and interpretations must consider the limitation in range of the A and B group, which may result in lower correlations than the more heterogenous condition of the C, D, and F group. The distribution of ``Reinforcement'' letters to a sample of students who received A's or B's on the first exam had no observable effect on subsequent test performance. (SW)

Identifiers-*University of Maryland College Park

Four items on educational and vocational decisions were analyzed from the 1969 University Student Census of the University of Maryland. A random sample of 100 students from each class was studied and comparisons were made by class and sex. Results indicate that: (1) more freshmen and sophomores were undecided and uncertain about their vocational goal and major field of study than juniors and seniors; (2) a substantial number of upperclassmen were as yet undecided and uncertain of their vocational goal; (3) males and females did not seem to differ in their indecision about a major field of study or vocational goal; (4) the time of selection of vocational goal and major field of study did not appear to be related; (5) students undecided about either major field or vocational goal tended to be undecided about the other; and (6) students undecided on their major field of study were less favorable to the idea of a special college for new students undecided as to their major, students who had decided on a major field of study viewed the idea more favorably. It is suggested that the undecided students may not want to be labeled or singled out, because it may connote that they were different and/or inferior. (Author/SW)

Descriptors-College Majors, *College Students, Comparative Analysis, Grade Point Average, Higher Education, Institutional Research, Research Methodology, Research Projects, School Surveys, State Universities, *Student Attitudes, *Student Characteristics, *Student College Relationship, *Student Subcultures, *Typology, Undergraduate Students
Identifiers-Clark Trow Ratings, University of Maryland College Park

A study was conducted to determine if Clark and Trow's (1966) typology of student subcultures could be empirically applied to a description of University of Maryland students. Twelve Counseling Center research staff members faked answers to the 1969 University Student Census (USC), an activities and attitude inventory administered to all undergraduates. The staff members answered the USC twice and faked two roles randomly assigned from the 12 possible permutations of the four student types: academic, collegiate, nonconformist, and vocational. The academic type is highly involved with ideas and highly identifies with the college, faculty, and administration. The collegiate type is not highly involved with ideas but highly identifies with the college. The nonconformist type is highly involved with ideas but does not highly identify with the college, and the vocational type is not highly involved with ideas nor highly identified with the college. Students responding in a particular pattern were identified and were classified as one of the four types if they met certain criteria. The response patterns for the four subcultures were compared with the responses of the 22,544 students who had completed the census. The four types of students differed significantly with regard to their mean grade point averages and tended to differ in their choices of major and college within the university. Based on study findings, each of the four student types are described. A description of Clark and Trow's typology, statistical tables, and references are included. (SW)

Identifiers-*On Campus Students, University of Maryland College Park

Information about the needs, interests, and use of recreational facilities was obtained from 407 undergraduate students from the University of Maryland. Responses to a 15-item telephone survey were received from 90 percent of a stratified, random sample of 450 students. There were 154 residents, 160 dependent commuters, and 93 independent commuters. Residents included those living in residence halls and fraternities and sororities, dependent commuters living with relatives, and independent commuters living alone, with a spouse, or friend. Eleven of the 15 items significantly discriminated among at least two of the three groups. Eight of the 11 significant differences were between the commuters generally and the residents. One interesting difference between types of commuters was that resident and independent commuters were more likely to spend their leisure time at their place of residence than were dependent commuters, but residents and dependent commuters were more likely to be satisfied with campus recreational facilities than independent commuters. Residents, as compared to commuters, engaged in nearly twice as many recreational activities during the school year, preferred participant to spectator sports, and were more informed about campus recreational opportunities when they first enrolled. Information is presented on types of recreation engaged in and proposed for the campus. (SW)

Identifiers-*Reentry Students, University of Maryland College Park

Two studies conducted at the University of Maryland during the 1973-74 academic year evaluated the efficacy of programs designed to meet the needs of women and sought to determine whether the provision of a supportive learning environment, rather than individual or group counseling, would influence women's life styles. In the first study 36 experimental subjects took a class in which they undertook four projects: an academic skills project; a career exploration project; a campus, community or women's resources project; and a personal class journal. The projects were designed to promote an active search for information that would be helpful in setting and reaching goals. The 36 experimental subjects were pretested and posttested using the following instruments: Vocational Decision-Making Checklist, the Self-Concept as Learner Scale, the Attitude Toward Women Scale, and Form E of the Dogmatism Scale. In the second study 34 experimental subjects attended weekly sessions organized into large didactic class activities and into three small discussion groups. Information was provided on vocational planning, employment trends, educational opportunities, decision-making, assertiveness training, and personal awareness training. The two programs did affect certain vocational and psychological attitudes. In the first experiment subjects exhibited greater maturity in vocational decision-making, and in the second experiment, subjects' self-concepts were enhanced. (SW)

Identifiers-*Access (Physical), State University of New York Albany

General guidelines for faculty members and teaching assistants are presented to aid them in taking whatever steps are necessary to reasonably accommodate students with disabilities. The difference between a disability and a handicap is explained, and the importance of a positive and helping attitude is stressed. Major disabilities are discussed and ways for increasing course access are suggested. The following conditions are covered: visual impairment; hearing impairment; motor impairments; speech disorders; hidden disabilities, such as epilepsy, diabetes, and heart conditions; and respiratory conditions. Resources that are available at the State University of New York at Albany are listed. H.E.W. Final Regulations on Section 504 of the Rehabilitation Act of 1973, effective June 3, 1977, are included. Identifiers-Berea College KY

Intended for supervisors involved in the work study program at Berea College, this manual describes techniques and philosophies inherent in the supervisor-student relationship. Work-learning is defined and the supervisor's role and responsibilities are examined. Student manpower characteristics (including inaccurate expectations, desire for impact, freedom from experience, and inquisitiveness) are discussed in terms of the success of student internships and types of student job structures (honored guest, special assistant, position employee, and project assignment) are identified. Suggestions for conducting the student interview (including establishing a friendly atmosphere, securing basic information, finding interest, discussing goals and plans, and advising) and for planning supervision (matching work with student capabilities and delegating work) are offered. The supervisory tasks of training (including orientation, demonstration or procedures), communicating (including reinforcing instructions and developing listening skills), motivating (such as providing a good example and setting goals), and evaluating are explored. Suggestions for coping with such problems as tardiness, absenteeism, poor quality work, and resistance to supervision and techniques for developing and maintaining good supervisor-student relationships and for counseling and advising students are offered. Common student problems are listed and a supervisory checklist is presented. (BD)

Intended as a text for students of higher education and as a resource for inservice training programs, this book describes what it is like to go to college. Part 1 reviews the kinds of research studies of college students that have been produced, including studies dealing with the impact of college, student unrest, the generation gap, interpretations of student consciousness, and trends and traditions. Part 2 consists of a fictionalized first-person narrative account of the college experience, based on individual and group interviews at a large private university. An interpretation of the narrative, based on other recent research (dealing with college selection, freshman year problems, life away from home, personal morality, and career planning) is presented in part 3. Undergraduate Education at the University: A Low Priority.

California Univ., Berkeley.
Pub Date-77
Note-34p.; Draft for discussion, not an official position
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*College Faculty, *Faculty Workload, Graduate Students, Higher Education, State Colleges, State Universities, *Student Teacher Ratio, Student Teacher Relationship, *Teacher Distribution, *Teaching Assignment, *Undergraduate Students
Identifiers-California University Berkeley, *California University System

This paper reviewed several sources of data on the University of California systemwide and the Berkeley campus concerning allocation of faculty contact hours and faculty teaching energies generally, by the level of student. By several different measures, faculty energy and effort devoted to undergraduate teaching appear to have declined substantially during the 1960-70 period. More recently, despite a declining proportion of graduate students over the last decade, faculty contact hours at the undergraduate level have declined even further. A systemwide effort beginning in academic year 1969-70 to redress the perceived imbalance had little apparent immediate impact and negligible long-term effects. A second type of analysis seemed to suggest that upward shifts in undergraduate interest/demand patterns at Berkeley, whether short-term or long-term, are accorded a fairly low priority in the allocation of temporary and permanent instructional resources. Temporary instructional resources are considered to be visiting professors, instructors, lecturers, and associates. It appeared that decisions to allocate temporary instructional resources were based heavily on programmatic rather than workload considerations. (Author/SW)

A Comparative Analysis of the Lecture-Discussion Method of Instruction and a Quasi-Individualized Mastery Approach in Introductory Sociology.

Pub Date-14 Jun 76

Note-39p.; A practicum presented to Nova University in partial fulfillment of the requirements for the degree of Doctor of Education

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-College Instruction, Comparative Analysis, *Discussion (Teaching Technique), Higher Education, Independent Study, *Individualized Instruction, *Lecture, *Mastery Learning, Pacing, *Sociology, Student Attitudes, *Teaching Methods

Identifiers-Black Hawk College IL

The possible difference in the performance on a mid-term and final exam between students taking a quasi-individualized mastery method of instruction and students having traditional lecture-discussion instruction was studied. A second issue examined was the difference between the proportion of students expressing a preference for one method of instruction over the other. The sample population involved two intact introductory sociology classes at Black Hawk College. Results demonstrated that there was not significant difference between either set of mean scores, nor was there any significant difference between the proportions of students expressing a preference for one method over the other. Self-pacing and class interaction were the main reasons for selecting the individualized method and lecture-discussion method, respectively. It is recommended that: the sociology department should offer both delivery systems within the department; the quasi-individualized mastery method should be studied again with instructors present during testing sessions; and an additional study should compare the lecture-discussion methods with a completely individualized delivery system (Author/LBH)

Identifiers-*Information Exchange Procedures

Problems with the Information Exchange Procedures (IEP) developed by the National Center for Higher Education Management Systems are discussed. IEP procedures analyze student records, faculty effort, and annual expenditures. The particular approach taken in the analysis of the student faculty relationship has important theoretical problems, is too complex and costly, and adds little significant insight for use in university administration. The descriptive approach of IEP is based on the faculty activity report which has numerous validity problems that destroy the potential use of its major contribution: the calculation of unit costs. The complex relationships between faculty and students, which are causes of the costs, are concealed by this effort. The errors of measurement chiefly center around the accuracy and validity of the faculty activity reports and the "representativeness" of data from a particular time period. Additional error results from problems such as social security matches between salary and faculty activity records, program classification structure matches between student records and faculty activity records, and the consistency across institutions of the types of operational decisions necessary in any large project. The complexity of the calculations used to produce the indices serves to compound the errors of measurement of the inputs. (SW)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Budgeting, *Data Bases, Educational Finance, Higher Education, Institutional Research, *Management Information Systems, *Payroll Records, *Personnel Data, *Recordkeeping, Salaries, State Universities
Identifiers-*Florida State University

A position and rate control system was undertaken at Florida State University in 1974 to alleviate the problems of the manual budgeting system. The budget master file was created biweekly by combining a subset of the current payroll/personnel data base with the updated budget information from the previous budget master file, keying on positional (line) numbers. The salary budget prepared at the beginning of the fiscal year is the basis for the budget data. The input, outputs, and users of the system are described. The alignment of the payroll/personnel data base, keyed by social security number, with the salary budget information, keyed by position number, involved two major problem areas, which are discussed. Descriptors-College Faculty, Cost Effectiveness, Departments, *Educational Finance, Expenditures, Financial Policy, Higher Education, Institutional Research, *Instructional Student Costs, *Models, Private Colleges, Program Budgeting, *Program Costs, Research Projects, *Resource Allocations, *Staff Utilization

Identifiers-*Georgetown University DC

Recent efforts at Georgetown University to formulate financial models to assist in staffing and allocation decisions are described. The analysis considers a departmental model that has been developed, a program model that is being designed, and the potential uses and misuses of the models. Both models use historical data and do not attempt to project future circumstances. The departmental model is a historical cost and enrollment model. Essentially the model distributes both the direct and indirect income and expenses of the main campus to 31 instructional units (usually academic departments) using formulas that include designated income, credit hour enrollment, assigned square footage, and actual expenditures. Once income and expenses are distributed to the units, a balance of payments is calculated to estimate the contribution or drain of each unit. The departmental model also made possible a program model by first estimating income and expenses for the academic departments. Once these figures are known, the next step is to break them down by courses offered, and then to the students enrolled according to the programs they are pursuing. A total of each program's costs can then be made from all of the instructional units (departments) contributing to the program in order to arrive at an overall cost for each program or major. Noncost factors involved in faculty staffing and allocation decisions are also summarized. (SW)

Identifiers-*North Texas State University

A questionnaire was designed and administered by North Texas State University to determine why students drop out of the school. Of the 3,180 undergraduate dropouts who were surveyed, usable responses were received from 678. Demographic information on each student was obtained from the computerized student master file and was used for descriptive and comparative purposes. Lack of or insufficient financial support was an important factor cited for the nonreturn of many students. Over 17 percent of the respondents indicated that they needed a break and time to think about schooling. Respondents indicated their dissatisfaction with several aspects of the university, many of which relate directly to programs and services provided by Student Affairs personnel. Information about college majors of dropouts, their plans, academic standing, and other characteristics are provided. A sample questionnaire is appended. (SW)

Identifiers-*Branch Campuses

The role that institutional research can play in providing strategic information for evaluating the feasibility of establishing satellite campuses is outlined. Satellite campuses are intended to serve new student markets as well as provide better access for existing students via off-campus sites. Both internal and external factors affecting satellite campus facilities development are examined in this report. The investigation of internal factors include: reviewing institutional surveys as a source of attitudinal information concerning student, faculty, and alumni interests in satellite course offerings; and examining the geographic distribution of students, alumni and public service participants in order to delineate highly accessible sites for new campuses. External factors for possible research include: (1) an analysis of the various market segments in the region that could potentially respond to new educational services in outlying areas; (2) an examination of potentially high accessible sites within the region based on population concentrations and transportation corridors; (3) an assessment of the economic feasibility of satellite campus development; and (4) a review of the general administrative and/or procedural problems associated with the creation of satellite sites. Identifiers-*University of Missouri Columbia

Monitoring and subsequently simulating student transfer patterns from one academic major (or level) to another typically enables an institution to estimate future student enrollment distributions across academic areas. At the University of Missouri-Columbia (UMC), a student flow model not only simulates the patterns of student transfer but also enables academic units to monitor the ``caliber'' of students transferring across disciplines as well as those exiting the institution entirely. The model has been used at UMC to: (1) provide individual feedback reports to each academic dean illustrating the number and caliber (ability) of students which that academic unit ``exchanges'' with other academic units including the numbers of eventual distinguished graduates and dropouts ``imported from'' or ``exported to'' other academic units; (2) analyze the attrition rate, reentry rate, and caliber of students withdrawing from UMC semester by semester; (3) calculate the contribution of each academic unit to the aggregate campus attrition rate and simulate the expected attrition rate under alternative enrollment distributions of students across academic disciplines; (4) simulate the expected enrollment and academic transfer patterns by sex as compared with actual data in order to evaluate underrepresentation of females across academic disciplines (Title IX); and (5) provide data for student counseling regarding the average frequency of student transfer, the typical semester when the first change occurs, what type of student changes academic areas most often, and ``transfer profiles'' for eventual distinguished graduates vs. dropouts. Identifiers-*Education and Work, *Tidewater Community College VA

The purpose of the study was to determine to what extent the administrators, counseling staff, and full-time faculty members of the Frederick Campus of Tidewater Community College were aware of and influenced by career education in the development of new and modification of existing programs. A four page, 12-item, locally constructed questionnaire was used. The sample consisted of 13 administrators, seven counselors and 81 full-time faculty members. The results of the tabulation were evaluated to identify the three groups' understanding of career education, the extent to which they used career education in their respective areas, to what extent the Campus Career Education services were used, and needs for future institutional planning in this area. A majority of those surveyed indicated that career education was important to their academic discipline, that it was part of their personal educational philosophy, and that it was positively affecting their program content through greater student interest. The majority also agreed that the best definition of career education was providing students with skills for selecting, preparing for and finding employment. However, their explanations of the method used to incorporate career education in the classroom indicated that they were providing occupational information and not teaching career development skills. This suggested a contradiction between the acknowledged, and defined goal of career education, and the type of information provided in the classroom. This contradiction resulted in the recommendation that a second phase of defining the skills and implementation methods be initiated. (Author/LBH)

Identifiers-Georgia State University

A cooperative effort by administrators and institutional researchers to assess the public image of an institution of higher education as one step in the planning process is described. Discussed are the interpersonal dynamics occurring in the recognition of the general problem, the formulation of specific questions, the design of the survey instrument, and the communication of the results. The results external negative evaluations were transformed into a framework to reinforce planned change to make the recruitment/admissions/registration process more efficient and effective. In this case, administrators and institutional researchers, within the political context of the institution, successfully addressed the social obstacles to effective use of institutional research. Identifiers-*American College Testing Assessment Program

A sample of 260 colleges was surveyed during the years 1972-1976 to determine the validity of predicting college freshmen grades from standardized test scores and high school grades using the American College Testing (ACT) Assessment Program, an evaluative and placement service for students and educators involved in the transition from high school to college. The ACT Assessment consists of four academic tests, self-reported high school grades, the Student Profile Section (SPS), and the ACT Interest Inventory. The academic tests cover the traditional subject areas of English, mathematics, social studies, and natural sciences. A composite score is tallied from these tests and this score is considered a measure of overall academic ability. The SPS provides information on student's background, extracurricular accomplishments, special academic needs, housing plans, financial need, planned major, and career plans. The Interest Inventory measures preferences for job-related activities in six categories: science, creative arts, social service, business contact, business detail, and technical skills. ACT offers two plans to colleges for predicting freshmen grades: (1) the Basic Research Service will predict grades for specific courses and subgroups of students, and can utilize data other than ACT test scores. The quality of grade predictions in this study was stable over the four-year period. Freshmen grade point averages appear to be predictable using equations as old as four years. To increase the accuracy of the predictions it is possible for colleges with small student populations to pool data from two or more years when developing prediction equations. (BH)

Matlock, John Humphries, Frederick S.
Back to the Basics with Resource Allocations.
Tennessee State Univ., Nashville.
Pub Date-27 Oct 78
Note-14p.; Paper presented to the Southern Association for Institutional Research (Nashville, Tennessee, October 26-27, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Accountability, *Budgeting, Committees, *Cost Effectiveness, Educational Finance, Higher Education, Institutional Research, Physical Facilities, Program Evaluation, *Resource Allocations, Salaries, School Safety, Staff Utilization, State Universities, *University Administration
Identifiers-*Institutional Evaluation, *Tennessee State University

A resource allocation and utilization study was undertaken of Tennessee State University and the results, recommendations and policy decisions that evolved are presented. The President's Council, comprised of the President, the Vice Presidents, and the Director of Planning, Management and Evaluation, directed the study. Data from the Office of Institutional Research and other institutions within the state system were also used. It was recommended that: additional security officers be hired and that many of the streets going through the entire campus be closed; salary inequities among lower ranking faculty members be alleviated and faculty salaries be monitored; continue to review future revenue and cost projections for the athletic programs to prevent a deficit budget; allocation be made of additional funds for staff increases in the physical plant area, and for older building maintenance. The College Work Study Program was analyzed and increased monitoring of work study students was suggested. Other areas of financing considered include: departmental budgetary practices, the effect of restricted funding, cost effectiveness in academics, library funding, and student support cost and institutional cost. Three general recommendations that emerged from the study were: (1) implementation of a resource allocation and utilization committee that would continue to make recommendations to the president; (2) formation of a committee on budget priorities; and (3) improvement of staff evaluation instruments. (BH)

Expanding the Role of Institutional Research.

Tennessee State Univ., Nashville.
Pub Date-27 Oct 78
Note-10p.; Paper presented to the Southern Association for Institutional Research (Nashville, Tennessee, October 26-27, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Administrative Change, Administrative Organization, *College Administration, *College Planning, Data Analysis, Decision Making, Evaluation Needs, Higher Education, *Institutional Research, Management by Objectives, *Mergers, *Organizational Change, Policy Formation, School Policy, State Universities
Identifiers-*Tennessee State University

The merger of the Tennessee State University's institutional research office and the planning, management, and evaluation offices is described. The roles of the institutional research office before the merger were the collection and dissemination of institutional data, storing of data collected from other sources, and conducting special studies. The planning, management, and evaluation office's primary role was to improve the administrative areas. It was involved in management techniques such as management-by-objectives and prediction models. The consolidated offices now collect and interpret data, communicate results to the campus community, and conduct studies. As a result of the merger, the institutional research staff has become more active in the management decision-making process. Joint activities include: the management-by-objectives process, cost study analysis, student data analysis, study of the committee structure of the university, study of resource allocation and utilization, development of a comprehensive five-year plan, development of a policy and procedures manual, development of an organizational chart and methods for evaluating the Advanced Institutional Development Program, defining responsibilities of positions at the institution, evaluation of system processes, and revamping the statistical data base. The two offices work both jointly and independently on projects and their influence and visibility in the university have expanded. (SW)

Academic Advising and Student Attrition.

Columbia State Coll., Columbia, Tenn. Office of Institutional Research.
Pub Date-27 Oct 78
Note-11p.; Paper presented to the Southern Association for Institutional Research (Nashville, Tennessee, October 26-27, 1978) ; Tables 1 and 2 may be marginally legible
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Attrition (Research Studies), College Faculty, *College Students, Dropout Prevention, Dropout Rate, *Dropout Research, *Educational Counseling, *Faculty Advisors, Higher Education, Longitudinal Studies, Private Colleges, *School Holding Power, Seniority, Teaching Experience
Identifiers-*Student Attrition

The relationship between academic advising and student attrition was examined at a private liberal arts college. A cohort analysis of students entering the college between 1971 and 1975 indicated that faculty members in the first year of their contracts had relatively more of their new student advisees subsequently withdraw than did the same faculty members in later years of their contracts or did experienced faculty members in the same year. The results were considered by a college-wide retention study committee in efforts to reduce student attrition. (BD)

Profiles of the Four-Year Undergraduate Colleges, 1979. State University of New York.

State Univ. of New York, Albany.
Pub Date-78
Note-63p.

Descriptors-Admission Criteria, College Curriculum, *College Environment, College Housing, College Majors, Directories, Enrollment Rate, Higher Education, *Institutional Characteristics, Intellectual Disciplines, Program Descriptions, Program Guides, *State Colleges, Student Financial Aid, Tuition, *Undergraduate Study
Identifiers-*New York, *State University of New York

Information is provided about the four-year undergraduate colleges of the State University of New York for 1979. The profile concerns the location and a brief description of the campuses; the general availability, type, and requirements of housing; campus activities; enrollment figures for fall 1977, tuition costs, admission criteria, academic programs of study; figures on the faculty for fall 1977; tuition refund policies; alumni survey results; definitions of commonly used terms and acronyms; financial aid opportunities; and information about Educational Opportunity Centers and the Educational Opportunity Program. Curriculum charts are provided, listing major programs alphabetically, as well as options (fields fo concentration within a major). The charts also indicate when, and for which type of student, a certain curriculum is available. (SW)

Descriptors-Civil Rights Legislation, College Role, Educational Finance, Equal Education, Equal Opportunities (Jobs), *Federal Aid, Federal Legislation, *Federal Regulation, *Financial Problems, Financial Support, *Government School Relationship, *Higher Education, Institutional Autonomy, *Laws, Legal Responsibility
Identifiers-Age Discrimination in Employment Act 1967, *Compliance (Legal), Education Amendments 1972 Title IX, Employee Retirement Income Security Act 1974, Executive Order 11246, Information Analysis Products, Rehabilitation Act 1973 Section 504, Social Security Act 1935

Two problem areas have arisen between the Federal Government and higher education institutions dependent on federal aid. One problem is a growing conflict over regulations, which involves the threat of loss of federal aid to ensure enforcement of federal civil rights goals. The second problem is an economic burden on academic institutions resulting from compliance with the regulations. Three laws that have been sources of controversy in the higher education community are executive order 11246, as amended, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973. The issues that have arisen in connection with equal educational and employment opportunity programs are explored. Problems also arise from requirements of the Social Security Act of 1935, as amended, the Employee Retirement Income Security Act of 1974, and the Age Discrimination in Employment Act of 1967, as amended. These programs impose high expenses on colleges and institutions, and primary teaching and learning missions may be impaired due to lack of funds. Colleges and universities urge that they not be looked on as just one more sector of the nation's economy, since they cannot pass on to students the full cost needed to meet their expenses. Other subjects discussed are: administrative costs and changes resulting from regulatory requirements; the academic community's perception of a heightened adversarial climate on campus; and recommendations to improve the regulatory process so that it better serves the needs of the academic community. (SW)

de Wolf, Virginia A.

A Validation Study of the Prediction Equation Used in Determining Freshman Admissions to the University of Washington During the 1978-1979 Academic Year.

Washington Univ., Seattle. Educational Assessment Center.
Pub Date-Sep 78
Note-20p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Admission Criteria, *College Admission, *College Freshmen, Grade Point Average, Higher Education, *Measurement Techniques, Predictive Ability (Testing), Predictive Measurement, *Predictive Validity, Statistical Data
Identifiers-*University of Washington

The predictive validity of the equation used for determining entrance into the University of Washington's freshman class during the 1978-79 academic year is examined. The sample was comprised of all freshmen entering the university directly from high school in autumn quarter 1974 who had been tested through the Washington Pre-College Test Battery in partial fulfillment of the entrance requirement. Five admission indices were computed based solely on data for each of the five following groups: arts and sciences, business administration, engineering, nursing, and total. For each group, the correlation of the cumulative undergraduate grade point average as of summer quarter 1977 with each of three admissions indices was computed and compared. An earlier admissions index used in academic years 1974-75 to 1977-78 was one of the indices. Data on other academic variables as of summer 1977, including the number of quarters attended and number of credits earned, are also presented. (Author/SW)

Descriptors-*College Curriculum, College Majors, *Continuous Learning, Degree Requirements, Directories, *Graduate Study, Higher Education, *Masters Degrees, *Part Time Students, Private Colleges, Program Guides, State Colleges
Identifiers-College of Saint Rose NY, Lifelong Learning, *New York, Rensselaer Polytechnic Institute NY, Russell Sage College NY, State University of New York at Albany NY, State University of New York Coll at Plattsburgh, Union College NY

This resource book provides information on part-time master's degree programs at colleges in Northeastern New York State. The various programs are organized into three groupings: major graduate fields, individual programs, and colleges. Provided are lists of specific programs and the college(s) where they are offered; an alphabetical listing of individual programs and the college(s) offering them; and charts of colleges, program offerings, and pertinent information concerning requirements, credit, and admissions tests. Supplementary information is provided on programs that require some full-time study, but half or less of the normal requirement. Schools included are: College of Saint Rose, Rensselaer Polytechnic Institute, Russell Sage College Evening Division, State University College At Plattsburgh, State University of New York at Albany, and Union College. A Model Academic Advisement Manual for Teaching Faculty.
Florida International Univ., Miami.
Pub Date- 78
Note-117p.; Some tables may not reproduce well due to marginal legibility of original document ; Best copy available
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Administrative Policy, *Admission Criteria, Career Planning, Clinical Experience, College Admission, College Curriculum, College Faculty, *Degree Requirements, Directories, *Educational Counseling, External Degree Programs, *Faculty Advisors, *Grading, Guides, Health Occupations Education, Higher Education, Individualized Programs, School Policy, School Registration, Social Services, Social Work, Statistics
Identifiers-*Florida International University, Policy Statements

The manual, for faculty advisors at Florida International University, provides information regarding policies and procedures relating to the academic advisement process. The introduction includes an academic advisement policy statement and the philosophy of the School of Health and Social Services. Part 2 provides an overview of the four phases of the advisement process and discusses the functions and responsibilities of the coordinator and the faculty advisor and outlines liaison activities with the Office of Registration and Records. Admissions are covered in part 3 (including such topics as admission policies and procedures, program requirements, general education requirements, and transfer credit) and registration is examined in part 4. Academic regulations (such as class attendance, dropping and adding, final exams, withdrawal, readmission, and suspension) are described in part 5. Part 6 focuses on the grading system, and part 7 on degree requirements. Curriculum offerings in the School of Health and Social Services (such as criminal justice, dietetics and nutrition, health science, home economics, nursing, physical therapy, and social work) are outlined in part 8. Part 9 provides other information regarding the external degree program, career planning and placement services, clinical and field experience, individualized programs of study, and statistics on the School of Health and Social Services. Included is the campus directory. (BD)

Descriptors-*Admissions Counselors, Case Studies, *College Admission, College Bound Students, Declining Enrollment, *Educational Demand, Educational Finance, Educational Supply, Enrollment Projections, *Higher Education, *Marketing, Research Utilization, Retrenchment, *Student Recruitment

This collection stresses the need for informed and more sophisticated marketing techniques for college admissions officers to help them cope with the decreasing number of prospective college students. The importance of the college admissions office is increasing as admissions becomes a more crucial element to the colleges' financial well-being. The collected papers provide an appraisal of what the situation in college admissions will be like for the next few decades. Presentations include: The Future Market for College Education (Humphrey Doermann); Applying Marketing Theory to College Admissions (Philip Kotler); The Positioning Era: Marketing Strategy for College Admission in the 1980's (Howard Geltzer and Al Ries); and Using Research in Analyzing Student Markets: A Case Study (Daniel F. Sullivan and Larry H. Litten). Introductory remarks by John M. Duggan are also included. (BH)

The Effect of Collective Bargaining on Teacher Salaries. Issue Analysis. September 1978.

Public Service Research Council, Vienna, Va.
Pub Date-Sep 78
Note-14p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Collective Bargaining, Comparative Analysis, Elementary Secondary Education, *Faculty Promotion, Higher Education, National Surveys, *Promotion (Occupational), *Teacher Salaries, *Teacher Strikes, Trend Analysis, *Unions
Identifiers-Compensation (Remuneration)

Teacher salaries across the country were examined to determine whether collective bargaining is a prime determinant of the rate of increase in teacher salaries. It is suggested that many teachers join a union and seek collective bargaining in order to achieve higher pay. The percentage change in primary and secondary teacher salaries was compared between the 1969-70 and 1975-76 school years. Further comparisons were made between the 30 states that enacted compulsory teacher bargaining legislation before or during the period under consideration and the 19 states without such legislation. Collective bargaining was not found to have a major impact on the growth of teacher salaries. States without teacher collective bargaining legislation which had a lower degree of actual bargaining, experienced growth in teacher compensation rates very similar to, and on the average higher than, those states with bargaining legislation. A recent study concluded that unionization has resulted in a negative impact on teacher salaries. At the collegiate level, a study has been conducted of 37 campuses that negotiated their initial collective bargaining agreement during the period between the 1971-72 and 1975-76 academic years. It is concluded that no significant impacts on salary, compensation, and promotions were associated with the adoption of collective bargaining by college and university faculty. At all levels, collective bargaining increases the likelihood of strikes, which disrupt the education process and entail a social cost. (SW)

The Academic Structure in Japan: Institutional Hierarchy and Academic Mobility.

Yale Univ., New Haven, Conn. Inst. for Social and Policy Studies.
Report No.-YHERG-27
Pub Date-Aug 78
Note-39p.; Some tables may not reproduce well ; Research sponsored by the International House of Japan
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Bureaucracy, College Role, Comparative Education, Foreign Countries, Governance, Government School Relationship, *Higher Education, Horizontal Organization, Institutional Role, Leadership Responsibility, Nationalism, Non Western Civilization, *Occupational Mobility, *Organizational Climate, *Power Structure, *Professional Recognition, Researchers, *Research Opportunities, School Organization
Identifiers-*Japan

The characteristics of the Japanese academic structure are examined with attention to the evolution of institutional hierarchy, the closed academic structure, and the effects of the academic structure upon academic research. The evolution of Japan's institutional hierarchy in academics has been tightly related to factors of nationalism, bureaucracy, and degreeocracy. The academic elite, as well as various national elites, were trained and sponsored by the central government, and they have monopolized the posts of professors in their alma maters even after the founding of other imperial universities and national universities. The school from which one comes has been an evaluation criteria rather than achievement or merit. In Japan most market shares are occupied by a few universities; market shares is one of the indexes of academic nepotism. The other index of academic nepotism is the inbreeding ratio. The lack of horizontal mobility is caused by the institutional hierarchy. Academic productivity is high among scholars graduated from universities ranked at the top of the institutional hierarchy, since in the closed academic structure, the graduates of the top universities are in the most advantageous position for placement to research posts. A Response to Increasing Faculty Resource Constraints: The Development of Umbrella Academic Programs and New Curricular Aggregates from Existing Instructional Resources.

Pub Date-Aug 78
Note-12p.; Paper presented at the Conference of the Society for College and University Planning (Hollywood, Florida, July-August 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*College Curriculum, College Instruction, *Curriculum Development, Degrees (Titles), Departments, Higher Education, *Interdisciplinary Approach, *Organizational Change, *Program Development, *Relevance (Education), Retrenchment, State Universities
Identifiers-California State University Dominguez Hills, San Diego State University CA

In an era of shrinking financial support for programmatic development as a result of reduced levels of funding from government sources and the concurrent influx of steady state, colleges and universities need to explore new alternatives. Two curricular planning strategies are addressed in this paper in response to this dilemma, one involving the creation of umbrella academic programs under the guise of an interdisciplinary framework, the other involving the reorganization of existing instructional resources into new programmatic aggregates. Examples of each strategy at two state universities are provided. The interdisciplinary example is the Behavioral Science Graduate Program, housed within the School of Social and Behavioral Sciences, at California State University, Dominguez Hills. The second approach is exemplified by a number of curricular programs at California State University, Dominguez Hills and San Diego State University, and it can be applied to any type of program, including a minor, an undergraduate degree program, or a graduate degree program. Their programmatic appeal to students and their cost-effective appeal to the university community are cited. It is contended that both approaches are necessary to retain the development of quality programmatic growth at colleges and universities. This growth is necessary for meeting the needs of students, both in terms of their interests and of their employability upon graduation. (Author/LBH)

Descriptors-Colleges, Cost Effectiveness, Educational Finance, *Equipment Utilization, *Federal Aid, Federal Regulation, *Government School Relationship, *Grants, Guidelines, Higher Education, *Purchasing, *Research and Development Centers, Scientific Research, Universities, Use Studies
Identifiers-Compliance (Legal), National Institutes of Health, National

Science Foundation

The National Science Foundation and the National Institute of Health's policies and procedures for awarding funds through grants for scientific research to colleges and universities for purchasing research equipment are reviewed. Both agencies rely mainly on the researchers to request only necessary equipment. Research evaluation systems, peer review, budget cuts, and site visits are also used to regulate equipment requests and each of these methods is described. Officials at six universities were interviewed, and the equipment management techniques of Boston University, Harvard University, Brandeis University, Brown University, Yale University, and the Massachusetts Institute of Technology are discussed. Iowa State University's Research Equipment Assistance Program is also described. The requirements of the Office of Management and Budget as detailed in circular A-110 are discussed and recommendations for changes are made including: (1) minimum federal requirements for grantees to follow to avoid unnecessary equipment purchases; and (2) special procedures to periodically check grantees' compliance with the requirements. The proceedings of the 1978 Legislative Work Conference of the Southern Regional Education Board include eight essays on higher education. In the first essay, Financing Higher Education in the 1980's: Fewer Students, More Dollars?,'' Lyman A. Glenny outlines nine issues that may affect fixed and variable costs for higher education. In Public Policy and Private Higher Education,'' David W. Breneman presents his views on federal and state policies affecting private higher education. He sees possibilities for the South that are effectively unavailable to the rest of the nation. In The Bakke Decision and State Legislatures,'' Robert M. O'Neil focuses on implications of the Supreme Court decision for state policymakers. In Supply and Distribution,'' Frank A. Sloan outlines some of the policies that have been tried or are being considered by states to influence the distribution of health manpower. In Supply: Changing the Focus to Health Care Delivery,'' Gordon H. DeFriese describes several specific programs that states now have in operation and that have promise for delivering health care services to rural areas. Robert R. Martin, a college president turned legislator, and Max Sherman, a legislator turned college president, present their views on higher education in Capitol and Campus.'' Competency Testing's Policy Implications for Teacher Training,'' by Charles B. Reed, remarks by West Virginia Governor John D. Rockefeller, IV, and remarks by Virginia Governor John N. Dalton are also presented. (SW)

Competence-Based Education: Its Nature and Purposes in Relation to Undergraduate Public Administration.
New York State Education Dept., Albany. Bureau of Occupational Education Research.
Spons Agency-Fund for the Improvement of Postsecondary Education (DHEW), Washington, D.C.
Pub Date-76
Note-18p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Educational Accountability, *Educational Objectives, Higher Education, *Performance Based Education, *Public Administration Education, *Systems Approach, Undergraduate Study

Competence-based education is defined and described as a system, and reference is made to its application to undergraduate education in public administration. Competence-based education emphasizes an integration of theory and practice in learning and curriculum and the organization of educational goals into explicit outcomes. The attainment of educational goals serves as the basis of the learning, assessment, and credentialing process. Competence-based education as a system seeks to teach those competences that are required in the real world. The three critical ingredients for an effective competence-based educational program are goal clarification, operational specification, and assessment. From the field of public administration there have been warnings against overdefinition, since the professional abilities needed in public administration tend to be analytical/integrative. Five benefits of competency-based education are discussed. (SW)

Identifiers-Branch Campuses, *Middle States

A number of colleges and universities are providing greater access to higher education by developing off-campus programs and courses. A study of such off-campus activities offered for credit in the Middle States area draws on data from the Middle States Commission on Higher Education (Middle States Association of Colleges and Schools) survey and on information from interviews with administrators. Focus is on those educational activities that necessitate a student's matriculating eventually at the main campus to secure a degree. Included in the data summarized is information on enrollment, student characteristics, the likelihood of student transfers to the main campus, curriculum offerings, policies concerning the determination of curriculum, faculty selection criteria, faculty situation (regular full-time, non-regular, etc.), program administration, administrative autonomy, and resources, including libraries, computers, counseling, etc. Also presented are a few recommendations about the administration of off-campus units, transfer of students to the main campus, curriculum planning, the advisability of selecting as many full-time main campus faculty as possible, adequate planning for off-campus units, and realistic appreciation of library needs. Descriptors-*Academic Standards, *Accreditation (Institutions), *Doctoral Degrees, Doctoral Programs, *Evaluation Criteria, *Graduate Study, Guidelines, Higher Education, *Masters Degrees, Professional Education, Program Descriptions, Program Evaluation

Identifiers-*Nontraditional Education

General guidelines for judging and evaluating advanced degree programs are presented, and the several types of degrees and specific graduate programs are discussed in detail. Graduate programs may be fully prescribed for all students, may have significant elements of flexibility permitting adaptations to individual needs and aspirations, or may be highly individualized for persons with clear and well-defined goals and unusual backgrounds. Accreditation by a nationally recognized agency has been the chosen means for assessing and recognizing the quality of institutional programs. There are two types of accreditation in higher education: general or institutional and specialized or programmatic. Research-oriented degrees have been directed mainly to the acquisition of knowledge and, to a lesser extent, to the organization and dissemination of knowledge. Practice-oriented degrees include those of the major professions. Nontraditional graduate programs and problems of appraising graduate programs in general are discussed. General characteristics of the following degree programs are discussed. Master of Arts and Master of Science,professional or practitioner master's degrees, sixth-year degrees and programs, Doctor of Philosophy, Doctor of Arts, Doctor of Education, and other practitioner type doctorates. Seven general principles and 24 specific principles regarding review and accreditation are presented. (SW)

Identifiers-Academic Planning, *Canada, *Faculty College Relationship

Studies on the identification of power bases within five Canadian universities were designed to develop a utility function for each sub-unit that will generate a series of power rankings. The unit of study is the faculty, and the tool is designed to identify the relative power of separate faculties and various combinations of faculties. Two power indices concerning budgetary allocation and academic policy-making are analyzed in this process. Five assumptions that form the basis for the derivation of the utility functions and power rankings are presented. The assumptions concern the external environment that affects the faculty, interaction with other faculties, and the formal governance structure. Faculty power is assessed by the Total System Interface Ranking and various power rankings with respect to policies concerning budgets, academic matters, and planning. The factors making up the Total System Interface Rank are the faculty's share of the university's inputs, the degree of constraint on the faculty exercised by outside agencies, the faculty's share of the university's outputs, and the type of interactions the faculty has with other faculties. Tables are presented for two of the universities on external interface relationships, committee structure, and internal interface relationships. External interface factors involve eight inputs, 10 constraints, and six outputs. (SW)

Descriptors-Academic Achievement, Access to Education, Black Students, Caucasians, *College Admission, College Integration, College Majors, *College Students, Comparative Analysis, *Educational Opportunities, Equal Education, *Ethnic Groups, Higher Education, Institutional Research, Jews, *Minority Groups, *Open Enrollment, Research Projects, Spanish Speaking, State Universities, Statistical Data
Identifiers-*City University of New York

The academic fate of students from different ethnic groups under open admissions at City University of New York is examined. Three central questions are addressed: (1) Who came and how was the ethnic composition of the university affected by open admissions? (2) To what degree did different parts of the university become ethnically integrated? (3) How did the members of different ethnic groups do? The analyses cover the first five years of open admissions and utilize four types of data. Open admissions did provide important access to the university for minority students, but more whites than minority students benefited from the policy for the years 1970-72. The distribution of minority groups at the university became more equal as a result of open admissions, but some stratification did remain. The impact of stratification at preceding levels of the system, in high schools and elementary schools, continued to be felt. Minority students were more likely to be found in the technical-vocational curricula, but student preferences appear to be the contributing factor. Students in the open admissions program did well by comparison with national norms. Even when high school performance was controlled, relatively consistent and sometimes large differences were visible in ethnic rates of success. In the senior colleges, Jewish students were generally the most successful and Hispanic students were the least successful. In the community colleges, the white groups were generally more successful than the blacks and Hispanics. Ten statistical tables are included. (SW)

Descriptors-*Academic Standards, Administrative Policy, Articulation (Program), *Comparative Analysis, Competition, Educational Coordination, *Grade Point Average, *Grading, Higher Education, *Interinstitutional Cooperation, *Student Evaluation
Identifiers-Grade Inflation

This article on grading practices in colleges considers the following issues: the more extensive utilization of nontraditional grades by many institutions, the practices of some institutions of not giving or not recording D and/or F grades, the policy of permitting unlimited repeating of courses with the last or highest grade received used in grade point average (GPA) computation, the academic bankruptcy'' procedure of excluding one or more bad'' semesters, and the lack of comparability of grades from one institution, one department, or one professor to the next. These practices raise serious questions about the manner in which a student's GPA is used to evaluate a student. There is a need for more commonality and equivalence in grading systems so that competition for graduate schools, fellowships, and jobs is more fair. There could be some progress in this direction if all of the departments or colleges in an institution, or all of the state schools in one state, or a national organization could encourage all of its member schools in higher education to work for equivalent grading systems. Identifiers-*Alabama

In its annual report for the 1977-78 fiscal year, the Alabama Commission on Higher Education summarizes the activities of the Commission and discusses the status of higher education in the State of Alabama. Major trends noted in this report include: an overall increase in state funding for higher education, an increase in funds appropriated for first professional health education, and a significant decrease in the number of humanities and liberal arts degrees awarded. Topics covered in the report include: (1) academic programs; (2) appropriations for higher education; (3) college and university information systems; (4) operating budget of the Commission; (5) federal programs; (6) special studies by the Commission; (7) student assistance programs; and (8) the evaluation committee. A map of institutional locations and lists of higher education institutions in the State of Alabama are appended. (BH)

Identifiers-Early Retirement, Junior Scholars Program

If no radical changes occur over the next 10 years in the aggregate relationships among college-age cohort sizes, enrollment figures and ratios of doctoral faculty-to-students, the mid-1980's and mid-1900's will see precipitous, but probably temporary declines in the demand for new Ph.D. faculty. Without the implementation of policies designed to offset such cyclical fluctuations, there will be serious consequences for academic research and teaching. Several innovative policies and recommendations to insure a moderate but steady flow of young doctorate scholars into academia are detailed and their consequences in terms of faculty demography and program costs are explained. On the national level, a Junior Scholars Program that would provide limited research positions is recommended. On the institutional level, early retirement programs introduced to fit projected changes in age structure and teaching demand are suggested. The importance of the timing of implementation for any of these programs is stressed. Statistical projections and summaries of previous related reports are appended. (Author/BH)

Descriptors-*Associate Degrees, *Bachelors Degrees, Black Students, Data Collection, *Degrees (Titles), Departments, *Doctoral Degrees, Females, Geographic Regions, *Higher Education, *Masters Degrees, Minority Groups, Statistical Data

The fourth in a series of volumes on higher education data, this fact book compiled by the American Council on Education contains information about associate degrees, bachelor degrees, and higher degrees earned in the United States from 1947-48 through 1975-76, with projected statistics provided through 1985. The data are condensed into figures and tables that emphasize trends and relationships. The categories for which figures and tables are provided include: earned degrees by level of degree; earned degrees by sex and by control of institution; earned degrees by region and state; earned degrees by race/ethnic group and academic area; and median years from baccalaureate to doctorate degree. Statistics for bachelor degrees awarded to black and other minorities and for doctorates awarded to women are also provided. Figures for earned degrees by academic areas are given in the following categories: humanities, education, social sciences, health professions, biological sciences, physical sciences, engineering, and other fields. Information compiled on associate degrees is presented in a separate section. An index to all four issues of the Fact Book is included. (BH)

Identifiers-*Nontraditional Education

A study was undertaken for the Council on Postsecondary Accreditation to develop evaluative criteria and procedures for the accreditation [illegible] nontraditional education. The summary report presents the major activities and findings of the study. The Introduction gives its history and background and outlines its scope, including the goals, organizational structure, and implementation. In Chapter 1, nontraditional education is defined, with its essential components and elements as well as its strengths and weaknesses identified. Chapter 2 presents findings on the current status of accreditation of nontraditional education, proposes changes in the process, and touches on a number of related issues such as experiential and prior learning, off-campus degrees and programs, contractual relationships, continuing education, the meaning of degrees, relationships to state and federal agencies, and the costs of accreditation. The implications of the project's findings are presented in Chapter 3, directly addressing the roles and relationships of traditional postsecondary education, the nontraditionalist, and accreditation. Twenty-five recommendations addressed to specific audiences are made in Chapter 4. Significant findings of a national survey undertaken for the project are reported throughout. Appended are a sequential evaluation model for institutions with off-campus programs, a list of advisory committee members, a roster of participating institutions, and a report of the PECA Seminar on the COPA Project. Descriptors-*Activism, Administrator Attitudes, Case Studies, College Faculty, *Dissent, Educational History, *Group Dynamics, Group Structure, Higher Education, Historical Reviews, Literature Reviews, *Organizational Climate, Power Structure, Student Behavior, *Student College Relationship, Teacher Attitudes, University Administration

Eleven years after the end of the height of protest on college and university campuses, it is important to try to understand what the student protest movement was all about, how it came to be, how and why it ended, and what will happen next. Through intimate case studies of takeovers at various universities, the dynamics of that era are examined. Presented in this book are essays on the literature about the protest movement, its organizational context, the tactics of protest, the dynamics of faculty response, the group psychology of campus disorders, and the strategies adopted by university authorities to counter dissent. The study attempts to provide both historical and structural perspective on previous topical studies of the protest period. A bibliography and index are included. (Author/MSE)

Identifiers-*Personalized System of Instruction

The state of the art of behavioral instruction and examples of successful implementation of behaviorally-based college teaching are provided in this book. In Chapter 1, the Personalized System of Instruction (PSI) is covered, including a discussion of the problems inherent in traditional teaching methods that led to the development of personalized instruction, a summary of the theoretical and empirical basis for the changes in traditional instruction, basic features of PSI, and the selection and use of the two most common kinds of proctors. Chapter 2 focuses on five other major behaviorally-based systems of college teaching: Ferster's interview technique; Michael's group-instructed, remediation system; Johnston and Pennypacker's individualized strategy for increasing oral fluency and minimizing errors; Malott's daily quiz, group-paced system for instructing very large classes; and Lloyd's behavioral menu, contingency-managed system for training a wide diversity of student performances. The third chapter is devoted to the management and grading of a behavioral course, with special emphasis on the basic PSI course and the interview technique. The major focus of Chapters 4 and 5 is on the large amount of diverse data collected in behavioral courses, including student evaluations of courses, student performance, and assessments of the relative importance of each of the many components that have been implemented in behavioral instruction courses. Throughout, methodological problems in researching behavioral instruction are analyzed when appropriate. In Chapter 6, extensions of behavioral instruction to noncollege populations and objectives are examined, and future directions for research are suggested. Bibliographies are provided for each chapter. (LBH)

On the Meaning of the University.
Pub Date-76
Note-123p.
Available from-University of Utah Press, Salt Lake City, Utah 84112 ($8.00)
Document Not Available from EDRS.
Descriptors-Books, *College Role, *Cultural Context, *Educational Benefits, *Educational Philosophy, Educational Responsibility, Futures (of Society), *Higher Education, Individual Needs, Quality of Life, Social Responsibility, Universities, *Values

The meaning of education is addressed in this book of philosophical essays by seven authors. Focus is on education in the context of the issues that currently confront students, teachers, educational institutions, and people concerned with the quality of contemporary life. The volume examines the cultural foundations of society and finds the meaning of a university in knowledge, its intrinsic value and its uses, and in reason and reasonableness. Reconciliation of Tradition and Modernity in Universities,'' by Lord Eric Ashby, confronts one of the decisive problems that education generates as it attempts to move into new territory while preserving the authentic values of the past. In Democracy and Distinction in American Education,'' Brand Blanshard treats another basic dilemma: the apparent conflict of the ideal of democracy with the ideal of individual distinction. In The Individual and Society,'' John Gardner examines the university's role in achieving both individuality and strength in social institutions. T.R. McConnell deals with the question: Do we have a Surfeit or Dearth of Highly Educated People?'' Mina Rees in her essay, The Ivory Tower and the Marketplace,'' sorts out the questions that must be asked by all educators who seriously believe that the university of the coming decades must be responsive to the practical interests of society while preserving its task as creator of knowledge and wisdom. In Forces for Change in American Higher Education,'' David Pierpont Gardner argues that the university of the future must accommodate a variety of forms and structures. The introductory essay suggests that the philosophy of education is a function of the value structure of the culture. (LBH)

Identifiers-Colombia

Guidelines for planning in higher education (which might have an application in Colombia) are described. Chapter 1 provides an expanded definition of higher education that includes noncollege channels to lifelong education and embraces all viable postsecondary education. Chapter 2 addresses current problems facing higher education, such as lack of statewide planning, proliferation of programs and institutions, lack of educational opportunities for all citizens, unsatisfactory financing, and inadequate measures of performance. Chapter 3 presents a general view of higher education, principles for development of higher education, and goals and objectives for higher education. In chapter 4 focus is on governance and management and proposals for both a state commission and a management agency are presented. Chapter 5 covers enrollment forecasting and describes an analytical procedure for predicting the number of potential college and postsecondary enrollees. Needs, aspirations, and accomplishments of high school seniors, high school graduates, vocational-technical students, seniors and graduates of private four-year colleges, public colleges and universities, and community junior college students are examined in chapter 6. Chapter 7 summarizes educational planning model applications and capabilities, and chapter 8 provides a report of the status of the model system in 1970 and lists 12 recommendations growing out of the program evaluation. The geographic origin of students enrolled in Kentucky colleges and universities for the Fall of 1977 are detailed in charts, tables, and maps compiled by the Kentucky Council on Higher Education. The data were gathered from colleges and universities accredited by the Southern Association of Colleges and Schools or by the American Association of Bible Colleges. Kentucky state-supported and independent institutions enrolled 126,162 students during the fall semester of 1977 and of that total, 125,395 are listed in this report by their Kentucky county or state of origin. Enrollment by county and state of origin is given for state-supported and independent colleges, universities, community colleges, and junior colleges. First-time freshmen enrollments, tuition waiver enrollments, and first-professional enrollments are detailed. Out-of-state enrollments and out-of-state first-time freshmen enrollment rates are included for both state-supported and independent institutions. Origin of enrollment for various individual institutions is also diagrammed with maps of the state of Kentucky. (BH)

Descriptors-*Academic Achievement, Adult Students, Comparative Analysis, *Females, *Grade Point Average, Higher Education, *Nontraditional Students, Statistical Data
Identifiers-*Black Hawk College IL, *Reentry Students

The two purposes of this study were to: (1) determine whether there had been an increase in the enrollment of returning women students (twenty-five years of age or older) between the fall of 1975 and the fall of 1976 at the Quad-Cities Campus, Black Hawk College. A second problem was to compare the mean grade point average achieved by these returning women students with the grade point average achieved by the rest of the student body. Enrollment data from the fall of 1975 were compared with the enrollment data of 1976, and the mean GPA of all returning women students and of the rest of the student body enrolled on the Quad-Cities Campus was computed by the data processing center. The results demonstrated that the enrollment of returning women students increased 2.2 percent while the overall student enrollment only rose 0.6 percent. The academic achievement of returning women students, as measured by the mean GPA, was significantly higher than the rest of the student body. This difference was significant at the .01 level. Recommendations included: (1) better scheduling of classes for women to increase student hours; (2) improved vocational counseling for women; (3) women should be encouraged to enter more courses traditionally reserved for males. Recommendations for further study included curriculum needs, delivery systems, and the effects of higher education on a woman's personal and social life. Statistical data are appended. (Author/LBH)

An Investigation of the Effectiveness of Black Hawk College Policy in Responding to the Needs of Returning Women Students.

Pub Date-2 Mar 76

Note-60p.; A practicum presented to Nova University in partial fulfillment of the requirements for the degree of Doctor of Education ; Reproduced from best copy available

EDRS Price MF-$0.83 HC-$3.50 Plus Postage.

Descriptors-Administrative Policy, *Adult Students, Affirmative Action, Equal Education, *Females, Higher Education, *Nontraditional Students, Program Effectiveness, Questionnaires, School Surveys, Statistical Data, Student Needs, *Student Personnel Services, *Womens Education

Identifiers-*Black Hawk College IL, *Reentry Students

Black Hawk College policies and programs were examined to determine their effectiveness in responding to the needs of returning women students, one of the most significant groups in the new student population. Literature was reviewed, college documents studied, key personnel were interviewed, and 225 women students aged 25 or older were surveyed. Findings demonstrated that (1) women constituted 52.8 percent of the entire student population and women 25 years old or older accounted for 25 percent of this group, (2) Black Hawk College has several significant programs for women, but very few women have knowledge of these programs, (3) about 70 percent of returning women students at Black Hawk College are career or job goal oriented. Four major recommendations are suggested: (1) a position of Coordinator for Women's Programs should be created to help bridge the present communication gap between existing programs and the student population; (2) a more flexible system for the scheduling of classes should be investigated; (3) there should be increased individualization of courses; and (4) extension courses and an innovative library-based program Study Unlimited, should be expanded. The study concluded that the adoption of these recommendations would strengthen the effectiveness of Black Hawk College's Affirmative Action Plan by improving the opportunities of returning women students. The survey questionnaire and statistical data are included. (Author/LBH)

Graduate education in the United States is viewed as a narrowing and intellectually confining experience, and its effects on the student and society are discussed. The experience of the graduate student includes learning how to deal with departmental requirements, course expectations, and demands from professors. The ability to hustle'' to meet the requirements of the program is an important skill and is seen as a form of academic socialization found in every discipline. Rather than developing an inquisitive mind, unafraid to delve into various fields and raise important questions, graduate schools force students to function within a particular paradigm producing graduates with shallow vision and limited credentials. Training received in graduate school, the skills required to hustle,'' are then put into practice in the professional world and the result is a group of power-seeking people of action and little depth. Professors also partake in the academic hustle'' in order to attract students and to publish papers and books. Students, professors, and people in general are seen as victims of a technological society that demands a supply of bureaucrats, politicians, business and technical persons to keep the system running, and provides few rewards for the reflective intellectual who is not willing to play along. Beausang, Kenneth R.

The Influence of Instructor Tutoring on the Learning of Students Using the Mastery Method in Introductory Sociology.

Pub Date-23 Jun 77
Note-64p.; A practicum presented to Nova University in partial fulfillment of the requirements for the degree of Doctor of Education
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-Academic Achievement, College Faculty, *College Instruction, College Students, Comparative Analysis, Higher Education, *Mastery Learning, Peer Teaching, Sociology, Student Opinion, Teacher Participation, *Teaching Methods, *Tutoring
Identifiers-Black Hawk College IL

The degree of influence instructor tutoring had on the performance of Black Hawk College sociology students was studied along with the question of whether students expressed a change in the degree of preference for the mastery approach when an instructor was actively involved in the learning process. Two classes were used: one during spring 1976 that did not receive instructor tutoring, and one during spring 1977 that did. Mean scores on a midterm exam were compared. At the close of the experiment, students were asked to express their preference for the mastery method of instruction as compared with the traditional lecture-discussion approach. Results demonstrated that there was no significant difference in the mean scores achieved on the midterm exam, nor was there any significant difference in the proportion of students expressing a preference for the mastery method when instructor tutoring was used. However, the smallness of the population tended to cause the tests to not be very sensitive. Recommendations included: (1) clarification of the mastery system in the college's schedule of classes; (2) peer tutoring; (3) increasing teachers' knowledge of and involvement with mastery learning; and (4) additional research of alternative delivery systems and student characteristics as predictors of success. White Students Enrolled in Black Colleges and Universities: Their Attitudes and Perceptions.

Southern Regional Education Board, Atlanta, Ga.

Pub Date-78

Note-50p.

Available from-Southern Regional Education Board, 130 Sixth Street, N.W., Atlanta, Georgia 30313 ($3.00)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Black Colleges, *Caucasian Students, *College Environment, College Integration, *College Students, Higher Education, Participant Satisfaction, Questionnaires, School Surveys, Southern Schools, Statistical Data, *Student Attitudes, Student Characteristics, *Student College Relationship, Student Experience

Attitudes and perceptions held by white students enrolled in black colleges were studied to determine their educational and personal experiences at the institutions, their feelings about the impact they had on the institutions, and to provide data that could be helpful to the institutions as they move toward becoming multi-cultural. For purposes of data analysis and interpretation, responses are categorized in five groups: observations of respondent data; educational climate and learning experiences; teacher competence; interpersonal relations; and overall satisfaction. All of the participating institutions were located in the South. White students are older than the traditional college age; 60.2 percent are married and 98.6 percent live off campus. The survey questionnaire, a Likert-type scale, investigated perceptions of social activities/atmosphere; physical facilities; employment preparation; student services; and administrative practices, as well as perceptions of the learning and teaching atmosphere. Open-ended items and a comment section were also included. Appendices provide institutional data, respondent information, data on responses to survey items, and selected subjective responses. (SW)

An Evaluation of the Suitability of the College Setting for Adult Senior Students Attending Federal City College During the Summer Term, 1973.

Pub Date-Mar 74
Note-28p.; Report submitted in partial fulfillment of the requirements for a directed study/practicum, Federal City College
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Adult Students, Age Groups, *College Environment, College Students, Educational Counseling, Faculty Advisors, Higher Education, Institutional Research, *Nontraditional Students, Questionnaires, Research Projects, Scheduling, School Orientation, School Registration, School Schedules, School Surveys, *Student Attitudes, Student College Relationship, Student Experience, *Student Needs, Student Personnel Services, *Undergraduate Students, Urban Universities
Identifiers-*Federal City College DC

The suitability of the college setting for adult senior students attending Federal City College during the summer term of 1973 was evaluated, with focus on registration, orientation, class schedule, academic advising, and supportive services. Adult senior students were defined as all undergraduates who were 31 years old or older and who had received 135-179 quarter hours of credit. A questionnaire mailed to 208 students yielded 72 usable responses. Based on the findings seven recommendations are offered: the college should establish a more organized and speedy registration process; the orientation program should better inform adult students about graduation requirements and the availability of facilities; more classes should be offered in the evening; the academic advisor should be more available to the adult student; more information should be provided to the adult student about the counseling center, day care center, media center, and the skills center; a centrally-located and reasonably-priced cafeteria is needed; and a followup study of adult students should be conducted to determine if the college setting improves. Appendices include initial and followup letters to students and a sample questionnaire. A literature review and bibliography are included. (SW)

Informal Interaction with Faculty and Freshman Ratings of the Academic and Non-Academic Experience of College.

Syracuse Univ., N.Y.
Pub Date- 75
Note-27p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Academic Achievement, College Environment, College Faculty, *College Freshmen, College Role, *College Students, *Educational Benefits, Followup Studies, Grade Point Average, Higher Education, Institutional Research, Intellectual Development, Interpersonal Relationship, Persistence, Private Colleges, Program Evaluation, Research Projects, School Surveys, Statistical Analysis, *Student Attitudes, Student Experience, Student Opinion, *Student Teacher Relationship, Teacher Attitudes, *Teacher Influence, Teacher Role

This study, done at Syracuse University in 1975, investigated the multidimensional differences in freshman perceptions and experience of the academic and non-academic aspects of college associated with varying amounts of informal contact with faculty. Discriminant analysis indicated that factor dimensions, termed Interest Value, Practical Appeal and Dullness/Apathy, best distinguished between groups of freshmen categorized as high, moderate and low interactors. High interactors were characterized by more positive ratings of their academic program on all three dimensions and by more positive ratings of their non-academic life on Interest Value than were low interactors. as measured by cumulative freshman grade point average, made little difference among the three groups. Analysis of supplementary data also indicated that high interactors ranked faculty members significantly higher as a source of positive influence on their intellectual development and as a source of positive influence on their personal development than did low interactors. In a follow-up analysis of the same subjects conducted during the subsequent academic year, amount of informal contact with faculty was found to be significantly associated with persistence at the institution. Descriptors-Advisory Committees, Educational Coordination, Educational Planning, Government Role, *Government School Relationship, *Graduate Medical Education, Higher Education, Interinstitutional Cooperation, Labor Supply, *Medical Education, Medical Schools, Medical Students, Needs Assessment, *Occupational Surveys, *Physicians, *Specialists

The supply of physicians in the United States and the way in which physician graduate medical education programs are established are discussed. Too many physicians are being trained within certain specialties and too few are being trained as primary care physicians. No system exists for ensuring that the number and types of physicians being trained is consistent with the approximate number needed. Federal agencies that directly or indirectly support graduate medical training programs make little effort to coordinate the numbers and types of those being trained. There is disagreement among medical organizations on the need to control physician specialty distribution. It is suggested that the Secretary of the Department of Health, Education, and Welfare (HEW) should discuss with the Coordinating Council on Medical Education the possibility of engaging in national studies of physician supply and requirements. HEW's Graduate Medical Education National Advisory Committee should play an active role in determining the scope of these studies and in monitoring their progress. The committee should also review in-depth the Coordinating Council's completed studies and provide the Secretary with its detailed comments and recommendations. (SW)

A Multi-Group Evaluation of the Models and Functions of University Counseling Centers. Research Report No. 8-76.

Maryland Univ., College Park. Counseling Center.

Pub Date-76

Note-29p.

Available from-Counseling Center, University of Maryland, College Park, Maryland 20742 ($1.50)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Administrative Personnel, Administrator Attitudes, College Faculty, College Students, Consultation Programs, *Counseling Programs, *Counseling Services, Counselor Attitudes, *Guidance Centers, Higher Education, Models, Occupational Guidance, *Participant Satisfaction, Program Evaluation, Psychotherapy, Resident Assistants, School Surveys, State Universities, Student Attitudes, Student Personnel Workers, Teacher Attitudes, *Universities

The appropriateness of four counseling center models (traditional, consultation, vocational guidance, psychotherapy) and 15 specific counseling center functions for universities with enrollments of 10,000 plus were evaluated by samples of counselors, student personnel administrators, resident assistants, faculty, students, and university administrators. Samples were drawn from a large public university in the East. The traditional model was evaluated most positively by five of the subgroups. The most salient findings were: (a) In both the models and functions phase of the study, student personnel subgroups rated consultation-related activities as appreciably more appropriate, both in a relative and absolute sense, than did non-student personnel subgroups; (b) While the psychotherapy model consistently received the lowest ratings, certain types of personal adjustment counseling received consistently positive ratings; (c) Educational-vocational counseling was seen as highly appropriate by all groups but counselors, and student personnel administrators did not feel enough of it was being done, which was consistent with earlier research. Identifiers-*University of Maryland College Park

University Student Census (USC) data of incoming freshman commuters at the University of Maryland, College Park, for 1973, 1974 and 1975 are examined. The respective samples numbered 1467, 588, and 858 students who were enrolling for the Fall semester and who planned to live off-campus. The report is divided into three sections: (1) a composite description of the typical incoming freshman commuter for each of the three years; (2) a summary of trends or directions in four areas: demographic variables, attitudes and expectations toward the university, attitudes toward social issues, and commuter needs; and (3) a sketch of a hypothetical commuter of the future and a discussion of his/her anticipated needs. Results over the past three years show that there is an increase in concern over the economy as the most important issue for society to resolve; commuters are living closer to campus; fewer students are working; they report high school grade point averages of B'''; more commuters' fathers have college degrees; the University of Maryland is their first choice of school because of its location; more commuters' educational objectives are to study beyond the bachelor's degree; the vocational value of education is becoming more important; more commuters expect to get involved in campus activities; most take a neutral stance on such social issues as recruiting blacks and black and womens' studies programs; and there is some increase in interest in busing service to suburbs and adjoining cities. Identifiers-*On Campus Students, University of Maryland College Park

This study sought to answer the following questions: Are commuting students different from resident students? Are commuters a heterogeneous population? Do trends in commuter concerns from 1973-75 persist in 1976? A sample of 1475 incoming freshmen at the University of Maryland, College Park, who attended the 1976 two-day freshman orientation sessions were administered the University New Student Census, and response difference among three sub-groups were compared: resident students (living on campus in dorms or fraternity/sorority houses); dependent commuters (living off-campus with parents or relatives); and independent commuters (living off-campus apart from parents or relatives). Of the 56 items analyzed, 20 items discriminated between dependent commuters and resident students, 17 items discriminated between independent commuters and resident students, and 17 items discriminated between dependent commuters and independent commuters. It was concluded that commuters were significantly different from resident students, and the two commuter groups were significantly different from each other. It was not found that the two commuter groups were more different from each other than they were different from resident students, as had been found previously. It was found that commuter concerns need to be interpreted from the perspective of commuter sub-groups rather than considering commuters as a homogeneous group. Commuters did not seem to be more disadvantaged than resident students in personal abilities and resources, but some evidence was found that due to lack of access to external sources of support such as peer groups, commuter students may need more supportive services than resident students. Identifiers-*On Campus Students, University of Maryland College Park

A random sample of 152 faculty (76% return rate) at the University of Maryland, College Park completed a version of the Situational Attitude Scale - Commuter, which assessed their differential attitudes toward commuting versus resident students in a situational context. Data were analyzed by t-tests at the .05 level, and only 7 of 60 items were responded to differentially by faculty, which is what would be expected by chance. Thus, there is no evidence that faculty differentiate among students based on their residence. These results are in contrast to those found among student personnel staff, who tended to have more negative attitudes toward commuters than resident students. Possible reasons for the differences in responses of the faculty and student personnel staff are discussed, as are implications for students and past and future research on the topic. (Author/MSE)

Identifiers-University of Maryland College Park

A telephone poll of 91 University of Maryland students was conducted to determine the nature and extent of their interest in women's studies courses. Results indicated that 96 percent felt there was a need for such courses and 57 percent would take such a course. Women (73 percent) were more interested than men (38 percent) in taking such courses, and Arts and Sciences students were most interested (65 percent) and Agriculture students least interested (0 percent). Students were most in favor of a major in women's studies (54 percent in favor) as opposed to having a separate department of women's studies (58 percent opposed), and 59 percent felt that individual departments should offer courses on women. Students were most interested (in descending order) in courses on: Sociology of Women, Psychology of Women, Sex and Politics, Biology of Women, Women in Literature, History of Women, and Women in Education. Women were more interested in the Psychology of Women than the Sociology of Women, while men were the opposite. Results of this survey suggest that steps ought to be taken at the University of Maryland to implement a women's studies curriculum. Students surveyed were overwhelmingly in favor of such an undertaking and there are large numbers of faculty members interested and willing to teach courses in some area relevant to their interests and to women's studies. Statistical data are included. (Author/LBH)

Identifiers-*Reentry Students, University of Maryland College Park

A needs assessment questionnaire was designed to assess the practical and psychological needs of mature women returning to college, and to compare these needs with those of returning men and traditional-age students. Demographic characteristics of the different groups were also examined. It is shown that the average returning woman is an upper-middle-class woman with a family, typically works few or no hours at a paid job, and has been away from school for at least several years; the average returning man, in contrast, is younger, less financially secure, married, but without children, has had a shorter break in his education, and works more hours at a paid job. Despite demographic differences, there were few differences in needs between the returning women and the other student groups, and the hypotheses of different needs of actual returning students versus those of potential returning students and of diverse subgroups of returning women were explored. Results of the study are described in terms of their implications for campus services and the evaluation of programs. It is noted that returning women as a group seem more involved in university life than returning men, who are more involved with paid jobs, and that the campus programs and services need to be tailored differently for the two groups. Identifiers-Compliance (Legal)

Red tape, particularly with reference to administration in the federal government, is described, and suggestions that have been proposed for improvement are explored. Among the frustrations that are met in dealing with government are duplicative and contradictory requirements of different agencies, restrictions imposed for announced ends that are never attained, and long time delays on action on pending matters. Government personnel are often blamed by the victims of red tape, but employees also are constrained by the procedures they must follow. Each constraint that has arisen in the government is a product of a fairly small number of claimants. Most people prefer certain constraints and annoyances to the possibility of temporary disruption. Government regulations are designed to protect people from each other, as for instance, in the relations between buyers and sellers. Additionally, government measures to help the destitute, the handicapped, and groups like farmers who suffer hardships, require regulations to define who is eligible. Government procedures are designed to ensure representation, rationality, and administrative effectiveness. Interest-group participation in official decisions occurs to a greater extent than would be dictated by fairness alone. Inadequacies to three major approaches to lessening problems of red tape are analyzed, and it is suggested that the normal methods of politics are ways of keeping red tape under control and endurable. Identifiers-*Federalists

The history of the first major student revolt in American colleges, which came at the turn of the nineteenth century, is reported in this book. The question of why upper class, Federalist, and socially conservative students became rioters is examined. The rioters are portrayed as a postrevolutionary generation the Sons of the Founders who wanted to outdo their elders in nationalistic deeds. It is argued that they were politicized by their Federalist fathers. When their generational and political goals were frustrated, they were rechanneled into surrogate political activity student revolt. To restore order, colleges adopted a new disciplinary tool, the blacklist, that effectively suppressed the resistance. Observations are offered about the part rebellion played in defining the antebellum college, and about how the downfall of republican education coincided with the rise of the evangelical movement in the colleges, leading to a struggle for control of the colleges of national import. Identifiers-Graduate Record Examination Background Quest

A study was conducted to identify older graduate student applicants and the graduate school selection process. Older students were operationally defined as over age 30 or those who received their baccalaureate degree eight or more years ago. Information about the characteristics of older graduate students was obtained from the Graduate Record Examination Background Questionnaire. About 15 percent, or 37,000, of the individuals in the data set were over 30, but only about half of these individuals received their baccalaureate degree in 1967 or before. The older applicants differed from younger students in several respects: there are more women than men in the older group; older applicants were more likely to have previously attended graduate school; older applicants are less likely to be undecided about their field of graduate study; and older applicants are more likely to select career-oriented fields than younger students. About 50 interviews of graduate school departments around Washington, D. C.; Los Angeles, California; Boston, Massachusetts; and Chicago, Illinois revealed that few departments had experimented with alternative methods to select graduate students, despite a realization that the older students are not well served by the traditional criteria. Institutionalizing Innovation in an Organization: A Model and Case Study.

Pub Date-19 Apr 75

Note-69p.; Paper prepared for presentation in the Formal Organizations Session of the annual meetings of the Pacific Sociological Association (Victoria, British Columbia, Canada, April 17-19, 1975); Parts may be marginally legible due to small print

EDRS Price MF-$0.83 HC-$3.50 Plus Postage.

Descriptors-Activism, *Administrative Organization, Case Studies, *Change Strategies, Conflict, Educational Change, Educational Sociology, Guidelines, Higher Education, *Innovation, Models, *Organizational Change, Organizational Climate, Organizational Effectiveness, Policy Formation, *Social Psychology, State Colleges, *Strikes, Student College Relationship

Identifiers-*San Francisco State College CA

A policy systems theoretical analysis of the problem of institutionalizing innovation in an organization is summarized in a flow diagram. The model is presented in terms of specific hypotheses, and then illustrated with a case of frustrated innovation, the 1968-69 crisis and strike at San Francisco State College. The model is set up (1) to help understand the process of innovation in an organization both in theory and practice, (2) to highlight turning points and stumbling blocks in attempts to innovate, and (3) to suggest guidelines for implementing change and managing crises along the way. The result should be of benefit to theorists, researchers, policy-makers and administrators. (Author/LBH)

The Labor Market for PhDs in Science and Engineering: Career Outcomes.

Spons Agency-Ford Foundation, New York, N.Y.; National Science Foundation, Washington, D.C.
Pub Date-78
Note-34p.; An earlier version of the study was presented at the Eastern Economics Association annual meeting (Washington, D.C., April 28, 1978) ; Tables may reproduce poorly due to small type
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Career Change, Career Opportunities, College Graduates, *Doctoral Degrees, *Employment Opportunities, *Engineers, Followup Studies, Graduate Surveys, Higher Education, Job Satisfaction, *Labor Market, Publications, Research Projects, Salaries, *Scientists, *Vocational Followup, Work Environment
Identifiers-*Outcomes of Education

The outcomes of the employment situation for science and engineering PhDs were assessed through a survey of college and university departments and faculty members who had accepted new academic jobs or who had left academic jobs for other positions within the last three years. Faculty members who had accepted their first job after receiving the doctorate were not included. A large sample of PhDs in 12 fields who were employed by the federal government and PhDs in many fields who were employed outside academe or government were also surveyed. The study analyzed the responses to an eight-page questionnaire, completed by 10,000 doctorate holders, which dealt with career outcomes, current job characteristics, personal and educational backgrounds, and career histories. Findings are reported on three important career outcomes: salary, job satisfaction, and publication rates. Detailed multivariate analyses were conducted on the three dependent variables and the following six categories of independent variables: background factors, educational experience, present job characteristics, employment history, satisfaction with life in general and with leisure activities, and mobility. It appears that salary, publication, and relationship of job to graduate study are important determinants of job satisfaction, although publication affects satisfaction only because it relates to salary. It is concluded that academic jobs are not the only desirable jobs for science and engineering PhDs, and that the decline in academic jobs does not warrant cutbacks in science and engineering. Maintenance of PhD production need not result in less satisfying or less productive jobs. (SW)

Identifiers-*University of Transylvania KY

The history of Transylvania University is traced in this book that commemorates its bicentennial. The ongoing life of the institution is placed in meaningful relation to the educational history of the nation and to the political, economic, social, and cultural forces that influenced that history. Transylvania was the first western university in the U.S. Its establishment and growth is described and its leaders and contributions are discussed. Among the topics covered in the 22 chapters are: learning in the wilderness; the contributions of James Moore, Horace Holley, Burris Jenkins, and Charles Loos; problems and slow growth of a university; the failure of innovative education; the crisis in the medical department; the period of decline, 1850-1865; the role of the Methodists; student life from the Civil War to World War I; World War I and the "heresy trial" of 1917; depression and war; innovation and expansion; and expansion and consolidation. Photographs and bibliography are included. (LBH)

Descriptors-*Career Opportunities, *College Graduates, *Employment Projections, Employment Qualifications, Employment Trends, *Higher Education, *Job Market, Labor Supply, *Occupational Information, Occupational Mobility, Resource Guides, Salaries, Trend Analysis, Work Environment

Identifiers-*Job Descriptions

This guide to career opportunities in over 100 fields covers a broad range of occupations for which a college degree is, or is becoming, the usual background for employment. For each occupation, information is presented on the nature of the work; places of employment; education, skills, and abilities required for entry; employment outlook; earnings; and working conditions. Information is also presented on how to use the guide, where to go for more information, assumptions and methods used in preparing employment projections, and important occupational and industrial employment trends. Occupations covered include workers in professional and related occupations, sales occupations, managerial and administrative occupations, and service occupations. The section on places of employment provides information on the number of workers in an occupation and tells whether they are concentrated in certain industries or geographic areas. The section on training, other qualifications, and advancement tells the minimum level and type of education required for various occupations and in many cases lists alternative ways of obtaining training. Frequently observed patterns of moving from one occupation to another are also discussed. For some occupations, information is provided on prospective job opportunities in terms of the expected demand-supply relationship. For every occupation and industry, an estimate of future employment needs is developed. (SW)

Identifiers-*Educational Information Centers

A system of statewide educational information networks is proposed and plans for the implementation of such a network are presented. The need for a coordinated, well-administered system to disseminate information about educational opportunities is discussed with specific reference to the importance of reaching older learners, minority groups, urban and rural areas, and other underserved populations. How such programs can be identified and requirements they should meet are discussed. It is recommended that the network (1) be comprehensive and provide information about all education options and alternatives; (2) provide coordination to insure that the needs of the consumers are met, resources are not duplicated, and to monitor funding requests; and (3) evaluate the quality of the services offered. Three plans for organizing an educational information network are explained and methods for expanding and developing services are provided. Federal, state, local, and private sources of potential funding for an education information network are included. (BH)

Data from the Graduate Programs and Admissions Manual, 2nd Edition'' published by the Graduate Record Examination Board and the Council of Graduate Schools in September 1973 are presented in tabular form to summarize information about graduate programs offered in all higher education institutions in the United States. This summary is based on data collected through questionnaire responses from all U.S. institutions awarding Master's degrees or higher. A separate summary is tabulated for 79 graduate programs and for 10 traditional groups into which the 79 programs were divided. For each program, responses are summarized for all institutions (classified by size) listed as offering that program and are also presented in categories based on number of degrees awarded, and program size including number of faculty, number of students, and number of financial aid awards. A longitudinal study designed to test hypotheses about the relationships between academic achievement, cognitive styles, and verbal competence is described. One entire class of 1,548 students of a large municipal college was followed from college entry in 1967 through entry into postgraduate and occupational training. Data were taken from tests, questionnaires, and academic records of the entire student group, and from an intensive battery of tests administered to 100 students from the original group. The various cognitive styles (field-dependent or field-independent) and their relation to choice of major and academic careers as well as postgraduate careers are described. The objectives of the study include: (1) examination of the influence of cognitive styles on academic progress; (2) examination of the influence of patterns of students' standing in the various cognitive styles on postgraduate study; (3) determination of the degree to which academic choices at the high school level are predictive of academic functioning in college and graduate school; (4) study of the effect upon various aspects of college evolution of a marked discrepancy in the level of functioning to determine the sources of cognitive style development; (5) examination of the role of cognitive styles in the verbal functioning of students who appear no different in standard tests of verbal ability. The results are presented in four sections and numerous tables provide statistical information. An extensive bibliography is included. (BH)

Identifiers-*Texas

The status of higher education in Texas is examined in this major report of changes in higher education over the past decade. Information on enrollment, cost, financial aid, job opportunities, and facilities in higher education institutions is given for private higher education, professional higher education, community colleges, and state colleges and universities. For the past decade Texas has been experiencing rapid growth and development of higher education institutions and ranks second in the nation for the number of students enrolled. The increasing costs of maintaining these institutions demand that financial support be increased substantially to maintain existent programs. Recommendations for state actions and policies on student assistance programs, public institutions, professional education, educational facilities, and funding for higher education are included. Twenty-one high priority items for consideration by the state coordinating board are also listed. Numerous tables and graphs provide statistical data. (BH)

Descriptors-*Access to Education, Adjustment (to Environment), Ancillary Services, *Armed Forces, Black Students, Cohort Analysis, Colleges, Community Colleges, Educational Needs, Enrollment Influences, *Federal Aid, Financial Needs, Higher Education, Military Service, Statistical Data, *Student Financial Aid, Universities, *Veterans, *Veterans Education
Identifiers-*GI Bill

The effects of the GI Bill on veteran's readjustment to civilian life and on the educational community are examined in an effort to determine if (1) benefit levels should be changed; (2) the time that veterans must complete their training or school should be extended; and (3) benefits for attending flight and correspondence school should be eliminated. The basic GI Bill benefit is a monthly stipend intended to cover at least part of school tuition and living expenses. Various forms of the bill and the benefits received from them since 1944 are discussed with specific attention to the post-Vietnam era. Comparisons are provided between the income levels, educational levels, and employment levels of veterans and nonveterans. It is concluded that the participation rate for black veterans exceeds that of white veterans and that veterans have higher employment rates and educational levels than nonveterans. The GI Bill influences the educational community because it increases the number of students and increases the flow of federal money to educational institutions. Figures for veteran enrollment by type of institution, and revenue from GI Bill students by type of institution are projected for fiscal years 1978 through 1983. Comparison of the GI Bill with other federal student grant programs are also included. The pros and cons concerning benefit levels, the time limit on receiving benefits, and benefits for flight and correspondence school are presented. (BH)

Descriptors-Administrative Organization, College Students, Credit (Finance), Educational Finance, Eligibility, Financial Needs, *Financial Problems, Higher Education, Historical Reviews, Legal Responsibility, *Loan Repayment, Money Management, *Student Financial Aid, *Student Loan Programs

Identifiers-*National Direct Student Loan Program

A historical perspective on the organization and administration of the National Direct Student Loan (NDSL) Program is reported in this study, particularly as it relates to persisting concerns about the default rate. Chapter 1 explains the origin, purpose, and provisions of the program. Chapter 2 provides an overview of the study, including both the data collection and analysis plans. In Chapter 3 focus is on institutional organization for NDSL (such as centralization and specific functions, billing and collection, data processing, and staff training), and Chapter 4 deals with NDSL recipient selection and packaging patterns. Institutional perceptions of problems (in selection and administration) in the award of NDSL funds are explored in Chapter 5 and the exit interview (with graduates and dropouts) is described in Chapter 6. NDSL billing and collection procedures (administrative options, teacher cancellation provisions, educational deferments, collection agencies, administrative actions against defaulters, and write-off preferences) are reviewed in Chapter 7. Chapter 8 deals with such billing and collection problems as administration of cancellation, deferment, and truth-in-lending provisions; preparing fiscal operations reports; and maintaining contact with borrowers. Relationships between administrative practices and annual institutional NDSL default rates are examined in Chapter 9. (BD)

Identifiers-Early Retirement

Based on the assumption that during the next quarter century the academic labor market will be chronically depressed, a project was undertaken to create models for projecting college faculty demographics. In this report the statistical models and the results of their application are explained in detail, including extensive statistical tables. Among the issues examined are: the effect of variation in enrollment growth; the results of allowing the rate of faculty promotion to fluctuate with excess demand (supply) of faculty; the results of increasing the level of outmigration of tenured and nontenured faculty from academia; the impact of the current elimination of mandatory retirement and the impact of programs that encourage faculty to retire early; and doctorate women and their future representation in academia. Pub Date-78
Note-33p.; Part of the Project on Quantitative Policy Analysis Models of Demand and Supply in Higher Education; for related document see HE 010 878 ; Best copy available
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Career Ladders, *College Faculty, *Doctoral Degrees, Higher Education, Labor Market, Models, Occupational Surveys, *Salary Differentials, *Teacher Salaries, *Teacher Supply and Demand, *Tenure, Time

In a market where salary adjustment is limited by equity constraints within ranks and across fields, non-salary adjustment to changing market conditions is likely to occur. Changes in the rate at which nontenured faculty are granted tenure is one such adjustment. A logit model that explains time to tenure as dependent on the time since an individual received his Ph.D. and market conditions is estimated using data from two large surveys of faculty. Estimated time to tenure is then related to other possible measures of excess demand or supply. It is found that the smaller the increase in starting salary, controlling for salary level, the lower is time to tenure. (Author)

Total Revenue and Expenses for Provincially Assisted Universities of Ontario for the Fiscal Year Ended April 30, 1978.

Descriptors-*College Attendance, College Freshmen, *Educational Demand, *Educational History, *Enrollment Influences, Enrollment Projections, Enrollment Trends, Females, *Higher Education, Males, *State Surveys, Statewide Planning, Statistical Analysis, Trend Analysis
Identifiers-Full Time Students, *New York

Some basic historical college participation statistics from New York State and a set of factors that may influence full-time undergraduate attendance in the future are described. Some specific measures of college participation, including the College Going Rate and the College Entrance Index (CEI), are introduced. The most significant findings are that 1975 was the peak year for CEI, that CEI has declined slightly since then, and that the relative participation of men and women has changed substantially in recent years. Information is provided on regional and county college entrance indices. Environmental, student, and institutional factors influence college participation rates. Environmental factors include increasing costs, declining rates of return on investments in college education, increasing participation of women and minority groups, tuition assistance program incentives, economic hardships, increasing job requirement, and termination of G.I. Bill. Student factors include population shifts, sibling squeeze, changing student composition, more stringent high school graduation requirements, family background in education, and military pressures. Institutional factors include tuition changes at the City University of New York, improved accessibility, selectivity levels, institutional recruitment and adjustment, enrollment ceilings, and net price levels. Descriptors-*Admission Criteria, *Affirmative Action, Civil Rights, College Admission, Equal Education, Higher Education, *Medical Schools, Minority Groups, Quotas, Race, Racial Integration, *Reverse Discrimination, *Supreme Court Litigation
Identifiers-*Bakke Case, *Selective Admissions, University of California Medical School Davis

The Regents of the University of California v. Bakke case in the U.S. Supreme Court and background information on the previous cases in California are presented. Allan Bakke is a white male who applied to the Davis medical school in both 1973 and 1974 and was refused admission even though admission slots under the college's special admissions program were unfilled and he was highly qualified. The state trial court found the program operating as a racial quota and ruled that the college could not take race into account in admissions decisions; however, Bakke's admission was not ordered. The Supreme Court of California affirmed the trial court's decision and further ordered Bakke's admission. The U.S. Supreme Court affirmed the California court order admitting Bakke and invalidating the college's special admissions program but reversed the decision prohibiting the college from taking race into account in future admission decisions. Separate opinions are presented concurring in part and dissenting in part with the judgment. Justice Stevens, the Chief Justice, Justice Stewart, and Justice Rehnquist concurred with the order to admit Bakke but viewed the question of whether race can be a factor in an admissions policy as not at issue. Justices Brennan, White, Marshall, and Blackmun concluded that race can be used as a factor in university admissions decisions. Justice Powell concluded that Bakke should be admitted and that some uses of race in university admissions are permissible. Separate opinions are also presented for Justice White, Justice Marshall, and Justice Blackmun. (SW)

Identifiers-*Southern Regional Education Board

Views on the partnership of government and higher education and experiences with the Southern Regional Education Board (SREB) are presented by the former governor of Florida and former chairman of SREB. SREB has encouraged long-range statewide planning and has brought together legislators, governors, educators, and other public leaders seeking and finding directions for the future of colleges and universities. In the early sixties SREB encouraged that the region assess its needs and objectives by national standards of quality and opportunity, and not by sectional benchmarks; following this advice may have been the most important single factor in the region's educational progress. In 1976 SREB identified the critical concerns demanding regional attention in the future. In the South, where there is not the enormous private endowment support of some other regions, the alliance of higher education and government has been important. The following issues are addressed: expanding educational opportunities at the college level, the mutual responsibilities of government and higher education in solving societal problems, academic freedom, competencies of college graduates, public school competency testing, educational finance, counterproductive controversies involving trends toward larger government and increasing checks and balances, and faculty collective bargaining. A list of nine priorities for postsecondary education in the South, issued by SREB in 1976, is included. (SW)

Descriptors-Administrative Organization, *Annotated Bibliographies, *College Housing, College Planning, *Dormitories, Educational Finance, Educational History, Food Service, Higher Education, Legal Responsibility, *Resident Assistants

The 1973 publication, ``Residence Halls in U.S. Higher Education,'' is updated and supplemented in this bibliography. Material omitted from the 1973 edition and material published since 1973 are included in this report. The 10 classifications used in the original bibliography are continued. They are: historical development of residence halls; residence hall financing; residence hall planning, construction, and facilities; organization and administration of residence halls; programming in residence halls; residence hall personnel; counseling activities in residence halls; food service in residence halls; legal issues and residence halls; and miscellaneous areas of interest. Within each category annotated references are provided, divided in subcategories of books, periodicals, newspapers, proceedings, dissertations, and unpublished papers. (LBH)

An Analysis of a Student Evaluation of Instruction in the Graduate School of an Urban University.

Pub Date-77

Note-36p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Class Size, *College Faculty, College Students, Evaluation Methods, *Grades (Scholastic), Graduate Students, Higher Education, Questionnaires, Rating Scales, *Reliability, *Student Evaluation of Teacher Performance, Student Opinion, *Student Teacher Relationship, *Teacher Evaluation, Urban Universities

Identifiers-*University of New Haven CT

Since the administrative evaluation of faculty at the University of New Haven has been hampered by the faculty's distrust of student input, this study aimed to improve the faculty's confidence in student evaluations of instruction. A student evaluation of instructors was statistically compared to grades issued by the instructors, and to class size. The evaluation was prepared by graduate students at the University of New Haven. Results of the analysis showed no statistical relationship between grades issued by an instructor and the rating the instructor received from the students. There was also no statistical relationship between the instructor's rating and class size. Grades issued by evaluated instructors were statistically compared to grades issued by instructors who were not evaluated, and no statistical difference was found. It is recommended that university-wide student evaluations be used for a two-year trial period for use in the evaluation of faculty by the university administration. Negative use of the evaluation results by the administration is not recommended. Statistical data and the survey instrument are appended. (Author/LBH)

A Study on the Validity of Admissions Policy as Applied to the School of Engineering at an Urban University.

Pub Date-77
Note-40p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Academic Achievement, *Admission Criteria, *Aptitude Tests, *College Mathematics, *Engineering Education, Grade Point Average, *Grades (Scholastic), Higher Education, *Predictive Ability (Testing), Predictor Variables, Professional Education, Statistical Analysis, Success Factors, Urban Universities
Identifiers-*Scholastic Aptitude Test

Entrance requirements and a weeding process conducted by way of a pre-engineering mathematics program act as a restriction on the number of students graduating with engineering degrees. This study examined the relationship between entrance requirements and the degree of student success upon graduation, as well as the validity of the weeding effect of the mathematics program. Statistical relationships were developed between such factors as Scholastic Aptitude Test (SAT) scores, mathematics grades, and graduating grade point averages (GPA). It was found that SAT verbal scores, SAT total scores, and grades in college mathematics are statistically related to graduating GPA. However, the data analysis shows that SAT math scores are not related to the graduating GPA. The analysis concludes that SAT math scores, verbal scores, and the total SAT scores are not related to the student's performance in college mathematics. Recommendations include a lowering of the minimum SAT requirements in mathematics for admission to the engineering college. (Author/LBH)

The Effect of Contemporary Engineering Education on the Creative Potential of Engineering Students.

Pub Date-77
Note-88p.; Not available in hard copy due to marginal legibility
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Cognitive Ability, College Freshmen, College Role, College Students, Comparative Analysis, Creative Ability, *Creative Development, *Creativity, Critical Thinking, Educational Objectives, *Engineering Education, Higher Education, Professional Education, Seniors
Identifiers-University of New Haven CT

The possibility that a specific engineering curriculum reduces the creative potential of its students was investigated, along with the relationship between pre-cognition, the ability to foresee events, and creativity. Engineering freshmen and seniors were tested and compared on creative potential. Liberal arts freshmen and seniors were also tested and used as a control. The Torrance Figural B Creativity Test was used to measure creativity; the Dean-Mihalasky test was used to measure pre-cognition. Results indicate that contemporary engineering education has no effect on the creativity of students, since freshmen and senior engineering students had the same creativity index. The creativity of engineers, on the dimension of originality, was significantly higher than the liberal arts group. Some strong correlations and patterns are shown between creativity and pre-cognition. The main conclusion is that the four-year undergraduate education at the University of New Haven did nothing to increase the student's creative propensity; if anything, the student's creative potential was decreased. The proposition that creativity and pre-cognition are related is somewhat supported by statistical evidence, but the relationship is not consistent. It is suggested that the successful development of the creative ability of students depends on a university-wide commitment to creativity as an objective of the institution. Appendices include IQ-to-creativity correlations and creativity and pre-cognition scores. (Author/LBH)

Identifiers-Cooperative Institutional Research Program (ACE), *University of South Carolina

During the 1977 fall orientation a questionnaire prepared by the American Council on Education (ACE) was administered to about 75 percent of the entering freshman class at the University of South Carolina. The study was part of ACE's ongoing national study, part of the Cooperative Institutional Research Program. An analysis of the results is made, and the demographic data, opinions, and projections of the freshman class are compared by college and with national norms. Eleven areas of interest were selected from the original questionnaire for inclusion in this analysis: student age by December 31, 1977; racial background; average grade in high school; highest degree planned; most important reasons for selecting the college; estimated parental income; probable major field of study; current religious preference; political orientation; residence planned during fall term; and statements that students estimate chances are very good that they will...'' Data are presented in tabular form with some notes. (Author/MSE)

Descriptors-*Consultants, Curriculum Development, *Educational Improvement, *Educational Psychology, Educational Research, Government School Relationship, *Health Occupations Education, Higher Education, Instructional Improvement, Needs Assessment, *Pharmaceutical Education, Pharmacy, Postsecondary Education As a Field of Study, *Professional Education, Trend Analysis

Functions of educational specialists, including educational psychologists, in the field of pharmaceutical education are discussed. The functions considered range from a general educational consultant to evaluator of an innovative program. Requirements for functioning effectively within a pharmacy school are also examined. The compensation available for those involved is outlined, and the future of educational psychologists in pharmacy education is described. This is considered in view of the recent federal proposal to discontinue capitation funds for schools of veterinary medicine, optometry, pharmacy, and podiatry as contrasted to the continuing need and mounting concern for the improvement of the educational process in schools of pharmacy. It is noted that there are 72 schools of pharmacy in the U.S. and approximately 30 to 40 educational specialists working within those schools, engaged in a wide variety of activities including "pure" educational research, program evaluation, curriculum development and revision, test design, admissions research, faculty evaluation, development of certifying examinations, and faculty development. A Model for Planning Programs in Faculty Development.

Pub Date-78

Note-24p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Administrator Attitudes, Bibliographies, College Administration, *College Faculty, Data Collection, Evaluation Methods, *Faculty Development, Formative Evaluation, Higher Education, Models, *Needs Assessment, Objectives, Program Attitudes, *Program Development, Program Evaluation, *Program Planning, *Systems Approach

Identifiers-Program Implementation

Ideas for putting the principles of faculty development into program form are discussed. The pitfalls of faculty development efforts are examined: the frustration of false expectations, the problem of fully integrating the program into the college community, the challenge of maintaining program momentum over time, and the inability to secure or maintain administrative support. The program planning process described is designed to avoid these problems. It has four phases: gathering and analyzing information, developing realistic goals, implementing activities, and developing assessment procedures. The last phase, in turn, provides for gathering information and returning to the first phase, to again begin the process. A diagram and brief bibliography are provided. (MSE)

Descriptors-Access to Education, *Black Colleges, Black Education, *Black Students, College Attendance, College Majors, Data Analysis, *Educational Demand, Enrollment Influences, *Enrollment Trends, *Higher Education, Institutional Characteristics, Minority Groups, National Surveys, Private Colleges, Racial Composition, Racial Distribution, *Southern States, State Colleges, State Universities, Trend Analysis

Trends in black enrollment in higher education in the U.S. and the South are reported. The first section examines characteristics of black enrollment in 1976 and includes total black enrollment (distribution by level), enrollment by type of institution (two-year or four-year, public or private), predominantly black institutions, and enrollment by field. Section 2 deals with historical perspectives and presents tables relating to the following topics: factors affecting black student enrollment; black enrollment in the South; high school graduation and college participation; and educational attainment during the period 1950-1977. Appended is a list of predominantly black colleges and universities (Fall 1976). (BD)

Identifiers-*California University Berkeley

Upper division undergraduate students at the University of California at Berkeley were surveyed to obtain evaluations of selected humanities departments. Of 1,472 questionnaires mailed out, 798 were returned. The questionnaire dealt with such matters as general education requirements, the quality of lower division education, extent of student contact with faculty, advising, coursework, overall student satisfaction and impact of the educational process, and students' views on various educational and university policy questions. Questions about curricula concerned the structure of the major, coverage of content, interpretation of content, class size, scheduling, competition, workload, grading, and testing. Questions about the faculty concerned their ethnicity and sex, informal relations with students, and the faculty's receptivity to males, females, whites, and minorities. A large majority of the students agreed that their program should facilitate undergraduate organization by including students on most committees, providing office space, and by similar types of inclusion. Lectures and coursework in most of the majors were evaluated as being interesting and challenging by very large majorities, but faculty receptivity to student input on course structure and content was not very high. Information and advising staff were seen as "generally quite helpful." Recommendations and information on demographic characteristics of respondents are presented. (SW)

Identifiers-*National Endowment for the Arts

The role of higher education in fostering the arts and educating artists is addressed. Currently, the Department of Health, Education, and Welfare focuses on aid to primary and secondary levels, and the National Endowment for the Humanities has not developed programs to support professional training in a specific form or arts education of the artist. In the fall of 1978, the National Endowment for the Arts (NEA) began to consider educational institutions as eligible for Challenge Grants, a development that points to certain basic issues about the importance of the arts experience for students at colleges and universities. Recommendations of a task force of NEA are cited, including the suggestion that grants be made available for needy students to pay for advanced arts study. Data are presented on postsecondary enrollments in the fine arts and employment opportunities after graduation. Several views on the relationship of the artist to academe, some innovative curricular developments in the arts, and examples of the collaboration of art and science are discussed. Information on performing arts programs provide some indication of the support higher education gives to the arts. The data reveal that the performing arts do not pay their own way. The fact that institutions are willing to support such programs is one indicator of the importance such programs play for the institutions. (SW)

Identifiers-Compliance (Legal), Information Analysis Products, Liability

This study on collegiate middle managers examines: the effects of federal compliance requirements on collegiate administrators; the cause of growth, elaboration, and differentiation in middle-level collegiate administration; the functions, status, roles, and values of mid-level administrators; and the role of national occupational associations for professional standing. Data were gathered from a literature review, a survey research questionnaire, and structured interviews with more than 200 administrators, faculty, and search committee chairpersons at 18 colleges and universities of different sizes and types. A survey also was conducted of the staff aides and directors of House of Representatives and Senate committees concerned with postsecondary education legislation, the executives of higher education associations in Washington, and the officials at Executive branch agencies. Collegiate mid-level administrators were considered to be the deans and directors of support services. Presidents, provosts, academic deans, department chairpersons, and librarians were excluded. The following topics are considered: sources of administrators and their background and training; career paths, mobility, and organizational commitment; administrators' rights and grievance procedures; women and minorities in middle management; communication on campus; liability of administrators; satisfactions and incentives for increased competence and performance; training and development; role conflicts among collegiate middle managers; and professional associations. Recommendations and a bibliography are included. (SW)

Descriptors-Academic Rank (Professional), *College Faculty, Employer Employee Relationship, *Employment Problems, Enrollment, Faculty Promotion, Fringe Benefits, Guidelines, Higher Education, *Part Time Teachers, Personnel Data, *Personnel Policy, Staff Utilization, Statistical Data, Status, Teacher Morale, Teacher Salaries, Tenure, *Work Environment
Identifiers-*California State Universities and Colleges, Compensation (Remuneration), Full Time Teachers, *Temporary Faculty

Phase I of the Task Force on Temporary Faculty study of the utilization of full- and part-time temporary faculty in the California State University and Colleges (CSUC) is presented. The study, which involved the gathering and analysis of data, the identification of problems many of them detrimental to faculty morale and the development of potential guidelines or policies, is presented in five sections. The first describes the recent increase in the employment of temporary faculty, both full- and part-time, and discusses some reasons for the increase, such as the need to fill sudden vacancies, replace tenured faculty on leave, and allow for last minute shifts in enrollment. The second section addresses the terms of appointments and job security and recommends that part-time faculty should receive year-long appointments when possible and that for part-time faculty there should be no limitation on the number of consecutive appointments. The third part deals only with part-time faculty, in terms of their status and conditions of work. It is recommended that a policy be developed regarding the advancement of part-time faculty in terms of merit salary adjustments, and that changes should be made with regard to health and unemployment benefits. A summary of the conclusions and recommendations comprise the fourth section. The fifth is a set of appendices containing statistical data on the extent of use of temporary faculty, the manner of use of part-time faculty, appointment and compensation, and enrollment considerations. The Use of a Markov Model in Assessment of Alternative Faculty Personnel Policies.

Pub Date-26 Oct 78

Note-20p.; Paper presented to the Southern Association for Institutional Research (Nashville, Tennessee, October 26-27, 1978) ; Best copy available

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Age, Career Ladders, *College Faculty, Employment Trends, Higher Education, Land Grant Universities, *Models, *Personnel Policy, Retirement, Salaries, Statistical Data, *Teacher Characteristics, *Teacher Employment, *Teacher Promotion, Tenure, University Administration

Identifiers-Faculty College Relationship, Full Time Teachers, *Markov Model

Changes in the composition of faculty with regard to age, tenure status, number of new members, average salary, turnover rate, and percentage of nontenured faculty receiving tenure are of concern to university policy makers. As a result of developments, such as changes in the mandatory retirement age and the limited growth of universities, assessing the nature and extent of changes in personnel characteristics, and determining the impacts of various personnel decisions upon these characteristics is important. A method is presented that provides insights into changing personnel characteristics and of the effectiveness of various changes in personnel policies. The method utilizes a Markov model of faculty flows and requires a minimum of two years of time series data concerning faculty age and tenure status. The impacts of six policies on the tenure status, salary, and age distribution of full-time faculty members at a large land grant university were analyzed. The policies are: (1) continuation of current hiring and retirement practices; (2) hiring only nontenured faculty; (3) hiring only assistant professors and instructors for the tenure track; (4) hiring only nontenured assistant professors and instructors for the tenure track; (5) mandatory retirement age extended to 70; and (6) mandatory retirement age at 65. The report demonstrates how these policies are modeled and discusses the various results. (JMD)

Descriptors-*Academic Rank (Professional), Age, *College Faculty, *College Planning, Comparative Analysis, Cross Sectional Studies, Departments, Educational Quality, Higher Education, Institutional Characteristics, *Personnel Policy, Prediction, Retirement, Statistical Data, *Tenure, Trend Analysis, Universities, *University Administration
Identifiers-Massachusetts

A methodological approach to tenure planning is illustrated in this study that examines the tenure characteristics of a research-oriented institution vis-a-vis other research universities and its own intramural schools and departments. Cross-sectional comparisons and time series projections are made to indicate the relative tenure position of an individual unit. With the exception of the retirement forecasts, most projections are extended to cover either a five- or ten-year period. The study begins by analyzing in the aggregate the tenure policies and the characteristic trends of other institutions and then proceeds to relate this to the institution under investigation, its major schools, and its various departments. The conclusions drawn have both global and local ramifications and can serve as an analytical reference point for most institutions of higher learning. The following are some of the conclusions: (1) most institutions grant tenure and the probability of overall tenure abolition is highly unlikely; (2) Massachusetts is among the group of 25 states with the highest tenure ratios within the United States; (3) the establishing of institutional tenure guidelines is a necessary first step towards planning and rationalizing the tenure process; and (4) it is a questionable issue as to whether tenure automatically ensures a higher grade of scholarship. Identifiers-Boston University MA, City Colleges of Chicago IL, Los Medanos College CA, Morehouse College GA, Pacific Lutheran University WA, Saint Josephs College IN, University of Wisconsin Green Bay

Many colleges and universities are revising course offerings and increasing graduate requirements to provide more highly integrated programs for their students. The efforts of seven institutions to develop such a core curriculum are described including those of: Saint Joseph's College (Rensselaer, Indiana); Los Medanos College (Pittsburgh, California); University of Wisconsin (Green Bay); Morehouse College (Atlanta, Georgia); City Colleges of Chicago (Illinois); Boston University College of Liberal Arts (Massachusetts); and Pacific Lutheran University (Tacoma, Washington). The curriculum revisions discussed vary and include the addition of single courses, four-year sequences, strict requirements, optional programs, open admission policies, community college programs, and a large university program. The address, telephone number, and name of a contact person at each school is given and 20 schools offering core curricula and/or integrated studies programs are noted. An annotated bibliography of core curriculum literature is provided. Basic questions and practical problems in developing a core curriculum are discussed in an article by Donald T. Hartman. Identifiers-Compliance (Legal), Higher Education General Information Survey, States (Geopolitical Regions)

Presented are summaries of the data collected in the section of the Higher Education General Information Survey for 1976 (HEGIS XI) entitled "Fall Enrollment and Compliance Report." The data were collected as a result of Title VI of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972. Institutions receiving federal financial assistance in the 50 states, the District of Columbia, and outlying areas of the United States were surveyed for the study. Reporting requirements, definitions of terms, and technical notes are appended. Data are organized in tables, alphabetically by state. Data are given for each institution, alphabetically, within each state. (MSE)

Identifiers-*Veterans Administration, *Veterans and Dependents Education Loan Program

The Veterans Administration (VA) loan program was reviewed by the General Accounting Office (GAO) to determine if it was meeting its primary objectives as stated in the legislative history. The program is mandated to provide an additional source of financial aid to students attending high-tuition institutions who would otherwise be financially unable to attend. The program was not meeting congressional intent in that about 72 percent of the loans made were to veterans attending schools charging low tuition or none at all. VA also has no assurance that the loans were based on demonstrated financial need. According to VA data, as of December 31, 1977, 44 percent of all matured loans were in default. The rate may have been as high as 55 percent if GAO findings in nine VA regions were representative of the entire country. VA's central office was not aware of the extent of this problem because it was not collecting all of the data necessary to compute the default rate properly. Recommendations are offered to the Administrator of Veterans Affairs. (Author/SW)

Identifiers-*Educational Outcomes, *Institutional Evaluation

The texts of three conference papers are presented in this volume. The papers are: Student-Oriented Management: A Proposal for Change (Alexander W. Astin); Goals, Outcomes, and Academic Evaluation (Howard R. Bowen); and A Summary of the 1978 COPA Summer Conference (Charles M. Chambers). The first addresses the definition of quality in administration, and concludes that a high quality institution is one whose management system keeps track of the intellectual and personal development of its students. In the second paper, seven basic principles are suggested for use in the identification and evaluation of outcomes in a particular college or university's undergraduate education. The third paper outlines and discusses several themes emerging during the conference: assumptions about outcomes, quantitative measurement of education, evaluation by outcomes, the use of self-study and team review, the use of accreditation, and the validity of outcomes assessments. Federal Student Aid Programs: A Briefing Paper on Impacts and Policy Options.

Pub Date-Mar 78
Note-54p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-College Administration, *Educational History, Educational Legislation, Educational Opportunities, *Federal Aid, Federal Legislation, Federal Regulation, *Financial Policy, *Government School Relationship, Higher Education, Public Policy, *Student Financial Aid, *Student Loan Programs
Identifiers-Carter Administration, Direct Institutional Aid, Tax Credits

The history and development of federal student aid policies for higher education are examined in this paper, along with how current policy affects institutions at the campus level, and current and future policy options from which federal and institutional policies will be drawn. The historical analysis concerns the initial federal policy after independence, major policies beginning in 1857, new policy initiatives after World War II, developments in the mid-fifties and sixties, and the 1972 Education Amendments and subsequent legislation. Factors in current federal aid policies that may affect the composition of student bodies at higher education institutions are the criteria for allocation of student aid and the requirements of student loan programs. Federal aid to students also means that the colleges and universities must maintain records, submit evaluations, use certain bookkeeping standards, and comply with other regulations. Federal student aid programs help to make profitmaking colleges more competitive, may result in the need for changes in curricula to meet the needs of lower socioeconomic students, penalize the most expensive and the moderately priced institutions, and may affect college costs. Three current policy alternatives the 1978 Carter proposals, the tax credit proposals, and direct institutional aid are discussed in terms of their implications for social policy, higher education as a whole, individual institutions, and students. Identifiers-Long Range Planning, New York, *Self Evaluation (Institutions)

A colloquium on self-assessment of postsecondary programs was held for colleges interested in developing self-assessment beyond what is included for the accreditation process. The colloquium was attended by almost all of the 15 colleges that were members of the Task Force on Self-Assessment for New York State. Topics of the meeting included: the role of self-assessment in institutional planning and change, the budgetary and staff support that make self-assessment continuous, the use of consultants and other resources for objective review, ways to ensure that self-assessment will result in decisions and action, and the relation of self-assessment to accreditation. An address entitled Concern for Self-Assessment,'' by Robert A. Plane, was followed by a panel discussion by the following university representatives: Richard Alfred, Rita Arthur, Ronald C. Brach, Joseph Burke, William Dempsey, and Vincent Toscano. Discussions were also held separately for liberal arts colleges, large colleges and universities, two-year colleges, and technical colleges. Alvin P. Lierheimer spoke on Accreditation and Self-Assessment,'' and five workshops were held. Two workshops on long-range planning concerned program reorganization and staff development, and identifying goals and the value of a data base. Two workshops on curricular review concerned developing a continuous system and emphasizing outcomes. The final workshop was on gathering institutional support for self-assessment. (SW)

Identifiers-*University of Mid America NE

This 1978 report on the model regional open learning system of the University of Mid-America (UMA), Lincoln, Nebraska, summarizes the activities of the following program areas: course development, delivery, research and dissemination, and governance and administration. Descriptions are provided of courses in the following stages of development: four courses were completed, two courses began production, one course was designed, and five course definition papers were prepared for review. Negotiations were also begun with organizations outside the UMA consortium concerning cooperative course development activities. Five delivery activities included the sponsorship of five conferences/workshops and participation in one conference, all concerning open learning. An intensive marketing campaign of UMA course materials, cooperation with other telecourse producers, and dissemination of information about the university were accomplished. Generic research activities were directed toward the further development of a cooperative research program with faculty members from member institutions. Market research activities concerned student characteristics, potential students, demand for nontraditional services, and optimal conditions under which course adoptions might be secured. Governance and administrative activities included appointment of the first full-time president, meeting the special terms and conditions of the grant award, and acquisition of an in-house computer and word processing system. Funding proposals were prepared and submitted, the Japan studies course package was introduced, and two new universities were admitted into the consortium. (SW)

Identifiers-*Woodrow Wilson Dissertation Fellows, *Woodrow Wilson Fellows

Woodrow Wilson Fellows and Dissertation Fellows elected between 1945 and 1971 were surveyed to trace their educational careers, judge the effectiveness of the selection process, and determine what they are now doing with their education. Some elements covered by other national studies were included to make possible a comparison of the Woodrow Wilson Fellows with other groups of graduate students. Based on 6,169 responses from the 14,000 who were mailed questionnaires, information is provided on the degree completion rate, percentage of fellows attending 21 graduate schools, distribution of awards by sex, percentage of fellows in 23 fields of study, the time taken to complete their studies, reasons for delay in completion of degrees, the selection of a dissertation topic, financial support, change of fields in graduate study, employment rates, academic employment, nonacademic employment, and reasons for employment outside academe. The following observations are presented: financial support may be necessary in selected areas, including the humanities; more work needs to be done concerning dissertation fellows to determine how their awards affected their careers; more information is needed about women and graduate education to determine why they are discouraged from completing graduate work or why it takes them longer to complete their dissertations; and more study is needed to assess the value of sabbatical leaves in improving teaching quality. (SW)

Descriptors-Affective Objectives, *Basic Skills, Cognitive Objectives, *College Role, *College Students, Communication Skills, Educational Background, *Educational Objectives, Fundamental Concepts, General Education, *Higher Education, *Knowledge Level, Liberal Arts, Mathematical Concepts, Reading Skills, Student Ability, Writing Skills
Identifiers-*Competence, Self Directed Learning

The skills, understandings, and special attributes that a competent college student should acquire are described. General skills in writing, reading, speaking, and calculating are primarily the responsibility of elementary and secondary education, and these skills must be mastered by every college student. In addition to a specification of these general skills, a listing is provided of the basic understandings of the following concepts that are needed for intelligent adult behavior: democracy and citizenship, history and geography, science, economics, literature, and self-directed learning. Special attributes that a college graduate should develop are: the ability to reason or think critically; acquaintance with the major methods of inquiry; perspectives of some of the important scholarly, literary, and artistic achievements of the past; a knowledge of our form of government; a moral sensibility for both personal and institutional behaviors that affect the human values of mutual respect, cooperation, and integrity; and a heightened sense of personal awareness both of oneself and one's place in society. Effective Teaching and Its Evaluation.

Pub Date-4 Nov 76
Note-13p.; Paper presented to AUCC annual conference on ``The Changing Conditions within Universities'' (Regina, Canada, November 4, 1976)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*College Faculty, *College Instruction, *Effective Teaching, *Faculty Evaluation, Faculty Promotion, Higher Education, Organizational Climate, Portfolios (Background Materials), Student Evaluation of Teacher Performance, Teacher Administrator Relationship, *Teacher Qualifications, Teaching Experience, *Teaching Quality
Identifiers-Teaching Dossiers

The question of evaluating effective teaching in light of the fact that teaching is still the principal function of the university is addressed. Most faculty receive very little specific training in teaching, even though the skills involved are complex and sophisticated. There is a dual responsibility for evaluation of teaching by faculty and administration, a type of collaboration that corresponds to the way most contemporary Canadian universities are governed. The main responsibility of the administration should be to provide a climate within which effective teaching and learning can occur. A teaching resource center, sabbatical leaves, and research and development grants for faculty are examples of encouragement or rewards provided to teachers for initiatives they may take. Faculty should not be constrained from practicing new approaches in their teaching. Teachers should provide information about their teaching performance that could be used for evaluation purposes. A teaching dossier might contain summaries of student course evaluations, comments by colleagues on the quality of the material presented in class, descriptions of innovative teaching and learning techniques, and evidence of some gain in knowledge or experience on the part of students. It is suggested that teachers should claim credit for good teaching in the same way as they would take the responsibility to document scholarly endeavors and administrative work. The involvement or concerns of students and the community in the evaluation of teaching performance is also discussed. (SW)

Identifiers-Bowling Green State University OH, Drew University NJ, Hunter College NY, Morningside College IA, Northern Virginia Community College, Tufts University MA, University of South Carolina, West Virginia University

A classification system for freshman courses that is useful as a planning tool and descriptive guide is presented and examples of analogous programs are described. Three approaches to freshman courses interdisciplinary, developmental, and utilitarian form a continuum, since many courses are derived from more than one philosophical base. The following features of the different kinds of courses are discussed: the philosophy, the roles of the teacher and learner, instructional mode, functions and structural emphases, and organizational climate. Generally, interdisciplinary courses are offered through liberal arts or general studies divisions, and the subject matter is enhanced through the integration of a variety of disciplines. Generally, developmental courses are affiliated with counseling services or general studies divisions and focus upon the student as a person and his or her self-perceptions and relationships with other individuals, society, and the college experience. Generally, utilitarian courses are associated with student affairs divisions and emphasize the student's mastery of a defined knowledge base such as institutional policies, procedures, and resources, or basic skills. Programs at several colleges are cited as examples of the different approaches. The freshman course

offers a means to increase faculty, administrator, and counselor interaction with new students and to involve student affairs staff in the formal curriculum. It can also identify programs and services to correspond more meaningfully to student goals. (SW)

Surviving in Wonderland: Factors for Success in Upward Bound Students Attending Selective Colleges.

Pub Date-15 Nov 78
Note-17p.; Paper presented at the annual meeting of the Mid-America Association of Educational Opportunity Program Personnel (4th, Fontanad, Wisconsin, November 12-15, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Affirmative Action, Basic Skills, Career Planning, College Admission, College Choice, *College Preparation, *Competitive Selection, *Disadvantaged Youth, Economically Disadvantaged, Educational Counseling, Educationally Disadvantaged, Educational Opportunities, Higher Education, Open Enrollment, School Orientation, School Services, Student College Relationship, *Student Needs, Study Skills, *Success Factors
Identifiers-*Upward Bound

This paper examines the unique make-up of selective colleges as opposed to those with open admission policies, variances in individual colleges, and how Upward Bound students can be prepared for selective colleges. Some orientations of selective colleges have been described as realistic, scientific, enterprising, and conventional. All of these orientations give low priority to interpersonal relations, the social sciences, and arts and humanities; the environments are highly competitive academically and little concern is manifested for the individual student. This failure to emphasize interpersonal relations will constitute an obstacle for the Upward Bound student. Students and staff on a selective college are less likely to be aware of or support the special needs of Upward Bound students. The staff of educational opportunity programs need to insure that the student's psychological, spiritual, financial, and physical needs can be met by the school they choose. In selective colleges that have special admission programs for disadvantaged, it is important to determine whether they have remedial courses, special classes, a reduced course load or delayed evaluation program, ethnic studies programs, and other supportive services. There is a need to prepare students for such things as the use of textbooks, listening and notetaking skills, how to prepare for and take tests, and the improvement of general verbal skills, writing, and vocabulary improvement, and reading skills. Students should also be prepared for the contact with students who will view them as different, and early career counseling is essential to student success. (SW)

Identifiers-*Association of Catholic Colleges and Universities

This report contains a proposal of a task force of the Association of Catholic Colleges and Universities (ACCU) for the development of an ACCU program on education for justice. It is believed that the Catholic community must be educated in the tradition of Catholic social thought, and a learning environment must be created that reflects a commitment to justice and an openness on the part of Catholics to change personal attitudes and behavior. After a foreward on education and justice by Alice Gallin, the following four perspectives are presented: Education for Social Justice A Christian Perspective,'' by William J. Byron; Justice and Peace: The Place and the Potential of Colleges and Universities,'' by J. Bryan Hehir; Education in a Global Perspective,'' by Lawrence T. Murphy; and Justice What Is It All About?'' by David Burell. Seven institutions were chosen as pilot schools to implement the proposal, and two of the pilot programs are described. Ray Jackson and Dan Regan describe the program at Villanova University and Ken Jamieson describes the program at the University of Notre Dame. Short descriptions are also provided of each of the seven pilot schools. Descriptions of programs at other schools are as follows: Joseph Fahey discusses the model at Manhattan College; Suzanne DeBenedittis discusses the Loyola-Marymount University program; Don Post describes the global studies program at Saint Edward's University; and Joseph Fahey describes the M.A. program in religious studies at Sacred Heart University. Identifiers-Bowdoin College ME, Brigham Young University UT, Gustavus Adolphus College MN, Illinois Central College, Los Medanos College CA, North Texas State University, Pacific Lutheran University WA, Saint Anselms College NH, Saint Josephs College IN

This bulletin focuses on general education programs and also provides an update on four core curriculum projects. One viewpoint on general education is presented by Theodore D. Lockwood in an article entitled, ``A Skeptical Look at the General Education Movement.'' The following general education programs of six colleges are described: Brigham Young University's general education program, North Texas State University's interdisciplinary liberal arts and science program, St. Anselm's College's portraits of human greatness program, Bowdoin College's senior center, Gustavus Adolphus College's program to strengthen the humanities, and Illinois Central College's DOORS program. The philosophies and approaches vary widely, from college-wide competency requirements to optional thematic clusters, from Piagetian programs for poorly-prepared students to better integration of science concepts in required courses. A list of resources and short descriptions of additional institutions that have general education programs are included. The update section of the bulletin describes four programs concerned with the core curriculum that have undergone significant changes and developments. The following four schools were among the seven institutions featured in the October 1977 issue of the bulletin on core curriculum: Pacific Lutheran University, the University of Wisconsin-Green Bay, Los Medanos College, and St. Joseph's College in Rensselaer, Indiana. Progress of their programs is described. (SW)

This bulletin focuses on liberal education for adults and includes an article on the topic and descriptions of seven institutional approaches. In "Creating Successful Liberal Education Programs for Adults," Carol Stoel points out that many adults are seeking a greater understanding of themselves and their world through liberal education programs. The following liberal education programs for adults are described: George Washington University's Continuing Education for Women program, Stephens College's Without Walls program, California State University at Long Beach's Adult Reentry Counseling program, Wesleyan University's Master of Arts program in liberal studies, Indiana University at Kokomo's External Degree Program/Project Outreach, Bunker Hill Community College's Open College Program, and the College of New Rochelle's School of New Resources. The programs range from providing counseling for enrollment in regular campus activities to providing academic credentials for learning opportunities offered by community organizations. Programs at other institutions that have been successful in meeting the educational needs of adults also are listed, and an annotated bibliography provides suggestions to readers seeking further information. Descriptors-*College Faculty, *Effective Teaching, Evaluation Criteria, *Faculty Evaluation, Faculty Promotion, Higher Education, Portfolios (Background Materials), Student Evaluation of Teacher Performance, *Teacher Qualifications, *Teaching Experience, *Teaching Quality
Identifiers-*Teaching Dossiers

The need to effectively evaluate teaching performance of university faculty and a suggested approach involving a teaching dossier are discussed. Administrative decisions about the careers of faculty members have tended to be based on publication records rather than teaching evaluation. It is suggested that the curriculum vitae of a faculty member should provide more substantial information about teaching than a mere listing of courses. Teaching accomplishments should be described in terms of the following areas: the agreement that may exist between the instructor and his chairman or dean concerning teaching responsibilities or criteria for success, a statement of formal teaching duties, the supervision of graduate or honors students, and informal teaching activities. A summary statement of data from student ratings of

recently-taught courses could be provided as evidence of teaching effectiveness. Real change in student abilities or performance, statements of alumni concerning the quality of instruction, and comments from colleagues teaching the same students in subsequent courses are some of the indicators a teacher can use in the dossier. Some indirect indicators of teaching performance or effectiveness are participation in curriculum development, authoring instructional materials, and conducting research on teaching and learning within the discipline. While there will be resistance to the notion of the teacher dossier, the fact that it provides only a brief addition to the existing curriculum vitae may encourage its use. (SW)

Identifiers-*Pennsylvania

Details of relationships between employment demand and the supply of graduates of various degree fields and degree levels from all types of institutions in Pennsylvania in 1977 are presented. Data on 45,078, or 50.5 percent of the higher education graduates at all degree levels, represents graduates' status five to six months after their graduation. All state and community colleges and two-thirds or more of state-aided and private junior colleges were not included. Postgraduate activities for graduates from 23 major disciplines are reported for the following five degree levels: bachelors, masters, doctoral, first-professional, and associate. Approximately 50 statistical tables are included, and some of the findings are summarized in the text. It was found that bachelor degree graduates experienced high employment rates if they had majored in computer sciences, engineering, or the health professions. A weak job market was experienced particularly by bachelor degree graduates in area studies, biological sciences, foreign languages, letters, psychology, social studies, and interdisciplinary studies. At the graduate levels employment was increasingly favorable, and a high percentage of associate degree graduates went on to further education. (SW)

Formative Influences in the Evolving Structure of American Postsecondary Education.

Pub Date-30 Aug 78
Note-15p.; Paper presented at the International Conference on Higher Education (4th, University of Lancaster, England, August 30, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Educational History, Federal Government, *Federal Regulation, *Governance, *Governing Boards, *Government Role, Higher Education, *Postsecondary Education, Private Colleges, State Government, *States Powers, Trend Analysis

Three movements that have affected the structure of American postsecondary education are the development of governance by lay boards of control, the growth in power of state coordinating bodies, and the emergence of federal regulatory agency authority over postsecondary education. American postsecondary education has been characterized as ``unplanned'' and as a ``nonsystem,'' because no agency of the national government has effectively determined the kind, number, or roles of postsecondary institutions. The roles of lay boards, the states, and the federal government are traced historically to the present. The following trends are projected: there will be a more coordinated structure in which the 50 states will develop their own more or less unified systems of postsecondary education; certain regional groupings will assume more significance, and private higher education, while retaining its independence, will in more ways be related to the evolving state systems; and in the latter quarter of the twentieth century, there will be significant change in the structure of postsecondary education. This update of an earlier glossary has been compiled to help promote awareness and use of a common language of terms, definitions, and procedures at the institutional, state, and national levels in postsecondary education. It is intended for use as a reference for those who exchange or collect information throughout postsecondary education, especially those who deal with data in institutions, government agencies, and education associations. Common definitions and categories have been developed for data items most regularly used in postsecondary education. The glossary was developed partly through ongoing monitoring of national and state data-collecting efforts for both common and mandated standardizations and classifications. (Author/MSE)

Descriptors-Board Administrator Relationship, Centralization, Comparative Education, Decentralization, *Decision Making, *Educational Accountability, Educational Change, Educational History, Foreign Countries, *Governance, *Governing Boards, *Higher Education, Political Influences, Trend Analysis, Trustees

Identifiers-United Kingdom

The evolution and role of the lay board of control (trustees, directors) of higher educational institutions and the part the board has played or may play in maintaining diversity in the American system are examined. The evolution of the lay board in the United States and in the United Kingdom is described. The lay board has become the American mechanism for bridging public accountability and the professional autonomy of academicians.'' The use of the lay board provides a means whereby special interest groups might establish educational institutions. The single board of control provides the means for maintaining individual identity and independence as expressions of decentralization, corporate pride, competition, and breadth of choice. The shift from the strong board to the strong college president and administrative staffs has resulted in a difficult position for the lay board. Problems result for the board as the college's purposes become more encompassing and functions more diffuse. The board is under the law of the institution and must be accountable to the public, but the board is also the instrument whereby the public makes its concerns known to the institution. Changes affecting American higher education and the role of the lay board include the growth of statewide governing and coordinating boards and the presence of a collective bargaining unit. (SW)

Descriptors-*Educational Finance, *Expenditures, *Federal Aid, *Financial Support, Higher Education, Medical Education, *Medical Schools, School Funds, Statistical Data
Identifiers-Capitation Support

A study of federal capitation support of medical schools included a review of the use of capitation funds by 11 selected medical schools, identification of total revenues received by each school, and study of the use of such revenues. The opinion of medical school representatives on the potential impact on schools if capitation support is withdrawn was also obtained. It was found that federal capitation support, although providing a relatively small percentage of the resources needed to operate a medical school, has played an important role in medical education. Withdrawal of such support, without adequate funds to replace it, may have serious consequences for some schools, particularly those with only limited access to resources from other federal, state, and private sources. The availability of federal capitation support has, because it is flexible, enabled some of the schools visited to initiate innovative learning experiences for medical students. The schools visited used 87 percent of their funds to pay personnel costs in school years 1973-74 through 1975-76. Much of the enrollment increase coincides with the availability of federal capitation support. Medical school officials expressed concern that an attempt to replace this support by increasing tuition would bring a marked change in the socioeconomic characteristics of the student body and require program reductions. Forty-five pages of statistical data on revenues, funding, and expenditures of medical schools are appended. (Author/SW)

Identifiers-Information Analysis Products

The literature pertaining to the processes and methods of curriculum design and evaluation in higher education is widely scattered and not in the form most useful to those designing curriculum. This monograph identifies many of these resources and discusses them in terms of their practical use. Case studies are used to illustrate the use of the techniques in higher education. In some sections, checklists are provided for use by groups of faculty members assessing the need for a new or revised curriculum or for designing, implementing, and evaluating a new curriculum. Throughout, the interactive, interrelated nature of the design and evaluation processes is stressed, showing that each process implies or anticipates another when approached systematically. An agreement for a loan granted by the United States to Indonesia through the Agency for International Development (AID) for higher education development training is described. The assistance to certain educational institutions is designed to assist in the financing of advanced training, upgrading and development of the faculties, administrations, and staffs of state and selected private universities and institutions of higher education. The loan will provide training in the United States for about 65 doctoral candidates and 65 MA/MS candidates, plus third country training for about 15 doctoral and 10 MA/MS candidates. It will also assist in-country training activities by providing the services of short-term consultants from U.S. institutions for up to 87.5 man-months. The loan is especially designed to provide assistance to faculties in institutions of higher education with high priorities given to sciences, technology, and selected social sciences. The following conditions of the loan agreement are detailed: loan terms, conditions precedent to disbursement, general covenants and warranties, procurement, disbursements, cancellation and suspension, communications, representatives, implementation letters, promissory notes, and termination upon full payment. Identifiers-*Department of Education (Proposed)

In this second book of the Brookings Institution series of Studies in Higher Education Policy, the complex relationship between the federal government and the nation's higher education system is examined. After a survey of the history and background of Washington's involvement, an appraisal is made of the present condition of postsecondary education with focus on what the government can and cannot do to alleviate problems that lie ahead. Federal assistance programs and government regulation are scrutinized, suggestions are made for reform, and several schemes for government reorganization are analyzed, including the controversial plan for a national Department of Education. Overhauling federal policy, programs, and structure is cautioned against, since too much prescription is thought to be worse than too little, and Washington's piecemeal approach to higher education has worked relatively well to date. Future federal policy, it is suggested, should be directed toward increasing diversity in and access to higher education. (Author/MSE)

Descriptors-*Educational Finance, Federal Aid, Federal State Relationship, Financial Policy, Government Role, *Government School Relationship, *Higher Education, Laws, *State Federal Aid, *State Legislation, *States Powers

Identifiers-Pennsylvania, Tennessee

The topic of state reappropriation of federal funds for higher education is addressed in this summary of a speech that sought to distinguish between reasonable program control by state legislatures and disruption of needed programs. The issue of a state legislature appropriating federal funds entering the state is before a number of legislatures. The debate centers on principles of government and poses new questions about relationships between state legislative and executive branches of government and between state and federal governments. The Advisory Commission on Intergovernmental Relations drafted a model reappropriations bill that it recommends for adoption by all state legislatures. The intention is to establish within the states a reasonable means for examining the effects of federal funds received by the states for the programs of those states. A concern was to insure that long-term commitments were not made by the states. It is important that state reappropriation laws do not disrupt the ongoing processes of higher education, such as the availability of student aid funds and research efforts of universities. It is suggested that a conscientious effort be made by the states and schools to determine those areas in which reappropriation can be undertaken to increase needed information by the states without disrupting schools. The situations in Pennsylvania and Tennessee are discussed. (SW)

Fashions in Instructional Development.
Pub Date-Jul 78
Note-9p.; Paper presented at the Fourth International Conference on Improving University Teaching (Aachen, July 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*College Faculty, *Consultation Programs, *Educational Research, Effective Teaching, Elementary Secondary Education, Faculty Development, Faculty Evaluation, Foreign Countries, Higher Education, *Improvement Programs, Inservice Programs, *Instructional Improvement, Program Evaluation, *Teacher Centers

This paper on instructional development notes the trend toward teaching improvement efforts, classifies instructional development centers in terms of their differing philosophies of operation, and identifies some general problems that have been encountered in institutional efforts to improve teaching and learning. Centers in North America, Europe, and Australia can be classified as reflecting broad trends or models. The clinical/psychotherapeutic'' approach offers a consultative service to faculty for advice and assistance with teaching problems. The research institute'' approach acts primarily as a center for empirical investigations of the teaching-learning process. The consultant/facilitator'' approach provides consultation on a wide variety of issues related to teaching and learning and provides general workshops. The general service center'' provides all the services of the other approaches, including research and consultation for individual faculty. Some general problems and concerns of instructional development activities are academic freedom, the kinds of research conducted, social change and personal development educational objectives, and the danger of token efforts. When feedback to faculty members is provided by

colleagues or administrative superiors, some faculty feel that the traditional right to teach without interference is endangered. Research conducted through instructional development centers needs to be relevant to the teaching process of the particular university. (SW)

Identifiers-*Georgia, *University System of Georgia

The Board of Regents of the University System of Georgia has established a policy that a graduate of a Georgia high school should be given the opportunity to attempt a college education in the University System. The Special Studies Program was organized to facilitate this ideal. The fundamental objectives of the program are to: (1) provide greater access to higher education to a larger segment of the state's citizens, (2) increase the retention of students once they are admitted to college, and (3) increase the probability of student success in college through the acquisition of reading, writing, speaking, mathematics and personal/social skills. This presentation addresses three program assessment criteria: (1) retention, (2) exit, and (3) post-performance of students. Retention studies show that 92 percent (compared to about 90 percent for regular placement students) of the students enrolled in Special Studies during any given quarter complete the quarter. They also show that approximately 85 percent of the students enrolled in a given quarter exit Special Studies or returns to college for the following quarter. Studies related to final exit from Special Studies indicate that 15 to 21 percent of the students in any quarter complete their final requirements and move fully into college level coursework. Studies of grade point average and grades indicate that in all three areas (mathematics, social science (reading), and English) former Special Studies students performed approximately one-half letter grade below regular placement students. However, in some institutions former Special Studies students' performance was better than regular placement student performance. Less difference between groups was found when grades were compared. The grade differences for the two groups passing regular college courses were nine percentage points in mathematics, five points in social science and 11 points in English. (Author/MSE)

A Synthesis of Research and Theory on Adult Development: Its Implications for Adult Learning and Postsecondary Education.

Pub Date-Mar 76
Note-178p.; Special Qualifying Paper for Harvard University, Graduate School of Education ; Some pages are marginally legible
EDRS Price MF-$0.83 HC-$10.03 Plus Postage.
Descriptors-*Adult Development, *Adult Learning, Behavior Theories, *Cognitive Style, *Developmental Stages, *Developmental Tasks, Higher Education, Learning Theories, *Literature Reviews, Models, Personality Theories, Research Reviews (Publications)

Research and theoretical literature about adult development and adult learning are synthesized within a conceptual framework that has three basic domains: life phase, developmental stage, and learning style. The life phase includes theories that identify age-linked periods of stability and transition throughout adulthood. The development stage refers to structural dimensions of intellect, character, and personality organization. Learning style includes research on individuals' characteristic predilections and preferences for certain functional modes of learning over others, both cognitively and behaviorally. For each area, the parameters of the construct are defined, key concepts are identified, major representative theories are reviewed, and the implications of the viewpoint for adult education are discussed. A large proportion of the text deals with the domain of the developmental stage. Implications for educational practice are analyzed on three levels: individual uses, institutional uses, and societal uses. A major premise of the paper is the idea that adults develop, and that educational programs and opportunities, and some of the resources of society, ought to be organized in ways that are responsive to adults' developmental needs. Identifiers-Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, *Optometry, South Carolina, Tennessee, Texas, Virginia, West Virginia

Concern about the adequacy of existing optometry schools to meet the needs and demands for optometric education in the South prompted a study, to result in a proposal for expansion of education in the field. The results showed that there is a shortage of optometrists in each of the 14 states of the Southern Regional Education Board (SREB) region, and a need for additional schools of optometry to meet the citizens' minimum requirements. A minimum of two additional schools are needed in the near future. It is recommended that they be established in academic health centers of universities and be developed as regional resources through the contracts-for-services program presently in operation in the SREB states. Tables and somewhat detailed state maps illustrate the study. (MSE)

Identifiers-Alabama, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia

Reports on legislative action affecting higher education in the Southern states that held regular or special legislative sessions in 1978 are presented and a preview of 1979 sessions is provided in this publication. In most Southern Regional Education Board States in 1978, higher education maintained or slightly increased its share of state tax fund appropriations. Initial 1979 higher education budget requests seem to indicate that there may be an even larger than usual gap between what governors and legislators may approve and what is being requested. Among the topics discussed are salaries, construction funding, competency testing, state aid to private higher education, veterinary medicine, and collective bargaining. States included in the analysis are Georgia, West Virginia, Virginia, Kentucky, Mississippi, Maryland, Tennessee, Florida, North Carolina, Louisiana, Alabama, and South Carolina. (SW)

Identifiers-Accreditation Agencies, Branch Campuses, *New Colleges, Single Sex Colleges, States (Geopolitical Regions)

This second annual report of openings, closings, mergers, and accreditation status of independent colleges and universities is part of a study to provide baseline data for observing the changes in the independent sector of higher education. The information was compiled from a survey of state postsecondary agencies and state associations of independent colleges and universities, and from two other publications. Among the highlights of the period from winter 1970 through summer 1978: 64 independent colleges and branch campuses were founded, though 129 closed and 42 merged with other independent institutions; 17 colleges shifted to public control; 325 institutions and branch campuses attained accredited status from nationally recognized agencies, and none (other than those closing) lost accreditation; and the greatest net loss of institutions occurred during 1975-1978. The listings of institutions are by type of change (first-time openings, closings, mergers, shift to public control, attainment of accreditation and by type of institution. Among the information given for each institution is: year of founding, year entered in the Education Directory, type of program (two-, four-year, or specialized program), accreditation agency, headcount enrollment, single-sex or coed, and religious affiliation. Descriptors-*College Majors, Degrees (Titles), *Doctoral Degrees, *Employment Opportunities, *Enrollment Projections, *Graduate Study, Higher Education, Intellectual Disciplines, Job Market, Masters Degrees, Models, *Occupational Surveys, Trend Analysis

A comprehensive, field-disaggregated analysis of the academic labor market is presented using data from the National Center for Education Statistics for first-year graduate enrollment and higher degrees awarded in distinct fields. The fixed-coefficient model of Cartter (1975) is enlarged and disaggregated into a model of the supply of master's as well as doctor's degrees in 19 different academic fields. Past and present trends of the graduate students' choices of field and type of higher degree are analyzed. These trends are extrapolated, using the least square regression methods and adjustments on the grounds of plausibility considerations, and future graduate enrollment and numbers of higher degrees are projected. It was found that the majority of B.A. graduates still enroll in graduate or professional schools, but more seem to be seeking a degree lower than the doctorate. If trends continue, the share of Ph.D. production in engineering, mathematics, physical sciences, arts, letters, and social sciences, which totalled more than one-half of all Ph.Ds awarded before 1971, will decrease to less than one-third in 1983 and later. There appear to be noneconomic factors, such as concern for the physical and social environment, that influence educational and career decisions. A formal representation of Cartter's Global Model of Ph.D. Production, a description of the field classification employed, statistical data, and comments on the empirical data are included. (SW)

Identifiers-*Cooperative Institutional Research Program, Full Time Students, Student Information Form

This is the thirteenth annual report of national normative data on characteristics of students entering college as first-time, full-time freshmen. The series, initiated in 1966, is part of the Cooperative Institutional Research Program (CIRP), an ongoing longitudinal study of the American educational system. The freshman survey data reported here were gathered from most of the country's higher education institutions by the Student Information Form, and have been weighted to provide information for use by persons engaged in policy analysis, manpower planning, administration, educational research, guidance and counseling, as well as by the general community of students and parents. The normative data are reported separately for men and women, and for 38 different groupings of institutions. The major stratifying factors are the predominant race of the institution's population (black or white), and institutional type, control, and selectivity. Some narration precedes the extensive data tables. A table showing institutional participation throughout the survey's history, the survey instrument, and related information are appended. (MSE)

The operational relationship between the independent sector and state planning agencies, and the issues and accomplishments of the independent sector in statewide planning for postsecondary education are examined in this study. Covered are private institution participation in statewide planning through spring 1978 and the perceptions of state agencies and independent sector associations regarding the level, success, and potential problems of this participation. Issues of concern to both groups are delineated, and mechanisms for successful participation are described. The survey instrument is appended. (MSE)

Identifiers-Full Time Students, In State Students, *Montana, Out Of State Students

Data on fall 1978 enrollment in higher education in Montana are summarized and compared with the previous year. Institutions in the Montana state university system, private colleges, and community colleges are included, as are graduate students. Enrollments in noncredit courses are not included in the tables, but are footnoted. Analyses include: distribution by class, institution type, and institution; distribution by campus within the state university system since 1973-74; distribution by sex; immigration of transfer students; net effect of transfers in and out of each institution; distribution by in- and out-of-state residence; first-time freshmen, both in-state and out-of-state; part- and full-time enrollment by institution; and full-time equivalent enrollment (some comparison is made here with the years since 1972-73). Data are presented in tables with some narration. (MSE)

Identifiers-*College Applicants, *University of Washington

Interviews with 814 applicants for admission to the University of Washington who were not offered admission, or who did not enroll, were conducted during the summer and autumn of 1978. The respondents, whether or not they met admission criteria, were highly similar in characteristics of background, career aspiration, and alternative educational activities. The majority of the applicants planned to enter other colleges or universities in the state system. Most of the respondents anticipated continuing or completing their education at the University of Washington in the future. The results were analyzed, with portions presented in graphs and tables. The survey instruments used for the two groups are appended. (Author/MSE)

Identifiers-*California

College-going rates of California high school graduates were computed from 1974-77 for the California public college system and for the fall of 1977 for a sample of California independent colleges and universities. A second focus of the analysis is the flow of transfer students from community colleges to the university and the state university. The analysis is limited to trends in the flow of students and to the relationship between that flow and the proximity of a university or state university campus. The flow of state student aid funds to students residing in the various counties in 1977 was also assessed. No decline was found in the college-going rate of recent high school graduates; the rate of attendance in California schools for those aged 19 and under is about 60 percent. Proximity to a campus of the University of California or the California State University and Colleges appears to be a significant determiner of whether a high school graduate will enroll at one of these campuses. Proximity to a four-year college campus appears to be an important factor in community college student transfer particularly in the state university system. Study findings and information about California colleges and universities are included in the appendices. (SW)

A Staff Survey of Formal Education and Training Programs Sponsored in California by Business, Industry, Government and the Military.

California State Postsecondary Education Commission, Sacramento.

Descriptors-*Adult Education, Armed Forces, Continuous Learning, Cooperative Programs, Educational Needs, Educational Programs, *Government Employees, Government School Relationship, Industrial Personnel, *Industrial Training, Industry, *Interinstitutional Cooperation, Interpersonal Competence, *Management Development, Management Education, *Manpower Development, Postsecondary Education, Skill Development, State Government, State Surveys, Supervisory Training
Identifiers-*California, Lifelong Learning

Educational activities sponsored by business, industry, and various levels of government, including the military (BIGM), in California are briefly reported. Much that is being offered through courses and services by postsecondary educational institutions is also being provided through BIGM training activities, and there are areas of cooperation between BIGM and schools. BIGM commitment to educational activity on the national level is reflected in an average annual expenditure of over $160 per employee, and in the development of educational facilities by over one-half of the nation's large companies. The focus of educational programming offered by BIGM concern the following broad categories: management education; interpersonal relations education; supervisory skills education and training; specific skills training, including business machines; organizational development education, including management by objectives; orientation education to an industry, culture, or location; and personal development education that is not directly job-related. The current educational climate, which includes external degree programs and field work, appears congenial to the exploration of more direct ties between BIGM and postsecondary education. A data base that describes the educational objectives and amount of training activity offered by BIGM in California is needed. (SW)

Identifiers-*Alabama

A random sample of adults in Alabama were surveyed in 1977 to determine their opinions and attitudes about postsecondary education. A 51-item questionnaire was designed to reflect public feeling about several areas of postsecondary education, including finance; governance; faculty; teaching, research, and service functions; and admissions and enrollment practices. Demographic data about the respondents were also collected. The sample of 1,259 adults, ages 16 and over, was representative of 82.4 percent of Alabama's total population in that age range; 655 completed questionnaires were analyzed. Respondents expressed a very favorable opinion of higher education in the state, believed higher education is important for themselves and their children, and the majority stated a willingness to pay more taxes to improve the quality of education in Alabama. More than 46 percent of the public are unsure about how well colleges and universities use the money they receive from the state. An overview of related literature, a description of the survey procedure, a sample questionnaire, and the implications of the findings for higher education in the state are presented. (SW)

Descriptors-*Academic Achievement, Basic Skills, *Critical Thinking, Educational Assessment, Educational Objectives, Evaluation Criteria, Federal Regulation, Higher Education, Remedial Instruction, *Student Needs, Tutorial Programs

The need to develop students' critical thinking skills is examined in this paper, along with existing academic support services, federal regulations and requirements, data on minority group students, and measures of program effectiveness. Many programs provide tutorial services to help the student meet the demands of coursework and to increase basic skills of reading, writing, and mathematics. It is usually thought that acquisition of sufficient basic skills will enable students to compete successfully in the classroom. Federal regulations and requirements are vague in suggesting any methodology by which program goals may be achieved. There is a higher rate of attrition in school among low income and minority students compared to middle and upper income students. Innovative programs and methodologies are needed to teach formal operational thinking processes. The student needs to be able to use a wide variety of symbols and understand abstract relationships. The fields of behavioral and educational psychology should be studied to determine effective methodologies for teaching critical thinking. (SW)

The factors affecting the admission and enrollment of minority students at the 12 state universities in Ohio were studied through campus visits, questionnaire administration, and correlation and multiple regression analysis of the findings. Summaries are presented on minority recruitment and retention efforts at each university for the following offices: admissions, financial aid, affirmative action, minority affairs, student affairs, academic affairs, social and cultural activities, black/ethnic studies, and black/ethnic cultural centers. Predictor variables that were isolated for analysis were: cost, federal financial aid, distance from a cultural center, strength of black studies programs and black cultural centers, and strength of minority and special service programs. Figures were obtained for full-time, main-campus, entering undergraduate freshmen for each fall session from 1973 to 1976. The statistical analysis suggests that the major factors affecting minority student enrollment are geographic location and the strength of the tutoring, counseling, and social, academic, and cultural programming services available to minority students. Two other factors deserving attention by administrators are the availability of financial aid and the need for more minority group members in faculty, staff, and administrative positions. (SW)

Identifiers-Chautauqua Institute NY, University of Wisconsin

The development of the higher adult education movement in the U.S. over the past century is reviewed in this book. Focus is on the cultural conditions that made it possible, the persons who played key roles, the characteristics that distinguished each period, and the trends that emerged and continue to the present day. An overview is first given of general cultural and educational progress in the nineteenth century as the author traces the noncollegiate roots of adult higher education back to such diverse institutions as the public library, the lyceum, vocational and technical institutes, correspondence courses, and the press. The initial steps in systematizing adult higher education are then detailed, including the major effort of John Vincent's Chautauqua Institute and the emergence of university extension. The model of modern university extension is described as it evolved at the University of Wisconsin. The period from 1920 through the end of World War II is reported in terms of three new developments: the rapid increase in number and size of evening colleges, the similar increase in size and number of community colleges offering adult services, and the introduction of the radio as an instructional medium. Post-1945 factors are also considered, such as the role of returning veterans, residential conference centers, educational television, and community service programs. The capacity and willingness of the public to support higher adult education is examined. (LBH)

Identifiers-Professional Development

Suggestions are offered for faculty development and evaluation activities that can aid teachers' understanding and growth. Teachers can benefit from classroom observation feedback from other teachers who have been trained to appreciate the different kinds of cognitive processes used in the classroom. Observing teachers can record the pattern of interaction in the classroom, and if a teacher's classroom goals are not being met, faculty development activities can also help in analysis and planning. This approach relies on a teacher's self-judgment, based on recognition of dissonance between intent and accomplishment and the desire to improve instruction. Faculty development might also encourage teachers to increase their knowledge about the teaching process in general, assist them in producing learning materials, and design courses and evaluation instruments. Control of faculty development activities by faculty is needed to promote faculty acceptance and trust. The controlling group should be drawn from different divisions. Since administrative support is necessary to carry out faculty development and evaluation activities, administrator development activities are also needed. Some particular faculty development programs at the author's institution are cited. (SW)

Identifiers-Information Analysis Products

An overview of current literature about alternatives and variations to existing concepts of tenure of faculty is presented. Tenure continues the appointment of faculty until retirement unless there is dismissal for adequate cause or unavoidable termination because of financial exigency or change of institutional program. Academic freedom is assured through procedures providing for academic due process in the case of dismissal for cause and economic security is provided by the expectation of continued employment. A combination of demographic changes, judicial decisions, shifts in the college curriculum, and financial restraint in allocation of resources for higher education suggest that this traditional understanding of tenure systems in higher education may change. In future periods of declining enrollments and financial restraint, more tenured faculty will be terminated, with tenure providing small measure of job security. Two major alternatives to tenure are contract systems and modifications combined with traditional tenure systems. There are numerous variations of contracts that replace tenure, but no major university has yet adopted any form of a contract system. Modifications include extension of the probationary period, establishing periodic evaluation of tenured faculty, establishing a nontenure track, and extensive use of part-time faculty appointments. Some major studies that document the concept and process of tenure in American higher education are cited. (SW)

An Uncertain Future. Review, 1975-76 to 1977-78.

Council of Ontario Universities, Toronto.

Identifiers-Canada, *Council of Ontario Universities, *Ontario

The development of the Ontario university system from 1975-76 to 1977-78 is traced, with focus on the deteriorating financial situation of the past few years and the impact of recently declining enrollments. The growth of cooperative activities among the universities has included the planning of graduate programs, library cataloging, instructional

development, and admissions. The current state of the Ontario universities and future prospects bring to discussion uncertainty over finances, enrollment, staffing, the adequacy of structures for planning, and the role of universities in general. In addition to the decline in the overall level of funding relative to costs, there have been important changes in the distribution of the funds among the different institutions. The changes have been brought about mainly by modifications in the formula distribution mechanism but also, to a lesser extent, by changes in the system of nonformula grants. Tuition fees are involved also. Developments in graduate level planning in Ontario are discussed to illustrate and define in part the pros and cons of cooperative planning and voluntary association of the autonomous universities. Background information about the membership, constitution, committees and affiliates, financial statements, and a list of publications of the Council of Ontario Universities are included. (SW)

Identifiers-Arizona State University, *Full Time Equivalent Students, Higher Education Price Index, Northern Arizona University, University of Arizona

Ways in which the external financial disclosures by universities may evaluate institutional economic viability are demonstrated. It is argued that the evaluation should take into account the effect of inflation and activity level. The evaluation model requires several years' information about revenues (general operating fund), the impact of inflation (as measured by the Higher Education Price Index (HEPI , and student enrollment in full-time equivalent (SFTE). Currently financial disclosure requirements of universities call for reporting only the revenue figures for individual years, and none of the other necessary information. Economic viability is measured by several growth indicators: revenue (R), R as adjusted by the HEPI (PLAR), R/SFTE, and PLAR/SFTE. Based on the data for the three state universities in Arizona for 1971-1978, this paper concludes that: (1) PLAR and PLAR/SFTE measure more accurately the economic viability of the universities in an inflationary environment; (2) university financial reports should include multi-year financial statistics and applicable price level changes; (3) instead of student headcount, universities should show SFTE; and (4) with appropriate supplementary information and analytic procedure, fund accounting information can be made more useful. Descriptors-*Affective Behavior, Age, Analysis of Covariance, Attitude Tests, Biological Sciences, *Biology, Biology Instruction, *Changing Attitudes, College Curriculum, *College Majors, *College Science, Educational Research, Higher Education, Honors Classes, Natural Sciences, Sex Differences, State Universities, Statistical Studies, *Student Attitudes, Student Characteristics, Student Interests
Identifiers-Biology Attitude Scale

The aim of this investigation was to determine whether biology majors' and non-biology majors' attitudes toward biology are changed as a result of a single semester of instruction in biology. This study also attempted to determine the direction, degree, and possible correlates of this modification. The Biology Attitude Scale was administered at the beginning and conclusion of two non-biology majors courses and three biology majors courses. Biology majors had significantly more positive entering attitudes toward biology than did the non-biology majors; however, all groups except the biology honors-section had decreased in positive attitudes by the end of the term. Although the decrease was not statistically significant, it was sufficient to result in statistically indistinguishable leaving-attitudes as evaluated by analysis of covariance. This study also demonstrated that the students' attitudes toward biology are only minimally related to such well-defined ideographic characteristics as gender and age. (Author)

Identifiers-*Bakke Case, DeFunis Case, Harvard College MA, *Selective Admission, University of California Davis, University of Washington

The public policy and legal issues surrounding preferential admissions of minorities in higher education and the politics and human drama of the controversy are reviewed and analyzed in this book. Focus is on the court cases of Marco DeFunis against the University of Washington law school and Allan Bakke against the University of California Medical School at Davis. The problem considered is how to promote equal opportunity for disadvantaged minorities through affirmative action without engaging in reverse discrimination. Included in the book are considerations of divergent notions of equal opportunity, increasing numbers of applicants and rising standards of admission, racial preference, special admissions or discretionary selection, goals and quotas, legal strategies, comparative academic qualifications, an increasing supply of qualified minority applicants, equal protection of the laws and racial classifications, and political implications. The Bakke and DeFunis cases are detailed through the arguments before the Supreme Court. A final chapter is devoted to an analysis of the Supreme Court's split decision in the Bakke case. Appended is a discussion of the Harvard College Admissions Program. (LBH)

Identifiers-Education and Work, *University of North Carolina Chapel Hill

All May 1977 graduates of the University of North Carolina at Chapel Hill were surveyed about their future plans and general impressions of their educational experiences. The response rate was about 46 percent and representative of the school's population, except that blacks were significantly underrepresented among respondents. Overall, about 23 percent were continuing their education, with 43 percent of those pursuing master's degrees, 41 percent pursuing professional degrees, and 15 going for doctorates. About 81 percent of those employed are permanently employed, with 60 percent, overall, employed in North Carolina. Unemployment status is also examined in detail. Respondents' ratings of 12 areas of university life show a majority of adequate or good ratings in all areas, with the highest percentage of good ratings for library resources, and the highest percentage of poor ratings for academic advising. Respondents were evenly divided in their feelings that academic standards should be higher and that there was too much emphasis on grades in their classes. The survey results are analyzed according to sex and race of the students responding, and are presented in narrative form with some tables. The survey instrument is included. (MSE)

Identifiers-Education and Work, Puerto Rico, *University of Puerto Rico Rio Pedras

The first followup study of the graduates of the Department of Graduate Studies in Education at the University of Puerto Rico, Rio Pedras campus, was undertaken with seven objectives to determine: the satisfaction of graduates in their present work; the specific preparation provided by the graduate program; whether graduates are working in positions for which they were trained; the satisfaction with formal college training; how job satisfaction is related to individual motivation; the graduates' perception of the reinforcement provided by their jobs; and what information will be most helpful in future student selection and orientation. The conclusions reached are that: (1) the graduate department is efficiently preparing students for work; (2) job security seems more important than competitiveness to Puerto Rican students; (3) the program in secondary education has set clear goals for its students, and the graduates express high satisfaction; (4) administration and supervision seems a very rewarding profession for its graduates, whereas guidance and counseling is less so; (5) there are very few people who are meant to be leaders in their fields, and they could be located by testing; and (6) younger professionals tend to be more internally controlled than older people, and are more willing to take risks and introduce changes. A number of specific recommendations are made for the program. (Author/MSE)

Descriptors-Administrator Role, Collective Bargaining, *College Faculty, College Governing Councils, *Educational History, *Governance, *Governing Boards, *Higher Education, Interprofessional Relationship, Labor Unions, Power Structure, Presidents, Teacher Participation, Teacher Role, Trustees, *University Administration

Identifiers-*Board Teacher Relationship

During the twentieth century a movement may be seen toward the delegation of control in college and university governance by governing boards to faculties. By the 1960's, joint effort or shared authority had been achieved on a limited number of campuses, and sought increasingly on others. However, several concomitant developments occurred. The growing recognition of the professoriate's role in governance made necessary an increase in the power of presidents and a broadening of their administrative staffs. In addition, the literature reflects the situations of only a limited number of institutions, especially those that have moved toward shared authority. Finally, collective bargaining has created a new basis for internal relationships, changing perspectives on shared authority. In this decade, relationships between governing boards and the professoriate have reached a juncture with two avenues ahead: one of the traditional commitment to shared authority and the other of unionism and collective bargaining. The academic profession will probably proceed along both routes for the foreseeable future, though they have different implications for the role of governing boards. (Author/MSE)

A Survey of Academic Suspension Policies and Practices. Report 78-01.

Central Washington Univ., Ellensburg. Testing and Evaluative Services.

Pub Date-Jan 78

Note-37p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Academic Failure, *Academic Probation, *Academic Standards, *Administrative Policy, Admission Criteria, Church Related Colleges, *College Faculty, Decision Making, Higher Education, Liberal Arts, Private Colleges, Questionnaires, School Policy, State Colleges, State Universities, Surveys, *Suspension, Teacher Attitudes

Identifiers-United States (Northwest), *United States (Pacific States)

Thirty-three private and public colleges and universities in the Pacific Northwest were surveyed in January 1977 for information about their policies and academic standards, suspension for academic reasons, and reinstatement after suspension. The responses of the 24 respondents, assigned numbers rather than institution titles, are presented here, along with the questionnaire. All but one of the respondents do have some academic standards policy for remaining in school and some system for implementing it. However, there is great variation in readmission practices and statistics. It is concluded that two factors are at work here: the person or persons making readmission decisions, and the students' perception of the process. In the readmission process the faculty is a very important element, and the process is dependent on the disposition of the individual faculty members. (MSE)

Smeltzer, Dennis K.

The Psychophysiological Reactions of Film Viewers While Viewing Selected Cinemagraphic Elements.

Pub Date-Apr 78
Note-19p.; Paper presented at the Annual Meeting of the Association for Educational Communications and Technology (Kansas City, Missouri, April 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Communication (Thought Transfer), Film Production, *Film Study, *Media Research, Psycholinguistics, *Psychophysiology, Statistical Analysis, *Visual Literacy
Identifiers-*Filmic Elements, Sequences

This study focused on the psychophysiological reactions of viewers seeing such selected cinemagraphic elements as varying camera distances, tracking shots, panning shots, and zooming shots. Subjects (N 29), randomly selected from introductory speech courses, viewed five films that varied in the presence or absence of the selected filmic elements. While the subject viewed the films, physiological measurements (GSR and respiratory rate) were taken. The subject then completed a semantic differential that measured the subject's perception of production and story-line concepts. A second study, composed of students in graduate level audiovisual courses (N 29), was conducted to replicate the results of the first study. The results of both studies indicated that there were significantly greater psychological responses with production concepts than with story-line concepts. The control film, which was composed of static long shots, was the locus of this variance, and also elicited significantly more physiological responses than the other filmic elements. The results of this study indicate that the absence or presence of certain filmic elements can greatly influence the psychophysiological responses to a film and that changes in the production of a film will have little effect on the comprehension of that film's story. Descriptors-Comparative Analysis, *Computer Managed Instruction, Cost Effectiveness, *Educational Research, *Individualized Instruction, *Military Training, Statistical Analysis

This study compares an instructor-managed (IMI) and a computer-managed (CMI) version of a modularized, individualized Navy Training course; the main difference between groups was in testing and remediation. Subjects were 240 students enrolled in the Propulsion Engineering School at Great Lakes, Illinois, who were divided into three groups: CMI group, IMI-conventional (students followed normal school procedures and scored their own lesson tests), and IMI-control (instructors scored and remediated lesson tests). Dependent measures included: (1) module test scores for all three conditions, (2) lesson test scores for the IMI-control and CMI conditions, (3) comprehensive test scores for all three conditions, (4) time to complete the course for all three test conditions, and (5) time instructors spent on various activities. A 3 (groups) by 13 (modules) analysis of variance was performed on module test scores. There do not appear to be any major performance differences between the CMI group and the IMI groups. The course completion time data indicate that CMI does result in time savings; CMI also resulted in more free time and less test scoring for instructors. (VT)

Descriptors-Community Colleges, *Computer Assisted Instruction, English Instruction, *Evaluation, *Higher Education, Mathematics, Statistical Analysis, Tables (Data)
Identifiers-Educational Testing Service, *TICCIT Computer System

To assess the impact of TICCIT upon the educational process, the Educational Testing Service (ETS) conducted an evaluation comparing the effects of TICCIT and traditional instruction on community college math and English students during the demonstration period covering the first year and a half of full TICCIT implementation. Data were collected from community colleges in Phoenix, Arizona, and Alexandria, Virginia; observations made after the initial evaluation include those from Brigham Young University. Results show that positive achievement results consistently occurred in both math and English applications. Students in mainline TICCIT English classes scored significantly higher on objective tests of writing skills and also scored better on essay tests than lecture students. In five of the six different math courses in which TICCIT was used, students on TICCIT sored significantly higher on posttests than did their counterparts in lecture sections. The evaluation and subsequent experience with TICCIT has shown that its effect upon students, especially the effect upon completion rates, is very highly dependent upon the environment in which it is implemented. This paper presents an overview of the background and design of TICCIT, a summary of data from the ETS evaluation, and the developer's view of the data and their implications. (Author/VT)

Identifiers-*Instructional Development, *PLATO

This paper describes the non-standard method that was used to evaluate the various processes and procedures employed by more than 20 PLATO courseware development groups and to evaluate this method. The method used was the Flanagan's critical incident technique, modified to include decisions as well as incidents. Sources of information for the evaluation included personal accounts of a number of staff members, interviews with other staff members, and papers and reports. More than 125 case histories of critical incidents or decisions were classified, and the processes and procedures that led to successful, unsuccessful, or equivocal results were analyzed. Discussion of this evaluation method includes its limitations, time requirements, advantages, suggestions for improvement, and its utilization. (VT)

Descriptors-*Computer Managed Instruction, *Cost Effectiveness, Evaluation, Instructional Design, *Instructional Systems, Military Training, *Resource Allocations

Identifiers-*Instructional Development

This paper considers some of the problems in implementing a cost-effectiveness analysis in training and education, and provides a specific example of an analysis that partially meets the cost-effectiveness analysis requirements. A computer-based study management system (SMS), which was implemented on a limited basis, was evaluated in the context of a Navy technical training school. A logical analysis was conducted of alternative delivery systems representative of the variety of delivery alternatives: minicomputer, time-sharing commercial system, and a microprocessor. Measures of effectiveness discussed included student study time, student attitudes, software development, facilities requirements, and hardware requirements. Cost considerations are mentioned only for hardware systems; other categories of resource requirements remain constant across systems. A cost-effectiveness [illegible] display is recommended for maximizing available information in the most easily interpretable form. (VT)

Descriptors-*Computer Managed Instruction, *Course Evaluation, *Evaluation, Instructional Design, Instructional Systems, *Military Training, Student Evaluation

Identifiers-*Instructional Development

This paper describes the multiple evaluation techniques which can be applied to one computer-based instructional system and the ways in which the data may be used. The Navy's Computer Managed Instruction (CMI) System is used as an example to illustrate the application of various evaluation strategies for solving problems associated with delivery system effectiveness, course material comparisons, variations of instructional strategies, and the daily management of instructional progress. Representative data are displayed which illustrate the uses of student data to facilitate the functioning of an operational CMI system. The uses are described on the basis of who actually uses the information for decision-making activities: the instructor, the schools, the system managers, or the instructional materials developer. Descriptors-*Computer Assisted Instruction, Instructional Systems, *Language Arts, Military Training, Multimedia Instruction, *Reading Skills, *Remedial Instruction, *Writing Skills
Identifiers-*Instructional Development

This paper reviews and illustrates what the computer offers the field of language arts. Two different approaches to computer assisted reading instruction available at the Naval Training Center in San Diego the subskills and the holistic approaches are described. The implications of computer assisted instruction for writing instruction are outlined and several specific approaches are suggested, including one presently in development. It is argued that the computer offers the language arts field a versatile device for evaluating and improving language skills; and that there is even greater potential for future development. (VT)

Descriptors-*Computer Assisted Instruction, Educational Research, Higher Education, *Instructional Design, *Intermode Differences, *Phonetic Transcription

Identifiers-*PLATO

This study investigated the advantages and disadvantages of different forms of drills as used in computer assisted instruction (CAI) lessons in phonetic transcription. Subjects (N 44) were students in a course in general phonetics at the University of Illinois. Measurements of student learning, student attitude, and time required for completion were considered for drills constructed with and without specific rehearsal of items initially missed. Time spent by students in exploratory and quiz sections of the lessons was also recorded. Results affirm that programming lessons to train the students by providing extra practice on their problem areas is educationally sound, and indicate that the extra time involved in the lesson design is worthwhile in terms of student learning and attitude. Identifiers-*PLATO IV

The objectives of this study were to find ways to use online data for Computer Based Education (CBE) lesson development and evaluation, to find correlation with off-line data, and to find limitations in the use of online data. Lessons in mathematics, biology, accounting, and chemistry were given on PLATO to community college and some high school students. Measures like percent of questions answered correctly on the first try, or ratio of wrong answers to the number of questions, were computed for each student. These measurements were compared among the classes that studied the same lessons. Observation in classes helped in judging whether the data were reasonable. Lessons that showed low performance were changed and the new data were looked at to find a reflection of these changes. Graphic representations of various lesson and student data were generated to help in the comparison. Off-line test scores were correlated with online data and stepwise multiple regression performed. Except in cases of very special lesson programming, it was found that online data can be a useful tool to follow and evaluate lesson development; the few exceptions can be corrected. (Author/VT)

Identifiers-*PLATO

This study was conducted to determine the impact of a change from primarily scheduled class usage of computer-based instruction (CBI) to primarily free period usage at the City Colleges of Chicago. This change resulted from an interpretation of funding guidelines that CBI was to be offered as a supportive service on a supplementary basis. Several strategies were used to facilitate a smooth transition which would minimize adverse effects on the overall amount of usage, student achievement, and student attitudes: (1) faculty who had used Plato previously were informed of the change on a personal basis, as well as by letter; (2) faculty involvement in CBI was strongly encouraged; and (3) an hourly schedule was prepared each week with subject listings arranged to help ensure that students wanting to study a particular subject would be given some priority. PLATO usage data collected both before and after the policy change were analyzed. A comparison was made of student attitudes towards CBI as shown on surveys administered before and after the policy change; faculty attitudes were solicited by questionnaire and by interview. Despite the lack of computer lesson space during prime-time usage and the short notice, the policy change was carried out successfully. (VT)

Descriptors-*Clinical Diagnosis, *Computer Assisted Instruction, Correlation, *Feedback, *Instructional Design, *Medical Education
Identifiers-*PLATO

Different feedback formats were utilized on a series of computer assisted lessons on physical diagnosis for second year medical students. Each lesson in the series is broken down into four or five major sections; in each section, the student is presented with a list of possible actions to be taken. On each item, three forms of feedback, two of which are generated by the computer, are received. The first type of feedback is ranking the items on the list in the order in which the student would do them; this rating is then compared with that of the author and his peers. A correlation coefficient is obtained for each comparison. The second feedback component is that of the ``good/bad'' judgment. The student is asked on each entry in the list whether he feels a particular action is appropriate; his response is immediately compared with the author's and he is informed of the result. The final and more personalized form of feedback is a short essay in which the student gives his opinion on the action. These essays are then stored, and later printed out for the instructor to read, review, and comment on. Although very limited student feedback was available, generally the students liked the instructional design feedback features. (VT)

Descriptors-*Computer Assisted Instruction, Computer Graphics, *Computer Managed Instruction, Instructional Design, *Instructional Systems, *Learning Laboratories, Management, Universities

This paper describes the Computer Based Learning Lab (CBLL) at Old Dominion University (ODU) as a component of the ODU-Comprehensive Assistance to Undergraduate Science Education (CAUSE) Project. Emphasis is directed to the structure and management of the facility and to the software under development by the staff. Serving the ODU-CAUSE User Group with respect to their programming needs is a predominate role of the CBLL. Other functions are briefly described, e.g., serving as a university-wide resource center for educational computing, implementing computer graphics as an educational resource, and providing computer facilities for other university users. It is explained that, although a comprehensive utilization study has not yet been undertaken, the reaction of faculty who have used the system has been favorable. Samples of files are provided to illustrate the flexibility and functional structure of the Computer Managed Instruction (CMI) system, e.g., adding a set of scores from a machine scored test, adding a set of scores from terminal input, creating a histogram of the first test, and modifying a student record in the roll file. Descriptors-*Computer Assisted Instruction, *Educational Research, *Instructional Design, Literature Reviews, Statistical Analysis, Technical Education, Training

Identifiers-*Learner Control

The effects of learner control in Computer Based Instruction (CBI) were compared to learner control with advice as to what content to see next, and to programmed control. Students in training at the Basic Electricity/Electronics School, Service Command, Naval Training Center, San Diego, served as subjects in this study. Materials used were four lessons on using a multimeter. Students were assigned randomly to one of three treatment modes: learner control (student is free to choose individual lesson segments and content within lesson segments without restrictions on the order in which he sees individual materials or on

how often he sees them); learner control with guidance (used an unobtrusive arrow superimposed on the lesson index or content choice page to recommend which lesson segment or lesson content the student should select next); or programmed control (imposed the same guidance parameters prescribed for the guided group but without choice). There was no significant difference in performance among the three groups. Following completion of the lessons, each student was asked to fill in an attitude questionnaire; there was no significant difference in the attitude towards CBI as a result of the different treatments. Identifiers-*Scientific and Technical Information

A study conducted in a non profit research and development organization and the technical development department of a profit corporation was designed to develop and implement interventions that would modify the information-communication behaviors of the technical professionals in these organizations, and to measure and analyze the effects of the interventions undertaken. Special features of the methodology include an STI user view which emphasizes a market-centered approach based upon the wants and predilections of the real-world users, as opposed to the technology centered viewpoint which attempts to push user acceptance and usage of available technologies; a design perspective rather than a science research perspective; and field studies employing interventions which are measured longitudinally in two different organizational contexts. The four interventions studied include the hiring of a ``high communicator'' the individual who tends the gates of technical information flow within an organization; the rearrangement of offices and people within a department; the resignation of a ``high communicator''; and the progress of individual projects through time. Findings suggest a need for a close look at the ``high communicator'' concept to account for the professionals' individual differences in function and style, as well as differences encountered over time. The self time study method is suggested as one fruitful means of providing some measurement of process which is necessary to further understand the phenomena. (Author/MBR)

Descriptors-*Complexity Level, *Information Processing, *Predictor Variables, Reaction Time, *Reactive Behavior, *Skill Analysis, Statistical Analysis, Task Performance, *Time Sharing

Three experiments were undertaken to examine the processing limitations that underlie multiple task performance and, ultimately, to test the theory that there exists a time-sharing ability which is general and can be assessed through the simultaneous presentation of any two or more sufficiently demanding tasks. Subjects were males and/or females chosen from the University of Oregon paid subject pool. Analysis of variance and Fishers least significant difference test were used to assess results. It was concluded that time-sharing is not a single general ability, but rather is dependent upon several more specific, and perhaps independent, processing limitations. These include: (1) an inability early in practice to simultaneously select, or retrieve, multiple responses from memory; (2) a persisting inability to initiate multiple independent responses simultaneously; (3) an inability to efficiently process contiguous inputs from separate modalities owing to the need for a modality-specific attentional focus; and (4) an inability to efficiently process multiple inputs from within the same modality owing to the existence of structural interference. It is suggested that the prediction of performance on complex criterion task combinations requires specification of which of these component abilities is required by the criterion situations, and the tailoring or predictor tasks based on this specification. Weintraub, D. Kathryn
Review of Corporate Headings'' by Eva Verona.
Pub Date-Feb 77
Note-13p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Cataloging, *Change Strategies, Classification, *Indexing, Library Standards, *Literature Reviews

Recommendations for the choice of corporate authorship and the form of corporate name are proposed as bases for international agreement in this area of cataloging. These recommendations are based on three assumptions: (1) that main entries are necessary and important; (2) that choice between conflicting alternatives should be to select that alternative which would lead to cataloging consistency between agencies; and (3) that a compromise interpretation should be based on a sound theoretical foundation. However, the first assumption is less valid given the development of online systems which make maintenance of several types of indexes and entries possible. The second would sacrifice user convenience, therefore economy of method would be determined by weighing consistency against convenience. The third assumption is the most promising as inconsistencies are identified and analyzed. Proposed guidelines for corporate authorship would shift large numbers of entries for corporate bodies to entries under the title proper, emphasizing the use of alphabetical finding lists and helping the user find known publications. Innovations recommended for the form of corporate names would affect the style and the sequence of elements in the heading. These changes are intended to increase consistency in choice of headings at the international level and standardize punctuation. The recommendations proposed by Verona are clear and could simplify the life of both user and cataloger; however, to determine effectiveness, the theory should be tested before implementation. (CWM)

Benson, Nancy Dollahite
A Study of Acquisitions and Processing Costs in a Small Public Library.
Pub Date-20 May 78
Note-109p.
EDRS Price MF-$0.83 HC-$6.01 Plus Postage.
Descriptors-*Cost Effectiveness, Costs, Flow Charts, Library Automation, *Library Networks, Library Research, *Library Technical Processes, Literature Reviews, Management, *Public Libraries, Records (Forms), Research, Tables (Data)

A study was conducted to determine whether the acquisitions and processing services available to Neill Public Library in Pullman as a cooperative member of the Washington Library Network would be more cost effective than in-house acquisitions and processing operations. The relevant literature is reviewed and descriptions of work studies in acquisitions, cataloging, and processing done over a period of several months at the library are provided, including a three-month check on the time required to move a book from its unpacking to the circulation shelf. Flow charts for the individual processors and a model processing flow chart were developed. Questions of the comparative quality of in-house and network processing were investigated through observation and interviews. Tables and graphs present information on the efficiency of acquisition and processing as it is done at Neill Library, its use of volunteers as a factor in keeping costs down, processing times for special requests and regular books, and times and costs per volume at the library and through the network. Results indicate lower cost and higher quality exist through the in-house system, and recommendations focus on improving in-house procedures rather than joining the network. A bibliography and several appendices are included. (MBR)

EDRS Price MF-$0.83 HC-$11.37 Plus Postage.
Descriptors-*Courses, Directories, *Ethics, Higher Education, *Programs, Questionnaires, *Sciences, *Technology, *Values
Identifiers-Ethics and Values in Science and Technology

This directory lists programs and courses with an EVIST orientation, and other programs and courses related to EVIST as compiled from 2,000 questionnaires sent to educational institutions in all 50 states. EVIST-oriented programs are listed alphabetically by name of institution under two general categories: science, technology, and human values; and biomedical concerns. Programs are numbered sequentially, and for each the program name, institutional affiliation and address, program director, program description, affiliated courses, and program details are given, including the program scope, audience, date of initiation, and funding sources. EVIST-oriented courses are listed alphabetically by title under science, technology, and human values; environmental concerns; health care, behavioral, and life sciences; industry, commerce, and society; and public policy-making. For each course, the course title, name of instructor and department affiliation, institution and address, cross references to EVIST programs, course description, and other details are given. Programs and courses related to EVIST are listed alphabetically by title or program under science, technology, and society; environmental concerns; health care; and contemporary moral and ethical problems. For programs, the director's name, department, and institution are given; for courses, the department and institution are provided. (Author/MBR)

Descriptors-*Indexes (Locaters), *Interlibrary Loans, Libraries, *Library Collections, *Library Guides, Policy
Identifiers-*Washington

This guide, compiled to assist interlibrary loan and reference staffs in finding special holdings of libraries in the state of Washington, is divided into several sections. Institutions responding to the special collections information request are listed alphabetically in one section, with each entry containing institution address and phone number, and a list of its special collections. Special indexes held by the various libraries are listed by subject and their location(s) are indicated. Individual collections are described in more detail in a subject listing, including policies and location. The final section outlines interlibrary loan policies for the University of Washington, Washington State Library, Seattle Public Library, and the Tacoma Public Library. (MBR)

Descriptors-*Book Thefts, Charts, Costs, Facility Inventory, *Library Collections, *Library Research, Records (Forms), *Research Methodology, Research Problems, Research Proposals, Tables (Data), *University Libraries

In order to determine the extent of loss due to theft of books and bound journals from the main stacks of Doe Library, three types of inventories were conducted: a volume count, an item-by-item inventory of the D-classed materials, and three sample inventories. Depending on certain assumptions, the results show that losses could range as high as 4.48 percent and that there is strong evidence of an increasing rate of theft. Recommendations for improving methodology in a proposed follow-up to this study are provided, as well as tables presenting the collected data. Appended are the results of the loan department service survey, a draft proposal for measuring the level of theft from the main stacks of Doe Library, and the code book for those who desire to obtain in machine-readable form the data collected in the sample inventories. Identifiers-Book Security Systems

A number of sample inventories were conducted to measure the effectiveness of the Tattle-Tape book detection systems used in the Moffitt Undergraduate Library and the General Reference Services area of Doe Library, and to establish baseline data for missing materials in four branch libraries (Education-Psychology, Engineering, Environmental Design, Graduate Social Sciences). The utilization made of these collections was also assessed, and additional useful information regarding missing materials from these and other collections was gathered. Data tables present the levels of missing materials for each collection studied, profiles of each collection, collection utilization statistics, and specific inventories of each collection. Appended are the code book for the Statistical Package for Social Sciences (SPSS), which was used to analyze the data; search forms for each branch; instructions for diagnostics and searchers; the inventory coding form and code book for Education-Psychology; the 1974 inventory of the Moffitt Library; the 1976 and 1977 inventories of the General Reference Services collection at Doe Library; and a task chart and schedules for the project. Descriptors-Bibliographies, Clearinghouses, Instructional Media, Library Material Selection, *Library Role, *Library Services, *Mainstreaming, *Mentally Handicapped, *Public Libraries

The L.I.F.E. (Learning Is for Everyone) project conducted by the Altoona Public Library from September 1975 to June 1977 sought to increase library services for the mentally handicapped of all ages. The L.I.F.E. collection of instructional materials includes toys, games, puzzles, books, magazines, records, multimedia kits, films, and conventional print materials for the mildly to profoundly retarded as well as a resource collection for parents, teachers, advocates, and the general public. Specific programs include films and discussion groups for parents, story hours, films, dramatics, hobby clubs, and holiday events for retarded patrons, and special programs for children and young adults which attempt to foster understanding of their retarded peers. As a result of the experiences in the planning and operation of these programs, suggestions for the development of similar programs are presented along with media selection criteria and a listing of resource agencies and specific instructional materials. Descriptors-Administrative Personnel, Annual Reports, *Community Benefits, Comparative Statistics, Directories, Federal Aid, Financial Support, Library Acquisition, Library Circulation, *Library Expenditures, Library Programs, *Library Services, *Public Libraries, State Aid

Identifiers-*Queens Borough Public Library

This annual report of the Queens Borough Public Library for 1976-77 focuses on the cooperative efforts it employed to maximize its services in the face of New York City's fiscal crisis. Though the staff was reduced by nearly 28 percent and hours were decreased by nearly 44 percent, circulation and reference statistics show only a 7 percent cut-back. Comparative statistics for 1976-77 and 1975-76 for receipts and expenditures, materials lent home for use, and reference assistance are presented, as well as new services that the library was able to provide with the help of state and federal grants: Free Bus to the Library, Literacy Volunteers, Higher Education Library Advisory Service (HELAS), New Americans Project, Job Information Service, and Community Information Center Referral Services. Special Features, such as Mail-A-Book Service, Oral History Tapes, Borrow-A-Picture Program, Associated Press Wire Service, Sunday Service at the Central Library, and Library Service to Prisoners, are also described. A directory of the branch libraries and a list of administrative personnel for Central Library are included. (JD)

Note-38p.; Paper presented at the Annual Meeting of the Special Libraries Association (Kansas City, Missouri, June 1978) ; Parts may be marginally legible
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Information Storage, *Library Automation, Methods, *Periodicals, *Recordkeeping, Records (Forms), *Special Libraries, Speeches
Identifiers-Selective Dissemination of Information

This paper describes how two small non-profit libraries successfully computerized their periodical record and routing systems. The steps required in gaining acceptance of the idea, planning, designing, installing, and perfecting each system are included. The Population Council library, whose clerical staff was formerly responsible for manually routing periodicals to library staff, designed a program where the computer actually printed three types of routing slips, matching the existing system. Journals were routed in three ways: (1) to a particular staff member for a check of contents for possible abstracting for the Population Council's monthly publication; (2) contents' pages of journals to a large number of staff for check to see if any wanted to see the entire issue; and (3) the journal itself to all those interested in seeing every issue, regardless of content. The Rockefeller Foundation Library's system has the capability of producing on-demand lists of titles received, in alphabetical order, by subject, with holdings; lists of titles received arranged by the individual who saw them; and lists of titles needing renewal in the upcoming month. Identifiers-Community Analysis Research Institute, University of Denver

An in-depth examination of Henry County and the Blue Ridge Regional Library in Virginia was conducted to assess the effectiveness, needs, and objectives of the library. Included are a brief history of Henry County, its physical, social, and economic characteristics and projections, and an evaluation of district census data. A detailed description of the library's history, facilities, services, financial resources, and collections is also presented, followed by conclusions and recommendations. These include more emphasis on public relations with community organizations; an increased use of media for senior citizens of low educational achievement; increased bookmobile service; continual reassessment of acquisitions policy to achieve balance in the collection according to educational and economic background of the population; and the need for a larger headquarters facility. Numerous maps, charts, and tables are integrated throughout the report. (Author/MBR)

Descriptors-*Health Personnel, Information Seeking, *Information Sources, Information Systems, Interviews, Medical Research, Needs Assessment, *Professional Continuing Education, Surveys

The first of three phases of a project to develop a Comprehensive Integrated Cancer Information System (CICIS) consisted of a survey which was conducted through personal interviews with 402 Alabama health professionals to determine their sources of health information. Type of practice, location of practice, age, size of hospital, and specialty seem to influence source, as well as environment here defined as rural, semi-urban, or urban. The findings show that medical literature is the most common source, both solicited and unsolicited. Other sources include talks with colleagues, local meetings, state meetings, national meetings, and continuing education courses. (JVP)

Descriptors-*Business, *Information Centers, Information Systems, Library Administration, *Library Role, *Library Services, Special Libraries

Many small and medium-sized companies see a library as a luxury they cannot afford. They may have room set aside with a small collection of books, periodicals or reports, yet the use of this often unsupervised storage system is minimal at best. These same companies, however, usually place great importance on maintenance of and access to correspondence and job files; on referral to and modification of engineering and architectural drawings; on creation and organization of public relations slide presentations; and on referral to company generated reports. A comprehensive information center with professional retrieval systems, clear organization, collection control, and knowledgeable help in locating and utilizing all materials, can be a critical financial resource and active focal point in the small or medium-sized company. Descriptors-Bibliographies, *Computer Managed Instruction, Data Collection, Educational Objectives, Expenditure Per Student, Federal Legislation, *Handicapped Children, *Home Programs, Individualized Instruction, Parent Child Relationship, *Preschool Education, Program Evaluation, *Student Development, Tables (Data), Tests

Identifiers-*Child Based Information System

The degree of success of the computerized Child-Based Information System (CBIS) was analyzed in two areas presenting, delivering, and managing a developmental curriculum; and recording, filing, and monitoring child tracking data, including requirements for Individualized Education Plans (IEP's). Preschool handicapped and high-risk children and their mothers participated in a home-based tutoring program, and the developmental growth of the children was measured with the Peabody Picture Vocabulary Test (PPVT), the Boehm Test of Basic Concepts (BTBC), and the Memphis Comprehensive Developmental Scale (MCDS), while the Maternal Teaching Style Research Instrument (MTSRI) was used to compare mothers and their behavior prior to and following home intervention. Analysis of data from the group using the

computerized management information system and two control groups using part or none of it showed that CBIS not only led to better identification of relevant objectives for individual children and to their increased achievement, but reduced administrative costs. CBIS appears to exceed the mandate of recent federal legislation (P.L. 94-142) requiring appropriate and individualized instruction for the exceptional child. (JD)

Identifiers-*Computer Searches, *ERIC

This is a self-instructional learning package designed to teach skills needed to improve computer searches of the ERIC data base. This is done by the generation of appropriate terms, or descriptors, related to population concepts, action concepts, and curriculum concepts. It is asserted that if a learner can identify the three selected descriptor categories and arrange these descriptors in the format presented, improved ERIC computer search statements will result. This learning package is intended for use primarily by graduate students in education; it is to be used in conjunction with the Thesaurus of ERIC Descriptors, 7th Edition. (VT)

Identifiers-Library Services and Construction Act, *New York, New York State Interlibrary Loan Network, Ohio College Library Center, Reference and Research Library Resources Program

Prepared as a background paper for the Governor's Conference on Libraries in June 1978, this document presents a summary of what is known (or not known) about the library 'picture' in New York State. This picture is sketched in an overview, and then specific areas are colored in. Information on each type of library school, public, academic, institutional, and special is provided with supportive statistics describing such aspects as resources and uses, financial support, and staff. Services for the blind and physically handicapped are presented, as well as those provided by library systems and networks (other than public) which exist within New York or to which state libraries belong. Library functions at the state level, followed by a brief discussion of library education in the state, conclude the report. Appendices include maps of the state library systems; statistical tables which summarize data on New York's public libraries, elementary and secondary enrollment and expenditures, college and university enrollment, and federal aid to education; state and federal legislation relating to libraries; and a bibliography. As an additional tool for the delegates to the Conference, a section of statements for discussion and study has been attached. (JD)

Descriptors-Bibliographies, *Consultants, *Instructional Design, *Interaction Process Analysis, *Interprofessional Relationship, Literature Reviews, Models, *Skills, Training

Identifiers-*Instructional Developers

This paper examines the principles and concepts of several different processes and models of professional-client interaction in the initial face to face interview Davies' approach, Silber's model, Shein's process consultation model, Havelock's change agent model, medical problem solving processes, and counseling processes. Conclusions drawn from a recent research project, which used a content analysis method to identify and categorize behaviors of professional instructional developers in the initial interview, are presented. It is suggested that instructional developers should master certain consultation competencies, which are identified from the literature and research, and some methods for training in these competency areas are proposed. Identifiers-APL Programing Language

Working from the premise that for any given periodical title there is some frequency of use at which it becomes cheaper for a library to acquire the publication than to borrow it, this report presents a mathematical model for estimating the costs of options associated with acquiring periodicals. Cost elements included in the model are initial cost, annual recurring cost, internal use cost, internal borrowing cost, external borrowing cost, storage cost, disposition (weeding) cost, and subscription cost. The report shows how, given these variables, the model can determine the crossover or breakeven point at which the cost of borrowing equals the cost of owning. Appendices include a detailed derivation of the cost model and the associated computer program written in APL, details concerning the cost surveys, and results generated from the model helpful in answering questions concerning the acquisition, maintenance, and discarding of back issues of periodicals. Identifiers-*Commission on New Technological Uses

The report tabulates and analyzes responses to two questionnaires returned by 531 (out of 1672) profit and non-profit publishers of 974 (out of 2552) United States scholarly and research journals. Certain categories of periodicals were excluded because they were not believed to ordinarily contain communications useful for scholarly purposes, or they were considered to have little economic impact. The questionnaires dealt, among other things, with present practices and anticipated future practices after the new copyright law (P.L. 94-553) goes into effect on January 1, 1978, with respect to the supplying of authorized copies directly or through agents or clearinghouses; permitting photocopying beyond the exceptions provided in the new statute; and acceptable prices for authorized article photocopying or the supplying of authorized photocopies. Responses are tabulated by circulation size, subject matter, and type of publisher. Both the complete journal and publisher questionnaires are provided, as well as a sample accompanying letter and follow-up letter. Also included is the National Serials Data Program (NSDP) serial data sheet for publishers. (Author/JD)

Descriptors-Bibliographies, *Change Strategies, *Copyrights, Data Bases, Information Dissemination, *Policy Formation, *Programing, Publishing Industry, *Reprography, Tables (Data)
Identifiers-*Consumers

This report is a study of how consumer interests would be affected by changes in the copyright laws governing photocopy and computer-based information. It examines the natures of copyright protection and consumer interest and, after a discussion of the information market in general, weighs copyright/consumer interest in the areas of photocopying, software, computer data bases, and computer-created works. The following recommendations for policy are made: (1) that no royalty charge be allowed on photocopying other than for resale; (2) that both copyrights, with authority to charge royalties, and non-disclosure contracts be available to independent software firms, but (3) that neither be available to large hardware manufacturers; (4) that copyrights be available both on information incorporated in data bases and on material disseminated from them, including computer created works; and (5) that the Federal Government explore means of assisting small copyright holders in protecting their copyrights. Data tables, graphs, and a bibliography are included. (Author/JD)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Abstracts, Bulletins, Developed Nations, *Educational Research, Educational Resources, *Information Networks, Information Retrieval, Information Systems, *Research Projects, Thesauri
Identifiers-*European Documentation and Information System

Bulletin 4 of the European Documentation and Information System for Education (EUDISED) compiles citations and abstracts of on-going and completed projects in educational research and development from 14 participating countries. Projects are grouped and cross referenced according to facets and sub-facets of the EUDISED Thesaurus, which precedes the entries. Titles of entries not in English or French are translated into one of these languages. Information provided for each entry includes country, status of project and dates, researcher(s), institution, financial source, descriptors in English, descriptors in French, and an abstract of the project in English, French, or German. An index of names is followed by subject indexes in English and French giving the titles and serial numbers of projects, and subject indexes in Spanish, German, and Dutch that indicate the serial number and language of the project involved. Idaho Interlibrary Loan: A Study of Fill Rate, Turnaround Time, Patron Satisfaction, and Characteristics of Requests.

Pub Date-Jun 78
Note-73p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-Bibliographies, Comparative Analysis, Data Sheets, Glossaries, *Interlibrary Loans, *Library Research, Literature Reviews, *Public Libraries, Tables (Data), *User Satisfaction (Information)
Identifiers-*Idaho, *Turnaround Time

Interlibrary loan requests originating at 72 Idaho public libraries during a 12-day period in January 1978, were analyzed to determine fill rate, turnaround time, and patron satisfaction with turnaround time and materials supplied. The results show that of 910 total requests submitted 75.05 percent were filled, 20.11 percent had not been received by the end of the study period, and 4.84 percent were not filled. These figures are compared to those from previous studies. While the mean turnaround time for requests filled was 11.39 days, a total of 94.71 percent of the respondents were very satisfied or satisfied with a turnaround time of one to 39 days, and 94.07 percent were very satisfied or satisfied with the materials they received. Data tables in the report and in appendices provide a more specific breakdown of the findings. The appendices also present a sample data collection worksheet, cover letter, instruction sheet, and second cover letter, as well as a list of patron comments reproduced verbatim from the survey sheets and arranged by degree of satisfaction. Report No.-TRITA-LIB-2010
Pub Date-Apr 78
Note-54p.; Not available in hard copy due to marginal legibility
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Cataloging, *Conferences, Directories, *International Organizations, Sciences, Technology
Identifiers-*Corporate Headings, International Federation of Library Associations

In an attempt to document the inconsistency and complexity of bibliographic control of names of international conferences, this directory provides a list of variant names used by such organizations. Preceding the list is a presentation/discussion of the seven recommendations made by the IFLA Working Group on Corporate Headings in April 1977, to resolve this problem. The entries are arranged in Dewey Decimal order, and each name is tagged with a sequential number or date to indicate the changes it has undergone. The distribution of the types of namings analyzed in the collection (e.g., one name which never changes, two or more parallel names which alternate with acronyms) is displayed in a table, as are the frequencies of acronyms. All of the names recorded here were derived from publications used at the Royal Institute of Technology in Stockholm. (JD)

This manual is designed to assist in developing meaningful workshops for retirees and pre-retirees to aid them in making effective use of their retirement incomes. Divided into five sessions, topics include the need for financial planning, major factors in such planning, and specific methods of helping retirees in their own financial planning; estimating retirement expenses and retirement budgets through inflationary years; legal problems including wills, estate planning, and making provisions for incapacity; and taxes and insurance. The objectives, methodology, time required, materials needed, and suggested readings are outlined for each session, and lecture materials for each topic are included. (Author/MBR)

Descriptors-*Community Services, Costs, Federal Aid, Financial Support, Motor Vehicles, *Older Adults, *Planning, State Aid, Tables (Data), *Transportation

This planning guide is designed to aid communities and service agencies in their choices for setting up transportation services for the elderly. Preliminary steps involve defining service objectives, and may also involve determining need; several alternative methods of predicting demand are discussed. Alternatives to actual service include the special bus for the elderly. This service may be provided directly by the coordinating agency and include vehicles such as specially equipped vans, school buses, and station wagons. Cost, revenues, and legal issues of such service are discussed in depth. Another alternative is the reduced fare program whereby older adults may ride existing public transit at a reduced fare. Volunteer services, with private groups providing transit alternatives to the elderly are also discussed. Tables list federal, local, and private funding sources for providing transportation for older Americans. (MBR)

Identifiers-Home Health Care

A training program for community agency volunteers involved in providing personal care and assistance to older persons in their homes is outlined in this manual. Twelve sessions are included with suggestions for supplementary sessions in several areas. The first four sessions, which cover the need for home services to the elderly, aspects of the aging process to promote a better understanding of the elderly, techniques of home management and home safety, and the importance of recreational activities, are designed for use by staff persons of councils on aging or similar agencies. The content and suggested methods for these sessions are included. The remaining sessions, concerned with home nursing skills maintaining health; recognizing illness; personal services for the bed patient; and diets, medicines, and treatments should be conducted by a qualified home nursing instructor through arrangements with the local Red Cross. All necessary materials for teaching and practice sessions are provided by the Red Cross. (MBR)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Costs, *Counselor Training, *Housing, Housing Needs, Information Services, *Instructional Materials, *Older Adults, Problems, Relocation, Training Objectives

This manual, designed for use in training staffs of local agencies which counsel elderly clients on housing problems, is organized into five sessions dealing with the social and economic factors of finding adequate physical shelter. Sessions deal with acquainting participants with the most critical issues in housing for the elderly; developing and applying a checklist of important locational factors in elderly housing; acquaintance with the hidden costs of different housing types; introduction to the process of providing housing counseling services; and acquaintance with relocation problems for the elderly. Each session includes a list of objectives, materials, and handouts. All sessions are extensively outlined illustrating the specific procedure and the time it should take to accomplish each objective. Readings are included for copying and use as handouts in several of the sessions. (Author/MBR)

Descriptors-Age, *Counselor Training, Death, Developmental Stages, Gerontology, *Health, *Health Services, Housing, *Instructional Materials, Leisure Time, Nutrition, *Older Adults, Safety

This training manual for personnel who work with older adults is designed to create awareness and knowledge of health maintenance for older Americans. Increasing awareness of the health needs of the aging, and fostering understanding of biological, psychological, and sociological aging processes, and of positive attitudes toward health care and protection of the aged, are covered in the initial sessions. An awareness of housing problems, how these problems affect health maintenance, the relationships between environmental safety and leisure activity with health maintenance, and geriatric nutrition needs are also stressed. Finally, an understanding of the older person's view of death is fostered. Step-by-step instructions for procedures and objectives are included. A list of materials needed for each session is also included, along with a resource directory for obtaining films which are recommended for use in several sessions. (Author/MBR)

Managing Reprints and Preprints in an Observatory Library.

Pub Date-Jun 78

Note-9p.; Paper presented at the Special Libraries Association Annual Meeting (Kansas City, Missouri, June 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Delivery Systems, Information Dissemination, *Library Collections, *Management, Methods, Periodicals, *Special Libraries

Identifiers-*Observatories, *Reprints

An on-going project of cross-referencing reprint and preprint series distributed by observatories to the collection of the National Radio Astronomy Observatory is described. Reprints available in the library's journal collection were removed after cross-indexing and referencing was accomplished. If the reprint was not available through the journal collection, it was kept and filed in the same folder as the annotated list of reprints, organized by observatory. The work varied with each observatory's publications simple identification of reprints being kept and being removed for those observatories that published their own annotated list of reprints was easy; for those series where no indexes existed, annotated indexes had to be created. This procedure allows the library to maintain the intent of identifying a work with a particular institution, but at the same time allows for considerable space savings and simplification of the collection by keeping a particular article in only one location in the library. An Evaluation of Approval Plan Performance: The Acquisition of Titles in Political Science.

Pub Date-75

Note-113p.; Studies in Librarianship series No. 1, San Jose State University

EDRS Price MF-$0.83 HC-$6.01 Plus Postage.

Descriptors-*Academic Libraries, Bibliographies, Books, *Evaluation, *Library Acquisition, Methods, Periodicals, *Political Science, Publishing Industry, Tables (Data)

Identifiers-*Approval Plan

This study, done at the San Jose State University library, measures the effectiveness of an acquisitions approval plan, designed to acquire current books soon after publication without the time consuming, costly operation of title-by-title ordering, for a group of titles in political science. It also investigates the variation of titles received on approval plans among individual publishers, and between trade and academic publishers, and the possibility that a relationship exists between the subject class of the title and its supply on approval plans. Results show that only 61 percent of the titles expected actually arrived within a time period considered reasonable by the library. In regard to individual publisher performance, the overall results were poor with a very wide range of performance exhibited. Results should force a reevaluation of the effectiveness and reliability of approval plans. Extensive bibliographies of the titles received and those not received through the approval plans are appended to the study. (Author/MBR)

List of Library Instruction Clearinghouses, Directories and Newsletters and Results of the Clearinghouse Questionnaires.
Pub Date-Aug 78
Note-25p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Clearinghouses, *Directories, *Information Sources, *Library Instruction, *Newsletters, State of the Art Reviews

This list is intended to provide librarians with a resource for implementing or modifying their library instruction programs and for developing state/regional clearinghouses, directories, or newsletters on library instruction appropriate to local needs. A clearinghouse is here defined as a center which collects instructional materials for loan and/or on-site inspection. Newsletters and directories are included if they are devoted exclusively to library instruction. Information was collected from the United States, Canada, and selected other countries. Using a questionnaire devised to provide uniform information for all contacts, information was collected on the services, resources, availability, price, and contact persons for all clearinghouses, directories, and newsletters now existing or in the planning stage. The list is comprised first of a summary of the information obtained by type and location and is followed by more detailed information presented on the completed questionnaires. (Author/JVP)

The Role, Purpose and Program of the Unit for Dissemination: A Position Paper. Revised.

Kentucky State Dept. of Education, Frankfort. Office of Communication Services.

Pub Date-Apr 78

Note-35p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Adoption (Ideas), Charts, *Diffusion, Educational Change, Educational Innovation, Educational Research, Improvement Programs, *Information Centers, *Information Dissemination, Methods Research, Research Utilization

To alleviate the time lag between the conception and the implementation of educational innovation, the Unit for Dissemination has been formed by the Kentucky Department of Education. Within the goals of fostering awareness and interest in innovation and of spreading innovation from field test to ultimate user, the Unit has defined objectives which include providing communication links, supporting services, technical services, and the coordination of dissemination efforts. In addition to promoting research and development in dissemination and diffusion, the Unit will organize and maintain a program of awareness on both the state and local level for innovative programs that will impact on local school districts. These efforts are seen as critical as the present disproportionate research-to-dissemination funding ratio results in a low-effectiveness as well as an approximately 20-year delay in the implementation of research results. Descriptors-Computer Programs, Data Sheets, Demography, *Educational Needs, *Knowledge Level, Metropolitan Areas, Question Answer Interviews, Questionnaires, Research Methodology, Rural Areas, Statistics, *Surveys, Tables (Data)

Identifiers-*Emergency Medical Service, *North Carolina

This report presents the findings of an initial survey that was designed to systematically determine the educational needs of citizens with regards to the emergency medical services system in their county. Specifically, the survey sampled the knowledge of respondents concerning: (1) what medical service is; (2) what services are available; (3) how to gain access to the emergency medical system; and (4) the conditions for which emergency medical service is available. Volunteers from county rescue squads conducted 1194 interviews in both the rural and metropolitan areas of Region J in North Carolina; 1036 usable questionnaires resulted. Demographic factors included race, age, sex, area, occupation, and education. The findings are tabulated for each item in the interview questionnaire, and further analyses provide a breakdown of some results by county and by education level. Appendices include both the survey questionnaire used in this study and one used in an earlier Chatham/Orange County study, as well as the computer programs used to obtain a description of the data records, to determine the number of interviews in a particular area, and to reformat the Orange County data to make it comparable to the Region J study. Descriptors-*Comparative Analysis, Computer Programs, Demography, *Educational Needs, *Knowledge Level, Metropolitan Areas, *Publicize, Question Answer Interviews, Questionnaires, Research Methodology, Rural Areas, *Surveys, Tables (Data)

Identifiers-*Emergency Medical Service, *North Carolina

In this follow-up study, an examination of the level of awareness of and knowledge about the Emergency Medical Services System in Region J of North Carolina was made to detect any changes from the earlier survey which might be due to a six-month campaign publicizing the system. To further pinpoint the channels through which the citizens of the region received this information, selected questions were added to the research instrument. The sampling methodology was similar to that of the initial survey, and, though the timing of the follow-up survey was poor (conducted in the summer months), the tabulated results are statistically compared to those from the earlier study. Further analysis discusses the significant cross-tabulations of demographic factors with responses from selected questions from the survey instrument. Appendices include the instructions to the interviewers, the survey instrument, a printout of the Statistical Package for the Social Sciences for the analysis, and extensions of percentages to include the number of people in Region J. Identifiers-County Community Organizations, *Emergency Medical Service, *North Carolina

This report presents the procedures and activities of a year-long Public Education Project conducted in Region J of North Carolina to help citizens of this region learn what Emergency Medical Services (EMS) are available, how to obtain them, and when to call upon them. Previous reports provide the sampling methodology used to survey the educational needs of the citizens and the statistical results it produced; this report summarizes and evaluates the steps of the project, from determining the educational objectives necessary to increase public awareness, to specific publicity methods and programs utilized to meet those objectives, including the design and production of educational materials. Community participation and organizations relevant to the success of the project are also discussed, and the project's budget is presented. A general overview with recommendations concludes the report. Appended are the resumes of the project director, coordinator, and administrative assistant; copies of the initial and final surveys; the public service announcements, radio and public affairs programs, print materials, school lesson plans, and slide/tape presentations used in the project to publicize EMS; and a list of equipment. Identifiers-*Emergency Medical Service

Using the systematic plan of the Public Education Project developed in Region J of North Carolina as its model, this guide presents in detail seven major steps in organizing a public education project for emergency medical services: (1) assessing needs; (2) survey methodology; (3) determining objectives; (4) media usage both mass media and individual/group presentations; (5) establishing time frames; (6) using an emergency medical technician as prime speaker; and (7) evaluation. Lengthy appendices provide useful documentation from the North Carolina project; the survey instruments and interviewer instructions; computer programs; different kinds of publicity, including radio announcements, brochures, television scripts and slides, a sample news release, billboard design, and telephone sticker, and school lesson plans; addresses of outdoor advertisers and survey resources; a list of local and civic groups and a checklist for county groups; time estimates; and a presentation report form. Preliminary Report on Book Losses in Libraries: A Pilot Opinion Survey.
Pub Date-Jun 77
Note-35p.; Parts of appendix marginally legible
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Academic Libraries, *Attitudes, Bibliographies, *Book Thefts, Library Research, Research Methodology, *Surveys, Tables (Data)
Identifiers-*Library Users, *Ohio State University Libraries

This study explores whether the installation of an electronic theft detection device has an effect on the library user's attitudes about booktheft and examines opinions and attitudes on booktheft motivations and potential solutions to the problem. Basic questions posed by the study are: Do the same pressures exist for the whole user population? Are the most significant variables affecting booktheft internal or external to the library, or both? If both, how do these variables interact? The theoretical framework of the research isolates five major factors possibly contributing to a high rate of booktheft: the library, academic pressure, individual personality, social and psychological pressures, and general criminal framework of theft. This report discusses (1) the development of a questionnaire to explore library users' booktheft attitudes and to obtain background information about library users and the sub-population of book thieves; (2) questionnaire distribution at two comparable academic libraries before and after one installed an electronic booktheft detection device; (3) comparison of library inventory figures before and after that installation; (4) statistical manipulation of survey information; and (5) analysis of results. Appendices include the annotated survey instrument and crosstabulations of significant questions between samples. (Author/JD)

Spons Agency-EXXON Education Foundation, New York, N.Y.
Pub Date-Aug 78
Note-174p.
Available from-Institute for the Future, 2740 Sand Hill Road, Menlo Park, California 94025 (R-42, $12.00)
EDRS Price MF-$0.83 HC-$8.69 Plus Postage.
Descriptors-Community Organizations, *Group Activities, Higher Education, *Interaction, *Man Machine Systems, Professional Associations, *Telecommunication
Identifiers-Audio Teleconferencing, Computer Based Teleconferencing, *Distance Education, *Teleconferencing, Video Teleconferencing

In this study of current and potential users of teleconferencing media in post-high school settings, more than 50 teleconferencing systems in the United States and Canada were surveyed. Researchers examined instructional, administrative, student service, and interorganizational uses of teleconferencing in educational organizations ranging from university extensions and professional associations to community volunteer organizations. The report includes detailed case studies of 13 existing systems and a comparative analysis of the characteristics of 46 educational networks. Having explored future uses of these media in light of likely societal trends, the Institute's judgment is that the use of teleconferencing in postsecondary education will continue to increase, but at a rate much slower than that predicted for earlier educational technologies. The most promising possibilities are in specific areas of instruction, such as courses that meet requirements for professional recertification. The operational guidelines provided include a set of preconditions or prerequisites for implementation of a teleconferencing system to facilitate the start-up process and to identify areas where teleconferencing does not seem appropriate, as well as guidelines for effective usage once a system has been established. Educational Television: Brazil.
United Nations Educational, Scientific, and Cultural Organization, Paris (France).
Pub Date-Oct 72
Note-67p.; Serial No. 2775/RMO.RD/MC
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Course Objectives, *Educational Television, Evaluation Methods, *Instructional Programs, Instructional Staff, *Job Training, Models, Organizational Effectiveness, *Staff Improvement, Television Research, Training Objectives
Identifiers-*Brazil, *Instructional Television Training Model

Based on evaluation of nine Brazilian educational television centers, an Instructional Television Training Model (ITV) was developed to aid in determining and designing training requirements for instructional television systems. Analysis based on this model would include these tasks: (1) determine instructional purpose of the television organization; (2) determine if ITV can be applied to a clearly defined instructional need; (3) determine if the ITV organization is or is to be incorporated into the instructional system; (4) review instructional objectives for clarity; (5) separate problems for beginning and operative organizations; (6) analyze problems; (7) determine if systems's organization or lack of training cause problems; (8) specify training objectives, anticipated functions, and individuals to learn each function; (9) using the Tiffin Matrix, quantify training resource requirements functions taught, degree of instruction, instruction time, personnel time, number of staff; (10) specify learning objectives; (11) choose aopropriate course type, based on subject-matter and locale; (12) management makes cost decisions; (13) select personnel training; (14) assess readiness of facilities and equipment; (15) clear times and schedules for personnel; (16) prepare budget; (17) structure course schedules; (18) prepare instructional materials; (19) determine student's knowledge through pretest; (20) administer instruction; (21) determine learning success through post-test; (22) and assess course success by comparing student's work before and after instruction. Recommendations for national and regional training centers are presented. (CWM)

TV and Kids, Parts I and II.
National Public Radio, Washington, D.C.
Pub Date-Aug 78
Note-38p.; Programs No. 127 and 128
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Broadcast Industry, Children, *Childrens Television, *Commercial Television, *Educational Television, Instructional Media, Public Television, Television Commercials, *Television Viewing

In this series of National Public Radio interviews, individuals from education and television broadcasting discuss the use and abuse of television by schools and the influence of television on children in home viewing. It is asserted that television is and will continue to be watched, and therefore it is necessary to learn how to deal with it. By having children view programs, create programs, and read scripts, schools do use television to help teach organizational, creative, writing, and reading skills, in addition to critical viewing skills. These interviews noted that: (1) teachers feel that television produces unrealistic competition between the teacher and entertainer; (2) children are able to learn at varying rates from instructional television; (3) children are influenced by television; (4) violence in the media has been replaced by sex; which has proved to be difficult to define; (5) broadcasting networks argue that television productions and stereotypical characters merely reflect social issues; (6) the Parent Teachers Association has issued viewing guides to help parents select productions; and (7) despite discriminate selection, too much television viewing has an effect on children's ability to develop cognitively or develop complex skills. Now I See: Aesthetics of Film and Television: A Discovery Approach.

New York State Education Dept., Albany. Educational Programs and Studies Information Service.
Pub Date- 75
Note-42p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Aesthetic Education, Animation, *Commercial Television, *Discovery Learning, Fantasy, *Film Study, Imagination, Instructional Innovation, Instructional Media, Metaphors, *Teaching Guides, Visual Literacy

Students can see more in motion picture and television productions once they realize that they are already quite knowledgeable, and these ten discovery-experience lesson units on film and television productions provide teachers with a means to let them discover for themselves that they already know several characteristics of the moving media as distinctive art forms. Teachers interested in setting up a staff development program can utilize and build on this material, with or without expert collaboration. The units are constructed to suggest ways in which participants can personally discover artistic characteristics and relationships already known but never defined or communicated. Each unit explains the students' discovery experience and, for ease in facilitating discovery for participants, is accompanied by Notes to Teacher. Frequent use of television programs is stressed to provide a continuing opportunity to encounter differing styles. Teachers are urged to show the films suggested at the end of each unit repeatedly to allow students to discern new aspects. Increased enjoyment, greater facility in talking about moving media intelligently and accurately, critical judgements about artistic worth and quality of life portrayed, discovery of strengths and limitations of the medium, and discovery of differences among the arts should be realized by participants. Identifiers-Digital Equipment Corporation

To make training cost-effective for its small systems customers, Digital Equipment Corporation provides self-paced training packages for several years that can be used by its customers on-site. To control the quality of this training, Digital is now incorporating computer managed instruction (CMI) into some of these packages. This CMI component uses a sequential probability test algorithm that allows tests to vary in length depending upon the learner's skill level. This algorithm assures that the tests' results are statistically reliable while keeping their length as short as possible. (Author)

Identifiers-*BASIC Programing Language, Computer Software, Digital Equipment Corporation

A computer managed instruction (CMI) package to teach BASIC programming, together with questions to be answered in its evaluation, are described. The training package consists of 16 learning modules coupled; an interactive CMI system generates pretests and posttests for each module and branches students to the next appropriate module. It is intended to be sold to customers to be used in a self-paced mode. Evaluation questions pertain to (1) what percentage of customers will use the CMI system, (2) whether students will use the tests as intended, (3) whether a sequential probability test ratio will reduce test length significantly, (4) whether test reliability is maintained, and (5) whether all test items are working properly. Descriptors-*Course Evaluation, Course Organization, *Guides, Higher Education, *Instructional Design, Instructional Innovation, *Learning Modules

Issues and illustrative material are presented from a project evaluating modular courses at McGill University from 1972 to 1976, with the overall intent of aiding instructors to produce instructional modules. Questions related to the nature of modular instruction at McGill, how modular instruction developed, and how it operates are examined. Thirty-two findings, interpretations, and recommendations are presented in areas of course structure, management, and organization of modules and materials. General findings include: (1) Provision of study skills or guidelines is a necessary adjunct to a modular course. (2) Early support and assistance of department heads should be obtained. (3) Assembly of learning materials into modules requires adherence to a set of principles of organization. Appendices include courses evaluated at McGill, issues in innovative instruction, and a guide for using modules. (CMV)

Identifiers-*Federal Communications Commission

The local government cable access channel is essentially a television station completely controlled by the local government. It differs from a local broadcast television station by being able to reach only those places which are connected to the cable system, having much less programming distribution costs, and having the capacity to deliver programming to selected audiences. Uses of local government cable television can be classified as the delivery of special services, delivery of information about government and services, closed-circuit, or on demand service. Decision making factors in determining cable usage include the needs of government departments, costs involved, and revenues available, and procedures leading to local government's actual use of the cable systems will vary from locality to locality. The initial steps will vary with the status of local cable activity, and subsequent steps will be motivated by the data developed and the intermediate decisions made in phases of study, implementation, and effectiveness evaluation. This report explains relevant Federal Communications Commission regulations, and appendices include program sources, studio costs, a facilities and equipment survey, a departmental needs survey, and a bibliography. EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Academically Handicapped, Adolescents, Annotated Bibliographies, *Case Studies, *Individualized Instruction, *Language Skills, *Models, *Multimedia Instruction, Secondary Education, Special Programs, Teaching Methods, Videotape Recordings

Some general approaches to individualized tutorial instruction are described with specific examples of a multimedia model for learning used with one 13 year old learning disabled student deficient in language skills. The model is presented in the form of a wheel, with a topic, theme, concept, or content area at the hub; radiating out from the center are seven overlapping areas of media including stage, design, print, photography, radio, movies, and television. Specific learning activities for each of the media are outlined, e.g., writing scripts of familiar stories for films and television. An annotated bibliography of sources and resources on multimedia instruction is included. (CMV)

EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-*Childrens Television, *Feasibility Studies, *Government Role, *Incentive Grants, National Surveys, *Needs Assessment, Television Research

A project examining the need for change in children's television environment and for the establishment of a grant-making organization designed to address the needs of the children's broadcasting environment consulted a variety of interests, insights, and divergent viewpoints. Research studies, government documents, books, professional journals, and popular magazine articles were consulted, and over 200 people were contacted, including commercial and public broadcasters, artists, distributors, advertisers, child psychologists, educators, federal agency spokespeople, legislators, and consumer advocates. Results indicate that change in the children's television environment is desired, as is a new grant-making service organization. It is also noted that although models presented for a national grant-making entity appear adequate, none are presently deemed feasible. Three recommendations call for (1) high priority of legislative activity related to children's television, (2) the establishment of a national council on children and television, and (3) the development of alternative distribution systems for children's programming, with special reference to cable channels. Appendices include project advisory board and team members, participants, Project Overview Conference participants, project method and description, footnotes, and a bibliography of works consulted. (CMV)

Survey of Audiovisual Instructional Materials Available on Teaching Skills. Final Report.

Australian National Committee of O.M.E.P., Victoria.
Pub Date-24 Oct 78
Note-68p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.

Descriptors-*Audiovisual Aids, Audiovisual Instruction, *College Faculty, Developmental Programs, *Educational Resources, *Health Education, Higher Education, *Instructional Materials, National Surveys, Skill Development, *Teaching Skills

A survey of 500 higher education institutions to identify available instructional materials in basic teaching skills relevant to university instructors resulted in a listing of producers and their products. The major focus of the study was on practical materials rather than theoretical, and teaching skills and educational issues of particular interest to health science instructors. A survey letter was mailed to health science institutions and individuals noted for expertise in faculty development; faculty development departments in liberal arts and health sciences colleges and universities; and individuals, private foundations, and commercial producers recommended by other respondents. Results were compiled into three tables: (1) audiovisual materials on teaching skills available from academic institutions; (2) audiovisual materials on teaching skills available from general resources; and (3) suggested resources for keeping current in the instructional development field. The survey indicated that few institutions have attempted to develop a "set" of such instructional materials although many have developed isolated units on basic topics. (CWM)

Field Evaluation of the Generalized Maintenance Trainer-Simulator: I. Fleet Communications System. ; Technical Report No. 89.

University of Southern California, Los Angeles. Behavioral Technology Labs.

Spons Agency-Office of Naval Research, Washington, D.C. Personnel and Training Branch.
Pub Date-Oct 78
Grant-N00014-75-C-0838
Note-95p.
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-*Computer Assisted Instruction, *Electronics, Equipment Evaluation, Instructional Systems, Military Training, *Problem Solving, *Radio Technology, *Simulation, Technical Education, Training Techniques

This report describes the Generalized Maintenance Trainer-Simulator (GMTS), an instructional system designed to give electronics students intensive troubleshooting practice in a simulated hands-on training environment, and reports on a field evaluation of the GMTS applied to systems level troubleshooting in radio communications. The GMTS can be used for any device in which signal paths and their relationships to controls, indicators, and test points can be defined. It generates interaction with the student by referring to his last inputs and to its stored history of interactions with him up to that point. To the extent that these individual student histories constitute models of individual students, GMTS constructs a model of each student to interact with that student. The computer program that implements the instructional system is indifferent to the specific equipment being taught, since specific equipment for simulation is determined by loading two bases for that equipment describing its essential features. Results of field evaluation of twenty students who practiced solving 35 troubleshooting problems were: (1) more uniform fluency at troubleshooting; (2) decrease in mean times to solve a problem; and (3) a more favorable attitude toward the trainer. (Author/CWM)

Silva, Clare M.

A Rationale for Individualized Instruction in Remedial Writing Programs.

Pub Date-Nov 77
Note-12p.; Paper presented at the Annual International Congress for Individualized Instruction (9th, Lafayette, Indiana, November 6-8, 1977)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-College Freshmen, Comparative Analysis, *Error Patterns, *Individualized Instruction, Punctuation, *Remedial Programs, Spelling, *Structural Analysis, *Writing Skills

Writing samples of 97 students in remedial writing classes were analyzed to determine error patterns in writing mechanics and the predominance of specific errors. Students were grouped according to individual student profiles and error patterns which indicated additional similarities and differences among individuals. Analysis indicated that most students shared the error patterns of spelling and punctuation, although the patterns were crosscut by other categories. Significant findings were: (1) students with proportionally more errors in their compositions were those with more highly differentiated problems of error; (2) only four percent of the students showed very high error count in all areas of writing mechanics; (3) spelling was the most severe generalized problem of mechanics; and (4) students showed marked variation in their writing skills profiles. Individualized instruction would help the student overcome obvious difficulties and concentrate attention on clearly defined individual needs. (CWM)

Descriptors-*Computer Managed Instruction, *Course Evaluation, Economic Education, Higher Education, *Management Systems, Summative Evaluation, Textbooks
Identifiers-*Computer Assisted Testing, *PLATO

This project evaluated a Course Management System (CMS), which was developed at the University of Illinois and implemented on the PLATO IV instructional system during two semesters of an introductory level economics course. The CMS was designed to integrate books, computer testing, and personnel utilization in applying instructional and computer technology to the management of large-scale instruction, while minimizing online computer use and costs, and materials preparation costs. The performance of the experimental and control groups on the final examination and the responses to a questionnaire measuring attitude provided the primary bases for evaluating the effectiveness and adequacy of the CMS. Results of these measures are discussed, and recommendations are offered for the individualization of computer managed standard courses. (Author/RAO)

Radio for Formal Education and for Development Communication.

Identifiers-Guyana, Nepal, United Nations, West Indies

The keynote article in this issue describes some empirically demonstrated beneficial functions of radio in development communications: (1) it improves the quality and relevance of education; (2) it keeps educational costs down; (3) it broadens access to education; and (4) it extends the impact of time, money, and effort outside the formal education system through such applications as open radio broadcasting, radio campaigns, and radio-listening groups. Other articles are concerned with the new U.N. Audio-Visual Information Center on Human Settlements, called Vision Habitat; defining broadcasting training needs; the use of radio in classroom instruction; two-way radio for health and development; successful scriptwriting; communication planning; the training and visitation system of agricultural extension; and a discussion about development project failures. Case studies deal with medicine and CB radios in Guyana, teacher training with radio in Nepal, and a satellite demonstration in the West Indies. (CMV)

Identifiers-Aptitude Treatment Interaction

The objectives of this project were (1) to determine whether or not adapting instruction to student characteristics will improve the effectiveness and efficiency of training, (2) to identify the learner attributes that interact best with specific instructional treatments, and (3) to establish what must be done to create and implement a useful adaptive instructional system. The professional literature concerning adaptive teaching systems was reviewed and evaluated, and several approaches to accommodating instruction to student characteristics were identified and considered. Little empirical evidence was obtained to support the aptitude-treatment-interaction (ATI) approach, and the experimental evaluation of several alternative approaches to adaptive instruction was recommended. A Modular CAI System.

Pub Date-78
Note-24p.; Paper presented at the International APLET Conference (Pontypridd, Great Britain)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Computer Assisted Instruction, Computer Programs, Concept Formation, Data Processing, Educational Development, Experimental Programs, *Models, *Programing Languages, Teaching Machines, *Technological Advancement, Technology Transfer

The experimental CAI system which is being tested at Delft University of Technology is structured in a modular manner to account for high changeability. The concept formulated for this project was the outcome of research into technological, organizational, and educational developments in CAI, and the enumeration of the common aspects of the courseware, different author languages, systems, and methods in current use. This paper discusses this concept and the implementation of the system, including the presentation of lessons, recording activities, designing a lesson, evaluation, distribution of data, and management. While experience with large numbers of students and course authors is not yet available, the system is functioning technically in accordance with expectations at this time. It is expected that it will be used more extensively by lecturers and students at the university in the future, and that extensions in the form of a compiler for the TUTOR subset and the CAISCO interpreter for a microcomputer system will make it possible to test the changeability and flexibility of this modular system. Audiovisual Education: Course Booklet; Content Overview, Requirements, Policies, and Project Guidelines.

Akron Univ., Ohio. Coll. of Education.

Pub Date-77

Note-26p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Films, Filmstrips, Higher Education, *Instructional Materials, *Instructional Media, *Material Development, *Media Selection, Media Technology, Transparencies

This booklet describes a visual education course at University of Akron designed to introduce selected media and their roles in teaching, learning, and the communication process. Students are involved in the selection, evaluation, and utilization of media and materials including films, filmstrips, transparencies, displays, and recordings. In addition students are exposed to introductory experiences in the preservation, adaptation, and preparation of materials including mounted visuals and overhead projection transparencies. A Discrepancy Model for ITV Program Evaluation: An Instrument for Teachers.

Pub Date-78

Note-13p.; Best copy available

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Attention, Educational Objectives, *Educational Television, *Evaluation Methods, *Models, *Program Evaluation, Student Attitudes

Identifiers-*Discrepancy Evaluation Model

Using aspects of the Children's Television Workshop procedure, a theoretical evaluation model is developed which may be used by teachers for previewing instructional television (ITV) programs. Based on discrepancy between teacher goals and expectations, program goals and purposes, and student attention and receptivity, the model assumes that the likelihood of successful viewing of ITV is inversely related to the amount of discrepancy. The model has been synthesized into an evaluation form consisting of a series of semantic differential scales grouped according to teacher, program, and student components. The more numerically equivalent the section averages, the less discrepancy can be expected between components, thus providing the teacher with an indication of the program's success. (Author/JEG)

Descriptors-Cognitive Style, *Complexity Level, Educational Facilities, Error Patterns, *Learning Processes, Physical Activities, Problem Solving, Programing, *Psychomotor Skills, Skiing, Skill Analysis, *Skill Development, *Task Analysis

This paper analyses new methods of teaching skiing in terms of a computational paradigm for learning called increasingly complex microworlds (ICM). Examining the factors that underlie the dramatic enhancement of the learning of skiing led to the focus on the processes of simplification, debugging, and coaching. These three processes are studied in detail, showing how the structure of each is affected by the basic skill required to perform a task, the equipment involved in its execution, and the environment in which the skill is executed. Throughout, parallels are drawn between the process of learning to ski, and learning computer programming and problem solving. The goal is to achieve insight into the complex issues of skill acquisition and design of learning environments (especially computer based ones) through analysis of the intuitively understandable domain of ski instruction. Descriptors-Computational Linguistics, Computer Assisted Instruction, *Computer Oriented Programs, *Computer Science Education, Military Training, Technical Writing
Identifiers-*Natural Language

This report addresses the problems of using natural language (English) as the communication language for advanced computer-based instructional systems. The instructional environment places requirements on a natural language understanding system that exceed the capabilities of all existing systems, including: (1) efficiency, (2) habitability, (3) tutorial capability, and (4) the ability to exist with ambiguity. Semantic grammar is presented as a paradigm for organizing the knowledge required in the understanding process that permits efficient handling of such phenomena as pronominalizations and ellipses. The need for a better formalism for expressing semantic grammars is met by the use of Augmented Transition Networks (ATN). The ability of the ATN-expressed semantic grammar to satisfy the mentioned requirements is demonstrated in the natural language front-end for the SOPHIE system. (Author/JEG)

NATO Symposium on the Evaluation and Planning of Interpersonal Telecommunications Systems. Final Report.

Spons Agency-National Science Foundation, Washington, D.C.
Pub Date-Mar 78
Grant-APR77-20480
Note-88p.
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-*Communication Satellites, *Conference Reports, Educational Research, Health Education, Information Services, Information Systems, Medical Care Evaluation, *Symposia, *Telecommunication

Papers presented at this symposium are grouped into eight sections, including introductory overviews; the delivery of health care, education, and community services; contributions from the field of scientific and technical information; teleconferencing and computer conferencing services; new services; and communication processes at both the individual and the organizational levels. Each of these sections lists the papers presented, provides a brief summary of their contents, and summarizes points arising in their discussion. A final section provides slightly edited transcripts of the comments by four participants at the end of the symposium on the issues of policy and methodology which had been raised during the four days. Appendices list the names and addresses of the participants in the meeting, provide some results from an evaluation questionnaire distributed on the last day, outline the notes made on one of the sessions conducted as an audioconference with two speakers based in North America, and also provide a brief response by Herb Ohlman (World Health Organization) to a draft of discussion summaries. Descriptors-Black Colleges, *Communications, *Developing Nations, Directories, *Educational Programs, Foreign Students, Graduate Study, Higher Education, Institutions, International Education, Programing (Broadcast), *Technical Assistance, Training, Universities

Identifiers-Canada, Non Academic Educational Institutions, Western Europe

This annotated list of institutions is the first of two documents produced in a study of training needs and opportunities in communication for development for personnel from less-developed countries. Three categories of institutions that either presently offer or have the potential to offer communication for development training are listed: U.S. universities, U.S. non-academic organizations, and Canadian and Western European organizations. Training in broadcasting and in social science approaches to communication and development are emphasized. Each institution is described briefly in terms of programs relevant to this survey, faculty and student activities, and interest expressed in further cooperation with USAID, the study's sponsor. A number of minority schools with communication programs have been included, most with a long tradition of service to predominantly black students. However, they have yet to expand into international communication or its application to development. (Author/RAO)

A Comparative Analysis of Methods for Tactical Data Inputting. Technical Paper 327.

Army Research Inst. for the Behavioral and Social Sciences, Arlington, Va.

Pub Date-Sep 78

Note-34p.; Research sponsored by the Army Combined Arms Combat Development Activity, Fort Leavenworth, Kans.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Analysis of Variance, *Comparative Analysis, Comparative Statistics, Computer Oriented Programs, Data Bases, *Electronic Data Processing, *Input Output Analysis, *Man Machine Systems, *Methods Research, Military Organizations

Four different methods for inputting enemy situation data (1) typing, (2) typing with error correction, (3) menus (choosing appropriate entry from a list), and (4) typing with autocompletion and an English option were compared for speed, accuracy, and ease of use. Thirty-two enlisted men and women, none of whom had used the inputting techniques being studied, were randomly assigned to the four method groups. The subjects acted as intelligence staff entering information about the enemy into a computerized data base. Subjects received free text messages describing enemy actions, extracted necessary information, and entered the appropriate codes into a variation of the Enemy Situation Data Add (ESDA) format of the TOS system. Results indicated that menus were more error free than the other inputting methods; also, menus were popular among the subjects and did not have higher mean times than the other inputting methods. To maximize the benefits of the menus, special attention should be given to the design of an operational menu-based inputting system, particularly with respect to length, display speed, and item selection. Spelling correctors or autocompletion should be considered only for experienced users and in operational settings that specifically require such aids. (CMV)

Descriptors-*Adoption (Ideas), *Change Strategies, Diffusion, Educational Change, Educational Development, Educational Technology, *Instructional Materials, Interaction, *Marketing, Models

The Relating, Discovering, Advocating, and Supporting (RDAS) notion of concept selling is applied to the marketing of products and services emanating from educational research and development. The four RDAS categories are further divided into 12 sequential and interdependent tasks: Client Identification; Fact Finding; Planning; Establishing Credibility; Targeted Research; Focused Planning; Problem Analysis and Agreement; Planning the Presentation; Presenting; Facilitating the Decision; Achieving Closure; and Rediscovering. Rationale, practical suggestions, and examples related to marketing task accomplishment are presented within the discussion under each major heading. This RDAS schema provides a template against which practitioners may assess their current activities, and may serve as a basis for establishing a new genre of management and cost accounting systems that can be applied to marketing educational products and services. This inventory provides information about development communication training programs for students from developing countries in Master's or Ph.D. programs or short-term non-degree training. A demand is anticipated for training specialists in different sectors agriculture, education, health, nutrition, and population in the use of communication to reach sector goals. The type of training desired will vary in time required, from short-term non-degree training to long-term Master's and doctoral level training; in place, from universities and organizations in the United States to in-country locations; and in focus, from production skills and practical problem-solving methods to high level policy-making and planning techniques to sophisticated research skills. This inventory reflects some of this variety of anticipated demand. The descriptions in this report are not meant to be comparative all the programs have different emphases but, rather, to provide information for selection of appropriate university resources to meet specific training needs. The institutions described are Cornell University, the East-West Communication Institute, Florida State University, Indiana University, Michigan State University, San Francisco State University, Stanford University, Syracuse University, and the Universities of Chicago, Hawaii, Massachusetts, Pittsburgh, Southern California, Wisconsin, and Texas. Identifiers-Education for All Handicapped Children Act

The 15 papers in this collection are based on a conference held in Annapolis, Maryland, in 1976, focusing on the reality of mainstreaming and the need for an increased knowledge base about the issues and concerns related to instructional technology in the implementation of the provisions of Public Law 94-142, the new Education for All Handicapped Children Act. Collectively, these papers, which blend the technology of instruction with many other facets of the educational process, make a case for believing that an appropriate education is one which uses the best of educational technology as part and parcel of its curriculum. Individual papers were authored by Burton Blatt, Clarence R. Calder, Jr., Barbara D. Bateman, Robert A. Weisgerber, Fred H. Wood, David Helms, Anna L. Hyer, Donald P. Ely, Patricia H. Gillespie, P. Kenneth Komoski, Diane Dormant, Sivasailam Thiagarajan, William H. Allen and Kay E. Goldberg, Thomas C. Lovitt, and Alan M. Hofmeister. (Author/RAO)

Descriptors-Child Development, *Cognitive Development, Elementary Education, *Fantasy, Interviews, *Programing (Broadcast), *Realism, *Television Research, *Television Viewing

A study proposing reality and fantasy discrimination of television content as a classificatory ability sought to identify differences between subjects who were able to make sophisticated reality-fantasy judgements and those who were not, and factors which might contribute to a subject's sophistication in discrimination. Open-ended and structured interviews were conducted with 36 children in grades one, three, and six; these interviews were scored and ranked according to the subject's sophistication with and tendency to use reality and fantasy concepts, sophistication in understanding the commercial broadcast television system, and degree of program familiarity. Results indicated that high scorers in reality-fantasy judgements were distinguished from their less sophisticated grade peers by their increased spontaneous use of reality-fantasy considerations. Also, the ability to assess the reality status of various types of television was relatively independent of the child's familiarity with a variety of television programs. The findings imply that efforts to teach children about the medium of television and its conventions could improve their skills in discriminating reality from fiction on television. (CMV)

Factors Affecting the Use of Instructional Television in the Classroom.

Pub Date-76

Note-16p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Bibliographies, *Classrooms, *Educational Television, Elementary Education, *Factor Analysis, Parent Attitudes, Teacher Attitudes, Teacher Characteristics, *Television Research, Television Viewing, *Use Studies

A study of 36 factors which could possibly limit the use of instructional television (ITV) in elementary schools consisted of an analysis of the responses to a questionnaire administered to 318 teachers who taught in kindergarten through grade six. Chi-square tests were computed for each factor in relationship to the average frequency of classroom ITV use per week. Results indicated that the 20 factors which affected the frequency of use included some teacher characteristics and attitudes, school and class size, grade level, planning and management, and ITV content. Comments by teachers indicated that a major factor in the use of ITV was public opinion toward its use. A selected bibliography of relevant research is provided. (CMV)

The process is discussed and helpful publications are reviewed for the selection of materials in three areas learning resource materials for library media programs, materials for special education, and equipment. In the first section, such factors as the need for suitable materials, the abundance of materials available, and financial limitations are considered, and 54 selection tools are described. Listed in three categories by the type of information they provide, these secondary sources include locator tools (indexes, catalogs, directories), recommended lists of materials (which provide some evaluative information in many instances), and review sources (bibliographies, mediagraphies, audiographies, discographies, and videographies). Sources for the location and evaluation of materials for special education, including individualized instruction in the implementation of Public Law 94-142, are discussed and several selection tools are reviewed. The last section includes a brief discussion of criteria for equipment selection and reviews of some publications which provide descriptive and/or evaluative information on hardware. (CWM)

Needs Assessment Survey of the Chatham County Media Program.

Pub Date-8 Dec 78
Note-39p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Audiovisual Programs, Educational Improvement, Educational Problems, Elementary Secondary Education, Evaluation Methods, Media Specialists, *Needs Assessment, Principals, *Public School Systems, Public School Teachers, Questionnaires, *School Surveys

A needs assessment survey was conducted as part of a study initiated by the Chatham County Public School System in Savannah, Georgia, to improve the educational opportunities available to learners within the school system. The two-part survey, dealing with problem area aspects of building and system level media programs, followed a standard form of discrepancy rating analysis, and assessed the perceptions and desires of teachers, principals, and media specialists in the Chatham system. All 391 teachers, principals, and media specialists who participated in the survey were asked to respond to the building level survey, while only media specialists and principals were asked to respond to the system level survey. A data analysis was conducted for each of the major sub-populations and for each of these groups by level of school. Major problem area aspects identified at the building level by all sub-populations included (1) provision of facilities for the local production of instructional materials, (2) use of instructional television as a basic component of the instructional program, and (3) provision of assistance with the local production of instructional materials. Appendices include samples of system and building level survey forms and analysis work sheets. (CMV)

A Researcher's Guide to Social-Psychological-Communication Variables in Family Planning Research.

Hawaii Univ., Honolulu. East-West Center.
Pub Date-Jun 73
Note-35p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Adoption (Ideas), *Annotated Bibliographies, Attitudes, Communication (Thought Transfer), Diffusion, *Family Planning, *Predictor Variables, Research Methodology, *Social Science Research

The 274 citations presented were selected from family planning research studies completed between 1946 and 1972 using social, psychological, and communication variables. The entries are numbered consecutively, and methodological summaries following each reference cover (1) researcher and/or sponsoring agency, (2) independent variables, (3) research locale, (4) research design, (5) data-gathering methods, (6) type of respondent, and (7) type of sampling. Most of the references cited are empirical studies in family planning communication, and are social-psychological in orientation, dealing with perception, motivation, communication, knowledge, attitudes, and practice variables. A few are comparative studies or attempts to synthesize existing material or to suggest possible application to existing action programs. Some are unpublished studies which have been described in articles. Guides at the end of the paper show the distribution of studies according to research locale and independent variable, with numbers referring to the bibliographic reference. (Author/CMV)

Descriptors-*Communication Satellites, *Educational Technology, *Exceptional Child Education, Handicapped Children, *Inservice Teacher Education, *Mainstreaming, Preschool Education, Primary Education, Seminars, Summative Evaluation, Telecommunication, *Workshops

This report documents the second delivery of ``Teaching the Young Handicapped Child: An Overview,'' an inservice course on mainstreaming for teachers of children from three to eight years of age, which was developed by the Appalachian Education Satellite Program (AESP) and Project PUSH (Parents Understanding Student Handicaps) in response to the passage of the Education for All Handicapped Children Act (PL 94-142). Designed primarily to reach teachers in the rural areas of Appalachia, the course consisted of five basic components: videotaped programs, live interactive seminars, in-class activities, practicum, and printed ancillary materials. Some of the activities and materials were modified on the basis of evaluation data from the first delivery of the course in the fall of 1977. The 270 participants in this revised course were located in 34 sites throughout the Appalachian region. (RAO)

Descriptors-Art Appreciation, *Communication Satellites, Copyrights, Educational Finance, *Educational Technology, Energy Conservation, Evaluation, Health Services, *Inservice Education, Older Adults, Self Concept, *Seminars, *Telecommunication, Values, *Workshops

The ten workshops described were delivered by the Appalachian Education Satellite Program (AESP), which was established in 1971 to determine the feasibility of satellite delivery of graduate and undergraduate courses to educators in the Appalachian region. AESP programming was expanded in 1977 to include workshops for such audiences as human resource, medical and health, business and industrial, and government personnel, as well as educators; topics covered in the spring 1978 workshops included the arts and aging, resource conservation for educational institutions, the University of Cincinnati external degree program in health planning/administration, developing a positive self-concept, an AESP advisory board teleconference, teacher values and discipline, and copyright law. Evaluation instruments were completed by both participants and site monitors following each workshop in order to evaluate student satisfaction, achievement of the objectives defined for each program, the technical quality of the broadcast, and interest in future AESP programming. Descriptors-Bibliographies, *Directories, *Federal Aid, Federal Government, *Federal Programs, *Financial Support, Grants, *Libraries, Library Programs, Program Descriptions, Qualifications, State Libraries, Tables (Data), Writing

This directory provides information on nine Federal library programs and 72 Federal library-related programs, as well as a bibliography of publications on the grants application process. While it provides a guide to funding sources, it is intended only to lead libraries to possible funding sources rather than serving as a complete information source. Of the four main sections, the first contains an annotated listing of 20 existing directories and other current publications relevant to library-related funding sources. The next lists nine Federal programs that provide direct support for library projects. Programs are arranged alphabetically by the name of the authorizing Act, and program descriptions include authorizing legislation, program purpose, fund uses, applicant eligibility requirements, grant type, level of funding, grant range, average grant, application/program source, and application closing date when available. The 72 library-related Federal programs listed in the next section are arranged alphabetically by program title, and include program descriptions providing the same information as the Federal program listings. A selected bibliography of publications on grantsmanship follows. Indexes by applicant eligibility, authorization, Federal agency, and subject area are also included, followed by a directory of state library agencies in the United States. (Author/MBR)

Descriptors-*Construction Programs, Costs, Facility Improvement, *Federal Aid, *Federal Legislation, Library Services, Projects, *Public Libraries, Tables (Data), Trend Analysis

Identifiers-*Library Services and Construction Act

This report analyzes some of the data from documentation submitted by the individual states for federal financial assistance through the Library Services and Construction Act to meet public library construction needs between 1965 and 1978. The impact of the LSCA library construction program is described in terms of the cutting of costs, the population affected, and the numbers and types of projects funded. The main goals of construction increased space, seating capacity, and book volume capacity are discussed in terms of the improved library services they have fostered. The other priorities of LSCA reaching isolated rural areas, and meeting special information needs of library patrons are discussed in terms of their fulfillment by construction funding. Several construction projects and their resulting service improvements are included to illustrate this relationship. Summaries of LSCA program highlights and future trends are followed by tables presenting expenditures by state and funding source, as well as by population density and type of construction; population served through the projects; number of projects; and affected floor area, added seating capacity, and added book volume capacity by state, population density, and type of construction and library. Budget Model.

Washington State Board for Community Coll. Education, Olympia.

Pub Date-Feb 78

Note-74p.; Appendices, illustrating printouts from the Automated Computerized Model, have been deleted due to poor reproducibility

EDRS Price MF-$0.83 HC-$3.50 Plus Postage.

Descriptors-*Budgeting, College Administration, Community Colleges, *Computer Oriented Programs, Costs, *Educational Finance, Expenditure Per Student, Financial Needs, Financial Policy, *Junior Colleges, Mathematical Models, Operating Expenses, Program Budgeting, *Resource Allocations

Computerized formula-driven budget models are used by the Washington community college system to define resource needs for legislative budget requests and to distribute legislative appropriations among 22 community college districts. This manual outlines the sources of information needed to operate the model and illustrates the principles on which the formulas work. Budget schedule forms are presented for five formula areas. The instructional program formula entails the greatest resource need, providing funds for faculty and faculty supervision, support personnel, supplies, and equipment. The number of students and their distribution over the instructional disciplines are the primary determinants of resource needs. The library and learning resource center formula is comprised of resources for the acquisition and maintenance of library collection units, for professional and support staff, and for operating costs. The plant operation and maintenance formula provides funds to cover staffing and non-labor costs of building and grounds maintenance, janitorial and trucking services, utilities, administration, and police, fire, and safety. The student services formula provides a basic complement of staff regardless of college size, beyond which a variable staff requirement is related to enrollments. The institutional support formula provides for the requirements of institutional administration and general expense functions. (MB)

Tillberg, Rebecca
1978-1979 Fall Enrollment Analysis.
Los Angeles Community Coll. District, Calif. Div. of Educational Planning and Development.
Pub Date-Dec 78
Note-63p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-Community Colleges, Courses, Day Students, *Declining Enrollment, Enrollment, *Enrollment Influences, *Enrollment Rate, Enrollment Trends, *Junior Colleges, Multicampus Districts, Retrenchment, *Student Characteristics
Identifiers-California (Los Angeles), Weekly Student Contact Hours

Enrollment in the Los Angeles Community Colleges in fall 1978 dropped to 124,523, a 3.7% decrease from fall 1977. Instructional Television and West Los Angeles College showed the only increases, although the increase at West (and the decrease at Trade-Technical College) were related to the administrative tranfer of the Airport Center from Trade to West in spring 1978. Weekly student contact hours (WSCH) the number of class hours in which students are enrolled each week dropped 4.4% in fall 1978. Student load WSCH per student declined to 9.75 hours in fall 1978, continuing the long-standing trend toward lighter class loads among students. However, day loads increased for the first time since 1973. One factor in the enrollment decline in fall 1978 was the approximate 9% reduction district-wide in the number of classes offered, a cut of perhaps 1,200 classes. A second factor may have been the loss of some students to neighboring districts in the wake of the summer sessions cancellation in Los Angeles. Preliminary figures indicated that the statewide decline in community college enrollment exceeded the decline in Los Angeles. Under the target budget system of community college financing in effect for 1978-79, state apportionment was not linked to enrollment. Data tables outline enrollments and student characteristics district-wide and for each of the nine campuses. (Author/MB)

Identifiers-*Hawaii

A master plan proposal for postsecondary education in Hawaii for 1977-1982 is presented. The goal for this overall program is to provide all qualified people of Hawaii an equal opportunity for quality education through public and independent institutions. Objectives include: (1) provision of a diversity of vocational, academic, and professional program offerings; (2) assessment of quality; (3) provision of access to all willing and able to benefit; (4) assurance of adequate state financing; and (5) coordination of educational resources. Outlined in this report are state characteristics in terms of population, economy, planning efforts, and college-going rates; and characteristics of the diverse postsecondary education institutions University of Hawaii; the independent colleges; the Western Interstate Commission for Higher Education; the East-West Center; the Adult Education Program; licensed trade, technical, and vocational schools; and out-of-state degree-granting institutions. A system of planning for postsecondary education is also outlined. Appendices contain legislation on postsecondary education, a list of members of the postsecondary education commission, data tables on state and institutional characteristics, and self-assessments of the postsecondary institutions. Identi[illegible]waii

This 1978 update supplements the "Master Plan for Postsecondary Education in Hawaii" by presenting information on the following types of institutions that offer instruction in Hawaii: out-of-state degree-granting institutions; trade, technical, and vocational schools; and correspondence schools with agents licensed by the state. There is also a description of the state's licensing/approving agencies: the Department of Regulatory Agencies which licenses degree-granting institutions; the Department of Education which licenses trade, technical, and vocational schools and the agents of correspondence schools; and the State Approving Agency for Veteran Training. Institutions were asked to provide data on their programs, enrollments, tuition, and staffing; to discuss plans for significant changes; and to define problems in their areas of postsecondary education. Research findings and recommendations in the areas of diversity, quality, access, financing, and coordination of postsecondary education institutions are also outlined. Appendices contain a list of commission members, college fact sheet forms, responses by various institutions, and a brief review of the literature on accreditation and state licensing. (Author/MB)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-Academic Aspiration, *Adult Students, Age, Black Students, Caucasian Students, Community Colleges, Educational Background, Enrollment Trends, Females, Junior Colleges, *Junior College Students, Males, Married Students, *School Surveys, Student Attitudes, *Student Characteristics, Student Employment, *Student Needs, Student Personnel Services, Student Problems, Teacher Attitudes

In order to assess the needs and determine the demographic, educational, employment, and enrollment characteristics of the 60-70% of the students attending Jefferson Community College (JCC) who were over 24 years of age, surveys were conducted of faculty and a random sample (N 302) of the 3,160 adult students enrolled during 1976-1977. Response rate was 70.3%. The study revealed that JCC followed national trends in increases in adult and female enrollments. Specific student characteristics focused on by the study included: age; sex; race; marital status; extent of family responsibilities; educational characteristics, such as highest degree attained, and attendance patterns (full- or part-time, day or night classes); employment and financial responsibilities, specifically no, full-, or part-time employment and other sources of financial support; reasons for returning to school; sources of influence to return to school; obstacles prior to and after enrollment; time between decision to enroll and enrollment; consideration of dropping out; persistence and performance factors in academic adjustment; number of semesters completed at JCC; faculty perceptions of adult students; and student attitudes toward JCC and its services. Sex and race variables were used to create sub-groups in the study, and other findings are expressed in these terms. Recommendations are included. (MB)

Descriptors-*College Majors, Community Colleges, *Courses, *Enrollment, Enrollment Trends, *General Education, *Junior Colleges, Liberal Arts Majors, *Vocational Education
Identifiers-*Hawaii

Patterns of course distribution by subject areas and of courses taken by various majors are described in this report on Hawaii community colleges. Distribution of courses by educational objective indicates: certificate students were taking 72% of their work in vocational courses; associate of arts degree students were taking 88% of their work in general education courses; and associate of science degree students were taking 61% of their work in vocational courses. Distribution by majors reveals that liberal arts students continued to take the bulk of their work in general education (88%); vocational majors continued to take most of their work in vocational courses (63%); and unclassified students took two-thirds of their courses in general education. As in the past, liberal arts majors were the largest consumers of general education courses, generating 65% of all Student Semester Hours (SSH); vocational majors and unclassified students were responsible for 29% and 5%, respectively, of all SSH generated in general education. Vocational students continued to generate the bulk of vocational SSH (80%) followed by liberal arts majors and unclassified students (15% and 4%, respectively). An appendix outlines crossover major groupings. (MB)

Report of the Senate Select Committee on Community Junior Colleges.

Identifiers-*Missouri, Redistricting

The inability of Missouri community college districts which serve 54% of the state's population but cover only 17% of the state's area to enlarge their property tax support base, pass capital bond issues, or to increase operational levies gave rise to a legislative study of four major issues: existing laws covering community colleges; the relationship and impact of community colleges to other institutions of higher education; the relationship of the colleges to the community; and the future development needs for community colleges, both substantive and financial. Public hearings were held and factual data from other states and other studies were collected. Testimony focused on the role and scope of the community colleges, industrial impact, financial alternatives, and the importance of local autonomy for the survival and growth of the colleges. The Senate Committee endorsed the following recommendations: (1) full statewide redistricting on a three-year trial basis, involving existing two-year, regional, and state colleges in either direct or contracted delivery of community college services; (2) full state funding for community college operations and capital improvements, phased in over a five-year period with concurrent property tax reduction; (3) local control through elected boards of trustees; and (4) assumption of responsibility for program coordination, fee approval, and state appropriations by the Coordinating Board of Higher Education. Current and proposed legislation and selected statistical data are appended. (MB)

A Survey to Determine to What Extent Ohlone College Is Meeting the Needs of Student Athletes.

Pub Date-28 Dec 78
Note-40p.; Ed. D. Practicum, Nova University
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Athletes, Athletic Coaches, *Athletics, Community Colleges, Institutional Characteristics, *Junior Colleges, Participant Satisfaction, School Surveys, Student Attitudes, *Student Behavior, *Student Characteristics, *Student Needs, Teacher Role

A questionnaire was administered to all 1978 fall quarter student athletes at Ohlone College (California) to assess their goals and needs, and to find out to what degree student experience matched expectation. There was an 86% (N 85) response rate from the varsity men and women teams (volleyball, field hockey, soccer, water polo, and football). Most of the athletes were between 18 and 19 years of age, lived with their families, and were employed part-time. Most were seeking a four-year or higher degree and planned to continue with a full load winter quarter. Students overall reported positive experiences with their classes and instructors; however, 58% had never talked to an instructor about course work out of class. Over half of the students (60%) had little contact with the counseling department regarding future plans. Athletes also reported little use of the learning resources center. Studying was done on a limited basis, with few athletes studying on weekends. Generally, athletes came to Ohlone because of the coaching and most believed they had become better athletes. They reported receiving little support from their coaches during off-season. It was recommended that the coaching staff meet with faculty, counselors, and library staff to determine ways that services could become more useful to the student athlete. (Author/MB)

Identifiers-*Comprehensive Employment and Training Act

In an effort to assist members of the American Association of Community and Junior Colleges (AACJC) in working to implement the Comprehensive Employment and Training Act (CETA), information is provided and issues are considered which are of concern to CETA prime sponsors and representatives of education. The issues include the goal of CETA to provide job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons, and the role of local, state, and federal agencies in implementing CETA legislation. The information contained in this document includes: (1) consideration of opportunities for education and excerpts and summaries of corresponding legislation from CETA of 1978; (2) an AACJC brief, summarizing CETA legislation; (3) a list of possible services under CETA (e.g., outreach, basic skill training, career counseling, and day care services); and (4) steps in the process of applying for CETA funds from a prime sponsor. Also included is a prime sponsor/education agreement checklist which covers assessment of existing resources, program description, program outcome and evaluation, and program administration. A final section discusses the contracting process and supplies a model contract. (MB)

Social Work Content in the Early Childhood Education Curriculum: Needs and Recommendations.

Pub Date-Jul 78
Note-113p.; Master of Science Thesis, Central Washington University
EDRS Price MF-$0.83 HC-$6.01 Plus Postage.
Descriptors-Annotated Bibliographies, Community Colleges, Day Care Services, *Early Childhood Education, Evaluation Criteria, Graduate Surveys, Human Services, *Job Training, *Junior Colleges, Literature Reviews, *Paraprofessional School Personnel, *Participant Satisfaction, *Program Evaluation, Social Services, Vocational Education
Identifiers-Washington

A survey of Washington State community college early childhood education (ECE) graduates was conducted to discover whether they performed and were adequately trained to perform a variety of social and human services tasks. These include outreach, broker, evaluator, teacher, behavior modifier, mobilizer (promoting neighborhood programs), consultant, community planner, data manager, administrator and enabler (providing services to those who require means of support). Questionnaires were mailed to 134 ECE students who graduated from one of the state's 12 accredited ECE training programs in 1976. Study findings reveal that in child care settings ECE graduates (paraprofessionals) provided a significant percentage (42.4%) of the social services under consideration. A majority of the employed graduates were satisfied with the general training they had received, but 30.2% were dissatisfied with their social and human services training. Increased training in these skills was recommended by 86% of the respondents. An extensive review is included of the literature related to the roles outlined above, and to social services in day care, in Head Start, and in public schools. An annotated bibliography and recommendations for improving ECE training programs are included, and appendices contain the survey instrument and a course outline for social workers in day care. (MB)

Identifiers-*Hawaii

The focus of this report is upon full-time faculty members at the seven campuses of the Hawaii Community College System, but additional information is provided on part-time faculty and lecturers. Data are summarized for the following characteristics: sex, academic background, tenure status, age, program category, average salary, and salary range. Study findings include: (1) the number of professional staff increased from 1,040 in fall 1977 to 1,053 in 1978; of these, 66% were full-time appointees; (2) the number of full- and part-time professional staff increased, while the number of lecturers decreased; (3) with regard to the 699 full-time professional staff, almost 66% were males; 74% were engaged in instruction; the average age was 42 years old; and 63% held master's degrees; (4) with regard to the 519 full-time instructors, 64% were males (revealing an increase in the proportion of females); 51% were general education instructors; their average salary had increased from $19,022 to $19,229 over the previous year; 64% were tenured; and 61% held master's degrees; and (5) the lecturer profile continued to reveal a 37-year-old male, with a master's degree, teaching general education courses, earning an average of $2,319 per semester. An appendix summarizes staff data for institutional support, academic support, student services, public service, and instruction categories. (AYC)

Identifiers-Student Objectives

In order to ascertain how successful graduates of the College of DuPage were in attaining their original academic goals, questionnaires were mailed to 943 graduates five years after their graduation in 1973. Response rate was 26%. Survey findings revealed that: (1) of the 223 respondents, 76% felt they had been "very successful" in attaining their original goals for 132 respondents, this goal was baccalaureate transfer; (2) 85% of those who transferred to a four-year institution received their baccalaureate degree within five years; (3) most respondents had entered the work force, 77% of them in a field for which they had been trained; (4) there was a distinct increase in the number of employers for which graduates worked when compared to findings of previous follow-ups; (5) 68% of employed respondents reported a job advancement, with alumni who had changed employers advancing at a higher rate; and (6) DuPage graduates tended to remain in the geographical vicinity of the college. Data tables also present employment characteristics by declared major. The one-, three-, and five-year follow-up questionnaires and the raw data from these surveys are included. (MB)

Sex Bias in Traditionally Male Occupational Programs.

College of DuPage, Glen Ellyn, Ill.
Report No.-C/D-IR-A-56-781
Pub Date- 78
Note-43p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Admission Criteria, Bias, Community Colleges, Equal Opportunities (Jobs), *Females, *Junior Colleges, *Sex Discrimination, *Sex Stereotypes, Student Attitudes, Surveys, Teacher Attitudes, Technical Education, Technical Occupations, Vocational Education
Identifiers-*Nontraditional Occupations

To evaluate potential sources of female sex bias and sex stereotyping within traditionally male occupational programs at the College of DuPage, programs with low female enrollment were selected for study: air conditioning and refrigeration, architectural drafting, auto service, building construction, criminal justice, electronics, fire science, graphic arts, manufacturing technology, plastics, and supermarket management. A three-part research design surveyed (1) men and women randomly selected from all winter 1978 registrants, (2) women enrolled in the specified occupational programs, and (3) occupational coordinators. Findings indicated that parents, friends, and childhood experiences ranked highest as sources of women's initial interest in the non-traditional occupational programs. Most of these women planned further study in their field either at the college or a four-year institution. All groups indicated that they did not believe their sex precluded their entry into college programs. Potential sources of sex bias at the college were consistently rated lower than potential sources of sex bias outside the college. Published materials such as textbooks, occupational literature and information about programs were rated as having the greatest potential for sex bias. Half of the occupational coordinators reported that there were places in their programs for women, but the other half felt opportunities were limited based on physical ability. (Author/MB)

Coordination and Governance in Colorado Postsecondary Education.

Colorado State Board for Community Colleges and Occupational Education, Denver.
Pub Date- 77
Note-10p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Agency Role, *Board of Education Role, Community Colleges, *Educational Coordination, *Governance, Governing Boards, *Junior Colleges, State Agencies, *State Boards of Education, Statewide Planning
Identifiers-*Colorado

In support of a legislative examination of the governance, role, and mission of Colorado's institutions of higher education, this paper presents the position of the Colorado State Board for Community Colleges on postsecondary coordination and governance. Of the several approaches toward statewide coordination or governance that have been attempted in various states, Colorado selected the coordination approach in 1965 when the General Assembly created the Colorado Commission on Higher Education as a planning and coordinating agency. Since then the governance structure in postsecondary education has changed, but the Commission remains active in student financial aid and outreach instruction. Another significant event occurred in 1967 when the State Board for Community College and Occupational Education and the state system for community colleges (wherein each institution has a College Council serving as an interface between the State Board and the local community) were established. The advantages of this system have been revealed in numerous studies. They lie in its increased flexibility, adaptability, and effectiveness; in the ability of the coordinating agencies to act as an umbrella under which the various constituencies can be placed; and in the provision of a balanced view of local and state needs and resources. An appendix contains role and mission statements from Colorado's community and junior colleges. (AYC)

Criteria for Establishing and Maintaining State-Supported Community Junior Colleges in Colorado.

Colorado State Board for Community Colleges and Occupational Education, Denver.
Pub Date- 77
Note-13p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Access to Education, Board of Education Policy, Community Colleges, *Declining Enrollment, Educational Objectives, Enrollment Trends, Financial Problems, Financial Support, Full State Funding, *Junior Colleges, Rural Schools, *Small Colleges, State Legislation, *Statewide Planning, Student Recruitment, Tuition
Identifiers-*Colorado

Following an overview of the growth of publicly supported junior colleges in Colorado and corresponding state legislation and policies of the Colorado State Board for Community Colleges and Occupational Education, this paper presents the present position of the Board on issues of student access and the establishment and maintenance of community colleges. Their long-term goal is that every Colorado resident above the age of 16, not currently in high school, should have access to a comprehensive community college within thirty minutes from his residence. However, a number of state-level decisions have contributed to a reduction in enrollment among some rural community colleges; these include the establishment of seven community colleges, increases in tuition, statutory limitations on local district funding increases, and curtailment of state participation in local capital construction. Enrollment declines at rural colleges, caused by new urban colleges, tuition surcharges, and elimination of state support for intercollegiate athletic programs, have been offset in some cases by the development of new and unique programs. The State Board supports the following ideas to increase student access and enrollment: reducing or eliminating in-state tuition at rural institutions, limiting numbers of high school students at doctoral-granting institutions, and reducing student-faculty ratios at small colleges with increases in state support. Descriptors-Academic Achievement, Community Colleges, *Computer Assisted Instruction, Computer Oriented Programs, Cost Effectiveness, Course Content, *Individualized Instruction, *Junior Colleges, Program Costs, *Program Descriptions, Student Reaction, *Teacher Role, Teaching Methods

Identifiers-*Teaching Information Processing System

The Teaching Information Processing System (TIPS), a computer-augmented instructional aid, provides individualized instruction for large numbers of students. The TIPS procedure involves the following: (1) instructor preparation of a detailed course outline; (2) delineation of course concept areas and objectives; (3) creation and weekly administration to students of TIPS surveys of multiple-choice questions sampling learning achievement; (4) creation of decision rules for question groupings in order to prescribe individualized assignments; (5) computer coding of survey answer key, concept areas, decision rules, and prescriptions; (6) instructor feedback to student assignments; and (7) administration of hour-long examinations. An evaluation of TIPS' effectiveness was demonstrated by a 10% improvement in the average score of students using the system. Though both high and low ability students were seen to benefit, underachieving students typically benefited more. Student reaction to TIPS was also favorable. Though the costs of implementing TIPS which include computer time and salaries of teacher assistants and readers are considerable, and though the expenditure of instructors' time was greater than expected, these factors must be balanced against the ability of instructors to handle larger numbers of students and the incremental learning gain of these students. Appendices illustrate aspects of TIPS. (MB)

Minorities in Technical Education: A Report of the Community Task Force for Expanding Minority Opportunities in Technical Education. A One Year Assessment.

Stark Technical Coll., Canton, Ohio.
Spons Agency-Ohio Board of Regents, Columbus.
Pub Date-Jun 77
Note-97p.; Pages 78-83 and 89-90 contain copyrighted material and are therefore not available; They are not included in the pagination
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-*Access to Education, Black Employment, *Blacks, Community Action, Community Colleges, Community Consultants, Cooperative Education, Guidance, *Junior Colleges, Minority Groups, School Community Relationship, Student Financial Aid, Student Recruitment, *Technical Education, Technical Occupations, Unemployed, *Unemployment, Workshops

Under a Title I grant of the Higher Education Act of 1965, Stark Technical College initiated a community task force for expanding minority opportunities in technical education. The task force, composed of community leaders and college representatives, became operational during the 1976-77 academic year. The need for this program was seen in the high unemployment situation of the area's black population. The task force met in workshop sessions focusing on the problem areas that have interfered with access to career opportunities that would be available to the black minority upon completion of associate degree programs in technical education. Specific areas of concern included financial aid, career guidance, developmental education, cooperative education, relationship of business and industry to the technical college, and the impact of technical education. Recommendations for financial aids, recruitment, community education, role models for success, and placement are outlined. An evaluation survey instrument relating to task force objectives is included. (MB)

An Investigation of Selected Community College Programs for Older Adults.

Pub Date-2 Dec 78
Note-54p.; Graduate seminar paper, Pepperdine University
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-Community Colleges, Community Services, *Financial Problems, Financial Support, *Junior Colleges, Literature Reviews, *Older Adults, Program Administration, *Program Descriptions, Retrenchment, Special Programs, State Aid
Identifiers-*California, Proposition 13 (California 1978)

The special needs of older adults in relation to community colleges were studied with the intent to (1) identify Southern California community colleges which have a special program for older adults, (2) identify and report the characteristics of selected programs, and (3) delineate the effect of Proposition 13 and under-financing for programs. Of the 55 Southern California community college catalogs reviewed, 19 were found to have special programs for older adults. Of these, 6 colleges were visited and the directors of the programs were interviewed in the areas of instructional services, community services, financing, organization, and plans for the next two years. Efforts to bring older adults out of an isolated environment was a major goal for most of the programs visited. It was recognized that the aging do not have similar goals to those of the traditional student. Most of the community service programs were academic in nature, serving to facilitate re-entry into higher education. Primary funding for these programs were from institutional sources as a result of Proposition 13. Plans for the future focused on finding ways to keep the programs going financially. A review of the literature, recommendations, and a bibliography are included. (MB)

McDaniel, Walter A.
Child Care Program Feasibility Study.
Atlantic Community Coll., Mays Landing, N.J.
Pub Date-Mar 78
Note-29p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Associate Degrees, *Child Care Centers, *Child Care Occupations, Community Colleges, Curriculum Planning, Day Care Services, *Employer Attitudes, Employment Opportunities, *Junior Colleges, *Manpower Needs, Needs Assessment, Occupational Surveys, Paraprofessional Personnel

A survey of 35 Cape-Atlantic child day care centers was conducted to examine the possibility of establishing a child care curriculum at Atlantic Community College. The facilities contacted were divided into four groups: nursery, private, church-related, and hospital-related. It was found that privately operated facilities accounted for approximately 50% of the respondents. The survey revealed that 1,861 children were served by these centers; 95% were between the ages of two and five years, 69% attended full-day sessions, and children in 89% of the centers were supervised by teachers who held baccalaureate degrees. Staffing patterns varied for each facility. A total of 215 individuals were employed by the 35 facilities. Teachers composed 25% and teacher's aides composed 27%. A ratio of children served to staff employed was 1:9. With respect to personnel training, 29% indicated that tuition was the main source of funding, while 34% relied on state and federal funding. Thirty-five percent of the facilities planned expansion of operations and 23% anticipated opening additional positions. Of the individuals interviewed, 89% felt that there were employment possibilities for persons with an Associate of Applied Science Degree in Child Care. All respondents felt that there was a need for such a program. (Author/MB)

Report on Follow-Up Data Regarding Graduates of Transfer and Career Programs.

Rockland Community Coll., Suffern, N.Y.
Pub Date-30 Apr 78
Note-24p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Community Colleges, Curriculum Evaluation, Employer Attitudes, Employment Patterns, *Followup Studies, *Graduate Surveys, *Junior Colleges, *Participant Satisfaction, Student Attitudes, Student Characteristics, Transfer Students, Vocational Education

A random sample of 500 graduates (from a total population of 4,046) of Rockland Community College (RCC) were surveyed in two groups, humanities/social science graduates and career program graduates. Career graduates were also individually interviewed. The overall response rate was 52%; telephone checks of non-respondents indicated no respondent bias. Data were also gathered from 15 employers of RCC graduates in the fields of nursing, criminal justice, secretarial skills, and data processing. Sixty-seven percent of the respondents were female, though no significant differences with male responses were indicated. Other respondent characteristics were typical of the school population: 60% were under 30 years of age and 95% were white. Responses revealed that 75% of the graduates continued to a four-year institution and received bachelor's degrees. For humanities/social science graduates this percentage was 83%, for career program graduates, 67%. The data suggested that many students tended to commute to other institutions and thus remained members of the community. In general, three-fourths of the graduates were working in the field of their choice. No significant correlations were found between salary and age, salary and number of jobs, or salary and degree earned. An overwhelming majority of comments indicated that the work at RCC was too easy. Employers consistently rated graduate employees highly. The survey instruments are appended. (MB)

Games and Simulations in Developmental Education.

Pub Date-Oct 77
Note-36p.; A working paper presented at the Annual Ohio Developmental Education Conference (5th, October 14-15, 1977)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Cognitive Style, Community Colleges, *Developmental Programs, *Games, *Junior Colleges, Learning Activities, *Low Achievers, *Remedial Instruction, *Simulation, Teacher Developed Materials, Teaching Methods

Developmental education activities should attempt to provide experiences which do not hold the student back from the normal flow of learning and which utilize processes already in the student's repertoire. Virtually all areas of developmental instruction can be supplemented with games and simulations, that is, activities designed to show the process of a possible or actual reality in which roles, resources, rules, and goals are specified. Games and simulations are discrete, complete, and logical. They are approximations, just as laboratory situations or apprenticeships approximate real work situations. In designing or using games, one should (1) determine what the student is to learn; (2) determine what proto-processes or pre-concepts are necessary to do the behavior; (3) design the general structure of the game by specifying roles, goals, resources, interactions, sequence of events, and external factors; (4) write out the game as a process; (5) design the materials; (6) write the rules; (7) evaluate and revise the game; and (8) pre-test and evaluate the game again. There must be a point to playing the game and that point must be made clear to the student. Behavioral objectives must be clearly spelled out and measured accurately. Whether used in the classroom or in a supplementary learning environment, games and simulations can help the learner gain the advantages of skill facility in the application of a particular discipline's terms and concepts. Advisory Committee Handbook.

Bergen Community Coll., Paramus, N.J.

Note-46p.; Not available in hard copy due to marginal reproducibility of original document

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-*Administrative Organization, *Administrative Policy, Adult Education, *Advisory Committees, Community Colleges, *Guidelines, *Junior Colleges, School Community Relationship, Vocational Education

This booklet was prepared to acquaint the personnel of the Bergen County public schools, the lay public, and advisory board members with the purpose and functions of advisory committees serving the vocational, technical, and adult education divisions of Bergen Community College. Following brief summaries of college history and philosophy, curriculum offerings, and the role of the Board of Trustees, the document reviews the organization and functions of advisory committees and provides detailed guidelines for committee operations in such areas as (1) qualifications, procedures for appointment, terms of membership, number of meetings, use of consultants, conduct of occupational surveys, provision of public information, and the responsibilities of the college representative; (2) bylaws for advisory committee operation; (3) evaluating and rewarding advisory committees; and (4) advisory committees and legislation. A checklist for getting the most out of advisory committees and a bibliography is included. Appendices contain various forms and correspondence relating to advisory committee and college interaction. Academic Success of San Jose City College Students Using Selected Student Characteristics.

Note-33p.

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors-*Academic Achievement, Age, College Graduates, College Majors, Community Colleges, Females, Grade Point Average, Grade Prediction, High School Graduates, *Junior Colleges, Males, *Predictor Variables, *Student Characteristics

Identifiers-San Jose City College CA

The purpose of this study was to determine the academic achievement of 1972 and 1974 Associate of Arts graduates from San Jose City College. A sample of 300 was selected from the total population of 1,871. The analysis of data focused on 11 independent variables: ethnic background, sex, marital status, high school graduation, day or evening status, transfer or vocational major, age, Davis Reading Test scores, Cooperative Mathematics Test scores, number of years to graduate, and location of high school attended. The criterion variable for academic success was grade point average (GPA). Variables found to be significantly related to GPA were sex, transfer or vocational-technical major, age, number of years to graduate, and location of high school attended. Thus, the student who is most likely to succeed was found to be female, a high school graduate, approximately 27 years old, a transfer liberal arts major, a graduate from a high school in a state other than California, and spending approximately four years to graduate from the community college. A modified predictor model was not obtainable due to a small correlation coefficient of predictability. A bibliography and and data tables are included. (Author/MB)

Magnitude Discrimination Index: A Merger of Delphi Assumptions and Realities.

Moraine Valley Community Coll., Oak Lawn, Ill.

Pub Date-79

Note-15p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Decision Making, *Discriminant Analysis, Factor Analysis, *Feedback, *Management, Management Games, *Mathematical Models, Multidimensional Scaling, Problem Solving

Identifiers-*Delphi Technique

The advantages of the Delphi Technique are that it relies on collective expert judgment, prevents the excessive influence in decision-making of those in positions of status, and encourages consensus. The technique consists of five steps: (1) asking experts to list items relevant to a topic; (2) returning the list to the participants and asking them to evaluate it according to given criteria; (3) returning the list, with a summary of responses, to the participants and asking those with minority responses to revise or defend their position; (4) returning the list and an updated summary of majority and minority responses again to provide additional opportunity for revision; and (5) formalizing a report of results arrived at by the repeated questionings. Traditionally, three major conventions are used in the final reporting: reporting by importance, reporting by consensus, and reporting by both consensus and importance. An additional alternative, which combines the elements of consensus and importance in one measurement, is a magnitude discrimination index. The advantages of this method of reporting are explored in relation to the other three methods. A bibliography is included. (MB)

Miner, Norris
Perspectives for Planning.
Seminole Community Coll., Sanford, Fla.
Note-7p.; For a related document see ED 122 896
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Budgeting, Cost Effectiveness, *Educational Planning, Efficiency, Evaluation Criteria, Input Output Analysis, Measurement Techniques, *Organizational Effectiveness, *Postsecondary Education, *Productivity

The operations of an institution can be viewed from three perspectives: (1) the actual operating measurement'' such as income and expenditures of a cost center at a point in time; (2) the criterion'' which reflects the established policy for a time period; and (3) the efficiency level'' wherein a balance between input and output is defined. Criterion is normally established with the development of the budget which establishes the desired levels of spending and production for a specific time period. The budget can be, and is, amended as conditions require; however, with each set of amendments a new criterion is established. The different perspectives are not always discrete nor is the hierarchical order the same for different organizational units or over time. In most systems, there is a strong tendency to mask the divergence of the perspectives over a planning time cycle. Growth, on the other hand, is largely controlled by the financial ability to absorb growth unless there is a funding formula encouraging growth. Production is too often considered at the actual level rather than considering the actual production in relation to the criterion or efficiency level. The planning cycle will start from a base in actual information. Qualitative outcome objectives are then produced and measures of effectiveness must be developed for them; the real danger for the monitoring processes is the paucity of effectiveness measures in instructional and service areas. Without them it is easy to slip into a mode of monitoring on efficiency alone. (Author/MB)

Identifiers-Kentucky, *University of Kentucky Community College System

A comprehensive study of community college education, including two-year programs offered by the eight public universities, was undertaken to determine whether Kentucky has developed a comprehensive community college program, to assess its status and future directions, to identify educational and political issues, and to consider alternative governance structures for both the University of Kentucky Community College System (UKCCS) and the two-year programs of universities. Study methods included collection of institutional data, interviews with individuals representing all constituencies at each institution, and a questionnaire survey of all community college faculty and administrators. Findings indicated that problems or weaknesses existed in statewide planning, articulation and interinstitutional coordination, program quality and duplication, responsiveness to community needs, expenditures per student, developmental skills programs, faculty salaries, staff development, student services, and other areas. Along with 20 recommendations, principally addressing areas of governance and finance, the study report includes a list of pertinent issues regarding quality in community college education, a brief history of the Kentucky community colleges, profiles of the 19 institutions offering two-year programs, and statistical data on college appropriations, enrollments, career offerings, faculty salaries, and student ACT scores. The survey instrument is appended. (BB)

Employer Manpower Needs and Job Entry Requirements for Paralegals within Johnson County, Kansas.

Johnson County Community Coll., Overland Park, Kans.
Pub Date-Apr 77
Note-48p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Community Colleges, Community Surveys, Curriculum Planning, Employer Attitudes, Employment Opportunities, *Job Analysis, Job Market, Job Skills, *Junior Colleges, *Legal Assistants, *Legal Education, *Manpower Needs, *Needs Assessment, Occupational Surveys
Identifiers-Kansas (Johnson County)

In order to determine whether a paralegal program could be successfully implemented at Johnson County Community College, surveys were sent to 262 local attorneys (with a 24% response rate) and to 41 members of the Kansas City Association of Legal Assistants (71% response). Emphasis was placed on determining area employment needs and the perceptions of skills expected of paralegal graduates. Respondents were asked to rate a total of 111 job responsibilities in nine broad categories (general, civil and criminal, real estate, taxation, corporate and partnership, domestic relations, estate planning and probate, workmen's compensation, and bankruptcy) as ``essential,'' ``desirable,'' or ``not applicable.'' Generally, most lawyers felt a paralegal should possess good general office skills and be knowledgeable in the areas of civil and criminal law and domestic relations. A majority of the paralegals felt that the ability to do research, prepare routine legal documents, and handle financial matters were essential skills. The study revealed that a full two-year program training paralegals for positions with area law firms was not justified, as there were not enough large firms in the area to provide adequate job opportunities and as other colleges were training paralegals in Missouri law. However, a limited program to upgrade the skills of legal secretaries was considered feasible. (MB)

Descriptors-Average Daily Attendance, *Community Benefits, Community Colleges, *Cost Effectiveness, *Costs, Educational Economics, *Educational Finance, *Junior Colleges, Open Enrollment, Postsecondary Education, Program Costs, Resource Allocations, State Aid, Vocational Education

Identifiers-*California

Cost accounting in California community colleges is considered in this study in terms of the mission of the colleges, the impact of the open enrollment policy, the economic benefits attributable to the colleges, and comparisons made with other segments of public higher education. The study revealed that statewide community college operating expenses were distributed as follows: 53% for instructional programs, 12% for general instructional services, 9% for student services, and 14% for instructional support and library and community services. One visible effect of the open access policy was that in 1977 88% of the freshmen and sophomores enrolled in a higher education institution and 10% of all Californians were enrolled in a community college. One direct benefit attributable to the colleges was that the mean income of a male with one to three years of college was $2,118 greater than that of a high school graduate. No absolute increase in per-student support from the State General Fund for the community colleges was found from 1973, when cost per weekly student contact hour was $59.52 to 1978. Major areas of vocational education activity in the community colleges were trade and industry, office, health, technical, and distributive programs. The mean for all vocational education expenditures per program was $1,028 per average daily attendance. Of the state's 1976-77 vocational education graduates 54% were from community colleges, and of these 92.4% were employed. (Author/AYC)

Student Development Comprehensive Development of Programs in Small/Rural Community Colleges.

Pub Date-Aug 78

Note-11p.; Paper presented at the National Conference on Rural/Small Colleges (1st, Blacksburg, Virginia, August, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Community Colleges, Educational Theories, Educational Trends, Institutional Characteristics, *Junior Colleges, Literature Reviews, *Rural Schools, *Small Colleges, *Student Development, *Student Personnel Services

Research on student development has shown positive effects of institutional smallness on most student outcome variables. However, no clear relationship of ruralness to these outcome measures has been shown. The limited literature on small/rural community colleges includes two areas relevant to student development: college characteristics, which include factors both advantageous and disadvantageous to student development, and research on undermanning theory, which suggests that undermanned environments increase the involvement and learning of their inhabitants. It can be inferred that small/rural community college have a positive impact on the development of students, though the inference is based on research which reports the collective impact of all types of small colleges. Among the trends in student service operations in small/rural community colleges are: (1) staff organizational relationships are becoming more traditional; (2) the realization that effective planning and wise utilization of resources are not dependent upon large sums of money; (3) admissions and registration functions are being moved to the supervision of the dean of instruction rather than the dean of students; (4) fewer counselors are full-time; and (5) student personnel services and instructional services are being organized under one administrative head. (Recommendations to researchers, policy makers, and faculty are offered.) (MB)

Position Papers.

American Association of Community and Junior Colleges, Washington, D.C.

Pub Date-Oct 76

Note-19p.; Papers prepared by the Task Force of the Small/Rural Community College

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Accreditation (Institutions), College Curriculum, Community Colleges, Educational Finance, *Educational Needs, *Educational Policy, Federal Aid, Financial Support, *Junior Colleges, Research Needs, *Rural Schools, *Small Colleges

Five position papers from the American Association of Community and Junior College's (AACJC) task force on small and rural community colleges are presented. On the issue of equal opportunity for the small/rural college, the task force asserts that public policy-making bodies must provide for comprehensiveness in curriculum and in services in all its community college units regardless of size or geographic location. In regard to financing, it is felt that equity in funding in any state system of public and community colleges depends upon the inclusion of some means, mathematical or other, of allowing for the higher costs of operation per unit within the smaller, rural community college. In regard to small colleges and accrediting agencies, it is stressed that any judgements should entail a preponderance of weight resting with representatives from peer institutions. In the area of federal and state constraints on small college programs, the task force emphasizes that federal funds are not serving to equalize education for students of two-year colleges. In respect to developing the literature and research support of rural community colleges, it is recommended that an AACJC monograph on rural colleges include an updated bibliography, that a collection of literature be established, that AACJC stimulate research, and that the AACJC Journal devote an issue to rural community colleges. Myran, Gunder A.
Community Services in Small/Rural Community Colleges: A Role in Rural Development.
Pub Date-10 Aug 78
Note-10p.; Paper presented at the National Conference on Small/Rural Colleges (1st, Blacksburg, Virginia, August, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Administrative Policy, College Role, Community Colleges, Community Development, *Community Service Programs, Community Services, *Human Services, *Junior Colleges, *Rural Development, *Rural Schools, School Community Relationship

Community service programs of rural community colleges can assist in rural development. Currently some programs focus on educational service to individuals or groups, while others are more direct community development projects. The following trends are indicative of the emergence of the human resources development role in the community college: (1) increased monitoring of curricular offerings; (2) increased emphasis on constituency development (e.g., women, older persons, union members, and handicapped persons); (3) changing view of student as consumer; (4) emphasis on community needs assessment; (5) increased liaison between the college and the work world; (6) expansion of continuing education for employment; (7) expansion of non-classroom instruction; (8) increased liaison with community agencies and resources; (9) movement toward student services such as life planning and assessment, adult support groups, and child care services; and (10) increased emphasis on institutional development. Other considerations include human resource development and the focus on the part-time adult student. A list of questions are presented to help the local community college administrator determine whether local policies and practices support the rural development role of the college. (MB)

Cohen, Arthur M.

Current Research on Small/Rural Community Colleges: Separating Fact from Fiction.

Pub Date-4 Aug 78
Note-12p.; Paper presented at the National Conference on Small/Rural Colleges (1st, Blacksburg, Virginia, August, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Administrative Problems, Community Colleges, Curriculum Problems, Financial Problems, Financial Support, *Institutional Characteristics, *Junior Colleges, Literature Reviews, Private Colleges, Public Schools, *Rural Schools, *Small Colleges

In examining research on the characteristics and problems of small/rural community colleges, one finds that a consistent definition of 'rural' does not exist, and that most research has traditionally focused on the differences between private and public colleges, not between small and large institutions. Research indicates that: (1) classes tend to be smaller in the private colleges (most of which have fewer than 1500 students) with the instructors using less reproducible media; (2) there is a much higher percentage of faculty with doctoral degrees (many doctors of divinity) in the private institutions as well as a higher percentage of part-time faculty; and (3) private and small public institutions are underrepresented in political science, Spanish, philosophy, and interdisciplinary humanities curricula. The literature on small/rural community colleges focuses on problems of finding job sites for cooperative education students and locating factory equipment for occupational students to practice on; the lack of a pool of people from whom to draw part-time instructors; funding limits due to low enrollment; and the overburden of tasks required of administrators. The literature also reveals that the rural college is often a cultural center, and frequently has easier access to private foundation funds. (MB)

Descriptors-*Churches, Church Programs, Church Role, *Clergymen, Community Colleges, *Community Involvement, Community Service Programs, Interinstitutional Cooperation, *Junior Colleges, Religious Organizations, *School Community Relationship, *Surveys

As part of an evaluation of the Community College Program of the United Ministries in Higher Education (UMHE), this study surveyed 323 pastors in local churches to determine: (1) local congregations' interest or involvement in working with community colleges; (2) a baseline against which to measure further involvement of the church with the community college movement; (3) local church relationships with the community colleges; (4) the acceptance of community college goals by members of the church; and (5) the impact of the program in encouraging congregation/college involvement. Questionnaires were returned by 258 pastors. Findings of the survey include: while pastors were aware of the existence of a community college serving their constituencies, they lacked detailed knowledge of the school, its mission, and its resources; sources of awareness of the college included both church-related sources and the college itself; most college/church interaction seemed to be related to activities of congregation members attending the college; congregations expressed dissatisfaction with community college ministry; church members of 75% of the pastors attended community colleges; more pastors had contacts with the college through its office of community services than through its office of student services. Data tables and the survey instrument are appended. (MB)

Identifiers-*Hawaii

A survey was administered to all 2,640 1977-78 graduates of the Hawaii community college system. General, academic, and employment information, as well as a general evaluation of the college experience, were elicited and a 59% response rate was achieved. There were statistically significant differences between respondents and non-respondents on the following characteristics: sex, program, degree/certificate, grade point average, and campus. Approximately 87% of the respondents were either working or attending school or engaged in both activities. The majority (86%) of those continuing their education at four-year institutions were able to tranfer credits without difficulty. Of the employed students, 41% were employed in clerical/sales work; 20%, in professional, technical, or managerial work; and 46% said they were employed in a field related to their training. In evaluating the general college experience, the proportion who gave favorable ratings was slightly higher among the present respondents than among the previous year's respondents. More than 45% felt that the colleges had been a ``great deal of help'' in meeting their goals. Data are analyzed for the community college total and for each of the seven colleges in the system. Extensive tables, presenting the survey results, and the survey instrument are appended. (MB)

Flexibility and a Departmental Instructional Planning Model.

Seminole Community Coll., Sanford, Fla.

Note-11p.; Pages 8-9 may be marginally legible due to small type

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Budgeting, College Instruction, Departments, Educational Finance, *Educational Planning, Mathematical Formulas, Measurement Techniques, Models, Part Time Teachers, Personnel Policy, *Postsecondary Education, Productivity, Program Planning, *Reduction in Force, Retrenchment, Salary Differentials, *Teacher Salaries, Teacher Supply and Demand

The flexibility of an educational program, institution, or system can be described as the ability of the unit to absorb negative responses, such as reductions in funding or enrollments, and continue to function in a viable manner. One approach to adjustment to such reductions is to effect cuts in personnel, current, and equipment spending. This paper presents a planning model designed to improve planning by providing quick cost analyses of various alternatives proposed within the instructional component of a budget. The model is based on the number of full-time equivalent teachers needed as determined by enrollment projections by year and productivity ratio, and the number of contract teachers employed. It assesses payroll records of an instructional division and determines the pay status (rank and years at the college on the salary schedule), contract status, and year of birth of each instructor. It provides the mechanism for determining production and productivity ratios. Flexibility is provided by the percent of production covered by part-time faculty. An additional part of the model allows for compounding raises for instructors. The use of the model and its flexibility are described. Appendices provide illustrations. (MB)

Success of Transfer Students in Pennsylvania.

Pennsylvania State Dept. of Education, Harrisburg. Bureau of Information Systems.

Pub Date-Oct 78

Note-27p.; Tables may be marginally legible due to print

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Academic Achievement, Community Colleges, *Enrollment Trends, *Grade Point Average, Junior Colleges, *Postsecondary Education, Private Colleges, State Schools, State Surveys, Student Mobility, *Transfers, Transfer Students, Universities

Identifiers-Pennsylvania, *Reverse Transfer Students

As part of a study of the success of tranfer students as measured by their grade point averages (GPA's), questionnaires were sent to most postsecondary institutions in Pennsylvania. Of the 110 four-year institutions surveyed, 56 (51%) supplied usable data. They reported 2,441 transfers from Pennsylvania community colleges. Of the 2,000 students who remained at their transfer institution for the academic year, 236 (12%) raised their GPA's by more than .5, 701 (35%) dropped their GPA's by more than .5, and 7,063 (53%) maintained their GPA's within .5. Of the 14 community colleges surveyed, only four provided usable data. They reported 523 transfers from four-year institutions; 405 from Pennsylvania and 118 from out-of-state. The GPA's of 287 (55%) of these students increased by more than .5; decreases of more than .5 were seen in the GPA's of 50 (10%) of the students; and 186 (35%) students maintained approximately the same GPA. When statistics from 1976 were compared with those from 1974 and 1975, it was found that transfer students were selecting private institutions at an increasing rate and that the number of students transferring from four-year to two-year institutions had tripled. State-related, state-owned, private state-aided, and private four-year institutions were examined as sub-groups in the study, and information for each college surveyed and reasons for substantial variance in their findings are included in the study report. Identifiers-Los Angeles City College CA

This summary of financial aids provided to Los Angeles City College students from 1973-1978 considers the four major vehicles for federal aid: (1) Basic Educational Opportunity Grants (BEOG); (2) National Direct Student Loans (NDSL); (3) Supplemental Educational Opportunity Grants (SEOG); and (4) College Work Study (CWS). Data tables outline amounts of aid, numbers of recipients, average amount of aid per recipient, and sex/ethnic characteristics of recipients. During the five years studied nearly 20,000 financial aids totaling over $10,000,000 had been provided for LACC students. Amounts of aid from NDSL and CWS increased slightly over the period, whereas assistance under BEOG grew from about 400 students receiving $100,000 in 1973-74 to over 5,000 students receiving nearly $3,000,000 in 1977-78. Data indicate that female recipients outnumbered male recipients in about the same ratio as their representation in the college population. Blacks (40% of the student population) received slightly over half of the aids, while White, Hispanic, and Asian students followed in that order, each showing percentages somewhat below their percentage in the college population. Academic Performance of L. A. C. C. Transfers Entering the University of California: A Twelve Year Summary, 1966-78. Research Study Los Angeles City Coll., Calif.

Pub Date-Feb 79

Note-14p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Academic Achievement, College Admission, Community Colleges, *Eligibility, *Enrollment Trends, *Grade Point Average, High School Graduates, Institutional Research, Junior Colleges, *Postsecondary Education, State Universities, Student Mobility, Tables (Data), Transfers, *Transfer Students

Transfer students from Los Angeles City College (LACC) are considered in terms of their eligibility to enter the University of California, i.e., their class standing at high school graduation, and their comparative performances at the University and LACC. Comparable data for all California community colleges are also provided. University of California reports provide numbers of Fall entrants, by campus attended, for eligibles and ineligibles, and a summary of academic performance which includes grade point average (GPA) earned at the community college and first year GPA earned at the University. From 1966 to 1977, over 2,500 LACC students transferred to the University of California in the Fall quarters. Entrants in Fall 1977 totaled only 169, continuing a downward trend apparent since 1974. Over 80% of the transfers from 1973 to 1977 were ineligible to attend the University directly from high school. LACC consistently sent a proportionately higher number of ineligibles than the community colleges statewide, 84% in 1977 as compared to 55% statewide. University GPA's of community college eligibles remained between 2.8 and 2.9 from 1970 to 1977; GPA's of ineligibles has generally been about .15 grade points lower than that of eligibles. Data tables comprise the bulk of the report. (MB)

Student Recruitment for the Public, Two-Year College: A Mandatory Aspect of Institutional Viability.

Note-11p.; Paper presented to the Missouri Association of Community and Junior Colleges
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-College Admission, College Bound Students, Community Colleges, Guidelines, High School Students, *Junior Colleges, *Marketing, *Publicize, Public Relations, School Community Relationship, Seniors, *Student Recruitment

The recommendations presented in this paper for successfully implementing a two-year college student recruitment campaign focus mainly on the high school senior and presuppose the existence of a recruiting staff. Initially, it is emphasized that an effective campaign is based on a series of positive items. Elements of a successful recruitment program include: (1) adoption of corporate marketing methods, such as market research, advertising, emphasis on selling, use of a professional sales staff, and altering the product according to marketing demands; (2) emphasis on a people orientation; (3) total college effort in keeping with institutional goals and philosophy; (4) selling the parent; (5) an impressive placement record demonstrating what programs can offer; (6) linking of recruitment and financial aid activities; (7) selling those aspects of a college which are most distinctive in a manner which lets the prospective student know how he/she can benefit from them; (8) openness to markets such as the adult, the industrial worker, the four-year college dropout, and the liberal arts graduate with no marketable skills; (9) accurate, honest, and attractive promotional literature; and (10) awareness of competitors after the same students. LACC Student Survey Fall 1978.

Los Angeles City Coll., Calif.

Pub Date-Feb 79
Note-18p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Academic Aspiration, Age, Community Colleges, Educational Background, Ethnic Groups, Evening Students, Family Income, Females, Institutional Research, *Junior Colleges, *Junior College Students, Males, *Participant Satisfaction, *School Demography, School Surveys, *Student Characteristics, Student Interests, Student Personnel Services, Tuition

Los Angeles City College (LACC) students were surveyed to determine their demographic and academic characteristics, and their attitudes toward their education. Of a random sample of 2,000 day and evening students, 1,266 responded. Data from the fall 1978 survey are compared to those from a fall 1976 survey and to fall 1978 district-wide statistics. The principal reason for attending college given by both day (42%) and evening (53%) students was to acquire or improve occupational or technical skills.'' The second most frequently given reason was to prepare to transfer to a four-year college.'' Major reasons for attending LACC were that the college was close to home, had no tuition, and had a reputation for good teaching. When asked if they would attend LACC if tuition of about $5.00 per unit were charged, 25% indicated that they would attend, another 25% indicated that they would if they received financial aid, 25% indicated that they could not afford to attend, and the remaining 25% were uncertain. The principal study interest of day students was fine arts, with business and secretarial programs ranked second; among evening students, business was ranked first and fine arts ranked fourth. A bachelor's degree was sought by 60% of the respondents. About 60% of day students and 95% of evening students were employed. Teaching and the library were the highest ranked student services. Almost 20% had attended high school in a foreign country. (Author/MB)

Survey of Fall 1975 Entering Students Who Graduated in 1977-78: Community Colleges. Student Flow Project, Report No. 47.

As part of a longitudinal study of fall 1975 entering students at Hawaii community colleges, this report focuses on the 750 students from that class who graduated during 1977-78. Findings in this report are presented for the community college total and by program for the 436 (58%) who responded to the survey. Approximately 88% of these respondents were either employed, in school, or both. Business had the highest proportion (86%) of graduates who were working and liberal arts had the highest proportion (73%) continuing their education. Of the employed respondents, 72% were working full-time, 48% were in clerical/sales occupations, 59% were employed in private industry, 28% learned of their jobs through personal applications to employers, 23% held the same job while they attended school, 41% felt their present job was of the type they would probably make their career, and 50% felt their jobs were related to their major field of study. Of the 178 graduates attending school, 71% were full-time students, 55% were seeking bachelor's degrees, and 48% were attending community colleges. The large majority indicated that they were "very satisfied" or "somewhat satisfied" with all aspects of their college experience. The 1977-78 graduates also tended to give favorable ratings to their campuses for helping them attain their goals. Data tables are included throughout. (MB)
